Aggravated Murder by Albanian Canons-Naser Sopjani 2013-08 Scholarly Essay from the year 2011 in the subject Law - Criminal process, Criminology, Law Enforcement, grade: -, -, language: English, abstract: Murder is a penal act that erases all life functions of the person, it is the most serious crime committed against this inalienable and essential right. Traditional Albanian Law that is identified with Canon, and mainly with Canon of Leka, it's very important to be treated in relation with murder. In this project, I will treat the Aggravated murder topic based on three main canons applied throughout Albanian areas as: Canon of Leke Dukagjini-North, Canon of Skenderbeu-Mid and Canon of Laberia-South of Albanian populated areas. The vast importance to treat Aggravated murders based on Canon stands that often is rumored that 'it is reacted based on Canon' but the truth is different. Often people for their benefits, often financial benefit, often called upon respecting the moral, manhood of their family and relatives, and respecting the rules of the Canon, they have misused the norms-rules of the Canon and adopt it to their needs. The Canons have harshly condemned the murder. As the institution for the blood revenge against the perpetrator, his family and relatives existed, at the same time was established the institute for forgiveness as a solid ground for Murder prevention and as a solution to stop the revenge that could last forever and for generations. I believe that this modest seminar will be beneficial to those dealing with different legal, social and other fields of the studies.

Drafting Legislation-Constantin Stefanou 2016-05-13 Drafting Legislation sets out to prove Sir William Dale's doctrine that the rules for drafting good quality legislation are the same in common and civil systems of law. Legislative solutions can therefore serve the drafter, the judge and the practitioner of any jurisdiction. The book discusses the general issue of quality in legislation from the legislative process to the actual drafting interpretation and enforcement. It also analyzes topics related to quality in legislation such as clarity, precision and disambiguity, plain language and gender-neutral language and assesses whether Sir William's view of universality in the definition and elements of quality in legislation is right or not. The volume is of critical interest to students and scholars of European law and the philosophy and theory of law.

Human Trafficking, Human Security, and the Balkans-H. Richard Friman 2008-10-01 In the aftermath of four Yugoslav wars, ongoing efforts at reconstruction in South Eastern Europe have devoted relatively limited attention to dimensions of human security that enhance protections for the region's most vulnerable populations in their daily lives. It is in this context that South Eastern Europe, and especially the Western Balkan region, has emerged as a nexus point in human trafficking. Human Trafficking, Human Security, and the Balkans brings together leading scholars, NGO representatives, and government officials to analyze and offer solutions to this challenge. The contributors explore the economic dynamics of human trafficking in an era of globalization, which has greatly facilitated not only the flow of goods and services but also the trade in human beings. They also examine the effectiveness of international and transnational policies and practice, the impact of peacekeeping forces, and the emergence of national and regional action plans in the Western Balkans and, more broadly, in South Eastern Europe. Finally, they consider the nature and ramifications of the gap between human security rhetoric and institutional policy steps against human trafficking.

Organised Crime in Europe-Cyrille Fijnaut 2007-01-21 This volume represents the first attempt to systematically compare organised crime concepts, as well as historical and contemporary patterns and control policies in thirteen European countries. These include seven 'old' EU Member States, two 'new' members, a candidate country, and three non-EU countries. Based on a standardised research protocol, thirty-three experts from different legal and social disciplines provide insight through detailed country reports. On this basis, the editors compare organised crime patterns and policies in Europe and assess EU initiatives against organised crime.

Serbia under the Swastika-Alexander Prusin 2017-06-06 The 1941 Axis invasion of Yugoslavia initially left the German occupiers with a pacified Serbian heartland willing to cooperate in return for relatively mild treatment. Soon, however, the outbreak of resistance shattered Serbia's seeming tranquility, turning the country into a battlefield and an area of bitter civil war. Deftly merging political and social history, Serbia under the Swastika looks at the interactions between Germany's occupation policies, the various forces of resistance and collaboration, and the civilian population. Alexander Prusin reveals a German occupying force at war with itself. Pragmatists intent on maintaining a sedate Serbia increasingly gave way to Nazified agencies obsessed with implementing the expansionist racial vision of the Third Reich. As Prusin shows, the increasing reliance on terror catalyzed conflict between the nationalist Chetniks, communist Partisans, and the collaborationist government. Prusin unwraps the winding system of expediency that at times led the factions to support one-another against the Germans--even as they fought a ferocious internecine civil war to determine the future of Yugoslavia.

