Subsidiarity and EU Multilevel Governance-Serafin Pazos-Vidal 2019-02-25 This book examines the theory and praxis of the legal concept of subsidiarity and the policy paradigm of multilevel governance, providing an updated overview on how subnational and national authorities engage within the EU institutional framework. Providing a theoretical assessment of real-life case studies, the book reflects on a number of key events from the negotiations of the European Convention to the process that led to the "Brexit" referendum and assesses the key agendas and institutional ethos of most actors involved in EU policymaking. It particularly focusses on the EU engagement of so-called non-privileged actors, such as subnational authorities from the UK, Germany, Austria, Italy, the Netherlands and Scandinavia, as well as national and regional parliaments. The author goes on to examine the sometimes selfish behaviour and individual agendas of the European Commission, European Parliament, Member States and even the European Court of Justice but also identifies many constructive ways of interaction that can decisively frame how EU decisions are made. This comprehensive book will be a useful reference to students, practitioners and academic researchers working in European politics, policymaking, public policy and EU law and integration.

Effective Fire and Emergency Services Administration-Robert S. Fleming 2010-04 Dr. Fleming's new book -- drawing from an array of business and administrative disciplines -- provides a solid conceptual foundation for understanding, meeting, and exceeding the expectations of organizational stakeholders and preparing for professional, personal, and organizational success in fire administration. The book addresses the various course objectives and learning outcomes for both the Introduction to Fire and Emergency Services Administration course within the FESHE Associate's Model Curriculum and the corresponding bachelor's course, Fire and Emergency Services Administration. Effective Fire & Emergency Services Administration will be an invaluable resource for students (both undergraduate and graduate), and current fire and emergency services personnel of all ranks who are preparing for career advancement, including promotional examinations. It also will serve as a very useful reference for current fire and emergency service operational and administrative officers.

Toward Sustainable Agricultural Systems in the 21st Century-National Research Council 2010-07-25 In the last 20 years, there has been a remarkable emergence of innovations and technological advances that are generating promising changes and opportunities for sustainable agriculture, yet at the same time the agricultural sector worldwide faces numerous daunting challenges. Not only is the agricultural sector expected to produce adequate food, fiber, and feed, and contribute to biofuels to meet the needs of a rising global population, it is expected to do so under increasingly scarce natural resources and climate change. Growing awareness of the unintended impacts associated with some agricultural production practices has led to heightened societal expectations for improved environmental, community, labor, and animal welfare standards in agriculture. Toward Sustainable Agricultural Systems in the 21st Century assesses the scientific evidence for the strengths and weaknesses of different production, marketing, and policy approaches for improving and reducing the costs and unintended consequences of agricultural production. It discusses the principles underlying farming systems and practices that could improve the sustainability. It also explores how those lessons learned could be applied to agriculture in different regional and international settings, with an emphasis on sub-Saharan Africa. By focusing on a systems approach to improving the sustainability of U.S. agriculture, this book can have a profound impact on the development and implementation of sustainable farming systems. Toward Sustainable Agricultural Systems in the 21st Century serves as a valuable resource for policy makers, farmers, experts in food production and agribusiness, and federal regulatory agencies.

The Wiley Handbook of Diversity in Special Education-Marie Tejero Hughes 2017-02-21 The Wiley Handbook of Diversity in Special Education is a state-of-the-art reference showcasing cutting-edge special education research with a focus on children and youth with disabilities from diverse cultural, ethnic, linguistic, and economic backgrounds. Cutting-edge special education research focusing on children and youth with disabilities from diverse cultural, ethnic, linguistic, and economic backgrounds An authoritative contribution to the field, this work charts a new path to effective interventions and sets an agenda for future research Addresses disabilities from an international perspective U.S. Marines In Vietnam: The Defining Year, 1968-Jack Shulimson 2015-11-06 The year 1968 was the year of the Tet Offensive including Khe Sanh and Hue City. These were momentous events in the course of the war and they occurred in the first three months of the year. This book, however, documents that 1968 was more than just the Tet Offensive. The bloodiest month of the war for the U.S. forces was not January nor February 1968, but May 1968 when the Communists launched what was called their "Mini-Tet" offensive. This was followed by a second "Mini-Tet" offensive during the late summer which also was repulsed at heavy cost to both sides. By the end of the year, the U.S. forces in South Vietnam's I Corps, under the III Marine Amphibious Force (III MAF), had regained the offensive. By December, enemy-initiated attacks had fallen to their lowest level in two years. Still, there was no talk of victory. The Communist forces remained a formidable foe and a limit had been drawn on the level of American participation in the war. Although largely written from the perspective of III MAF and the ground war in I Corps, the volume also treats the activities of Marines with the Seventh Fleet Special Landing Force, activities of Marine advisors to South Vietnamese forces, and other Marine involvement in the war. Separate chapters cover Marine aviation and the single manager controversy, artillery, logistics, manpower, and pacification.—E. H. SIMMONS, Brigadier General, U.S. Marine Corps (Retired)

