Sciamanesimo senza sciamanesimo-Leonardo Ambasciano 2014-12-19 Sono passati più di sessant’anni da quando lo storico delle religioni Mircea Eliade ha dato alle stampe la sua monografia dedicata allo sciamanesimo, un testo rivelatosi decisivo per imporre l’argomento nel dibattito interno alla storia delle religioni. La seconda edizione, aumentata e tradotta nel 1964 per il mercato editoriale statunitense, ha poi avuto un impatto significativo sui riferimenti culturali della giovane generazione dell’epoca. Sorprendentemente, e malgrado il successo dell’opera, non esiste a tutt’oggi un’analisi critica dedicata alla formazione eliadiana del concetto di sciamanesimo. Si è così creato un vuoto storiografico che ha gravato sulle ricostruzioni e sulle interpretazioni del pensiero dello storico delle religioni. Evolucionismo antidarwiniano, psicoanalisi, teleologia, folklore, paleontologia e paleoantropologia, letteratura fantastica, paranormale e soprannaturale, politica reazionaria e anti-occidentale sono alcuni tra gli strumenti discorsivi che entrano a vario titolo nel laboratorio della complessa macchina mitografica eliadiana. Andare a monte di questi riferimenti bio-bibliografici, tracciare le coordinate dei contatti intellettuali e decostruire le trame dei prestiti concettuali è quanto si propone di fare l’indagine presentata in questo libro.

Jewish Frontiers-S. Gilman 2003-07-10 In this collection of new essays, Sander Gilman muses on Jewish memory and representation throughout the twentieth-century. Bringing together the worlds of literature, medicine, and popular culture in his characteristic ways, Gilman looks at new, post-diasporic ways of understanding the limits of Jewish identity. Topics include the development of the genre of Holocaust comedy, the imagination of the relationship of the body, disease, and identity, and the place of Jews in today’s multicultural society.

Buddhist Psychology and Cognitive-Behavioral Therapy-Dennis Tirch 2015-10-23 This user-friendly guide to the basics of Buddhist psychology presents a roadmap specifically designed for cognitive-behavioral therapy (CBT) practitioners. It explains central Buddhist concepts and how they can be applied to clinical work, and features numerous experiential exercises and meditations. Downloadable audio recordings of the guided meditations are provided at the companion website. Essential topics include the relationship between suffering and psychopathology, the role of compassion in understanding and treating psychological problems, and how mindfulness fits into evidence-based psychotherapy practice. The book describes an innovative case conceptualization method, grounded in Buddhist thinking, that facilitates the targeted delivery of specific CBT interventions.

Deinstitutionalisation and After-Despo Kritsotaki 2016-11-29 The book relates the history of post-war psychiatry, focusing on deinstitutionalisation, namely the shift from asylum to community in the second part of the twentieth century. After the Second World War, psychiatry and mental health care were reshaped by deinstitutionalisation. But what exactly was involved in this process? What were the origins of deinstitutionalisation and what did it mean to those who experienced it? What were the ramifications, both positive and negative, of such a fundamental shift in psychiatric care? Post-War Psychiatry in the Western World: Deinstitutionalisation and After seeks to answer these questions by exploring this momentous change in mental health care from 1945 to the present in a wide range of geographical settings. The book articulates a nuanced account of the history of deinstitutionalisation, highlighting the constraints and inconsistencies inherent in treating the mentally ill outside of the asylum, while seeking to inform current debates about how to help the most vulnerable members of society.

The SAGE Handbook of Identities-Margaret Wetherell 2010-03-23 "Overall, its breaking of disciplinary isolation, enhancing of mutual understanding, and laying out of a transdisciplinary platform makes this Handbook a milestone in identity studies." - Sociology Increasingly, identities are the site for interdisciplinary initiatives and identity research is at the heart of many transdisciplinary research centres around the world. No single social science discipline 'owns' identity research which makes it a difficult topic to categorize. The SAGE Handbook of Identities systematizes this complex field by incorporating its interdisciplinary character to provide a comprehensive overview of its themes in contemporary research while still acknowledging the historical and philosophical significance of the concept of identity. Drawing on a global scholarship the Handbook has four parts: Frameworks: presents the main theoretical and methodological perspectives in identities research. Formations: covers the major formative forces for identities such as culture, globalisation, migratory patterns, biology and so on. Categories: reviews research on the core social categories central to identity such as ethnicity, gender, sexuality, disability and intersections between these. Sites and Context: develops a series of case studies of crucial sites and contexts where identity is at stake such as social movements, relationships, work-places and citizenship.

