New Headway: Beginner: Workbook (without Key)-Liz Soars

2002-01-24 New Headway Beginner is aimed at absolute beginners, or those who have learned a little English but lack the confidence to build on it. It provides a solid foundation for New Headway Elementary. Its measured, step-by-step approach builds both skills and confidence. The right mix of language work and plentiful practice material enables learners to consolidate their knowledge of key points before proceeding further. The clearly defined grammatical syllabus includes past, present and future time and provides a thorough basis on which to build. The presentation of new language is gradual, methodical and clearly structured, giving learners a clear sense of progression. The vocabulary syllabus focuses on high-frequency survival terms and avoids overload. The gradual introduction of simple skills work with manageable

communicative activities give learners a sense of achievement. 'Everyday English' practises social expressions in common situations and shows how learners can apply their knowledge in practical ways.

New Headway, Beginner-John Soars 2010 A new Beginner edition from the world's most trusted ELT course.

The First 20 Hours-Josh Kaufman 2013-06-13 Forget the 10,000 hour rule— what if it's possible to learn the basics of any new skill in 20 hours or less? Take a moment to consider how many things you want to learn to do. What's on your list? What's holding you back from getting started? Are you worried about the time and effort it takes to acquire new skills—time you don't have and effort you can't spare? Research suggests it takes 10,000 hours to develop a new skill. In this nonstop world when will you ever find that much time and energy? To make matters worse, the early hours of practicing something new are always the most frustrating. That's why it's difficult to learn how to speak a new language, play an instrument, hit a golf ball, or shoot great photos. It's so much easier to watch TV or surf the web . . . In The First 20 Hours, Josh Kaufman offers a systematic approach to rapid skill acquisition— how to learn any new skill as quickly as possible. His method shows you how to deconstruct complex skills, maximize productive practice, and remove common learning barriers. By completing just 20 hours of focused, deliberate practice you'll go from knowing absolutely nothing to performing noticeably well. Kaufman personally field-tested the methods in this book. You'll have a front row seat as he develops a personal yoga practice, writes his own web-based computer programs, teaches himself to touch type on a nonstandard keyboard, explores the oldest and most complex board game in history, picks up the ukulele, and learns how to windsurf. Here are a few of the simple techniques he teaches: Define your target performance level: Figure out what your desired level of skill looks like, what you're trying to achieve, and what you'll be able to do when you're done. The more specific, the better. Deconstruct the skill: Most of the things we think of as skills are actually bundles of smaller subskills. If you break down the subcomponents, it's easier to figure out which ones are most important and practice those first. Eliminate barriers to practice: Removing common distractions and

unnecessary effort makes it much easier to sit down and focus on deliberate practice. Create fast feedback loops: Getting accurate, real-time information about how well you're performing during practice makes it much easier to improve. Whether you want to paint a portrait, launch a start-up, fly an airplane, or juggle flaming chainsaws, *The First 20 Hours* will help you pick up the basics of any skill in record time . . . and have more fun along the way.

New Opportunities-Amanda Maris 2006 *Opportunities* is a five-level course for teenagers. Modules of topic-based units provide rich, contemporary content based on a wide variety of information themes. SLA Research and Materials Development for Language Learning- Brian Tomlinson 2016-05-20 *SLA Research and Materials*

Development for Language Learning is the only book available to focus on the interaction between second language acquisition theory and materials development for language learning. It consists of contributions written by experts in SLA, experts in materials development, researchers who have expertise in both fields, and introductions and conclusions by the editor. The book is organized into four major sections - position statements; materials driven by SLA theory; evaluations of materials in relation to SLA theory; and proposals for action - that offer a diverse range of perspectives while maintaining a cohesive and comprehensive overview on the subject. This book is ideal for post-graduate courses in applied linguistics and second language acquisition and for researchers interested in the relationship between SLA and materials development.

linguists and literary scholars have been impelled by curiosity about particular linguistic or literary phenomena to seek to observe them in action in original texts. The fruits of each earlier enquiry in turn nourish the desire to continue to acquire knowledge, through further observation of newer linguistic facts. As time goes by, the corpus linguist operates increasingly in the awareness of what has gone before. Corpus Linguistics, thirty years on, is less an innocent sortie into corpus territory on the basis of a hunch than an informed, critical reassessment of existing analytical orthodoxy, in the light of new data coming on stream. This volume comprises twenty-two articles penned by members of the ICAME (International Computer Archive of Modern and Mediaeval English) association, which together provide a critical and informed reappraisal of the facts, data, methods and tools of Corpus Linguistics which are available today. Authors reconsider the boundaries of the discipline, exploring its areas of commonality with Sociolinguistics, Language Variation, Discourse Linguistics, and Lexical Statistics and showing how that commonality is potentially of immense benefit to practitioners in the fields concerned. The volume culminates in the report of a timely and novel expert panel discussion on the role of Corpus Linguistics in the study of English as a global language. This encompasses issues such as English as an international lingua franca, 'norms' for global English, and the question of 'ownership', or who qualifies as a native speaker.
