An Anthology of Russian Literature from Earliest Writings to Modern Fiction-Nicholas Rzhevsky 2019-09-16 Russia has a rich, huge, unwieldy cultural tradition. How to grasp it? This classroom reader is designed to respond to that problem. The literary works selected for inclusion in this anthology introduce the core cultural and historic themes of Russia's civilisation. Each text has resonance throughout the arts - in Rublev's icons, Meyerhold's theatre, Mousorgsky's operas, Prokofiev's symphonies, Fokine's choreography and Kandinsky's paintings. This material is supported by introductions, helpful annotations and bibliographies of resources in all media. The reader is intended for use in courses in Russian literature, culture and civilisation, as well as comparative literature.

Anna Karénina ...graf Leo Tolstoy 1899 Anna Karenina, begun in 1875 and finished two years later, shares with War and Peace the distinction of being the most widely read among Russian novels. The story of beautiful Anna, her dull marriage, her adulterous and destructive passion, set against the vividness of contemporary Russian life, makes this epic novel an unforgettable one.

Thoughts and Things-Leo Bersani 2015-01-13 Leo Bersani s career spans more than 50 years, and extends across a wide spectrum of fields:from French studies, modernism, realist fiction, and psychoanalytic criticism, to film theory and queer theory (a field Bersani could be said to have invented). In Thoughts and Things Bersani emerges as a thinker of ontology, aesthetics, and ethics, i.e., he emerges as a philosopher of the first order. In this elegant series of essays, he posits what would appear to be an irreducible gap between our thoughts (the human subject) and things (the world). His exemplary texts range from Jean Genet (Our Lady of the Flowers) to Claire Denis (the French filmmaker whose masterpiece is Beau Travail). But he then asks whether a fissure of being between the subject and the world might simply be masking a more fundamental oneness, arguably a oneness intrinsic to our being in and with the world. He addresses the problem of formulating ways to consider the undivided mind, drawing on various sources from Descartes to cosmology, Sufi mysticism, and neo-Platonism. Cosmos and individual, past and present merge in the idea that our bodies contain atoms from stars that exploded millions of years ago: res cogitans and res extensa, for Bersani, are united in the oneness of cosmic being. This little book, in its sensitive treatment of films and literary texts, succeeds brilliantly in diagramming new forms as well as radical failures of connectedness. It is a new departure for Bersani, and will be devoured by his growing body of devoted readers."

On the Road to Self-Actualization-Leo Onyiriuba 2013-04-24 "On the road to self-actualization" features tales that will inspire you to fulfil your dream. Its intent is to help people anticipate conflicts which life introduces when they seek to fulfil their dreams. It sheds light on the making of mid-life crisis and how to manage it. Set in Nigeria, it mirrors struggles between dreams, ambitions and destiny and the winning psyche. The tales will challenge you to discover and harness your endowments - the gifts for which you have passions. But they also disabuse people who carry on with life in despair. Unfortunately, a lot of people tend to interpret their condition based on some superstition. Doing so, they ignore the need or fail to reinvent themselves. Consequently, they fail to make a success of life. Getting to grips with forces that shape outcome of life - the way lke did in the tales - is critical for success. Life's issues are a decisive influence in the tale. On occasion life manifests its harsh realities - defying reason and unleashing ordeals on its victims. Helplessly mankind has had to live with an uncritical but rational mind that life's phenomena encompass vicissitudes. Solving all of life's questions is not beyond the realms of possibility. But finding appropriate responses to dictates of life intriguingly belongs in the spiritual realm - some would say. That way life continues to take a toll on its victims. From struggles to quit the rat race to manoeuvres to know what the future holds in store, life holds sway still. People who make a success story applaud life for its fairness, while the unfortunates bemoan that life is unfair to them. Yet everyone learns the lessons of life in the school of experience. The unpalatable truth is that human desires - usually seen in people's lofty dreams and ambitions - and the realities of life are often diametrically opposed. This fact dawns when somebody's chickens come home to roost as is evident in Ike's experience. The Lean Accounting Guidebook-Steven M. Bragg 2017-01-29 The Lean Accounting Guidebook reveals how to streamline the accounting department with over 150 improvement tips for billing, collections, cost accounting, fixed assets, payables, payroll, and more. The book describes how to use value stream mapping, flow charting, traffic analysis, and measurement systems to decide which changes to make, including discussions of how to maximize the value created by the various improvements.

Leo Fender-Phyllis Fender 2017-12-12 Occasionally, the world produces one of those rare thinkers that alter the course of history. Disney reinvented entertainment, Einstein revolutionized science, Edison lit up our lives with the light bulb, Bell got the world talking with the telephone ... and Fender revolutionized music. If you think about it, Leo Fender has influenced every person on earth today - at least everyone who has ever heard a song. Guitar Player Magazine declared that Clarence Leo Fender is the father of the solid body guitar. Not only did he invent it, but Leo's guitars were used by everyone from Elvis Presley, to Eric Clapton and from Jimmy Page to Jimmy Hendrix. Indeed,Rolling Stone Magazine published a list of the world's top 100 guitarists, and 90 of them used one of Leo's guitars on stage, and the others used guitars that copied Leo's inventions and concepts. Leo Fender was shy, had one glass eye, and was nearly deaf. Yet, from the small town of Fullerton, California, he built an iconic worldwide empire that is worshipped by the rock stars themselves. The highest price ever spent for music memorabilia was not for Michael Jackson's glove, original Beatles' handwritten lyrics or even Elvis' killer pantsuit. It was for a Fender Stratocaster, which sold for a staggering \$2.7 million. Written by the wife of the late Leo Fender, for the very first time, this book provides a rare look into the wonderful mind and world of this quiet genius.
