Mind as Mirror and the Mirroring of Mind—Steven W. Laycock 1994-10-11 Rooted in the insights of Madhyamika dialectic and an articulated Zen phenomenology, this study uncovers and examines the methodological presuppositions undergirding the work of Husserl, Sartre, and Merleau-Ponty and calls into serious question certain of the most fundamental assumptions of the Western phenomenological tradition regarding the nature of mind. Mind as Mirror and the Mirroring of Mind presents, for the first time, a searching and distinctively Buddhist challenge to the Western phenomenologies—a challenge, that is, to grow beyond the settled alternative assumptions that the mind either is or is not mirror-like in its experience of phenomenal reality.

The Mirror of Yoga—Richard Freeman 2010-09-14 The world of yoga is astonishingly rich in its array of schools and practices. Yet, as diverse as they seem, they share a common aim: the discovery of the essence of existence that can be found at the core of our being, and the liberation that comes from that discovery. With this worthy goal in mind, Richard Freeman presents an enlightening overview of the many teachings, practices, and scriptures that serve as the basis for all the schools of yoga—hatha, bhakti, jnana, karma, tantra, and others. He shows how the myriad forms are ultimately related, and can even be perceived to make up a vast, interpenetrating matrix, symbolizing the unity, profundity, and beauty of the ancient tradition. Richard's wide-ranging discussion includes the Upanisads and Samkhya philosophies, the Yoga Sutra of Patanjali, the eight limbs of astanga yoga, the process and purpose of hatha yoga, and much more. He also explores the role of the guru, chanting, meditation, and the yogic imperative of offering service to others. All of this is applied to the actual practice, giving the reader the tools to digest and apply the wealth of information to daily life. The Mirror of Yoga will be a welcome resource to all yogis who wish to better practice the profound philosophy underlying their practice.

Mirrors in the Brain-Giacomo Rizzolatti 2008 When we witness a great actor, musician, or sportsperson performing, we share something of their experience. It become clear just how this sharing of experience is realised within the human brain. This text provides an accessible overview of mirror neurons, written by the man who first discovered them.

Mirror of Minds-Geoffrey Bullough 1962-12-15 The aim of the author, who has long been interested in the history of ideas, has been to give some illustrations of the ways in which at various periods English poetry has reflected current views of the human mind, with special reference to such topics as its place in the cosmos, its relations with the body, the connections between sense, passions, and reason, the problem of soul and its possible survival after death. The subject matter is important, for many of the more self-conscious writers have been profoundly affected by their assumptions about the senses and passions, the reason and the imagination. The author traces four main historical phases in each of which different aspects and potentialities of the mind have been stressed. Chapter I discusses the microcosmic conception of man inherited from the Middle Ages and traces its influence in some allegorical and didactic verse, lyric and epic. Chapter II considers the development of Shakespeare's attitude to the mind and human character. Chapter III turns to some effects (between Dryden and Wordsworth) of the seventeenth-century revolution in philosophy and science, including the search for clarity and order, the Augustan interest in reason and the passions, and the rise of the association of psychology. Chapter IV shows how the Romantic poets made use of associations and intuitions, and discusses the Victorian poets' hopes and fears about immortality in relation to the advance of science. The last chapter traces the influence of the philosophy of the "moment" from the aesthetes to T.S. Eliot, and distinguishes the effects of some twentieth-century psychologies in modern poetry. Poets, of course, have rarely been systematic philosophers or psychologists; they have usually picked out and applied imaginatively only a few notions from contemporary thought. Consequently this study does not attempt to set the history of English poetry squarely against the history of philosophy. Rather, characteristic topics and writers have been selected and the discussion of them will be seen to throw light on some major imaginative preoccupations of each age. The student of English poetry and the history of ideas will find valuable comments on the major writers from Chaucer and Spenser down through Shakespeare and Milton, Dryden, Wordsworth, Shelley, Tennyson, Browning, Hardy and on a variety of modern poets such as Bridges, Eliot, Sitwell, Auden, and Graves. Alexander Lecture Series.

