Secrets of Professional Pot-Limit Omaha-Rolf Slotboom 2016-03-23 Pot-Limit Omaha is a fascinating game which is rapidly increasingly in popularity on the back of the current poker boom. However, there is a dearth of quality material giving advice on how to handle all elements of this complex form of poker. Until now... Secrets of Pot-Limit Omaha is one of the first books to analyze medium and high-stakes PLO in great depth. The author, long-time successful PLO cash game player Rolf Slotboom, reveals key information that has never appeared in print before. The following are just some of the topics that are discussed in this ground-breaking book: A revolutionary short-stack approachAdjustments for big-stack playA study on the prop bet sizeCorrect seating positionBlocker playThe bare ace bluffExploiting your opponents' specific weaknesses Finally, the practice hands and the chapter on hand match-ups offer tremendous theoretical and practical advice. This book is a must-read for anyone who wishes to play PLO successfully.
The DARPA Urban Challenge-Martin Buehler 2009-11-26 By the dawn of the new millennium, robotics has undergone a major transformation in scope and dimensions. This expansion has been brought about by the maturity of the field and the advances in its related technologies. From a largely dominant industrial focus, robotics has been rapidly expanding into the challenges of the human world. The new generation of robots is expected to safely and dependably co-habitat with humans in homes, workplaces, and communities, providing support in services, entertainment, education, healthcare, manufacturing, and assistance. Beyond its impact on physical robots, the body of knowledge robotics has produced is revealing a much wider range of applications reaching across diverse research areas and scientific disciplines, such as: biomechanics, haptics, neurosciences, virtual simulation, animation, surgery, and sensor networks among others. In return, the challenges of the new emerging areas are proving an abundant source of stimulation and insights for the field of robotics. It is indeed at the intersection of disciplines that the most striking advances happen. The goal of the series of Springer Tracts in Advanced Robotics (STAR) is to bring, in a timely fashion, the latest advances and developments in robotics on the basis of their significance and quality. It is our hope that the wider dissemination of research developments will stimulate more exchanges and collaborations among the research community and contribute to further advancement of this rapidly growing field.
Key Lime Pie Murder-Joanne Fluke 2011-01-01 New York Times Bestseller It promises to be a busy week for Hannah Swensen. Not only is she whipping up treats for the chamber of commerce booth at the Tri-County fair, she's also judging the baking contest; acting as a magician's assistant for her business partner's husband; trying to coax Moishe, her previously rapacious feline, to end his hunger strike, and performing her own private carnival act by juggling the demands of her mother and sisters. With so much on her plate, it's no wonder Hannah finds herself on the midway only moments before the fair closes for the night. After hearing a suspicious thump, she goes snooping--only to discover Willa Sunquist, a student teacher and fellow bake contest judge, dead alongside an upended key lime pie. But who would want to kill Willa and why? Now Hannah needs to crank up the heat, hoping that Willa's killer will get rattled and make a mistake. If that happens she intends to be there, even if it means getting on a carnival ride that could very well be her last. . . "Yummy. . .Fluke has developed a charming supporting cast who all feel like friends by the time the murder is solved. The dozens of tempting recipes Fluke includes are an added treat." --Publishers Weekly

Correctional Health Care Delivery-Kenneth L. Faiver 2020-02-18 Each person confined in jails, prisons, and juvenile detention facilities must be afforded unimpeded access to needed health care. Such persons, without risk of interference or fear of reprisal, should be able to alert health care staff of a medical need, obtain a timely professional evaluation of that need, and receive treatment in the manner prescribed by a competent provider. Simply stated, no correctional officer should ever prevent, impede, or inhibit anyone from alerting a health care provider of a perceived need for health services, even though the officer may believe the request is trivial, fictitious, or undeserved. This book focuses on access to health care services by special populations in correctional institutions (women, youths, elderly, persons with dementia, and the terminally ill), which includes important information on privatization in corrections. The following topics are featured: the context, principles, balance and implications of correctional health care, including the recent detention of immigrants in the United States; the unimpeded access to care, enhancements, stress reductions, health literacy, culture, ethnicity, religion, intake health screening, medical clearance for transfer or release, medications and clinical appointments, emergency care services, special settings, copayments, and budgeting for health care services; privatization, contracts, evaluating bids, monitoring the contract, and minimizing adverse risks; special health concerns of incarcerated women, communicable disease, pregnancy-related concerns, aging, frailty, osteoporosis, mental health, cosmetic concerns, health education and job assignments; youth in corrections, hygiene, exercise, gender-specific needs of young women, informed consent, supervision of vulnerable youth, substance abuse treatment, and the community connection; special health needs and humane care and alternative care of the aging; the prevalence, person-centered care, elements of care, environment, restraints, visits, and the ethics of incarcerating persons with dementia. The book concludes with end-of-life care in prison, hospice, palliative care, and compassionate release. It will serve as an invaluable tool for correctional officers, health care providers, justice and legal professionals, social workers, mental health professionals, and counselors.
Upon the Gardens of Epicurus-William Temple 2004 Sir William Temple, diplomat, statesman, and writer, retired to his garden in the 1680s and wrote what has become one of the key texts, not only of gardening, but also of the English aesthetic. It was he who introduced the idea of the charm of irregularity, and who gave it the allegedly Chinese name sharawadgi. The English style of landscape gardening can be traced in a direct line to this essay, which has not been in print for over 95 years.
The Official GNOME 2 Developer's Guide-Matthias Warkus 2004 Developers who write programs for GNOME use the GNOME API. Working with the GNOME API is preferable because the program will conform to the standard GNOME program look and feel. It also allows the developer to use the GNOME specific libraries in the program, greatly simplifying the development process. The Official GNOME 2 Developer's Guide is the official GNOME Foundation guide to programming GUIs and applications using the GTK+ and GNOME API. Developed in partnership with the GNOME Foundation, this book is for programmers working with the GNOME 2 desktop environment. Each section begins with an example program that serves as a tutorial, then develops into a reference on the topic. Includes abundant, well-annotated examples. Knowledge of the C programming language is required, but no GUI programming experience is necessary.
E-Business and E-commerce Infrastructure-Abhijit Chaudhury 2002 This book is a comprehensive primer to both traditional and emerging E-Commerce technologies. Students with no prior technical knowledge will be able to grasp complex topics such as networking, Internet security, Web languages and other important subjects in a way that illustrates their use through case studies and practice by completing Web projects.

