The Family That Couldn't Sleep-D. T. Max 2006-09-05 For two hundred years a noble Venetian family has suffered from an inherited disease that strikes their members in middle age, stealing their sleep, eating holes in their brains, and ending their lives in a matter of months. In Papua New Guinea, a primitive tribe is nearly obliterated by a sickness whose chief symptom is uncontrollable laughter. Across Europe, millions of sheep rub their fleeces raw before collapsing. In England, cows attack their owners in the milking parlors, while in the American West, thousands of deer starve to death in fields full of grass. What these strange conditions—including fatal familial insomnia, kuru, scrapie, and mad cow disease—share is their cause: prions. Prions are ordinary proteins that sometimes go wrong, resulting in neurological illnesses that are always fatal. Even more mysterious and frightening, prions are almost impossible to destroy because they are not alive and have no DNA—and the diseases they bring are now spreading around the world. In *The Family That Couldn't Sleep*, essayist and journalist D. T. Max tells the spellbinding story of the prion's hidden past and deadly future. Through exclusive interviews and original archival research, Max explains this story's connection to human greed and ambition—from the Prussian chemist Justus von Liebig, who made cattle meatier by feeding them the flesh of other cows, to New Guinean natives whose custom of eating the brains of the dead nearly wiped them out. The biologists who have investigated these afflictions are just as extraordinary—for example, Daniel Carleton Gajdusek, a self-described “pedagogic pedophile pediatrician” who cracked kuru and won the Nobel Prize, and another Nobel winner, Stanley Prusiner, a driven, feared self-promoter who identified the key protein that revolutionized prion study. With remarkable precision, grace, and sympathy, Max—who himself suffers from an inherited neurological illness—explores maladies that have tormented humanity for centuries and gives reason to hope that someday cures will be found. And he eloquently demonstrates that in our relationship to nature and these ailments, we have been our own worst enemy.

Eat, Sleep, Poop-Scott W. Cohen 2010-03-30 Written during award-winning pediatrician Dr. Scott W. Cohen's first year as a father, this book is the only one to combine two invaluable “on the job” perspectives—the doctor's and the new parent's. The result is a refreshingly engaging and informative guide that includes all you need to know at each age and stage of your child's first year. Drawing on the latest medical recommendations and his experiences at home and in the office, Dr. Cohen covers everything from preparing for your baby's arrival to introducing her to a new sibling, to those three basic functions that will come to dominate a new parent's life. *Eat, Sleep, Poop* addresses questions, strategies, myths, and all aspects of your child's development. In each instance, Dr. Cohen provides a thorough overview and a simple answer or explanation: a “common sense bottom line,” yet he doesn't dictate. The emphasis is on doing what is medically sound and what works best for you and your baby. He also includes fact sheets, easy-to-follow diagnosis and treatment guides, and humorous daddy vs. doctor sidebars that reveal the learning curve during his first year as a dad. Lively, practical, and reassuring, *Eat, Sleep, Poop* provides the knowledge you need to parent with confidence, to relax and enjoy baby's first year, and to raise your child with the best tool a parent can have: informed common sense.

Toxic Bedrooms-Walter Bader 2010-08-30 Your bedroom should be a safe haven, but unfortunately more and more research is revealing that the bedroom may be one of the most toxic places in the home. Consider that the average conventional mattress contains more toxic chemicals than a 50 gallon oil drum, and that our skin, the largest organ of the body, is also the most porous entry point. It is no wonder that chemicals found in mattresses, known to cause toxic reproductive effects, are regularly being found at significant levels in human blood samples. Walter Bader outlines the dangers of the toxic threats lurking in the home so that, armed with knowledge, you can defend yourself and your family against them.

Aligning Strategy and Sales-Frank Cespedes 2014-08-12 “The best sales book of the year” — *strategy+business* magazine That gap between your company's sales efforts and strategy? It's real—and a huge vulnerability. Addressing that gap, actionably and with attention to relevant research, is the focus of this book. In *Aligning Strategy and Sales*, Harvard Business School professor Frank Cespedes equips you to link your go-to-market initiatives with strategic goals. Cespedes offers a road map to articulate strategy in ways that people in the field can understand and that will fuel the behaviors required for profitable growth. Without that alignment, leaders will press for better execution when they need a better strategy, or change strategic direction with great cost and turmoil when they should focus on the basics of sales execution. With thoughtful, clear, and engaging examples, *Aligning Strategy and Sales* provides a framework for diagnosing and managing the core levers available for effective selling in any organization. It will give you the know-how and tools to move from ideas to action and build a sales effort linked to your firm's unique goals, not a generic selling formula. Cespedes shows how sales efforts affect all elements of value creation in a business, whether you're a start-up seeking to scale or an established firm looking to jump-start new growth. The book provides key insights to optimize your firm's customer management activities and so improve selling and strategy.