The Identity of Nations-Montserrat Guibernau 2013-04-25 What is national identity? What are the main challenges posed to national identity by the strengthening of regional identities and the growth of cultural diversity? How is right-wing nationalism connected to the desire to preserve a traditional image

of national identity? Can we forge a new kind of national identity that responds to the challenges of globalization and other deep-seated changes? In this important new book, Montserrat Guibernau answers these and other compelling questions about the future of national identity. For Guibernau, the nation-states traditional project to unify its otherwise diverse population by generating a shared sense of national identity among them was always contested, and was accomplished with various degrees of success in Europe and North America. Such processes involved the cultural and linguistic homogenization of an otherwise diverse citizenry and were pursued by different means according to the specific contexts within which they were applied. At present, the impact of strong structural socio-political and economic transformations has resulted in greater challenges being posed to the idea that all citizens of a state should share a homogeneous national identity. Diversity is increasing, and plans for further European integration contain the potential to generate significant tensions, casting greater doubt on the classical concept of national identity. As a result, we are faced with a set of new dilemmas concerning the way in which national identity is constructed and defined. The book offers a theoretical as well as a comparative approach, with case studies involving Austria, Britain, Canada and Spain, as well as the European Union and the United States of America. The Identity of Nations will be essential reading for advanced students and professional scholars in sociology, politics and international relations.

History of the Theory of Sovereignty Since Rousseau-Charles Edward Merriam 1999

Sir Robert Peel-Richard A. Gaunt 2010 Sir Robert Peel - paragon or pariah? Peel was the greatest statesman and political leader of mid-Victorian Britain, a titan of Conservative politics, whose legacy has inspired generations in his party and in British political life. In a career spanning forty years he held the greatest offices of state including Chief Secretary to Ireland, Home Secretary, Chancellor of the Exchequer and was twice Prime Minister. He was the first acknowledged leader of the Conservative Party and the Founder of Modern Conservatism. Yet Peel's seemingly peerless reputation has never been secure. The Repeal of the Corn Laws split his party, his 'Peelite' supporters joined the Liberals and the Conservatives remained in opposition for thirty years. Richard Gaunt, drawing on a huge archive of state papers, contemporary writings including Peel's own Memoirs and the latest historiography, paints a convincing picture of Peel as an exponent of effective government in the modern industrial state and a calculating practitioner, supremely self-confident, who dominated both his Party and the House of Commons. Gaunt's revisionist life of Peel will be essential reading and the standard work for students and general readers interested in Conservative and mid-Victorian political history and historical biography.

Globalization and Its Enemies-Daniel Cohen 2007-09-07 A provocative argument that the frustrations of globalization stem from the gap between the expectations created and the lagging economic reality in poor countries. The enemies of globalization—whether they denounce the exploitation of poor countries by rich ones or the imposition of Western values on traditional cultures—see the new world economy as forcing a system on people who do not want it. But the truth of the matter, writes Daniel Cohen in this provocative account, may be the reverse. Globalization, thanks to the speed of twenty-first-century

communications, shows people a world of material prosperity that they do want—a vivid world of promises that have yet to be fulfilled. For the most impoverished developing nations, globalization remains only an elusive image, a fleeting mirage. Never before, Cohen says, have the means of communication—the media—created such a global consciousness, and never have economic forces lagged so far behind expectations. Today's globalization, Cohen argues, is the third act in a history that began with the Spanish Conquistadors in the sixteenth century and continued with Great Britain's nineteenth-century empire of free trade. In the nineteenth century, as in the twenty-first, a revolution in transportation and communication did not promote widespread wealth but favored polarization. India, a part of the British empire, was just as poor in 1913 as it was in 1820. Will today's information economy do better in disseminating wealth than the telegraph did two centuries ago? Presumably yes, if one gauges the outcome from China's perspective; surely not, if Africa's experience is a guide. At any rate, poor countries require much effort and investment to become players in the global game. The view that technologies and world trade bring wealth by themselves is no more true today than it was two centuries ago. We should not, Cohen writes, consider globalization as an accomplished fact. It is because of what has yet to happen—the unfulfilled promises of prosperity—that globalization has so many enemies in the contemporary world. For the poorest countries of the world, the problem is not so much that they are exploited by globalization as that they are forgotten and excluded.

