Textbook of Neonatal Resuscitation-Ronald S. Bloom 1996

NEONATAL RESUSCITATION, 1994-Ronald Samuel Bloom 1994

Textbook of Neonatal Resuscitation-Jeanette Zaichkin 2000 CD includes: full text plus dramatic footage of actual resuscitation events, laryngoscopic view of the airway, digitized animation, review questions, and learner-directed interactive video scenarios.

IAP Textbook of Pediatric & Neonatal Emergencies-Santosh T Soans FIAP 2019-08-31

Neonatal Nurse Practitioner Certification Intensive Review-Amy R. Koehn, PhD, NNP-BC 2019-12-13 The definitive certification review for exam success!

Written by leading APRN neonatal educators and clinicians, this authoritative study guide delivers all the tools neonatal nurse practitioners need to pass the National Certification Corporation (NCC) certification exam and the Continuing Competency Assessment (CCA). User friendly and concise, this review's content mirrors that of the actual exam and is structured in accordance with the most updated test plan blueprint. This resource's numerous exam-style questions and answers with rationales included in each chapter help readers uncover gaps in their knowledge. This review synthesizes the knowledge required to pass the exam, saving the reader time and effort by omitting extraneous material. In addition to spotlighting essential content throughout the text, recommended references provide the reader with the option to seek out additional information as needed. Additional benefits include important information about the exam along with savvy study and test-taking tips. This review will ensure exam success for both new NNPs and those who are taking the CCA exam. **KEY FEATURES**
Mirrors the format of the certification exam
Concise outline format for easy access to essential content
Written by leading NNP educators and clinicians
Includes valuable study and test-taking tips
Exam-style questions and answers with explanatory rationales
Includes more than double the amount of questions on the exam, including a 175-question simulated practice exam
Purchase includes digital access for use on most mobile devices or computers

Comprehensive Neonatal Nursing Care-Carole Kenner, PhD, NNP, FAAN 2013-08-21 "This book provides a complete look at neonatal healthcare delivery. This edition includes discussions of contemporary topics of interest, such as informatics, genetics, global health, and family-centered care, which are vital to providers caring for neonates today. The case studies and the evidence-based practice dialogues at the end of each chapter provide great opportunities for further reflection. The book is useful to a wide audience in nursing, including undergraduate and graduate nursing students, practicing neonatal and pediatric nurses, and advanced practice nurses who care for neonates." Score: 92, 4 Stars.--Doody's Medical Reviews This 'classic' has been thoroughly updated to incorporate the most up-to-date research findings and strategies for providing cost-effective and evidence-based care. New chapters address emerging infections, the late preterm infant, and neonatal care from a global perspective. Included are updated neonatal care protocols and procedures, neuroprotective risk factors, new treatments, and new trends in developmental care. Text integrates the Institute of Medicine's (IOM) five competencies, reflects the Affordable Healthcare Act and the Robert Wood Johnson and IOM report "The Future of Nursing." The text continues to provide neonatal care from a physiologic and pathophysiologic approach, with a major emphasis on nursing management at the bedside and advanced practice level. Each neonatal body system is presented, along with E-B interventions to assist in understanding the 'why' behind what is seen in the clinical area. Integrative management is threaded through the text along with extensive research findings to support practice strategies and rationales for sound clinical decision-making. Topics of recent interest include iatrogenic complications, neonatal pain, use of computers or other technology in neonatal care, and neonatal AIDS. Case studies enhance understanding of both common and rare neonatal conditions. New to the Fifth Edition: New chapters: emerging infections, the late preterm infant, and neonatal care from a global perspective
Updated neonatal care protocols and procedures, neuroprotective factors, new treatment modalities and new trends in developmental care
Tackles the UN Millennium Development Goals (MDGs)
Addresses the expansion of the nurse's role in the US and worldwide
Provides case studies that lead the reader through the identification, diagnosis, treatment, and evaluation of common and rare neonatal conditions

S.T.A.B.L.E. Program Post-resuscitation Pre-transport Stabilization Care of Sick Infants-Kristine A. Karlsen 2006-01-01 The STABLE Program is a neonatal education program that focuses on the post-resuscitation/pre-transport stabilization care of sick newborns. This learner manual serves as a student handbook for either self-study or instructor-led presentations. It includes more than 220 pages, illustrated in full color.