It Happened Again-Vibin R 2019-01-31 When Karthik had to find an individual housein his second year of college, he never expected the house would change his life forever. He meets a beguiling girl named Shruti who introduces herself as the house owner. The pair had the special moments of their lives as friends as well as young lovers. The couple had their future planned out but fate had it's own plan. Will they win over fate's design? No Way Back-Alfred George 2017-11-29 When I woke up in the mornings and opened my eyes, all I could see was the street and hard times; no one to turn to and nowhere to really go but to the dump or fishing or stealing, and most days, I did all three. I had no one to look up to so I made my own way. Sometimes, one day would be easier than another, but every day was a bit of hell. Every day, I got an "ass beating" about something I did or something I did not do. I had no say about anything. I was always wrong in my father's and mother's eyes and the more they beat me, the meaner I got with them and with everybody else. My sisters hardly ever got beaten. I got all the beatings for the family, so I really got in a f--- it kind of attitude. I began to look for the beatings every day. My life was really in bad shape.
All I Want for Christmas Is a Vampire-Kerrelyn Sparks 2009-10-06 Toni Davis's Christmas wish list 1. Springing my best friend from the psych ward. 2. Living somewhere that doesn't have coffins in the basement. Occupied coffins. 3. Finding Mr. Right. Please make him tall, dark, handsome, and alive. This Christmas isn't so merry for Toni. Her best friend's been locked up in a mental hospital ever since she told the police she was attacked by vampires, and the only way for Toni to get her out is to prove that bloodsuckers really do exist. So she's taken a job as a bodyguard for the Undead, but she gets more than she bargained for, especially when she meets Ian MacPhee, a Scottish rascal looking for Ms. Right. Although Ian's nearly five centuries old, he looks and acts like a twenty-seven-year-old hunk. How can a dead man be so damn sexy? Could Mr. Wrong be Mr. Right? One forbidden kiss could lead to an eternity of passion—and all it takes is one moment under the mistletoe . . .

Basic Nursing-Patricia Ann Potter 2003 Building on the strengths of the fourth edition, Basic Nursing: Essentials for Practice is back in a new edition! Thoroughly updated and revised to provide a more focused and engaging presentation, this new edition offers the basic principles, concepts, and skills needed by nursing students. The five-step nursing process returns to provide a consistent, logical organizational framework, with a clear writing style and numerous learning aids. An increased emphasis on caring, along with new boxes on Focused Client Assessment and Outcome Evaluation, reflect current practice trends. This new edition is better than ever! Five-Step Nursing Process provides a consistent organizational framework. More than 40 nursing skills are presented in a clear, 2-column format with rationales for all steps. Procedural Guidelines boxes provide streamlined step-by-step instructions for performing basic skills. Growth and Development chapter and age-related considerations throughout clinical chapters help prepare students to care for clients of all ages. Sample Nursing Care Plans highlight defining characteristics in assessment data, include client goals and expected outcomes in the planning section, and provide rationales for each nursing intervention. Progressive Case Studies follow the interactions of a client and nurse throughout the chapter to illustrate steps in the nursing process and develop critical thinking skills. Brief coverage of higher level concepts including research, theory, professional roles, and management, maintains the text's focus on essential, basic content. The narrative style makes the text more engaging and appealing. Focused Client Assessment boxes provide specific guidelines for factors to assess, questions and approaches, and physical assessment. Content on delegation is discussed throughout the narrative and specific guidelines are included for each skill. Skills now include Unexpected Outcomes and Interventions to alert for potential undesirable responses and provide appropriate nursing actions. Caring in Nursing is presented in a new chapter and as a thread throughout the text. Outcome Evaluation are based on the chapter's case study and provide guidelines on how to ask questions and evaluate care based on the answers received. NIC and NOC are discussed in the Nursing Process chapter to provide an overview of these taxonomies encountered in practice. NCLEX-style multiple-choice questions at the end of each chapter help students evaluate learning.