European Sourcebook of Crime and Criminal Justice Statistics, 2010-Marcelo F. Aebi 2010 The 2010 edition of the European Sourcebook of Crime and Criminal Justice Statistics contains data for 40 European countries, comprising the largest collection on criminal justice and crime-related data for Europe. The book addresses issues, such as: how police deal with crime throughout Europe * which decisions are taken by the prosecution services * how many offenders are convicted and how they are sanctioned * how many police officers and prosecutors there are in any given country * what there is to be learned from victim and offender surveys' data. In order to make the reader aware of possible limitations of the comparability of figures, all chapters contain information on offense definitions and recording practices. This is the newest volume in the WODC (Wetenschappelijk Onderzoek- en Documentatiecentrum / Research and Documentation Centre) series on Research and Policy. The WODC is an international criminal justice knowledge center which contributes to the development and the evaluation of justice policy set by the Netherlands Ministry of Justice.

Mafia-René Seindal 1998 Antonio Salvo was a mafioso, but he did not traffic in narcotics, he did not run weapons, he did not kill anyone and he did not take part in the 'ordinary' mafia activities. Salvo was a business man, one of the wealthiest business men in Sicily. He took an interest in all important lines of business and had close political connections at the highest levels in Rome. He represented another, but not less important side of the mafia. He was a central part of the far-reaching network of economic and political interests that dominated Sicily through decades. This book analyses the economic and political activities of the mafia on the basis of the latest source material and explains how the mafia has succeeded in surviving, protecting, and flourishing in post-war Italy.

The Soviet Jewish Americans-Annelise Orleck 2001 A highly readable introduction to an an important new American population.

International Business Law and Lex Mercatoria-Filip De Ly 1992 Traditionally, legal problems arising in connection with international business transactions had to be solved by a national law. This view was challenged in post war scholarly writing and transnational practice. It was argued that transnational rules (such as transnational contracts, general conditions, trade usages, general principles, uniform rules, arbitral cases) should be applied instead. Often, these transnational rules are referred to as lex mercatoria. This volume analyzes the different legal approaches to international business problems (including the theory of lex mercatoria) as well as their implications for international practice. As such, the relevance and importance of substantive law and conflict of laws and of national, international and transnational rules are discussed both with regard to their application by national courts and by international commercial arbitrators.

Mind in Science-R. L. Gregory 1993

Criminal Interrogation-Warren D. Holmes 2002 The reasons why people don't confess are practical and psychological. Questioning during interrogation should be done in a non-accusatory manner so as not to alienate either an innocent or guilty person. Questioning should be chronological, designed to determine state

of mind, differentiate between memory recall and fantasy, provide verification, test the logic of the story, reveal the use of defense mechanisms of projection and disassociation, force an evaluation of a story, and determine post-act behavior. Questioning should end with the all-encompassing question: "Is there anything you didn't tell me because I didn't ask you the question?" People lie using certain tactics and making predictable statements. Observing body language, case analysis, and the interpretation of a suspect's story and remarks is an eclectic approach to lie detection.

Reversible Destiny-Peter T. Schneider 2003-03-13 Reversible Destiny traces the history of the Sicilian mafia to its nineteenth-century roots and examines its late twentieth-century involvement in urban real estate and construction as well as drugs. Based on research in the regional capital of Palermo, this book suggests lessons regarding secretive organized crime: its capacity to reproduce a subculture of violence through time, its acquisition of a dense connective web of political and financial protectors during the Cold War era, and the sad reality that repressing it easily risks harming vulnerable people and communities.

Charting the efforts of both the judiciary and a citizen's social movement to reverse the mafia's economic, political, and cultural power, the authors establish a framework for understanding both the difficulties and the accomplishments of Sicily's multifaceted antimafia efforts.

Men of Dishonor-Antonino Calderone 1993 The startling 1992 confessions of Antonino Calderone, a boss in the Sicilian Mafia, provide a behind-the-scenes look at la Cosa Nostra that reveals the Mafia's history, organization, and worldwide influence. 35,000 first printing. \$25,000 ad/promo.