Introductory Statistics: A Problem-Solving Approach-Stephen Kokoska 2010-01-01 Introductory Statistics: A Problem-Solving Approach by Stephen Kokoska combines a traditional, classic approach to teaching statistics with contemporary examples, pedagogical features, and prose that will appeal to today's student. Kokoska emphasizes statistical inference and decision making throughout. His fresh yet practical way to help students understand statistics is balanced by a logic that speaks to the teaching style of many instructors. Introductory Statistics: A Problem-Solving Approach has been extensively reviewed and class tested and feedback from instructors and students has shaped it throughout its development. Author Steve Kokoska blends solid mathematics with lucid writing to create a text that illustrates statistical concepts by using a stepped problem-solving approach. His textbook helps students understand the process of basic statistical arguments, a skill that will help them in their coursework and as they enter a life beyond academics. The driving philosophy of Introductory Statistics: A Problem-Solving Approach is simple: statistics is often hard for students but, when presented in an orderly, precise, friendly manner (and with some humor), statistics can change the way students think about math and about the world around them

Staffing Organizations-Heneman, Herbert Gerhard Heneman (III, Jr) 2011-09-01 Heneman and Judge's Staffing Organizations, 7/e, is based on a comprehensive staffing model. Components of the model include staffing models and strategy, staffing support systems (legal compliance, planning, job analysis and rewards), core staffing systems (recruitment, selection, employment), and staffing system and retention management. Up-to-date research and business practices are the hallmarks of this market leading text. In-depth applications (cases and exercises) at the end of chapters provide students with skill-building and practice in key staffing activities and decision-making. A comprehensive running case involving a fictitious retailing organization provides even greater opportunity for in-depth analysis and skill building. Students also have the opportunity to address ethical issues at the end of each chapter.

Public Policy Research in the Global South-Heike M. Grimm 2019-04-10 This volume focuses on the evolution of public policy and the role of agenda setting with regard to policymaking in countries of the Global South. The authors illustrate the emergence of public policy research as an academic discipline, and highlight various aspects of history, governance, politics, and economics as components of public policy theory development. By offering a cross-national perspective, the papers contribute to a better understanding of when, how, and by whom a given policy agenda is designed, which is essential to grasping how policy is implemented. In turn, the authors investigate how the development of public policy research has influenced policymaking in fields such as democratization, migration, corruption, agriculture, environment, education, and entrepreneurship and, more specifically, agenda setting in selected countries of the Global South.

Labor Relations-Arthur A. Sloane 1967 "Labor Relations," the most accurate, readable, timely, and valuable book of its kind on the market, provides readers with a basic understanding of unionism in its natural habitat and a fundamental appreciation of the union-management process. It focuses on the negotiation and administration of labor agreements, and emphasizes the more significant bargaining issues. The 11th edition includes much new material and an extensively revised and updated bibliography. For vice-presidents and directors of labor relations, union presidents, and others who are full-time labor-management professionals for either managements or unions.

Hard-pressed in the Heartland-Peter J. Rachleff 1993 Hard-Pressed in the Heartland tells the heartbreaking but empowering story of a spirited local union trying to resist management's drive for concessions--while fending off a conservative national union leadership unwilling to support its own members. Going beyond academic history, it offers useful perspectives for rebuilding a democratic, militant, community-based unionism that can succeed where today's bureaucratic unionism cannot.