A Practical Guide to Third Trimester of Pregnancy & Puerperium-Alok Sharma 2016-04-30 A Practical Guide to Third Trimester of Pregnancy & Puerperium is a comprehensive resource for the management of the final stage of pregnancy and its complications. Complications covered include pre-term labour, pre-labour rupture of membranes, post-term pregnancy, placental adhesive disorders, and umbilical cord abnormalities. Enhanced by over 120 images and tables, providing quick reference information for obstetricians and gynaecologists.

Pediatrics for Medical Students-Daniel Bernstein 2011-07-24 Textbook concentrates on evaluative skills and the rational development of differential diagnosis. It also covers clinical practice in the context of recent trends in the delivery of health care, including legal issues, coding, utilization review, utilization management and more.

Resuscitation of the Fetus and Newborn, An Issue of Clinics in Perinatology - E-Book-Praveen Kumar 2012-11-12 The Guest Editors have assembled well published authors to present state-of-the-art clinical reviews devoted to resuscitation of the newborn and fetus. Articles are devoted to the following topics: fetal/intrauterine compromise; Cellular biology of end organ injury and strategies to prevent end organ injury; Role of oxygen in the DR; DR management of meconium stained infant; Role of medications in neonatal resuscitation; Delayed cord clamping; Post-resuscitation management; HIE and novel strategies for neuroprotection; Physiology of transition from intrauterine to extrauterine life; Resuscitation of preterm infants: Special considerations; Chest compressions and dysrhythmias in neonates; Resuscitation of infants with prenatally diagnosed anomalies; Ethical issues in neonatal resuscitation; Training programs in neonatal resuscitation: The Neonatal Resuscitation Program and Helping Babies Breathe; and Future of neonatal resuscitation.

Chestnut's Obstetric Anesthesia: Principles and Practice E-Book-David H. Chestnut 2014-02-28 From basic science to various anesthesia techniques to complications, the meticulously updated, fifth edition of Chestnut's Obstetric Anesthesia: Principles and Practice, covers all you need to know about obstetric anesthesia. An editorial team of leading authorities presents the latest on anesthesia techniques for labor and delivery and medical disorders that occur during pregnancy. New chapters and rewritten versions of key chapters cover topics such as psychiatric disorders in the pregnant patient, neurologic disorders, and critical care of obstetric patients. It is an invaluable, comprehensive reference textbook for specialists in obstetric anesthesiology and obstetricians, as well as anesthesiology and obstetric residents. This book also serves as a clear, user-friendly guide for both anesthesiologists and obstetricians who are in clinical practice. Consult this title on your favorite e-reader, conduct rapid searches, and adjust font sizes for optimal readability. Get all the accuracy, expertise, and dependability you could ask for from the most important names in the fields of obstetric anesthesia and maternal-fetal medicine. Master the current best practices you need to know for treating the fetus and the mother as separate patients—each with distinct needs. Search and retain difficult concepts easily with the help of key point summaries in each chapter. Stay current on the latest advancements and developments with sweeping updates and new chapters on topics such as patient safety and team approach, transthoracic echocardiography and noninvasive measurement of cardiac output in obstetric patients, psychiatric disorders during pregnancy, neurologic injuries, and more. Prevent and plan for potential complications associated with the advancing age of pregnant women. An extensive, state-of-the-art discussion of "critical care of obstetric patients" equips you to address any special considerations for this increasing segment. Know exactly how to proceed. An abundance of tables and boxes illustrate the step-by-step management of a full range of clinical scenarios. Choose the best drugs available while adhering to the most recent guidelines for obstetric anesthesia.

Rogers' Textbook of Pediatric Intensive Care-Donald H. Shaffner 2015-07-29 Now in vibrant full color throughout, Rogers' Textbook of Pediatric Intensive Care, 5th Edition, continues its tradition of excellence as the gold standard in the field. For more than 25 years, readers have turned to this comprehensive resource for clear explanations of both the principles underlying pediatric critical care disease and trauma as well as how these principles are applied in clinical practice. In the 5th Edition, more than 250 global contributors bring you completely up to date on today's understanding, treatments, technologies, and outcomes regarding critical illness in children.

