History of the Caribbean-Frank Moya Pons 2012-02

The Saga of Olaf Tryggvason-Oddr Snorrason 2018-05-31 Oddr Snorrason, a Benedictine monk in northern Iceland in the late twelfth century, composed a landmark Latin biography of the legendary Norwegian king Olaf Tryggvason (died 1000 C.E.). This biography was soon translated into Icelandic, and the translation (though not the Latin original) is preserved in two somewhat differing versions and a small fragment of a third. The Saga of Olaf Tryggvason is the first English translation of this text, augmented by an introduction and notes to guide the reader. There is a strong possibility that Oddr's biography was the first full-length saga of the Icelandic Middle Ages. It ushered in a century of saga writing that assured Iceland a unique place in medieval literature and in the history of prose writing. Aside from being a harbinger of the saga tradition, and indeed of the modern novel, The Saga of Olaf Tryggvason has its own literary merits, including an epic description of the great Battle of Svoldr, in which King Olaf succumbed. In significant ways the narrative of this battle anticipates the mature style of the classical sagas in the thirteenth century.

The (Un)Making of the Modern Family-Daniel Dagenais 2009-05-01 This book is neither an indictment of the new family nor a rallying cry. It is a classical exercise of family sociology that draws upon a range of disciplines -- history, anthropology, psychology, and demography -- to provide an interpretive model for understanding contemporary changes in the family. It explores traditional family forms in order to identify changes that gave birth to the ideal type of the modern family, and it discusses how the modern family's constituent elements (the family as institution, conjugal and parent-child relationships, and gender and sexuality) relate to modernity's central feature -- the concept of the individual. By reconstructing an archetype of the modern family, this book explains why individuals have experienced its deconstruction as a profound identity crisis.

The Future of Food-British Broadcasting Corp. (PRD) 2010-07-28 "According to Tim Lang, Professor of Food Policy at London's City University, future wars may be fought specifically over agricultural resources. Given the present volatility of food prices and the riots they provoked in 2008, his theory seems to be on the mark. This program assesses the potential for a global food crisis as it guides viewers through issues involving climate change, oil consumption, biofuel development, fish stock depletion, and other topics. A Rift Valley herder discusses drought in Africa; a Cuban scholar details the impact of the Soviet collapse on food transportation in his country; an Indian farmer reports being pressured into planting jatropha instead of food crops; and Senegalese fishermen lament the intrusion of Western corporate interests." -- Back of container.

My Movie Business-John Irving 2012-05-08 John Irving's memoir describes the author's involvement (and lack thereof) in five of the films that have (and have not) been made from his nine novels. My Movie Business focuses primarily on the thirteen years Mr. Irving spent writing and rewriting his screenplay of The Cider House Rules, for four different directors. A Miramax production, the film was finally shot in the fall of 1998 directed by the Swedish director Lasse Hallström (My Life as a Dog), with Michael Caine in the role of Dr. Larch. The Cider House Rules is a November 1999 release. Mr. Irving also writes about the failed effort to make his first novel, Setting Free the Bears, into a movie; about two of the films that were made from his novels (but not from his screenplays), The World According to Garp and The Hotel New Hampshire; and about his ongoing struggle to shepherd his screenplay of A Son of the Circus into production. In addition to its qualities as a memoir - anecdotal, comic, affectionate, and candid - My Movie Business is an insightful essay on the essential differences between writing a novel and writing a screenplay. Never have the two forms of storytelling been so lucidly compared and contrasted; the details are memorable, the examples clarifying. My Movie Business includes photos by Stephen Vaughan, the still photographer on the film set of The Cider House Rules. From the Hardcover edition.