Frantz Fanon-Alice Cherki 2006 Given the continuing relevance of Fanon’s insights into the enduring legacy of colonialism on the psyches of the colonised, this compelling and personal account of his life will be required reading for anyone interested in the consequences of empire.

Supermom-Tiziana Rocca 2010 Today more than ever, having children means coming to grips with constantly rising expenses and with the fact that Mom almost always needs to work outside the home. That, in turn, means that Mom has to deploy her forces along a hundred different fronts. This book is a guide - based on Tiziana Rocca’s experiences as a wife, mother, and director of a highly successful public-relations firm. "Like all mothers," Rocca writes, "my days are spent performing somersaults as I divide my time and energy between family and work. I've always got a million things to do, and each day is an obstacle course." Notwithstanding these difficulties, Rocca believes that Mom (with a capital M!) is the cornerstone of the entire family structure, essential to children's emotional and cognitive development. She writes with compassion, humor, and conviction about the unique strength of women and mothers: the power to "never give up and never give in."

Sapiens-Yuval Noah Harari Sapiens is the remarkable history book which is written about humans and the distinct species of the earth due to our behaviour and wildness. Yuval Noah Harari is the author of this fabulous book. He is the most provoking author on the history of humanity and the nature we live. There are plenty of things we do unintentionally to kill nature. This is a wonderful book which contains biology and history both. It is the perfect book to read in summer and it is highly appreciated by the Mark Zuckerberg, Barak Obama, and Bill Gates. The writer gives a brief history of humans and how to act like humans.

India Song-Marguerite Duras 2015-06-30 Unseen voices narrate this story of the affair between the haunting Anne-Marie Stretter and the disgraced French vice-consul in Lahore. In the India of 1937, with the smell of laurels and leprosy permeating the air, the characters perform a dance of doomed love to the strains of a dying colonialism. Originally commissioned as a play for Britain’s National Theatre,India Song was made into a film that premiered at the 1975 Cannes Film Festival. American Cinematographer praised it for its "imaginative use of voices creating an echo chamber effect that perpetuates the past," and Molly Haskell called it “Marguerite Duras’ most perfectly realized film, the most feminine film I have seen, a rarefied work of lyricism, despair, and passion, imbued with a kind of primitive emotional hunger that is all the more moving for its austere setting."

Second Manifesto for Philosophy-Alain Badiou 2011-02-07 Twenty years ago, Alain Badiou’s first Manifesto for Philosophy rose up against the all-pervasive proclamation of the "end" of philosophy. In lieu of this problematic of the end, he put forward the watchword: "one more step". The situation has considerably changed since then. Philosophy was threatened with obliteration at the time, whereas today it finds itself under threat for the diametrically opposed reason: it is endowed with an excessive, artificial existence. "Philosophy" is everywhere. It serves as a trademark for various media pundits. It livens up cafés and health clubs. It has its magazines and its gurus. It is universally called upon, by everything from banks to major state commissions, to pronounce on ethics, law and duty. In essence, "philosophy" has now come to stand for nothing other than its most ancient enemy: conservative ethics. Badiou’s second manifesto therefore seeks to demoralize philosophy and to separate it from all those "philosophies" that are as servile as they are ubiquitous. It demonstrates the power of certain eternal truths to illuminate action and, as such, to transport philosophy far beyond the figure of "the human" and its "rights". There, well beyond all moralism, in the clear expanse of the idea, life becomes something radically other than survival. Portugal in Africa-M. D. D. Newitt 1981