Manual of Neonatal Care-John P. Cloherty 2012-01-05 This edition of the Manual of Neonatal Care has been completely updated and extensively revised to

reflect the changes in fetal, perinatal, and neonatal care that have occurred since the sixth edition. This portable text covers current and practical approaches to evaluation and management of conditions encountered in the fetus and the newborn, as practiced in high volume clinical services that include contemporary prenatal and postnatal care of infants with routine, as well as complex medical and surgical problems. Written by expert authors from the Harvard Program in Neonatology and other major neonatology programs across the United States, the manual's outline format gives readers rapid access to large amounts of valuable information quickly. The Children's Hospital Boston Neonatology Program at Harvard has grown to include 57 attending neonatologists and 18 fellows who care for more than 28,000 newborns delivered annually. The book also includes the popular appendices on topics such as common NICU medication guidelines, the effects of maternal drugs on the fetus, and the use of maternal medications during lactation. Plus, there are intubation/sedation guidelines and a guide to neonatal resuscitation on the inside covers that provide crucial information in a quick and easy format.

Pediatric ICD-10-CM 2021-American Academy of Pediatrics Committee on Coding and Nomenclature 2020-10-15 This completely updated 6th edition includes all 2021 updates for pediatric ICD-10-CM codes as well as recently created COVID-19 coding guidance and a new chapter on codes for special purposes, such as vaping-related disorders. For pediatric provider, coder, and biller, here's the most helpful and easy-to-use manual on ICD-10-CM yet. Featuring a laser-sharp pediatric focus, it provides codes and guidelines in a simplified yet familiar format. The combination of hallmark features and easy-to-use format makes facing the challenge of accurate diagnosis coding easier. This important guide condenses the vast ICD-10-CM code set into only pediatric-centered guidelines and codes. It has been reorganized to include the guidelines directly at the chapter and code level, helping to ensure that coders will always use the right codes in the right situation. Tabular, indexed navigation helps you find needed items fast.

The S. T. A. B. L. E. Program Instructor Manual-Kristine Karlsen 2012-07-30 Introductory section in the beginning of the manual provides detailed background information about the S.T.A.B.L.E. Program, testing, course renewal, and instructor classifications and qualifications. Case vignettes introduce each module and several case studies are provided for discussion. S.T.A.B.L.E. stands for the 6 assessment parameters covered in the program: Sugar, Temperature, Airway, Blood pressure, Lab work, and Emotional support for the family.

Managing Infectious Diseases in Child Care and Schools-Susan S. Aronson 2016-09-26 This award-winning guide provides child care directors, teachers, and caregivers with essential information on the prevention and management of infectious diseases in group care settings. The newly revised and updated fourth edition is aligned with the most recent version of the premier AAP source of information on infectious diseases, Red Book(r). The robust section of more than 50 quick-reference fact sheets on common infectious diseases and symptoms has been expanded to include new sheets on Clostridium difficile (or C diff), Norovirus, and Staphylococcus aureus (MRSA and MSSA). Additionally, the sample letters and forms section offers new and updated documents on pressing topics, including a Refusal to Vaccinate form. As always, the guide is easy to use, providing clear, authoritative guidance on limiting the spread of infection."

Preparticipation Physical Evaluation-Preparticipation Physical Evaluation Task Force 1997

2015 Handbook of Emergency Cardiovascular Care for Healthcare Providers-American Heart Association Staff 2015-11-04 Product 15-3105

School Health-American Academy of Pediatrics Council on School Health 2016-03-04 Significantly revised and updated, the 7th edition provides the latest guidelines for developing health programs, including nutrition services, medication administration, physical activity and sports, and the school environment. New in the 7th edition: New content on school health in medical education, family and community involvement, staff wellness and more. Updates on the role of the school physician, school nurse, and guidance on school-based screening, serving populations with unique needs such as allergies and asthma, mental health and social services, and program assessment and evaluation.