Incident Investigation Techniques-Jeffrey S. Oardkey 2003

Concepts in Enterprise Resource Planning-Ellen Monk 2012-03-05 Show your students how to master and maximize enterprise resource planning (ERP) software -- which continues to become more critical in business today - with the latest edition of Monk/Wagner's successful CONCEPTS IN ENTERPRISE RESOURCE PLANNING. Equip students to use ERP tools to increase growth and productivity as they learn how to effectively combine an organization's numerous functions into one comprehensive, integrated system. CONCEPTS IN ENTERPRISE RESOURCE PLANNING, 4E reflects the latest trends and updates in ERP software while demonstrating how to make the most of this important technology. The authors introduce the basic functional areas of business and how they are related. The book demonstrates how information systems that are not effectively integrated fail to support business functions and business processes that extend across functional area boundaries. By contrast, students clearly see how integrated information systems help organizations improve business process and provide managers with accurate, consistent, and current data for making informed strategic decisions. All-new sidebar cases and real examples throughout this edition not only thoroughly introduce the practical aspects of enterprise resource planning, but also prepare readers for ongoing ERP success in business today and tomorrow. Ethics and Airbus-Peter Schulz 2008-08-21 Project Report from the year 2007 in the subject Business economics - Business Ethics, Corporate Ethics, grade: 85%, Macquarie University (Graduate Accounting and Commerce Centre), course: Veranstaltung International Marketing (post-graduate unit), 34 entries in the bibliography, language: English, abstract: This report examines Airbus, one of two major players in the global aircraft manufacturing industry. Recent findings indicate that Airbus might have showed unethical business behavior in convincing customers to purchase its aircraft. After presenting and analyzing these allegations and updating potentially unethical conduct by Airbus to the present day, this report continues to discuss the topic of ethics in general. It is then elaborated how ethics are applied within the aircraft manufacturing industry by its two main players Boeing and Airbus. Following this, tools such as a PESTLE analysis and a SWOT analysis of Airbus are presented. Based on the findings of these analyses, recommendations for Airbus are formulated and examined with regard to practicability and feasibility aspects. Recommendations will be divided into short-, medium- and long-term strategies. Finally, this report will conclude by summarizing the findings and giving an outlook to Airbus' position in the global marketplace.

Differential Forms and Applications-Manfredo P. Do Carmo 2012-12-06 An application of differential forms for the study of some local and global aspects of the differential geometry of surfaces. Differential forms are introduced in a simple way that will make them attractive to "users" of mathematics. A brief and elementary introduction to differentiable manifolds is given so that the main theorem, namely Stokes' theorem, can be presented in its natural setting. The applications consist in developing the method of moving frames expounded by E. Cartan to study the local differential geometry of immersed surfaces in R3 as well as the intrinsic geometry of surfaces. This is then collated in the last chapter to present Chern's proof of the Gauss-Bonnet theorem for compact surfaces.

Introduction to Computer Security-Michael Goodrich 2014-02-10 Introduction to Computer Security is appropriateforuse in computer-security courses that are taught at the undergraduate level and that have as their sole prerequisites an introductory computer science sequence. It is also suitable for anyone interested in a very accessible introduction to computer security. A Computer Security textbook for a new generation of IT professionals Unlike most other computer security textbooks available today, Introduction to Computer Security, does NOT focus on the mathematical and computational foundations of security, and it does not assume an extensive background in computer science. Instead it looks at the systems, technology, management, and policy side of security, and offers students fundamental security concepts and a working knowledge of threats and countermeasures with "just-enough" background in computer science. The result is a presentation of the material that is accessible to students of all levels. Teaching and Learning Experience This program will provide a better teaching and learning experience-for you and your students. It will help: Provide an Accessible Introduction to the General-knowledge Reader: Only basic prerequisite knowledge in computing is required to use this book. Teach General Principles of Computer Security from an Applied Viewpoint: As specific computer security topics are covered, the material on computing fundamentals needed to understand these topics is supplied. Prepare Students for Careers in a Variety of Fields: A practical introduction encourages students to think about security of software applications early. Engage Students with Creative, Hands-on Projects: An excellent collection of programming projects stimulate the student's creativity by challenging them to either break security or protect a system against attacks. Enhance Learning with Instructor and Student Supplements: Resources are available to expand on the topics presented in the text.
