Forensic Psychiatry, Race and Culture-Dr Suman Fernando 2005-08-08 Forensic psychiatry is the discipline which distinguishes the 'mad' from the 'bad', but are its values inherently racist? Why are individuals from non-Western backgrounds over-represented statistically in those diagnosed with schizophrenia and other serious illnesses? The authors argue that the values on which psychiatry is based are firmly rooted in ethnocentric Western culture, with profound implications for individual diagnosis and systems of care. Through detailed exploration of the history of psychiatry, current clinical issues and present public policy, this powerful book traces the growth of a system in which non-conformity to the prevailing cultural norms risks alienation and diagnosis of mental disorder.

Satellite Communications-Timothy Pratt 1986 The only work to present a unified treatment of all the basic aspects of satellite communications and to give practical examples from real systems. Pratt and Bostian go beyond the standard treatment of ideal channels (which ignores some very real practical limitations) to deal with the problems associated with transmitting digitally modulated signals through real satellites and earth stations. Included are chapters on orbital mechanics, spacecraft construction, satellite-path radio wave propagation, modulation techniques, multiple access, and a detailed analysis of the communications link.