Architecting for Scale-Lee Atchison 2016-07-11 Every day, companies struggle to scale critical applications. As traffic volume and data demands increase, these applications become more complicated and brittle, exposing risks and compromising availability. This practical guide shows IT, devops, and system reliability managers how to prevent an application from becoming slow, inconsistent, or downright unavailable as it grows. Scaling isn't just about handling more users; it's also about managing risk and ensuring availability. Author Lee Atchison provides basic techniques for building applications that can handle huge quantities of traffic, data, and demand without affecting the quality your customers expect. In five parts, this book explores: Availability: learn techniques for building highly available applications, and for tracking and improving availability going forward Risk management: identify, mitigate, and manage risks in your application, test your recovery/disaster plans, and build out systems that contain fewer risks Services and microservices: understand the value of services for building complicated applications that need to operate at higher scale Scaling applications: assign services to specific teams, label the criticalness of each service, and devise failure scenarios and recovery plans Cloud services: understand the structure of cloud-based services, resource allocation, and service distribution

Your Baby's First Year-American Academy Of Pediatrics 2010 Provides advice on all aspects of infant care from the members of the American Academy of Pediatrics, discussing such topics as behavior, growth, immunizations, and safety.

Encyclopedia of the Modern Middle East & North Africa: D-K-Philip Mattar 2004 Contains approximately three thousand alphabetically arranged entries that provide information about significant people, places, and events in the history of the Middle East and North Africa since 1800, and includes maps, genealogies, a glossary, and an index.

Fanaroff and Martin's Neonatal-Perinatal Medicine E-Book-Richard J. Martin 2014-08-20 Tackle your toughest challenges and improve the quality of life and long-term outcomes of your patients with authoritative guidance from Fanaroff and Martin's Neonatal-Perinatal Medicine. Drs. Richard J. Martin, Avroy A. Fanaroff, and Michele C. Walsh and a contributing team of leading experts in the field deliver a multi-disciplinary approach to the management and evidence-based treatment of problems in the mother, fetus and neonate. New chapters, expanded and updated coverage, increased worldwide perspectives, and many new contributors keep you current on the late preterm infant, the fetal origins of adult disease, neonatal anemia, genetic disorders, and more. "...a valuable reference book and a pleasure to read." Reviewed by BACCH Newsletter, Mar 2015 Consult this title on your favorite e-reader, conduct rapid searches, and adjust font sizes for optimal readability. Be certain with expert, dependable, accurate answers for every stage of your career from the most comprehensive, multi-disciplinary text in the field! See nuance and detail in full-color illustrations that depict disorders in the clinical setting and explain complex information. Obtain more global perspectives and best practices with contributions from international leaders in the field of neonatal-perinatal medicine. Get comprehensive guidance on treating patients through a dual focus on neonatology and perinatology. Spot genetic problems early and advise parents of concerns, with a completely new section on this topic. Make informed clinical choices for each patient, from diagnosis and treatment selection through post-treatment strategies and management of complications, with new evidence-based criteria throughout. Stay at the forefront of your field thanks to new and completely revised chapters covering topics such as: Principles and Practice I Immune and Non-immune Hydrops Fetalis I Amniotic Fluid Volume I Enhancing Safe Prescribing in the Neonatal Intensive Care Unit I Role of Imaging in Neurodevelopmental Outcomes of High-Risk Neonates I Patent Ductus Arteriosus I Gastroesophageal Reflux and Gastroesophageal Reflux Diseases in the Neonate. Find and grasp the information you need easily and rapidly with indexing that provides quick access to specific guidance.

The Hidden Brain-Shankar Vedantam 2010-01-19 The hidden brain is the voice in our ear when we make the most important decisions in our lives—but we're never aware of it. The hidden brain decides whom we fall in love with and whom we hate. It tells us to vote for the white candidate and convict the dark-skinned defendant, to hire the thin woman but pay her less than the man doing the same job. It can direct us to safety when disaster strikes and move us to extraordinary acts of altruism. But it can also be manipulated to turn an ordinary person into a suicide terrorist or a group of bystanders into a mob. In a series of compulsively readable narratives, Shankar Vedantam journeys through the latest discoveries in neuroscience, psychology, and behavioral science to uncover the darkest corner of our minds and its decisive impact on the choices we make as individuals and as a society. Filled with fascinating characters, dramatic storytelling, and cutting-edge science, this is an engrossing exploration of the secrets our brains keep from us—and how they are revealed.

Oakes' Neonatal/pediatric Respiratory Care-Dana F. Oakes 2004-01-01

Emergency Medical Responder-American Academy of Orthopaedic Surgeons 2010 Updated To The new National EMS Education Standards and endorsed by the American Academy of Orthopaedic Surgeons, The fifth edition of our core first responder textbook, Emergency Medical Responder, continues to take an assessment-based approach to emergency medical responder training. Designed to meet the needs of law enforcement personnel, fire fighters, rescue squad personnel, athletic trainers, college students, and laypersons, The text and features found in the fifth edition will help students take the next step toward becoming outstanding Emergency Medical Responders.