Lacan, Discourse, Event: New Psychoanalytic Approaches to Textual Indeterminacy-Ian Parker 2013-10-30 Lacan, Discourse, Event: New Psychoanalytic Approaches to Textual Indeterminacy is an introduction to the emerging field of Lacanian Discourse Analysis. It includes key papers that lay the foundations for this research, and worked examples from analysts working with a range of different texts. The editors Ian Parker and David Pavón-Cuéllar begin with an introduction which reviews the key themes in discourse analysis and the problems faced by researchers in that field of work including an overview of the development of discourse analysis in different disciplines (psychology, sociology, cultural studies and political and social theory). They also set out the conceptual and methodological principles of Lacan’s work insofar as it applies to the field of discourse. Ian Parker and David Pavón-Cuéllar have divided the book into three main sections. The first section comprises previously published papers, some not yet available in English, which set out the foundations for ‘Lacanian Discourse Analysis’. The chapters establish the first lines of research, and illustrate how Lacanian psychoanalysis is transformed into a distinctive approach to interpreting text when it is taken out of the clinical domain. The second and third parts of the book comprise commissioned papers in which leading researchers from across the social sciences, from the English-speaking world and from continental Europe and Latin America, show how Lacanian Discourse Analysis works in practice. Lacan, Discourse, Event: New Psychoanalytic Approaches to Textual Indeterminacy is intended to be a definitive volume bringing together writing from the leaders in the field of Lacanian Discourse Analysis working in the English-speaking world and in countries where Lacanian psychoanalysis is part of mainstream clinical practice and social theory. It will be of particular interest to psychoanalysts of different traditions, to post-graduate and undergraduate researchers in psycho-social studies, cultural studies, sociology and social anthropology.

Imaginary Maps-Mahasweta Devi 2020-10-12 Imaginary Maps presents three stories from noted Bengali writer Mahasweta Devi in conjunction with readings of these tales by famed cultural and literary critic, Gayatri Chakravorty Spivak. Weaving history, myth and current political realities, these stories explore troubling motifs in contemporary Indian life through the figures and narratives of indigenous tribes in India. At once delicate and violent, Devi’s stories may be the experiences of the "tribals" and tribal life under decolonization. In "The Hunt," "Douloti the Bountiful" and the deftly wrought allegory of tribal agony "Pterodactyl, Pirtha, and Puran Sahay," Ms. Devi links the specific fate of tribals in India to that of marginalized peoples everywhere. Gayatri Spivak’s readings of these stories connect the necessary "power lines" within them, not only between local and international structures of power (patriarchy, nationalisms, late capitalism), but also to the university.

The High-caste Hindu Woman-Rambabi Sarasvati 1888

The Myth of Analysis-James Hillman 1997 In this work, acclaimed Jungian James Hillman examines the concepts of myth, insights, eros, body, and the mytheme of female inferiority, as well as the need for the freedom to imagine and to feel psychic reality. By examining these ideas, and the role they have played both in and outside of the therapeutic setting, Hillman mounts a compelling argument that, rather than locking them away in some inner asylum or subjecting them to daily self-treatment, man’s "peculiarities" can become an integral part of a rich and fulfilling daily life. Originally published by Northwestern University Press in 1972, this book had a profound impact on a nation emerging self-aware from the 1960s, as well as on the era’s burgeoning feminist movement. It remains a profound critique of therapy and the psychological viewpoint, and it is one of Hillman’s most important and enduring works.

Local Histories/Global Designs-Walter Mignolo 2000-02-06 This book is an extended argument on the "coloniality" of power by one of the most innovative scholars of Latin American studies. In a shrinking world where sharp dichotomies, such as East/West and developing/developed, blur and shift, Walter Mignolo points to the inadequacy of current practice in the social sciences and area studies. He introduces the crucial notion of "colonial difference" into study of the modern colonial world. He also traces the emergence of new forms of knowledge, which he calls "border thinking." Further, he expands the horizons of those debates already under way in postcolonial studies of Asia and Africa by dwelling in the genealogy of thoughts of South/Central America, the Caribbean, and Latino/as in the United States. His concept of "border gnosis," or what is known from the perspective of an empire’s borderlands, counters the tendency of occidentalist perspectives to dominate, and thus limit, understanding. The book is divided into three parts: the first chapter deals with epistemology and postcoloniality; the next three chapters deal with the geopolitics of knowledge; the last three deal with the languages and cultures of scholarship. Here the author reintroduces the analysis of civilization from the perspective of globalization and argues that, rather than one "civilizing" process dominated by the West, the continually emerging subaltern voices break down the dichotomies characteristic of any cultural imperialism. By underscoring the fractures between globalization and mundialization, Mignolo shows the locations of emerging border epistemologies, and of post-occidental reason. In a new preface that discusses Local Histories/Global Designs as a dialogue with Hegel’s Philosophy of History, Mignolo connects his argument with the unfolding of history in the first decade of the twenty-first century.