Labor Economics-George J. Borjas 2010 Labor Economics, 5e is a well-received text that blends coverage of traditional topics with modern theory and developments into a superb Labor Economics book. The Fifth Edition builds on the features and concepts that made the first four editions successful, updating and adding new content to keep the text on the cusp of recent events in the Labor Economics field. The new edition continues to be the most concise book in the market, enabling the instructor to teach all relevant material in a semester-long class. Despite the book's brevity, the instructor will find that all of the key topics in labor economics are efficiently covered in the Fifth Edition. Thanks to updated pedagogy, new end-of-chapter material, and even stronger instructor support, the Fifth Edition of Labor Economics remains one of the most relevant textbooks in the market.

The Next Step- 2017-03 The Next Step: Exponential Life presents essays on the potential of what are known as "exponential technologies"--those whose development is accelerating rapidly, such as robotics, artificial intelligence or industrial biology--considering their economic, social, environmental, ethical and even ontological implications. This book's premise is that humanity is at the beginning of a technological revolution that is evolving at a much faster pace than earlier ones--a revolution is so far-reaching it is destined to generate transformations we can only begin to imagine. Contributors include Aubrey D.N.J. de Grey, Jonathan Rossiter, Joseph A. Paradiso, Kevin Warwick, Huma Shah, Ramón López de Mántaras, Helen Papagiannis, Jay David Bolter, Maria Engberg, Robin Hanson, Stuart Russell, Darrell M. West, Francisco González, Chris Skinner, Steven Monroe Lipkin, S. Matthew Liao, James Giordano, Luciano Floridi, Seán Ó Héigeartaigh and Martin Rees.

Women and the Economy-Saul D Hoffman 2015-11-24 Women and the Economy presents a comprehensive economic analysis of women's issues and the economic factors that have changed their lives - from marriage and fertility to work and pay. This engaging textbook examines topics such as gender wage differentials, changes in marriage markets and fertility, and the rise of women's labor force activity. It also includes coverage of a wide range of policy issues, from taxes to family policy to microlending. This third edition of Women and the Economy has been fully revised and updated and, among other things: • makes economic theory accessible to students • incorporates cutting-edge contemporary empirical research • uses data and policy examples from the USA and European countries throughout • includes two chapters that focus specifically on women in developing economies An invaluable book for undergraduate and postgraduate students of economics, development, and women's studies.

Nursing Informatics-Marion J. Ball 2013-11-11 Nursing, like other health-related professions, is information-intensive. The quality of care a patient receives is based on the soundness of judgment exercised by the health care team. Underlying sound judgment is up-to-date information. Unless nurses have access to accurate and pertinent information, the care being rendered will not be of the highest standard. What is required is not necessarily more rapid and efficient information services. Modern technology can process immense amounts of data in the blink of an eye. What we in the health professions need are information systems that are more intelligent, systems that can integrate information from many sources, systems that analyze and synthesize information and display it so that it may be applied directly in patient care--in other words, information that answers a question or even gives practical advice. In order to accomplish such objectives, work is needed to establish the scientific and theoretical basis for the use of computing and information systems by health professionals. This is the research component. In addition, there is the need for continued development and evaluation of practical information systems.

Human Resource Management-Raymond A. Noe 2006 As competitors strive to win the war for talent, effective human resource management is necessary to gain true competitive advantage in the marketplace. Three challenges companies face are sustainability, technology, and globalization. Human Resource Management 5th Edition brings these challenges to life by highlighting real-world examples pertaining to these issues and relating it to the concepts within the chapter. This best-selling McGraw-Hill/Irwin Human Resource Management title provides students with the technical background needed to be a knowledgeable consumer of human resource (HR) products and services, to manage HR effectively, or to be a successful HR professional. While clearly strategic in nature, the text also emphasizes how managers can more effectively acquire, develop, compensate, and manage the internal and external environment that relates to the management of human resources.