DIBELS-Louisa Cook Moats 2003-01-01 "This prevention-oriented assessment for the growth and development of literacy skills will help you easily identify students in need of intervention and accurately evaluate the effectiveness of intervention strategies. DIBELS is designed for ongoing use to measure foundational skills and progress in reading; predict later reading success and performance on high-stakes tests; and provide an instructional goal that will prevent reading failure and promote reading success."--Publisher's web site.

Atlas of Procedures in Neonatology-Mhairi G. MacDonald 2012-10-08 The Atlas of Procedures in Neonatology, Fifth Edition, provides detailed, step-by-step

instructions on procedures performed in the neonatal intensive care nursery. In an easy-to-follow outline format, with more than 450 drawings and clinical photographs, the book presents clear, current information on indications, preparation, technique, precautions, and how to avoid potential complications. New for this edition: New chapters covering: Brain and Whole Body Cooling; Bubble CPAP; Educational Principles of Simulation Based Procedure Training to help you stay updated on the latest technology and information Access to free online companion website that includes fully searchable text, image bank and videos so you can access the content anytime, anywhere Video collection has been expanded to include: lumbar puncture, intraosseous infusion, bubble CPAP and pericardiocentesis for both commonly performed procedures and vital emergency procedures

WHO Technical Specifications for Neonatal Resuscitation Devices-World Health Organization 2016

Encyclopedia of the Modern Middle East: D-K-Reeva S. Simon 1996 Encompasses the interaction of political, historical, social, economic, and cultural movements as well as relevant persons (living and dead), places, and events. Spans the geographical area from Afghanistan to Morocco. Covers topics in politics, economics, religion, history, literature, the arts, and more.

Mosby's Pediatric Nursing Reference - E-Book-Cecily Lynn Betz 2007-10-08 Provide the best possible nursing care to children and their families, no matter what their condition. This one-of-a-kind resource equips you with detailed information on commonly encountered pediatric diseases, medical and surgical conditions, and disorders, with separate sections devoted to diagnostic tests, outpatient procedures, and surgeries. Its compact, A-to-Z format is designed for ease of use in busy settings - perfect for quick reference when working with patients! Portable size and straightforward, alphabetical organization are designed for quick, convenient, on-the-spot reference. Consistent format throughout lets you easily locate necessary information, including pathophysiology, incidence, clinical manifestations, complications, laboratory and diagnostic tests, medical or surgical management, nursing assessment, diagnoses, and interventions, discharge planning and home care instructions, client outcomes, and references. The book is divided into three main parts covering 87 medical and surgical conditions, 12 topics related to diagnosis and procedures, and 16 helpful appendices. New chapters address autism spectrum disorders, chronic lung disease of infancy, Type 2 Diabetes, Down Syndrome, Fragile X Syndrome, overweight and childhood obesity, and Turner Syndrome. New appendices offer helpful information on mental health, non-accidental trauma, and palliative care. Updated charts and references in the appendices - specifically growth charts and immunization information - reflect current practice. Expanded content is provided on community resources.

Guidelines for Perinatal Care-American Academy of Pediatrics 1997 This guide has been developed jointly by the American Academy of Pediatrics and the American College of Obstetricians and Gynecologists, and is designed for use by all personnel involved in the care of pregnant women, their fetuses, and their neonates.

Pediatric Nutrition-American academy of pediatrics. Committee on nutrition 2013-10-15 Significantly revised and updated by the American Academy of Pediatrics Committee on Nutrition with contributions from more than 100 authors, the new seventh edition provides practicing clinicians with evidence-based guidance on the full spectrum of childhood nutrition issues. The new seventh edition provides the latest information about nutrient metabolism and nutrition to support the normal development and health of infants and children who are well, those born with congenital anomalies or disorders of metabolism, and those with acute and chronic illness. New in the 7th edition: - The latest evidence-based guidelines from the AAP on feeding healthy infants and children - Current policies and practice recommendations from the AAP Committee on Nutrition - Several new chapters and appendices have been added, including chapters on school and day care nutrition; gene and nutrient interaction; and metabolic programming. - Recent advances and developments on topics that arise frequently in pediatric practice: breastfeeding, fast foods, vegetarian diets, persistent newborn diarrhea, preterm infant nutrition needs, chronic obesity, vitamin supplementation, and more - Appendices of more than 50 tables including dietary allowances, energy requirements, composition of human milk and infant formulas, MyPlate, and more - More than 20 growth charts for very low and low birth weights; full-term infants, children, and adolescents; down syndrome; and more - Updates listings of resources for you and your patients, including printed materials, government agencies, and Web sites

