Journeyman Actor-William Windom 2009-02-01 In a career that has spanned fifty years and taken him from one of the greatest movies of all time to some of television's best series, Emmy-award winning character actor William Windom takes you behind the scenes of show business from Broadway to Hollywood in his candid and witty autobiography. Shortly after returning from active duty in World War II, Windom entered the acting world, launching his career in parts on and off Broadway in the late 1940s and 1950s. With refreshing candor, he tells how he landed his first Hollywood role as the winning attorney against Gregory Peck in 1962's "To Kill a Mockingbird" and then went on to act in popular television series including "Columbo," "Star Trek," "All In the Family," and "Dallas," But perhaps his most enjoyable roles came from his regular appearances on "The Farmer's Daughter," and as Doc Hazlitt in the popular "Murder, She Wrote," Through Windom's personal anecdotes, Hollywood aficionados can get up close and personal with some of the industry's biggest names, including John Wayne, Sam Goldwyn, and Angela Lansbury, and aspiring performers can glean wisdom on choosing agents and managers, working with directors, and performing an audition by following Windom's expert and time-tested advice. Humorous, honest, and endlessly entertaining, "Journeyman Actor" delivers an intimate glimpse into the career of one of Hollywood's most successful character actors.

The Wheat Rusts — Breeding for Resistance-Douglas R. Knott 2012-12-06 The idea for this book was conceived by the late Dr. Irvine A. Watson of the University of Sydney, and he developed the first outline. I was then invited by Dr. Watson to share in its writing. Unfortunately, shortly there after, recurring heart problems forced him to curtail his activities and with draw from the project. He died before the book could be completed. Dr. Watson's intention was to produce a very practical book that would provide wheat breeders with all of the information necessary to breed success fully for resistance to the three wheat rusts: leaf rust, stem rust, and yellow rust. It was intended to be very specific in describing procedures to be used and at the same time provide all of the necessary theoretical background. I hope that I have been successful in meeting these objectives. The book assumes that the reader has some knowledge of plant pathology, genetics, and plant breeding. Extensive use has been made of the literature, but it was not possible to cite all of the papers on a given topic. In making a choice, an attempt was made to choose key papers or more recent papers that provided references to the earlier literature. Acknowledgements This book was written partly at the University of Saskatchewan and partly at the University of California, Davis, while I was on a sabbatical leave.

Differential Forms and Applications-Manfredo P. Do Carmo 2012-12-06 An application of differential forms for the study of some local and global aspects of the differential geometry of surfaces. Differential forms are introduced in a simple way that will make them attractive to "users" of mathematics. A brief and elementary introduction to differentiable manifolds is given so that the main theorem, namely Stokes' theorem, can be presented in its natural setting. The applications consist in developing the method of moving frames expounded by E. Cartan to study the local differential geometry of immersed surfaces in  $R^3$  as well as the intrinsic geometry of surfaces. This is then collated in the last chapter to present Chern's proof of the Gauss-Bonnet theorem for compact surfaces.

Grumman Jf/J2f Duck-Steve Ginter 2009-01-01 The JF/J2F "Duck" was one of those military workhorses moving around in the background before and during WWII which did a tremendous job but never got the publicity of its' more glamorous teammates. Some said the Duck could be more aptly named the "Ugly Duckling." Be that as it may; when no other bomber could be found, it carried bombs; when no other transport could be found, it transported; when no other photo plane could be found, it photographed and when no other rescuer could be found, it rescued. When it came to "Utility Craft," the JF/J2F was the definitive.
