Resolving the Innovation Paradox-G. Haour 2003-11-17 Innovation is central to the success of technology companies. The CEOs of these companies must make a priority of ensuring that technical know how is effectively converted into value. The paradox is that they rarely do. Resolving the Innovation Paradox shows how to put innovation for longer-term growth at the centre of the CEO radar. One tool is distributed innovation . Distributed innovation offers companies two main benefits. First, companies raise revenue by using channels such as licensing and selling innovation projects. Second, companies tap into external technical know-how, combining it seamlessly with their internal capabilities to develop 'high impact' products and services. Unconstrained by internal resources, such firms gain in agility. Resolving the Innovation Paradox offers examples from companies such as Generics, Intel, Nokia and Samsung. The book is addressed to all readers interested in managing innovation.

Atlantic Automobilmism-Gijs Mom 2014-12-01 Our continued use of the combustion engine car in the 21st century, despite many rational arguments against it, makes it more and more difficult to imagine that transport has a sustainable future. Offering a sweeping transatlantic perspective, this book explains the current obsession with automobiles by delving deep into the motives of early car users. It provides a synthesis of our knowledge about the emergence and persistence of the car, using a broad range of material including novels, poems, films, and songs to unearth the desires that shaped our present "car society." Combining social, psychological, and structural explanations, the author concludes that the ability of cars to convey transcendental experience, especially for men, explains our attachment to the vehicle.
