Linear Algebra: A Modern Introduction-David Poole 2014-03-19 David Poole's innovative LINEAR ALGEBRA: A MODERN INTRODUCTION, 4e emphasizes a vectors approach and better prepares students to make the transition from computational to theoretical mathematics. Balancing theory and applications, the book is written in a conversational style and combines a traditional presentation with a focus on student-centered learning. Theoretical, computational, and applied topics are presented in a flexible yet integrated way. Stressing geometric understanding before computational techniques, vectors and vector geometry are introduced early to help students visualize concepts and develop mathematical maturity for abstract thinking. Additionally, the book includes ample applications drawn from a variety of disciplines, which reinforce the fact that linear algebra is a valuable tool for modeling real-life problems. The Love of Your Life-Enriqueta Olivari 2015-01-22 We have been conditioned to believe that love comes from outside and it depends on our relationships. This widespread belief has led us to establish relationships marked by dependence, attachment and suffering. But the truth is that love is our natural state and not dependent on anything external. With a pleasant and clear language, you will discover in this book how to develop love towards yourself on all levels or aspects: physical, mental, emotional, and spiritual. It is a full guide to the essentials to establish harmonious relationships and a happy life. From a young age, Enriqueta Olivari felt the need to find meaning in her life. This search led her to be initiated by Osho, her master in meditation. She learned to find the love, peace and joy from within. The author is also a therapist and speaker. She has been trained in India. For over thirty years, she has taught courses in personal growth in Argentina, Brazil, Spain, the United States, and Mexico.

The Hole of the Pit-Adrian Ross 2013-03 CLASSIC EARLY HORROR IN THE STYLE OF MR JAMES BY A FRIEND AND COLLEAGUE "The haunted house story becomes a real nerve-shredder..." 'Adrian Ross' was a great name to conjure with in the early years of the 20th century. A founding father of 'musical comedy', this celebrated librettist wrote over two thousand lyrics and worked on around sixty popular musicals, including the hugely successful English versions of The Merry Widow and Lilac Time. In his completely different earlier life, under his own name of Arthur R. Ropes, he was a multi-talented Cambridge don, a Senior Fellow at King's College during the 1880s, alongside M.R. James. He composed two impressive works of supernatural horror fiction - both narrated by Cambridge scholars - which appear here together in one volume for the first time. Ross and James were among the first writers of the late nineteenth century who moved away from the familiar traditional Victorian ghosts to the much stranger world of centuries-old demons, all extremely dangerous and horrifying, defying any clear description. For example, the traditional haunted house tale takes a hideous descent into grave terror here. While the Collected Ghost Stories of M.R. James have been widely available for decades, it is now time for the collected horror fiction of 'Adrian Ross' to be available for the present 21st century generation. Silent in the Grave-Deanna Raybourn 2019-07-15 Only from New York Times bestselling author Deanna Raybourn, go back to where it all began with the original Lady Julia Grey historical mystery series. "Let the wicked be ashamed, and let them be silent in the grave." These ominous words are the last threat that Sir Edward Grey receives from his killer. Before he can show them to Nicholas Brisbane, the private inquiry agent he has retained for his protection, he collapses and dies at his London home, in the presence of his wife, Julia, and a roomful of dinner guests. Prepared to accept that Edward's death was due to a long-standing physical infirmity, Julia is outraged when Brisbane visits and suggests that her husband was murdered. It is a reaction she comes to regret when she discovers damning evidence for herself, and realizes the truth. Determined to bring the murderer to justice, Julia engages the enigmatic Brisbane to help her investigate Edward's demise. Dismissing his warnings that the investigation will be difficult, if not impossible, Julia presses forward, following a trail of clues that lead her to even more unpleasant truths, and ever closer to a killer who waits expectantly for her arrival. The Invention of Time and Space-Patrice F. Dasso 2016-09-30 This investigation of time and space is motivated by gaps in our current understanding: by the lack of definitions, by our failure to appreciate the nature of these entities, by our inability to pin down their properties. The author's approach is based on two key ideas: The first idea is to seek the geo-historical origins of time and space concepts. A thorough investigation of a diversified archaeological corpus, allows him to draft coherent definitions; it furthermore gives clues as to whether time and space were discovered or invented. The second idea is to define the units before trying to define space and time. The results presented here are unexpected: Time and space were not discovered in nature, but they were invented; time is not a phenomenon and space has no materiality; they are only concepts. This runs contrary to the opinion of most scientific and the philosophical authorities, although one would seek in vain for a theoretical validation of the conventional position. This book will provide much food for thought for philosophers and scientists, as well as interested general readers. General Medicine Radiology-Prabhakar Rajiah 2007-12 Provides in-depth knowledge of radiological appearances of common general medicine conditions.