Through a Mirror, Brightly-Raymond Comeau 2001-11-20 The articles in this book are plain and simple and practical. They reflect the transformative experience of practicing the Lessons of A Course In Miracles. They demonstrate a mind awakening from the dream to the experience of the Peace of God. This awakening is expressed through poems, songs, a Shakespearian sonnet, sonnets from the Course, a "Star Trek" episode, excerpts from a Socratic dialogue, and stories of direct personal experience. What is unique about this book is that it offers the reader opportunities to experience a shift in his own mind. Each article engages the reader by addressing his perceptual, dreaming mind, inviting him to participate in experiencing the alternative to his dreaming. By entering in, the reader can experience a shift from dreaming to awakening to the True Reality of his own Identity.

The Mind's Mirror-Desmond Hampel 2012-12-12 This collection of poetry takes you on a spiritual journey, a romantic interlude, a look at relationships from a romantic perspective and life's adventure.

Mindfulness: Living in the Moment Living in the Breath-Amit Ray 2015-11-21 The book discusses the art of living in the moment and living in the breath. It has five parts. Part one discusses the hierarchy of mindfulness, factors of mindfulness, micro-mindfulness, frameworks of mindfulness, goal setting and planning with mindfulness, and many other aspects of mindfulness. Part two, three and four discusses different practices of mindfulness meditation. Written in clear and concise language, and beautifully illustrated, the book is enjoyable to read and easy to practice. In this book Dr. Ray explores mindfulness as an art of living in the moment and living in the breath. He explores mindfulness as the source of inspiration and inner peace. Ray explains how to apply mindfulness to everything we encounter so we can transcend unconscious habits that have imprisoned us for so long. He shows the ways to transform our fear, expectation, anger, regret, cravings, frustration, and fatigue into positive energy of love and compassion.

Mind Wide Open-Steven Johnson 2004-02-27 BRILLIANTLY EXPLORING TODAY'S CUTTING-EDGE BRAIN RESEARCH, MIND WIDE OPEN IS AN UNPRECEDENTED JOURNEY INTO THE ESSENCE OF HUMAN PERSONALITY, ALLOWING READERS TO UNDERSTAND THEMSELVES AND THE PEOPLE IN THEIR LIVES AS NEVER BEFORE. Using a mix of experiential reportage, personal storytelling, and fresh scientific discovery, Steven Johnson describes how the brain works -- its chemicals, structures, and subroutines -- and how these systems connect to the day-to-day realities of individual lives. For a hundred years, he says, many of us have assumed that the most powerful route to self-knowledge took the form of lying on a couch, talking about our childhoods. The possibility entertained in this book is that you can follow another path, in which learning about the brain's mechanics can widen one's self-awareness as powerfully as any therapy or meditation or drug. In Mind Wide Open, Johnson embarks on this path as his own test subject, participating in a battery of attention tests, learning to control video games by altering his brain waves, scanning his own brain with a \$2 million fMRI machine, all in search of a modern answer to the oldest of questions: who am I? Along the way, Johnson explores how we "read" other people, how the brain processes frightening events (and how we might rid ourselves of the scars those memories leave), what the neurochemistry is behind love and sex, what it means that our brains are teeming with powerful chemicals closely related to recreational drugs, why music moves us to tears, and where our breakthrough ideas come from. Johnson's clear, engaging explanation of the physical functions of the brain reveals not only the broad strokes of our aptitudes and fears, our skills and weaknesses and desires, but also the momentary brain phenomena that a whole human life comprises. Why, when hearing a tale of woe, do we sometimes smile inappropriately, even if we don't want to? Why are some of us so bad at remembering phone numbers but brilliant at recognizing faces? Why does depression make us feel stupid? To read Mind Wide Open is to rethink family histories, individual fates, and the very nature of the self, and to see that brain science is now personally transformative -- a valuable tool for better relationships and better living.

Man, the mirror of the universe; or, The agreement of science and religion, explained for the people-James Luke Meagher

The Buddha in Your Mirror-Woody Hochswender 2012-03-01 While the notion that "happiness can found within oneself" has recently become popular, Buddhism has taught for thousands of years that every person is a Buddha, or enlightened being, and has the potential for true and lasting happiness. Through real-life examples, the authors explain how adopting this outlook has positive effects on one's health, relationships, and career, and gives new insights into

world environmental concerns, peace issues, and other major social problems.
