USS Relentless-O'Neil De Noux 2016-03-25 A saga of the US Navy from the Barbary War of 1803 through the War of 1812. In 1803, a young man joins the crew of what will become the most famous frigate of the early US Navy - USS Constitution. From the sands of North Africa during the first Barbary War, across the aquamarine waters of the Caribbean, we follow the exploits of a young American seaman, Alain de Noux. At the outbreak of the War of 1812, Captain de Noux takes the ship he personally designed to sea to fight the mightiest navy in the world - Britain's Royal Navy. USS Relentless is the newest, largest, fastest frigate in the world, her hull coated in resin that allows her to fly across the waves, her radically-designed sails and special chute-sail that acts as a spinnaker pulls the big frigate along at nearly eighteen knots. Armed with weapons far in advance of its time - steel cannons with rifled barrels that propel shells farther than any cannon on any ship, along with special binoculars that aid lookouts to see at night, USS Relentless is a most lethal ship. The ship also carries high caliber shells that explode on contact and special carcass rounds filled with white phosphorous, consuming any ship it strikes in flames. USS Relentless challenges all ships, including the huge British ships-of-the-line, contemporary battleships. Terrorizing the Atlantic for months, Relentless is sent on a more important mission, a mission with no return ticket. She will fly the American flag into combat for the first time across the Indian Ocean, attacking the fat merchant ships of Britain's lucrative East India Company. America does not have the means to invade Britain, but USS Relentless can disrupt her most profitable trade routes. Alain finds success in war and finally meets the woman that will change his world, if only for a short time. In his heart, he knows he will die a young man. It is a race. How many ships can the great raider destroy or capture before the Royal Navy's fleet can destroy her? Along the shoals of the Laccadive Islands, In what the world will call The Battle of the Arabian Sea, USS Relentless must fight an entire fleet in order for Alain to get back to the love of his life.

Knowledge Of The Holy:Drawing Close To God By Knowing His Attributes-A.W Tozer 2017-09-09 True religion confronts earth with heaven and brings eternity to bear upon time. The messenger of Christ, though he speaks from God, must also, as the Quakers used to say, "speak to the condition" of his hearers; otherwise he will speak a language known only to himself. His message must be not only timeless but timely. He must speak to his own generation. The message of this book does not grow out of these times but it is appropriate to them. It is called forth by a condition which has existed in the Church for some years and is steadily growing worse. I refer to the loss of the concept of majesty from the popular religious mind. The Church has surrendered her once lofty concept of God and has substituted for it one so low, so ignoble, as to be utterly unworthy of thinking, worshipping men. This she has done not deliberately, but little by little and without her knowledge; and her very unawareness only makes her situation all the more tragic.

The two Americans are drawn to one another on this plush island to become enmeshed in a struggle between good and evil. What diabolical plan do Nazi scientists have for tigers? The perilous adventure becomes a deadly game of cat-and-mouse in the realm of the ultimate predator - the tiger.

The Water Wars-Cameron Stracher 2011-10-01 Welcome to a future where water is more precious than oil or gold... Hundreds of millions of people have already died, and millions more will soon fall-victims of disease, hunger, and dehydration. It is a time of drought and war. The rivers have dried up, the polar caps have melted, and drinkable water is now in the hands of the powerful few. There are fines for wasting it and prison sentences for exceeding the quotas. But Kai didn't seem to care about any of this. He stood in the open road drinking water from a plastic cup, then spilled the remaining drops into the dirt. He didn't go to school, and he traveled with armed guards. Kai claimed he knew a secret-something the government is keeping from us... And then he was gone. Vanished in the middle of the night. Was he kidnapped? Did he flee? Is he alive or dead? There are no clues, only questions. And no one can guess the lengths to which they will go to keep him silent. We have to find him-and the truth-before it is too late for all of us.