Kinship and Beyond-Sandra Bamford 2012 The genealogical model has a long-standing history in Western thought. The contributors to this volume consider the ways in which assumptions about the genealogical model-in particular, ideas concerning sequence, essence, and transmission-structure other modes of practice and knowledge-making in domains well beyond what is normally labeled 'kinship'. The detailed ethnographic work and analysis included in this text explores how these assumptions have been built into our understandings of race, personhood, ethnicity, property relations, and the relationship between human beings and non-human species. The authors explore the influences of the genealogical model of kinship in wider social theory and examine anthropology’s ability to provide a unique framework capable of bridging the 'social' and 'natural' sciences. In doing so, this volume brings fresh new perspectives to bear on contemporary theories concerning biotechnology and its effect upon social life.

Satipatthana Meditation-Analyo 2018-07-31 From the Buddhist meditator and scholar, Bhikkhu Anālayo, this is a thorough-going guide to the early Buddhist teachings on Satipatthana, the foundations of mindfulness, following on from his two best-selling books, Satipatthana: The Direct Path to Realization and Perspectives on Satipatthana. With mindfulness being so widely taught, there is a need for a clear-sighted and experience-based guide. Analyo provides it.

Alcohol: No Ordinary Commodity-Thomas Babor 2010-02-25 From a public health perspective, alcohol is a major contributor to morbidity and mortality, and impacts on many aspects of social life. This text describes advances in alcohol research with direct relevance to the development of effective policies at local, national and international level.

Is Menstruation Obsolete?-Elsimar M. Coutinho 1999-10-14 Is Menstruation Obsolete? argues that regular monthly bleeding is not the "natural" state of women, and that it actually places them at risk of several medical conditions of varying severity. The authors maintain that while menstruation may be culturally significant, it is not medically meaningful. Moreover, they propose that suppressing menstruation has remarkable health advantages. Because of cultural changes, shorter durations of breast feeding, and birth control, the reproductive patterns of modern women no longer resemble that of their Stone age ancestors. Women have moved from the age of incessant reproduction to the age of incessant menstruation. Consequently, they often suffer from clinical disorders related to menstruation: anemia, endometriosis, and PMS, just to name a few. The authors encourage readers to recognize what has gone previously unnoticed that this monthly discomfort is simply not obligatory. They present compelling evidence that the suppression of menstruation is a viable option for women today, and that it can be easily attained through the use of birth control pills. In fact, they reveal that contraceptive manufacturers, knowing that many women equate menstruation with femininity and that without monthly bleeding would fear that they were pregnant, engineered pill dosage regimens to ensure the continuation of their cycles. Indeed, throughout history societies have assigned menstruation powerful meaning, and Is Menstruation Obsolete? presents a fascinating history of how menstruation inspired doctors to try therapeutic bleeding for a variety of ailments, and how this therapy remained dominant in Western medicine until the early 20th century. Is Menstruation Obsolete? offers women a fresh view of menstruation, providing them with the information they need to make progressive choices about their health. This is a message whose time has come.

Kali-Ajit Mookerjee 1988-03 Discusses the place of Kali in the Hindu religion, describes the powers associated with her, and looks at rituals, paintings, sculptures, and writings

Falklands-Malvinas-Bernard McGuirk 2007

Journey Toward the Cradle of Mankind-Guido Gozzano 1996 The author recounts his experiences traveling in India, and shares his impressions of the land, its people, and culture

Death Instinct and Knowledge-Massimo Fagioli 2019 The book includes five chapters: The disappearance fantasy; The disappearance fantasy and the death instinct; The disappearance fantasy and oral ambivalence; The disappearance fantasy and envy; and Projection and intuition. In this book, Fagioli formulated what has become known as Human Birth Theory, according to which, human thought arises at birth with newborns' reaction to light. This theory, which anticipates recent findings in contemporary infant research, has been confirmed by new scientific discoveries in neonatology, neurobiology and particle physics. The Italian Ministry for Education has recently approved the setting-up of The School of Dynamic Psychotherapy Bios Psyche, for graduates, based on the cultural and scientific model of Human Birth Theory. The book offers a new psychodynamic theory and an innovative and consistent therapeutic approach to all those who work in the fields of psychiatry and psychotherapy. Many readers, though not directly involved in clinical work, appreciate the book for its new theory on the human psyche. A large number of European psychiatrists and clinical psychologists have based their therapeutic practice on the theory and principles put forward in this book.