Angels, Mobsters and Narco-Terrorists-Antonio Nicaso 2010-01-19 In this ground-breaking book, Antonio Nicaso, an internationally renowned expert on organized crime groups, and Lee Lamothe, a veteran investigative journalist specializing in criminal conspiracies, present solid evidence of how established organized crime groups — such as the Mafia and the Triads — have changed their tactics and allegiances to protect their interests against the rise of violent and power-hungry gangs from Albania, Mexico, and Russia. Angels, Mobsters, & Narco-Terrorists reveals how, due to their shared border, the USA and Canada have become prime targets for criminal groups that engage in money laundering and prostitution rings, and trafficking in human cargo, narcotics, and arms. On the international scene, state-sanctioned crime is thriving on heroin profits and cyber crime is emerging as a very lucrative and baffling activity to investigate and shut down. Dive inside the world of organized crime and discover how far it has penetrated our lives.

Peace through International Law-Georg Nolte 2009-10-03 Georg Nolte Excellencies, dear Colleagues, Ladies and Gentlemen, I welcome you to our colloquium on the occasion of the sixtieth anniversary of the International Law Commission. The Ludwig Maximilians University of Munich and the Humboldt University of Berlin are happy that you have followed our invitation. We are particularly proud that a majority of the members of the International Law Commission have accepted our invitation. The presence of one former member of the Commission deserves special mention: Bruno Simma is now not only a Judge at the International Court of Justice but also, if I may say so, the "local hero", having held the wonderful Chair for International Law at the University of Munich for more than thirty years. He is still living in Munich when he is not in The Hague. We are glad that participants have come from nearby, from neighbouring regions and countries, as well as from countries as far away as Brazil and China. I am personally very content that our group represents a fine mixture of experienced international lawyers and younger colleagues and students. This composition gives us the opportunity for fruitful exchanges, and for the ILC to reach out and to receive feedback. The International Law Commission needs no introduction. Like a few happy persons, at age sixty it can look back onto a largely successful career.

American Police Dilemma-Johannes F. Spreen 2003-03-01 "Commissioner Johannes Spreen was a police officer extraordinary; a man who helped restructure and develop New York City Police Academy training leading to a college program, a 'West Point' for officers, now John Jay College for Criminal Justice. Johannes Spreen is a man of enthusiasm, indeed a prophet; always ahead of his time and brought his talent to Detroit as Police Commissioner and later Sheriff of Oakland County." Rudolph P. Blaum, Retired Captain, New York City Police Department, John Jay College, former president American Education Association. This book

describes how policing has gradually emphasized law enforcement over the protection of people. It is a compelling book by an innovative and gifted top cop who presents a convincing case for community-oriented policing. This story of policing urban America over several decades covers politics, crime control, leadership, mental and physical conditioning, morals, and rivalries that reduce effectiveness. Besides being a role model for youth, police officers, administrators and policy analysts, Commissioner Spreen used wit and literary brilliance to describe his career and these issues through charming letters to his daughter.

The Oceans and Environmental Security-James Broadus 1994-11 The concept of environmental security, drawing on the widely understood notion of international strategic interdependence (in facing, for example, threats of nuclear war or economic collapse) is gaining currency as a way of thinking about international environmental management. In 1989, the Institute for World Economy and International Relations of the Russian Academy of Sciences and the Marine Policy Center of Woods Hole Oceanographic Institution instituted a joint project to examine environmental security as it applies to the world's oceans. The Oceans and Environmental Security is a unified expression of their findings. The oceans, as global commons, are of central importance to issues of international environmental security. Critical problems are those that are likely to destabilize normal relations between nations and provoke international countermeasures. As such, the book focuses on seven specific concerns: land-based marine pollution North Pacific fisheries depletion hazardous materials transport nuclear contamination the Arctic Ocean the Southern Ocean and Antarctica the Law of the Sea

U.S. National Security-Cynthia Ann Watson 2008-01 A thoroughly up-to-date expert analysis of national security issues in the United States, focusing on the dramatic changes brought about by the attacks of September 11, 2001. * A chronology of the post-Cold War period with overwhelming emphasis on the post-9/11 era and profiles of the new personalities at home and abroad affecting U.S. national security * A thorough bibliography of media on national security, including online resources, websites, media offerings, and books

A History of European Integration-Walter Lipgens 1982

Religion in the Process of Globalization-Peter Beyer 2001

Crime and Criminal Justice-William Lyons 2006 Focusing on the relationship between law and communities, this volume critically examines the ways that the incarceration explosion, the disproportionate number of African-Americans in American prisons and various forms of racial profiling (policing motorists, juror narratives, campaigns playing the race card, for instance) concentrate disadvantage and make salient political challenges to prevailing understandings of the relationship between crime, punishment, and governance.

