Turkey and EU Integration-Çıgdem Nas 2017-05-18 What has been achieved regarding Turkey's efforts at integration to the EU and what obstacles remain to it achieving full membership? Like other developing countries, Turkey displays visible signs of advancement with rapid increases in living standards, greater mobility and the rapid spread of technology. Much of its legislation and political, economic and administrative systems are also now aligned to the EU and this process has undoubtedly contributed to democratization and modernization. At the same time problems in politics and society persist; the Gezi protests, limitations of freedom of expression, frequent occupational accidents in the mining and construction sectors, honour killings and political upheaval which has manifested itself most starkly with the recent coup attempt all call attention to the challenges facing a country in the process of change. Charting the political, legal and economic relations between Turkey and the European Union since 1959 this book explores the relationship through phases such as association, customs union and candidacy. Each chapter covers a particular period in the relations and/or a theme which has both current and overall relevance to the conduct of the relations. In this way, the authors examine the impact of the EU in affecting change, what has been achieved and the obstacles that remain.

Is the Planet Full?-Ian Goldin 2014-05-15 What are the impacts of population growth? Can our planet support the demands of the ten billion people anticipated to be the world's population by the middle of this century? While it is common to hear about the problems of overpopulation, might there be unexplored benefits of increasing numbers of people in the world? How can we both consider and harness the potential benefits brought by a healthier, wealthier and larger population? May more people mean more scientists to discover how our world works, more inventors and thinkers to help solve the world's problems, more skilled people to put these ideas into practice? In this book, leading academics with a wide range of expertise in demography, philosophy, biology, climate science, economics and environmental sustainability explore the contexts, costs and benefits of a burgeoning population on our economic, social and environmental systems.

International Antitrust Law & Policy: Fordham Competition Law 2013-Barry E. Hawk 2014-03-01 This volume contains articles and panel discussions delivered during the Fortieth Annual Fordham Competition Law Institute Conference on International Antitrust Law & Policy. About the Proceedings: Every October the Fordham Competition Law Institute brings together leading figures from governmental organizations, leading international law firms and corporations and academia to examine and analyze the most important issues in international antitrust and trade policy of the United States, the EU and the world. This work is the most definitive and comprehensive annual analysis of international antitrust law and policy available anywhere. The chapters are revised and updated before publication, where necessary. As a result, the reader receives up-to-date practical tips and important analyses of difficult policy issues. The annual volumes are an indispensable guide through the sea of international antitrust law. The Fordham Competition Law Proceedings are acknowledged as simply the most definitive US/EC annual analyses of antitrust/competition law published. Each annual edition sets out to explore and analyze the areas of antitrust/competition law that have had the most impact in that year. Recent "hot topics" include antitrust enforcement in Asia, Latin America: competition enforcement in the areas of telecommunications, media and information technology. All of the chapters raise questions of policy or discuss new developments and assess their significance and impact on antitrust and trade policy.

J-Reading n. 1-2013- 2013

HC 1115 - The Criminal Justice System-Great Britain: Parliament: House of Commons: Committee of Public Accounts 2014-05-20 The Criminal Justice System is complex and to operate effectively relies on numerous interdependencies between the different bodies involved. There are weaknesses in the System which have persisted for far too long and which cause delay and inefficiency, and serve to undermine public confidence. One example is the failure to ensure the right information is available in case files, where the quality has consistently worsened; another is that a quarter of trials are cancelled or delayed because of late decisions by one or more of the agencies involved. The Home Office, Ministry of Justice and Crown Prosecution Service have made some efforts to improve, but progress in addressing the key problems remains disappointingly slow. Crime has fallen but the Departments gave little evidence linking this improvement to their actions, and while both crime and police officer numbers are down, prison numbers have remained static over the same period. The Departments' efforts to improve efficiency are taking place against a background of reduced resources and staffing, and a prison population twice as high as 20 years ago. The Departments are struggling to: improve the smooth passage of criminal cases through the System; achieve greater collaboration and efficiency between criminal justice organisations at local level; and improve the use of new technology for sharing information.

The Euro Trap-Hans-Werner Sinn 2014-07-31 This book offers a critical assessment of the history of the euro, its crisis, and the rescue measures taken by the European Central Bank and the community of states. The euro induced huge capital flows from the northern to the southern countries of the Eurozone that triggered an inflationary credit bubble in the latter, deprived them of their competitiveness, and made them vulnerable to the financial crisis that spilled over from the US in 2007 and 2008. As private capital shied away from the southern countries, the ECB helped out by providing credit from the local money-printing presses. The ECB became heavily exposed to investment risks in the process, and subsequently had to be bailed out by intergovernmental rescue operations that provided replacement credit for the ECB credit, which itself had replaced the dwindling private credit. The interventions stretched the legal structures stipulated by the Maastricht Treaty which, in the absence of a European federal state, had granted the ECB a very limited mandate. These interventions created a path dependency that effectively made parliaments vicarious agents of the ECB's Governing Council. This book describes what the author considers to be a dangerous political process that undermines both the market economy and democracy, without solving southern Europe's competitiveness problem. It argues that the Eurozone has to rethink its rules of conduct by limiting the role of the ECB, exiting the regime of soft budget constraints and writing off public and bank debt to help the crisis countries breathe again. At the same time, the Eurosystem should become more flexible by offering its members the option of exiting and re-entering the euro - something between the dollar and the Bretton Woods system - until it eventually turns into a federation with a strong political power centre and a uniform currency like the dollar.