Architects of Annihilation-Gotz Aly 2015-09-24 Architects of Annihilation follows the activities of the demographers, economists, geographers and planners in the period between the disorderly excesses of the November 1938 pogrom and the fully-effective operation of the gas chambers at Auschwitz in summer 1942. The authors, both journalists and historians, argue that this group of intellectuals, often combining academic, civil service and Party functions, made an indispensable contribution to the planning and execution of the Final Solution. More than that, in the economic and demographic rationale of these experts, the Final Solution was only one element in a far-reaching programme of self-sufficiency which privileged the German Aryan population.

Animal Rights and Wrongs-Roger Scruton 2006-10-31 In this acclaimed book, Scruton takes the issues relating to vivisection, hunting, animal testing and BSE and places them in a wider framework of thought and feeling. Now available in paperback

Collected Poems and Other Verses-St?phane Mallarm? 2008-11-13 Stéphane Mallarmé was the most radically innovative of nineteenth-century poets. This is the fullest collection of Mallarmé’s poetry ever published in English, and the only edition in any language that presents his Poésies in the last arrangement known to have been approved by the author. It includes all the prose poems and the unique, unclassifiable Un Coup de dés... (A Dice Throw...)

The Idea of Latin America-Walter D. Mignolo 2009-02-09 The Idea of Latin America is a geo-political manifesto which insists on the need to leave behind an idea which belonged to the nation-building mentality of nineteenth-century Europe. Charts the history of the concept of Latin America from its emergence in Europe in the second half of the nineteenth century through various permutations to the present day. Asks what is at stake in the survival of an idea which subdivides the Americas. Reinstates the indigenous peoples and migrations excluded by the image of a homogenous Latin America with defined borders. Insists on the pressing need to leave behind an idea which belonged to the nation-building mentality of nineteenth-century Europe.

Sexing the Body-Anne Fausto-Sterling 2020-06-30 Now updated with groundbreaking research, this award-winning classic examines the construction of sexual identity in biology, society, and history. Why do some people prefer heterosexual love while others fancy the same sex? Is sexual identity biologically determined or a product of convention? In this brilliant and provocative book, the acclaimed author of Myths of Gender argues that even the most fundamental knowledge about sex is shaped by the culture in which scientific knowledge is produced. Drawing on astonishing real-life cases and a probing analysis of centuries of scientific research, Fausto-Sterling demonstrates how scientists have historically politicized the body. In lively and impassioned prose, she breaks down three key dualisms -- sex/gender, nature/nurture, and real/constructed -- and asserts that individuals born as mixtures of male and female exist as one of five natural human varieties and, as such, should not be forced to compromise their differences to fit a flawed societal definition of normality.

Studies in Ancient History-John Ferguson McLennan 1896 A comprehensive anthropological and historical study of marriage and women’s social role in Australia, Africa, the Americas, etc.

Transferring Human Impedance Regulation Skills to Robots-Arash Ajoudani 2015-11-05 This book introduces novel thinking and techniques to the control of robotic manipulation. In particular, the concept of teilempedance control as an alternative method to bilateral force-reflecting teleoperation control for robotic manipulation is introduced. In teilempedance control, a compound reference command is sent to the slave robot including both the desired motion trajectory and impedance profile, which are then realized by the remote controller. This concept forms a basis for the development of the controllers for a robotic arm, a dual-arm setup, a synergy-driven robotic hand, and a compliant exoskeleton for improved interaction performance.