Death Angels-O'Neil De Noux 2016-03-02 In Nazi occupied France during the autumn of 1943, an alluring young woman, two French resistance fighters and an American agent are brought together by the US Office of Strategic Services (OSS). Their code names are the names of archangels, including Samael, the angel of death. They call themselves Death Angels as they leave a trail of dead German officers and French collaborators from southern France all the way to Paris, as the City of Light prepares for her liberation. After derailing a German supply train, Louis and Jack set up on a rooftop above SS Headquarters to await the arrival of the Nazi commander who will be sent to coordinate the bloody reprisal for the sabotage. Expert snipers, the two manage to kill the officer sent and escape. Meanwhile, Arianne, who was a Parisian courtesan before the war, has been sleeping with the enemy, knowing her lover will brag about her and bring his friends to her where she will use her stiletto to slay a hero of the Third Reich. The OSS will team her with Louis and Jack after, along with a teen-aged compatriot Chico to form a secret cell of assassins. It does not take long for the three men to become enamored of Arianne but the team must focus on their missions as they leave bodies on their way to Paris where their most important mission awaits their expertise. Haunted by their pasts, filled with a seething hatred, they draw on their special talents for killing to form an unbreakable bond, even as the men fall in love with their most lethal member, the young woman whose passion for life is matched by her overwhelming desire to kill Nazis. Born in New Orleans, O'Neil De Noux writes character-driven crime fiction, although he has been published in many disciplines including historical fiction, children's fiction, mainstream fiction, science-fiction, suspense, fantasy, horror, western, literary, young adult, religious, romance, humor and erotica. Why Geography Matters-Harm de Blij 2005-09-01 Over the next half century, the human population, divided by culture and economics and armed with weapons of mass destruction, will expand to nearly 9 billion people. Abrupt climate change may throw the global system into chaos; China will emerge as a superpower; and Islamic terrorism and insurgency will threaten vital American interests. How can we understand these and other global challenges? Harm de Blij has a simple answer: by improving our understanding of the world's geography. In Why Geography Matters, de Blij demonstrates how geography's perspectives yield unique and penetrating insights into the interconnections that mark our shrinking world. Preparing for climate change, averting a cold war with China, defeating terrorism: all of this requires geographic knowledge. De Blij also makes an urgent call to restore geography to America's educational curriculum. He shows how and why the U.S. has become the world's most geographically illiterate society of consequence, and demonstrates the great risk this poses to America's national security. Peppering his writing with anecdotes from his own professional travels, de Blij provides an original treatise that is as engaging as it is eye opening. Casual or professional readers in areas such as education, politics, or national security will find themselves with a stimulating new perspective on geography as it continues to affect our world.

Man is a travelling animal, and on these icy slopes skiing began as a means of survival. That it has developed into the leisure and sporting pursuit of choice by so much of the globe bears testament to its elemental appeal. In polar exploration, it has changed the course of history. Elsewhere, in war and peace, it has done so too. The origins of skiing are bound up in with the emergence of modern man and the world we live in today.

As Far As You Can Go Without A Passport-Tom Bodett 1986-01-22 Homespun humor about the way we live, from the pleasant futility of salmon fishing and the joys of Halloween, to quiet afternoons with soap opera families and endless nights in pursuit of trivia Tom Bodett, humorist, radio star, and pitchman for Motel 6, lives and writes in Homer, Alaska, the little town in the blue Northwest where America stops, carwise. "If you got into your car in New York," he says, "and wanted to take a nice long drive, I mean the longest drive you could without turning around or running into a foreign language, this is where you'd wind up." It's a place of moose and salmon and spectacular sunsets, but, Bodett insists, it's also small-town America, a place not all that different from the Michigan town of his youth. That's why he's made it his home: it perfectly suits his contrary appetites for the extreme and the everyday, for the rigors of the outdoor life and the mundane joys of the family circle. As Far As You Can Go Without a Passport, Bodett's first collection of casual essays, contains pieces on everything from trapping, tree cutting, and halibut fishing, to soap operas, lost socks, and sleeping in. It's guaranteed to please both the renegade and the homebody in every reader.
