Washington during Civil War and Reconstruction-Robert Harrison 2011-08-15 In this provocative study, Robert Harrison provides new insight into grassroots reconstruction after the Civil War and into the lives of those most deeply affected, the newly emancipated African Americans. Harrison argues that the District of Columbia, far from being marginal to the Reconstruction story, was central to Republican efforts to reshape civil and political relations, with the capital a testing ground for Congressional policy makers. The study describes the ways in which federal agencies such as the Army and the Freedmen's Bureau attempted to assist Washington's freed population and shows how officials struggled to address the social problems resulting from large-scale African-American migration. It also sheds new light on the political processes that led to the abandonment of Reconstruction and the onset of black disfranchisement.

Auto Repair For Dummies-Deanna Sclar 2019-01-07 Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

111 Places in Los Angeles that you must not miss-Laurel Moglen 2016 The ultimate insider's guide to Los Angeles Features interesting and unusual places not found in traditional travel guides 'In Los Angeles, everyone is a star.' - Denzel Washington For more than a century, seekers of sun and celebrity from around the world have flocked to this sprawling metropolis on the Pacific, which Dorothy Parker once described as '72 suburbs in search of a city.' But beyond the red-carpet reputation and Tinseltown trappings is a west coast wonderland teeming with unexpected cultural experiences, iconic architecture, gorgeous open spaces, quirky museums, hidden vistas, unconventional art, and obscure stories about the starlets, moguls, personalities, and players who have made Los Angeles their playground. This unusual guidebook explores 111 of the city's most interesting and unknown places and experiences: wander a serpentine path in a spiritual quest of your own making; channel your inner cowboy at a tried and true honky tonk bar; pay homage to the Dude at the bungalow where the big Lebowski lived; turn your car tires into musical instruments on the country's only 'musical' road; sleep with the ghosts of Marilyn Monroe and Charlie Chaplin; view a constellation of stars more vivid than anything Hollywood Boulevard has to offer. From the San Gabriel Mountains to the Pacific Ocean, Angelenos and visitors will fall in love with the real Los Angeles. Adventures beckon. Surprises await. Just imagine how much more scintillating your dinner-party storytelling will be... »In Los Angeles, everyone is a star.« - Denzel Washington Seit mehr als einem Jahrhundert strömen Menschen auf der Suche nach Sonne und Prominenz in die riesige Metropole am Pazifik. Laurel Moglen has worked for NPR stations in Los Angeles and created podcasts for organizations and companies including Travelocity covering what to do, see, and eat in cities around the US. Oily Hands and the Smell of Diesel: Tales of a Ford Dealer Engineer in the 1960s-David Harris 2017-09-29 1960 saw the dawn of an era of unprecedented innovation and development in farm machinery. It was a period of rapid technical advancement, that produced machines which are the mainstay of the current very buoyant vintage tractor restoration movement. At the start of the decade, spark-ignition Standard Fordson tractors still occasionally required repair; by the end of the decade, the Fordson Diesel Major had been replaced by the Ford 1000 series. The history of these iconic brands is well-known; Oily Hands and the Smell of Diesel gives an alternative view - the inside story of the agricultural machinery repair trade. First employed as an apprentice, then moving his way up to an engineer, David Harris gives an entertaining, informative and personal account of his time spent at a Ford main tractor dealership, working on Ford, Fordson, County, Roadless and Muirhill tractors, Chaseside loaders, Claas combines and New Holland and Jones balers amongst others. Including many historical photographs, David describes the technical challenges in detail, and tells of the ups and downs of life in the workshop and out in the field. This book will be a must-read for anyone who is or was involved in the machinery industry; anyone looking to restore or repair vintage agricultural machinery and anyone with a general interest in farming and machinery history.

1,001 Facts that Will Scare the S#*t Out of You-Cary Mcneal 2010-03-18 Fact: Chocolate contains the alkaloid theobromine, which in high doses can be toxic to humans, and in even small amounts can kill dogs, parrots, horses, and cats. This means that despite its name, the Kit-Kat candy bar is not a recommended snack for your kitty-cat. I wonder how many cats have died because of this confusion. Fact: The most germ-laden place on your toilet isn't the seat or even the bowl-it's the handle. The solution: Don't flush. Let the next guy worry about it. There are "just the facts"-and then there are just the facts that will frighten the bejezus out of you. And thanks to this little gem of a bathroom book, you'll never look at the world the same way again, without, er, dry heaving a little bit. From the sneaky fish that can swim up our genitals to the E. coli bacteria lurking in the very water we drink, disturbing phenomena are everywhere we turn. Educational, entertaining, and undeniably horrifying, this book isn't guaranteed to help you, um, go to the bathroom, but it's certain to make your time there more...informed.
Gene Control-David Latchman 2018-03-29 Gene Control offers a current description of how gene expression is controlled in eukaryotes, reviewing and summarizing the extensive primary literature into an easily accessible format. Gene Control is a comprehensively restructured and expanded edition of Latchman's Gene Regulation: A Eukaryotic Perspective, Fifth Edition. The first part of the book deals with the fundamental processes of gene control at the levels of chromatin structure, transcription, and post-transcriptional processes. Three pairs of chapters deal with each of these aspects, first describing the basic process itself, followed by the manner in which it is involved in controlling gene expression. The second part of the book deals with the role of gene control in specific biological processes. Certain chapters deal with the importance of gene control in cellular signaling processes and for normal development of the embryo. Another chapter discusses the key roles played by gene-regulatory processes in the specification of differentiated cell types such as muscle cells and neurons. The final chapters discuss the consequences of errors in gene control; the relationship between gene misregulation and human diseases, especially cancer; and potential therapies designed specifically to target particular levels of gene control. Gene Control will be of value to students in biological sciences, as well as to scientists and clinicians interested in how genes are regulated in health and disease.

The stockbroker-turned-outdoorsman recalls his days as an African pro hunter in "The Killer Baboons of Vlackfontein." "Four Fangs in a Treetop" records a foray into British Honduras for the jaguar. "a gold-dappled teardrop of motion." Capstick narrowly escapes the Yellow Beard, Central America's deadly tree-climbing snake, and cows "The Black Death" (Cape buffalo) in the kind of article that makes this author "the guru of American hunting furs" (New York Newsday). On Brazil's forsaken Marajo Island, he bags the pugnacious red buffalo, which has the "temperament of a constipated Sumo wrestler and the tenacity of an IRS man." The author discusses 12- and 20-gauge shotgun loads; recalls the pleasures of "biltong" (African beef jerky); describes the irresistible homemade lures of snook fishing expert John Corbatch; and kills a genteel take of Atlantic salmon with the brilliantly simple tube fly. Featuring more than thirty gorgeous drawings by famous wildlife artist Dino Paravano, Death in a Lonely Landis another collector's item by a writer who "keeps the tradition of great safari adventure alive in each of his books" (African Expedition Gazette).
