The Great Fuzz Frenzy-Susan Stevens Crummel 2005-09-01 Deep, deep down in their underground town, the prairie dogs live in harmony--until a mysterious, fluorescent, very fuzzy thing (otherwise known as a tennis ball) rolls down their hole. When the prairie dogs discover that they can pluck and pull the fuzz into fabulous fashions, their fear quickly turns to curiosity, then delight, then pure greed. The frenzy that erupts threatens to tear apart the prairie-dog town forever. But when mean ol' Big Bark is kidnapped after taking all the fuzz for himself, the prairie dogs come to the rescue and remember the true meaning of community.

Engaging the Online Learner-Rita-Marie Conrad 2011-03-23 Engaging the Online Learner This updated edition includes an innovative framework—the Phases of Engagement—that helps learners become more involved as knowledge generators and cofacilitators of a course. The book also provides specific ideas for tested activities (collected from experienced online instructors across the nation) that can go a long way to improving online learning. Engaging the Online Learner offers the tools and information needed to: Convert classroom activities to an online environment Assess the learning that occurs as a result of collaborative activities Phase in activities that promote engagement among online learners Build peer

interaction through peer partnerships and team activities Create authentic activities and implement games and simulations Praise for Engaging the Online Learner "The Phases of Engagement framework provides a road map for creating community at each phase of an online course. This book is an invaluable guide to innovative practices for online learning." -Judith V. Boettcher, coauthor of The Online Teaching Survival Guide "Engagement is the heart of online learning. The authors have developed an encyclopedia of tried-and-true learner engagement activities that are authentic and ready to use." -Donald P. Ely, professor emeritus, instructional design, development and evaluation in the School of Education, Syracuse University

Comparative Higher Education-Philip G. Altbach 1998 Higher education is increasingly international. The issues that affect universities in one country are important globally. There are a myriad of links among academic systems worldwide. Comparative Higher Education is the first book to systematically explore many of the most important implications of the globalization of higher education. It explores the links among universities, including foreign students and scholars, the impact of the Western higher education idea on universities throughout the world, and especially the current importance of American academic ideas worldwide, and the patterns of inequality among academic systems. Teachers and students are at the heart of the academic systems. Comparative Higher Education focuses on professors and students- especially the political involvement of both professors and students- and seeks to understand their roles in a comparative framework. The book concludes with a discussion of higher education development in the newly industrializing countries. These Pacific Rim nations are examples of how higher education has been used in the process of development. Comparative Higher Education reflects more than three decades of research in the field, and places key elements in the globalization of higher education in a useful framework. Worldwide examples are used to illustrate analyses of such key topics as international exchange, future trends in university development, the complex relationships among academic systems in the industrialized and developing countries, and related issues.

The Three-Minute Classroom Walk-Through-Carolyn J. Downey 2004-04-20 Change the entire school culture with this collaborative method of supervision! For years, the classic supervision model has frustrated both principals and teachers by fostering superior-subordinate relationships, focusing on teacher conformity rather than growth, or producing checklist data that are irrelevant to the curriculum. The Three-Minute Classroom Walk-Through offers a practical, time-saving alternative that impacts student achievement by cultivating self-reliant teachers who are continuously improving their practice. This method answers principals' key questions: Is the work of my teachers aligned with district curriculum? Are my teachers using research-based "best practices"? Are they choosing the instructional strategies that will promote student achievement?

Science Detective Beginning-Stephen David Fischer 2004 The lessons covered are organized around National Science Education Standards and are designed to improve student skills in science, critical thinking, reading and writing.

Experience of Mediated Learning-European Association for Research on Learning and Instruction 2000 In this volume the authors examine the impact of Feuerstein's theory of Mediated Learning Experience (MLE) on our understanding of the learning, instruction and cognitive modifiability of children, adolescents and young adults. The book begins with a historical essay charting the origins of the theory in

Feuerstein's work with holocaust survivors and immigrant children, to the current international acceptance and application of his ideas. The authors discuss key issues such as: the relationship between Feuerstein's theory and the changing agenda of psychological research; developments in the fields of learning potential assessment and their contribution to a more culturally equitable evaluation procedure; the influence of MLE theory on the enhancement of the learning potential of students. The discussion concludes with a consideration of the more problematic aspects of Feuerstein's work and an examination of alternative assessment methods.

Materials Selection in Mechanical Design-M. F. Ashby 1992-01-01 New materials enable advances in engineering design. This book describes a procedure for material selection in mechanical design, allowing the most suitable materials for a given application to be identified from the full range of materials and section shapes available. A novel approach is adopted not found elsewhere. Materials are introduced through their properties; materials selection charts (a new development) capture the important features of all materials, allowing rapid retrieval of information and application of selection techniques. Merit indices, combined with charts, allow optimisation of the materials selection process. Sources of material property data are reviewed and approaches to their use are given. Material processing and its influence on the design are discussed. The book closes with chapters on aesthetics and industrial design. Case studies are developed as a method of illustrating the procedure and as a way of developing the ideas further.