Happy Money-Elizabeth Dunn 2013-05-14 If you think money can't buy happiness, you're not spending it right. Two rising stars in behavioral science explain how money can buy happiness—if you follow five core principles of smarter spending. If you think money can't buy happiness, you're not spending it right. Two rising stars in behavioral science explain how money can buy happiness—if you follow five core principles of smarter spending. *Happy Money* offers a tour of new research on the science of spending. Most people recognize that they need professional advice on how to earn, save, and invest their money. When it comes to spending that money, most people just follow their intuitions. But scientific research shows that those intuitions are often wrong. *Happy Money* explains why you can get more happiness for your money by following five principles, from choosing experiences over stuff to spending money on others. And the five principles can be used not only by individuals but by companies seeking to create happier employees and provide “happier products” to their customers.

Elizabeth Dunn and Michael Norton show how companies from Google to Pepsi to Crate & Barrel have put these ideas into action. Along the way, the authors describe new research that reveals that luxury cars often provide no more pleasure than economy models, that commercials can actually enhance the enjoyment of watching television, and that residents of many cities frequently miss out on inexpensive pleasures in their hometowns. By the end of this book, readers will ask themselves one simple question whenever they reach for their wallets: Am I getting the biggest happiness bang for my buck?

Play the Odds 2. Embrace Tomorrow Today 3. Seek Constant Motion 4. Lead, Don't Follow 5. Never Stop Learning 6. Create Competitive Advantage 7. Connect the Dots 8. Pick Your Battles 9. Set and Align Your Priorities 10. Always Create Value

Lucid Dreaming-Robert Waggoner 2008-10-01 *Lucid Dreaming: Gateway to the Inner Self* is the account of an extraordinarily talented lucid dreamer who goes beyond the boundaries of both psychology and religion. In the process, he stumbles upon the Inner Self. While lucid (consciously aware) in the dream state and able to act and interact with dream figures, objects, and settings, dream expert Robert Waggoner experienced something transformative and unexpected. He was able to interact consciously with the dream observer - the apparent Inner Self - within the dream. At first this seemed shocking, even impossible, since psychology normally alludes to such theoretical inner aspects as the Subliminal Self, the Center, the Internal Self-Helper in vague and theoretical ways. Waggoner came to realize, however, that aware interaction with the Inner Self was not only possible, but actual and highly inspiring. He concluded that while aware in the dream state, one has both a psychological tool and a platform from which to understand dreaming and the larger picture of man's psyche as well. Waggoner proposes 5 stages of lucid dreaming and guides readers through them, offering advice for those who have never experienced the lucid dream state and suggestions for how experienced lucid dreamers can advance to a new level. *Lucid Dreaming* offers exciting insights and vivid illustrations that will intrigue not only avid dreamworkers but anyone who is interested in consciousness, identity, and the definition of reality.

At Day's Close: Night in Times Past-A. Roger Ekirch 2006-10-17 "Remarkable...Ekirch has emptied night's pockets, and laid the contents out before us."

—Arthur Krystal, *The New Yorker* Bringing light to the shadows of history through a "rich weave of citation and archival evidence" (Publishers Weekly), scholar A. Roger Ekirch illuminates the aspects of life most often overlooked by other historians—those that unfold at night. In this "triumph of social history" (Mail on Sunday), Ekirch's "enthraling anthropology" (Harper's) exposes the nightlife that spawned a distinct culture and a refuge from daily life. Fear of crime, of fire, and of the supernatural; the importance of moonlight; the increased incidence of sickness and death at night; evening gatherings to spin wool and stories; masqued balls; inns, taverns, and brothels; the strategies of thieves, assassins, and conspirators; the protective uses of incantations, meditations, and prayers; the nature of our predecessors' sleep and dreams—Ekirch reveals all these and more in his "monumental study" (The Nation) of sociocultural history, "maintaining throughout an infectious sense of wonder" (Booklist).