A Post-Colonial Enquiry into Europe’s Debt and Migration Crisis-Ranabir Samaddar 2018-04-22 This important and topical volume is composed around the debt and migration crisis in Europe in 2015 (known as the Greece crisis), and written almost concurrently as the two crises developed in quick succession. The central argument here is that Europe’s present crisis suggests a post-colonial bind, or to put in stronger terms, a post-colonial destiny of Europe. The European situation bears remarkable similarity with the post-colonial condition elsewhere in the world and suggests a strong bond between Europe’s present situation and the post-colonial bind in which much of the world finds itself. The purpose of this volume is to examine in the light of 21st century capitalism notions such as debt, crisis, rupture, dialogue, mobilization, neo-liberalism, war and migration, and the old, never to be settled, question of ideology. The volume ends with reflections on Europe’s migration crisis, and reinforces the point that a critical post-colonial sense of history, accumulation, globalization, and the resilience of the nation form will help us reflect on the present European crisis, and draw appropriate lessons.

Christophany-Raimundo Panikkar 2004

Maybe One-Bill McKibben 2013-06-25 From the groundbreaking, bestselling author of The End of Nature, a controversial and provocative book arguing that to help the planet we should begin to voluntarily limit our numbers. Bill McKibben’s books and essays on our environment -- physical and spiritual -- have shaped and spurred debate since The End of Nature was published in 1989. Then, he sounded one of the earliest alarms about global warming; the decade of science since has proved his prescience. Now, in Maybe One, he takes on the most controversial of environmental problems -- population. We live in a unique and dangerous time, he asserts, when the planet’s limits are being tested and voluntary reductions in American childbearing could make a crucial difference. The father of a single child himself, McKibben maintains that bringing one, and no more than one, child into this world will hurt neither your family nor our nation -- indeed, it can be an optimistic step toward the future. Maybe One is not just an environmental argument but a highly personal and philosophical one. McKibben cites new and extensive research about the developmental strengths of only children; he finds that single kids are not spoiled, weird, selfish, or ascial, but pretty much the same as everyone else. McKibben recognizes that the transition to a stable population size won’t be easy or pain-free but ultimately is inevitable. Maybe One provides the basis for provocative, powerful thought and discussion that will influence our thinking for decades to come.

Tropical Night Falling-Manuel Puig 1993

Archetypal Psychology-James Hillman 2004-12-01 The first volume of the James Hillman Uniform Edition will be the long-awaited amended third edition of Archetypal Psychology: A Brief Account, with a detailed up-to-date checklist of all his writings and a comprehensive bibliography of writings in the field of archetypal psychology. 1934-Alberto Moravia 1983 A political tale about an Italian anti-Fascist and the encounter he has with a German girl. The story takes place in 1934 on a boat ride to Capri. It details the relationship between an Italian anti-Fascist - Lucio - and a scared, suicide-seeking German girl. It addresses large philosophical questions like the meaning of life, love and death, through the author’s art.

Born Twice-Giuseppe Pontiggia 2007-12-18 When a breach birth leaves Paulo severely disabled, his father, the articulate, unsentimental Professor Frigerio, struggles to come to terms with his son’s condition. Face to face with his own limitations, Frigerio confronts the strange way society around him handles Paolo’s handicaps and observes his surprising gifts. In spare, deeply affecting episodes, the professor of language explores the nuanced boundaries between "normal" and "disabled" worlds. A remarkable memoir of fathering, winner of the 2001 Strega Prize, Italy’s most prestigious literary honor, Born Twice is noted Italian author Guiseppe Pontiggia’s American debut.

Censorship and Literature in Fascist Italy-Guido Bonsaver 2007 The history of totalitarian states bears witness to the fact that literature and print media can be manipulated and made into vehicles of mass deception. Censorship and Literature in Fascist Italy is the first comprehensive account of how the Fascists attempted to control Italy’s literary production. Guido Bonsaver looks at how the country’s major publishing houses and individual authors responded to the new cultural directives imposed by the Fascists. Throughout his study, Bonsaver uses rare and previously unexamined materials to shed light on important episodes in Italy’s literary history, such as relationships between the regime and particular publishers, as well as individual cases involving renowned writers like Moravia, Da Verona, and Vittorini. Censorship and Literature in Fascist Italy charts the development of Fascist censorship laws and practices, including the creation of the Ministry of Popular Culture and the anti-Semitic crack-down of the late 1930s. Examining the breadth and scope of censorship in Fascist Italy, from Mussolini’s role as ?prime censor? to the specific experiences of female writers, this is a fascinating look at the vulnerability of culture under a dictatorship.
