China's Evolving Surface Fleet-Peter Dutton 2017 Over the past fifteen years, the People's Liberation Army Navy's (PLAN's) missile fast-attack craft and amphibious fleets have been significantly modernized. While these two types of vessels have not increased in numbers, their capabilities have increased exponentially. This publication examines the People's Liberation Army's (PLA's) doctrine and training strategy in order to analyze present and predict future missions by these military vessels. China's deterrence posture is improved greatly by these ships and boats, which aid coastal water defense, and threaten Taiwanese attempts to gain independence. In addition, these two fleets improve China's long-range sealift capabilities, and help with the PLA's traditional, and new, nontraditional security practices. These fleets allow the PLAN to continue offshore operations, and begin "blue-water" operations.

problem. This text, in its first edition, promised to educate all interested in the Engineering area as a whole. Educators and students bought this book because of their great interest in seeing engineers thrive and made it wildly successful. In this edition more information about engineering careers and the discipline generally is to be included. This practical approach is edging out the voluminous, traditional introduction to engineering books. In this second edition of *The Engineering Student Survival Guide*, Chapter 2 has been heavily revised with a completely new section entitled, "Ten Tricks of the Old-Timers (Upperclassmen)". Much of the information pertaining to the time before a freshman's first class begins has been deleted. This book is part of the B.E.S.T. (Basic Engineering Series and Tools) Series, which consists of modularized textbooks offering virtually every topic and specialty likely to be of interest to engineers. All the texts boast distinguished authors and the most current content. The goal of this series is to provide the educational community with material that is timely, affordable, of high quality, and flexible in how it is used.