Evicted-Matthew Desmond 2016-03-01 WINNER OF THE 2017 PULITZER PRIZE GENERAL NON-FICTION From Harvard sociologist and MacArthur "Genius" Matthew Desmond, a landmark work of scholarship and reportage that will forever change the way we look at poverty in America In this brilliant, heartbreaking book, Matthew Desmond takes us into the poorest neighborhoods of Milwaukee to tell the story of eight families on the edge. Arleen is a single mother trying to raise her two sons on the \$20 a month she has left after paying for their rundown apartment. Scott is a gentle nurse consumed by a heroin addiction. Lamar, a man with no legs and a neighborhood full of boys to look after, tries to work his way out of debt. Vanetta participates in a botched stickup after her hours are cut. All are spending almost everything they have on rent, and all have fallen behind. The fates of these families are in the hands of two landlords: Sherrena Tarver, a former schoolteacher turned inner-city entrepreneur, and Tobin Charney, who runs one of the worst trailer parks in Milwaukee. They loathe some of their tenants and are fond of others, but as Sherrena puts it, "Love don't pay the bills." She moves to evict Arleen and her boys a few days before Christmas. Even in the most desolate areas of American cities, evictions used to be rare. But today, most poor renting families are spending more than half of their income on housing, and eviction has become ordinary, especially for single mothers. In vivid, intimate prose, Desmond provides a ground-level view of one of the most urgent issues facing America today. As we see families forced into shelters, squalid apartments, or more dangerous neighborhoods, we bear witness to the human cost of America's vast inequality—and to people's determination and intelligence in the face of hardship. Based on years of embedded fieldwork and painstakingly gathered data, this masterful book transforms our understanding of extreme poverty and economic exploitation while providing fresh ideas for solving a devastating, uniquely American problem. Its unforgettable scenes of hope and loss remind us of the centrality of home, without which nothing else is possible. How to Find Your Dream Dog-Dixie Tenny 2016-09-27 Bringing a new dog into the household should be one of life's happiest events. The process always starts with excitement and high expectations. Too often, though, it ends in disappointment. The new puppy wakes everyone three times a night, gnaws on furniture, piddles everywhere, knocks the children down. The new adolescent dog is too wild. The new adult dog growls at your neighbors. And where did all this dog hair come from? Most people spend hours researching a new mattress, days researching a new car, and weeks researching a new home or job. Yet for a new dog, a companion for the next 10-15 years, the most they do is visit the nearest shelter or pet shop and buy whatever looks cute and appealing. It's no wonder they end up disappointed. Whether you are looking for a purebred puppy or a charming mixed-breed, the type of dog you bring into your home matters. A quiet owner will struggle to keep up with a high-energy labrador mix, for instance, while an active outdoor family will be impatient with a snoozy bulldog. And finding the right kind of dog means becoming the right kind of owner—a task that takes some forethought and planning. "How To Find Your Dream Dog" is here to fix the disconnect of dog ownership. It walks you step-by-step through the process of choosing the right type of dog for you—not only exploring the canine qualities that can determine your perfect puppy, adolescent, or adult dog, but also assessing your lifestyle to make sure you're a good match for the dog, too. The book also looks at good (and bad) sources for finding healthy and sound pet dogs, gives guidelines for evaluating individual puppies, and warns of some red flags to watch out for during your dog search. With this guidebook in hand, you can be confident that the next puppy or dog you bring home will be the right companion and friend for you for the rest of its days. Dixie Tenny is a Certified Training Partner with the Karen Pryor Academy of Animal Training and Behavior. During her 30+ years spent working with people and their pets, she has seen again and again how mismatches between dog and owner can create "behavior problems" that never would have happened if the right dog had been matched to the right owner in the first place. She wrote this book to help puppy buyers and dog adopters start out on the best possible foot with their new pet dogs, and stay on that path for years to come.