Government Procurement in the WTO-Sue Arrowsmith 2003-01-14 In the World Trade Organization regime, government procurement is largely excluded from the multilateral agreements. The "plurilateral" WTO Agreement on Government Procurement, with its challenging accession procedures and limited number of signatories, cannot be said to succeed in its efforts to liberalize this area of trade activity—and more than 10 percent of gross domestic product in most countries. This insightful and thoroughly researched study investigates the special sensitivities of government procurement that have left major trade barriers intact despite the WTO mandate that has proven so effective in other areas. Professor Arrowsmith examines the following crucial factors in depth: why and how procurement practices create barriers to trade the institutional structure for dealing with government procurement in the GATT/WTO system the impact of relevant WTO law on national legal systems the types of contracts and entities covered in the Agreement on Government Procurement how the National Treatment principle and the Most Favored Nation obligation affect government procurement rules of WTO contract award procedure and the controversy over their interpretation and revision the free trade vs. social and environmental issues question in the context of government procurement and the monitoring and enforcement of WTO procurement rules Throughout the presentation the author focuses on specific issues to illuminate the overall pattern of her legal analysis. For example, practical questions stemming from such activities as multi-phase tendering and electronic procurement are raised for special scrutiny. The legal literature of the WTO and its jurisprudence are frequently brought into Professor Arrowsmith's arguments. The result is a new work of major significance—a work that government procurement officials in every country, whatever their field, cannot afford to ignore. The value of Government Procurement in the WTO to lawyers and scholars in the field goes without saying. Review " Beneath its somewhat ordinary title is a work of extraordinary depth and quality. Although written by a law professor, this book is far more than a traditional legal textbook. In exceptionally lucid writing, the author sets forth a comprehensive study of the World Trade Organization (WTO) regulations ("Articles") on public procurement and their implications."

Legendary Lawman:-Dr. Diane Holloway 2009-01-12 Michigan Sheriff Johannes Spreen went to jail today to defend his beliefs and actions saying Id rather be right than free. Walter Cronkite, CBS News, May 7, 1977. Im inspired by legendary police commissioner and former sheriff Johannes Spreen, whose community-partnership approach encouraged people to work together, and it was successful. Arizona Police Chief Dan Saban. Johannes Spreen was a police officer extraordinary; a man who helped restructure and develop New York City Police Academy training leading to a college program, a West Point for police officersnow John Jay College for Criminal Justice. Johannes Spreen is a man of enthusiasm, indeed a prophet; always ahead of his time. Rudolph P. Blaum, retired NYPD and co-developer of John Jay College courses. This intimate portrait of former Detroit Police Commissioner and Michigan Sheriff Johannes F. Spreen, forming his attitudes against the rugged tides of experience and events, is a delight to read. The revealing rise of a German immigrant through New York and Michigan police hierarchies adds to our understanding of policing, competitive police turf battles and the criminal forces that drive our nation to the brink in attempting to maintain freedom and peace. Spreens innovations re-shaped American law enforcement thinking.

Armed Forces and Security Services-Council of Europe 2009-01-01 Faced with the growing threats of terrorism and international organised crime, European societies are feeling an increasing need for both domestic and external security. Government action to combat these threats must be lawful - and also legitimate - and be conducted with due respect for human rights, democracy and the rule of law, which are fundamental Council of Europe principles. The question arises as to who is going to exercise democratic oversight in this area. What are the roles of parliaments, the executive, the judiciary and civil society? Do supervisory bodies exist at supranational level? This book presents the various players and their duties in the security field and confirms the need to strike a balance between a democratic conception of fundamental freedoms and security safeguards, on the basis of reports by the Council of Europe Parliamentary Assembly and the European Commission for Democracy through Law.

Policing Citizens-P.A.J. Waddington 2002-11-01 This analysis of policing throughout the modern world demonstrates how many of the contentious issues surrounding the police in recent years - from paramilitarism to community policing - have their origins in the fundamentals of the police role. The author argues that this results from a fundamental tension within this role. In liberal democratic societies, police are custodians of the state's monopoly of legitimate force, yet they also wield authority over citizens who have their own set of rights.