Physical Assessment of the Newborn-Ellen P. Tappero, DNP, RN, NNP-BC 2014-09-01 Physical Assessment of the Newborn, 5th Edition, is a comprehensive text with a wealth of detailed information on the assessment of the newborn. This valuable and essential resource illustrates the principles and skills needed to gather assessment data systematically and accurately, and also provides a knowledge base for interpretation of this data. Coverage addresses: gestational assessment, neurologic assessment, neonatal history, assessment of the dysmorphic infant, and systemic evaluation of individual body systems, as well as key information on behavioral and pain assessment, including the use of specific tools with various groups ranging from term to extremely preterm infants.

Numerous tables, figures, illustrations, and photos, many of them in full color, are a major strength that enhances the book's usefulness as a clinical resource. The text is an excellent teaching tool and resource for anyone who performs newborn examinations including nurses, neonatal and pediatric nurse practitioners, nurse-midwives, physicians and therapists. It can also serve as a core text for any program preparing individuals for advanced practice roles in neonatal care.

KEY FEATURES: An authoritative and renowned text that comprehensively addresses all key aspects of newborn assessment Provides a well-ordered evaluation of individual body systems. Assists the practitioner in identifying infant state, behavioral clues, and signs of pain, facilitating individualized care.

Comprehensively addresses the tremendous range of variation among newborns of different gestational ages. The content is amplified by numerous photos and illustrations, many in full color Includes Power Point slides and an Image Bank

Guidelines for Air and Ground Transport of Neonatal and Pediatric Patients-Robert M. Insoft 2016

Neonatology Review-Dara Brodsky 2003 This valuable review book provides a thorough framework for the basic principles of neonatology in a clear and user-friendly style. The detailed yet focused outline format makes it the perfect book for those in training in neonatology and those studying for the Neonatology Boards, as well as a useful general reference for professionals in the field. The first comprehensive guide for the neonatal/perinatal board exam Provides a thorough framework for the basic principles of neonatology The outline format is supplemented with tables, lists, and illustrations for easy study and recall

Preschool English Learners- 2009

New Outlook- 1984

Pediatric Emergency Medicine-Jill M. Baren 2008 This authoritative reference equips you with the essential knowledge to provide comprehensive and effective care to children in an emergency setting. From age-specific diagnoses and chief complaints through developmental considerations and psychosocial issues, this text guides you through the full range of medical and surgical conditions commonly encountered when treating pediatric emergencies. The use of full color throughout, diagnostic algorithms, text boxes, charts, clinical pearls and pitfalls, and other visual features ensure the book will make crucial clinical information easy to find and apply. Tap into expert guidance on all aspects of pediatric emergency medicine, from the physical exam and usual and unusual presentations through to disposition criteria and transfer issues. Access step-by-step guidance on administering critical life support interventions and providing effective diagnostic and therapeutic ambulatory care. Quickly review specific treatment protocols for various emergency settings, including general emergency departments, community hospitals, tertiary care centers, EMS and transport, and triage. Find information fast with or without a known diagnosis, with content organized both by chief complaints and by specific diagnoses. Better understand how problems present differently in infants, children, and adolescents with age-specific diagnoses. Identify and manage the psychosocial issues surrounding pediatric patients, including major depression and suicidality, sexual and physical abuse, child neglect, and violence. Easily absorb key information with the aid of text boxes, algorithms, clinical pearls, and pitfalls. Retrieve information easily with a consistent templated format.

Developing Reading and Writing in Second-language Learners-Diane August 2008 This book is a shorter version of Developing Literacy in Second-Language Learners, reporting the findings of the National Literacy Panel on Language-Minority Children and Youth. This book concisely summarizes what is known from empirical research about the development of literacy in language-minority children and youth, including development, environment, instruction, and assessment. --From publisher's description.