Sleep for Success! Everything You Must Know About Sleep but Are Too Tired to Ask-Dr. James B. China-Thomas Orlik 2020-05-15 The Chinese economy appears destined for failure, the financial bubble forever in peril of popping, the real estate sector doomed to collapse, the factories fated for bankruptcy. Banks drowning in bad loans. An urban landscape littered with ghost towns of empty property. Industrial zones stalked by zombie firms. Trade tariffs blocking the path to global markets. And yet, against the odds and against expectations, growth continues, wealth rises, international influence expands. The coming collapse of China is always coming, never arriving. Thomas Orlik, a veteran of more than a decade in Beijing, turns the spotlight on China's fragile fundamentals, and resources for resilience. Drawing on discussions with Communist cadres, shadow bankers, and migrant workers, Orlik pieces together a unique perspective on China's past, present, and possible futures. From Deng Xiaoping's reform and opening to Donald Trump's trade war, Orlik traces the policy steps and missteps that have taken China to the brink of a "Lehman moment" credit crisis. Delving into the balance sheets for banks, corporates, and local governments, he plumbs the depths of financial risks. From Japan in 1989, to Korea in 1997, to the U.S. in 2007, he positions China in the context of a rolling series of global crisis. Mapping possible scenarios, Orlik games out what will happen if the bubble that never pops finally does. The magnitude of the shock to China and the world would be tremendous. For those in the West nervously watching China's rise as a geopolitical challenger, the alternative could be even less palatable.

Tribe of Mentors-Timothy Ferriss 2017-11-21 Tim Ferriss, the #1 New York Times best-selling author of *The 4-Hour Workweek*, shares the ultimate choose-your-own-adventure book—a compilation of tools, tactics, and habits from 130+ of the world's top performers. From iconic entrepreneurs to elite athletes, from artists to billionaire investors, their short profiles can help you answer life's most challenging questions, achieve extraordinary results, and transform your life. From the author: In 2017, several of my close friends died in rapid succession. It was a very hard year, as it was for many people. It was also a stark reminder that time is our scarcest, non-renewable resource. With a renewed sense of urgency, I began asking myself many questions: Were my goals my own, or simply what I thought I should want? How much of life had I missed from underplanning or overplanning? How could I be kinder to myself? How could I better say "no" to the trivial many to better say "yes" to the critical few? How could I best reassess my priorities and my purpose in this world? To find answers, I reached out to the most impressive world-class performers in the world, ranging from wunderkinds in their 20s to icons in their 70s and 80s. No stone was left unturned. This book contains their answers—practical and tactical advice from mentors who have found solutions. Whether you want to 10x your results, get unstuck, or

reinvent yourself, someone else has traveled a similar path and taken notes. This book, *Tribe of Mentors*, includes many of the people I grew up viewing as idols or demi-gods. Less than 10% have been on my podcast (*The Tim Ferriss Show*, more than 200 million downloads), making this a brand-new playbook of playbooks. No matter your challenge or opportunity, something in these pages can help. Among other things, you will learn:

- More than 50 morning routines—both for the early riser and those who struggle to get out of bed.
- How TED curator Chris Anderson realized that the best way to get things done is to let go.
- The best purchases of \$100 or less (you'll never have to think about the right gift again).
- How to overcome failure and bounce back towards success.
- Why *Humans of New York* creator Brandon Stanton believes that the best art will always be the riskiest.
- How to meditate and be more mindful (and not just for those that find it easy).
- Why tennis champion Maria Sharapova believes that "losing makes you think in ways victories can't."
- How to truly achieve work-life balance (and why most people tell you it isn't realistic).
- How billionaire Facebook co-founder Dustin Moskovitz transformed the way he engages with difficult situations to reduce suffering.
- Ways to thrive (and survive) the overwhelming amount of information you process every day.
- How to achieve clarity on your purpose and assess your priorities.
- And much more.

This reference book, which I wrote for myself, has already changed my life. I certainly hope the same for you. I wish you luck as you forge your own path. All the best, Tim Ferriss

*The Heart Goes Last*-Margaret Atwood 2015-09-29 Margaret Atwood puts the human heart to the ultimate test in an utterly brilliant new novel that is as visionary as *The Handmaid's Tale* and as richly imagined as *The Blind Assassin*. Stan and Charmaine are a married couple trying to stay afloat in the midst of an economic and social collapse. Job loss has forced them to live in their car, leaving them vulnerable to roving gangs. They desperately need to turn their situation around—and fast. The Positron Project in the town of Consilience seems to be the answer to their prayers. No one is unemployed and everyone gets a comfortable, clean house to live in . . . for six months out of the year. On alternating months, residents of Consilience must leave their homes and function as inmates in the Positron prison system. Once their month of service in the prison is completed, they can return to their "civilian" homes. At first, this doesn't seem like too much of a sacrifice to make in order to have a roof over one's head and food to eat. But when Charmaine becomes romantically involved with the man who lives in their house during the months when she and Stan are in the prison, a series of troubling events unfolds, putting Stan's life in danger. With each passing day, Positron looks less like a prayer answered and more like a chilling prophecy fulfilled.