Language Planning and Student Experiences-Prof. Joseph Lo Bianco 2013-06-28 This book is a timely comparison of the divergent worlds of policy implementation and policy ambition, the messy, often contradictory here-and-now reality of languages in schools and the sharp-edged, shiny, future-oriented representation of languages in policy. Two deep rooted tendencies in Australian political and social life, multiculturalism and Asian regionalism, are represented as key phases in the country's experimentation with language education planning. Presenting data from a five year ethnographic study combined with a 40 year span of policy analysis, this volume is a rare book length treatment of the chasm between imagined policy and its experienced delivery, and will provide insights that policymakers around the world can draw on.

The Changing Policy-Making Process in Greater China-Bennis Wai Yip So 2014-04-24 This book explores how the policy-making process is changing in the very volatile conditions of present day mainland China, Taiwan and Hong Kong. It considers the overall background conditions - the need to rebalance in mainland China after years of hectic economic growth; governance transition and democratic consolidation in Taiwan; and governance crisis in Hong Kong under a regime of uncertain legitimacy. It examines the various actors in the policy-making process - the civic engagement of ordinary people and the roles of legislators, mass media and bureaucracy - and discusses how these actors interact in a range of different policy cases. Throughout the book contrasts the different approaches in the three different jurisdictions, and assesses how the policy-making process is changing and how it is likely to change further.

Bulletin of Electrical Engineering and Informatics-Tole Sutikno Bulletin of Electrical Engineering and Informatics (Buletin Teknik Elektro dan Informatika) ISSN: 2089-3191, e-ISSN: 2302-9285 is open to submission from scholars and experts in the wide areas of electrical, electronics, instrumentation, control, telecommunication and computer engineering from the global world. Routledge Handbook of Political Corruption-Paul M. Heywood 2014-12-17 Since the early 1990s, a series of major scandals in both the financial and most especially the political world has resulted in close attention being paid to the issue of corruption and its links to political legitimacy and stability. Indeed, in many countries - in both the developed as well as the developing world - corruption seems to have become almost an obsession. Concern about corruption has become a powerful policy narrative: the explanation of last resort for a whole range of failures and disappointments in the fields of politics, economics and culture. In the more established democracies, worries about corruption have become enmeshed in a wider debate about trust in the political class. Corruption remains as widespread today, possibly even more so, as it was when concerted international attention started being devoted to the issue following the end of the Cold War. This Handbook provides a showcase of the most innovative and exciting research being conducted in Europe and North America in the field of political corruption, as well as providing a new point of reference for all who are interested in the topic. The Handbook is structured around four core themes in the study of corruption in the contemporary world: understanding and defining the nature of corruption; identifying its causes; measuring its extent; and analysing its consequences. Each of these themes is addressed from various perspectives in the first four sections of the Handbook, whilst the fifth section explores new directions that are emerging in corruption research. The contributors are experts in their field, working across a range of different social-science perspectives.

The Politics of Heritage in Africa-Derek Peterson 2015-03-02 This book shows African heritage to be a mode of political organisation - where heritage work has a uniquely wide currency.

Interpreting WTO Agreements-Asif H. Qureshi 2015-01-29 This second edition identifies the problems of interpreting WTO agreements, addressing the legislative developments and updating the case law.

Betting the Farm on a Drought-Seamus McGraw 2015-04-15 Climate change has become one of the most polarizing issues of our time. Extremists on the left regularly issue hyperbolic jeremiads about the impending destruction of the environment, while extremists on the right counter with crass, tortured denials. But out in the vast middle are ordinary people dealing with stronger storms and more intense droughts than they've ever known. This middle ground is the focus of *Betting the Farm on a Drought*, a lively, thought-provoking book that lays out the whole story of climate change—the science, the math, and most importantly, the human stories of people fighting both the climate and their own deeply held beliefs to find creative solutions to a host of environmental challenges. Seamus McGraw takes us on a trip along America's culturally fractured back roads and listens to farmers and ranchers and fishermen, many of them people who are not ideologically, politically, or in some cases even religiously inclined to believe in man-made global climate change. He shows us how they are already being affected and the risks they are already taking on a personal level to deal with extreme weather and its very real consequences for their livelihoods. McGraw also speaks to scientists and policymakers who are trying to harness that most renewable of American resources, a sense of hope and self-reliance that remains strong in the face of daunting challenges. By bringing these voices together, *Betting the Farm on a Drought* ultimately becomes a model for how we all might have a pragmatic, reasoned conversation about our changing climate.

Mathematical Combinatorics, Vol. 2/2013-Linfan Mao Papers on S-Denying a Theory, Characterizations of the Quaternionic Mannheim Curves In Euclidean space, Smarandache Seminormal Subgroupoids, A Note on Odd Graceful Labeling of a Class of Trees, The Kropina-Randers Change of Finsler Metric and Relation Between Imbedding Class Numbers of Their Tangent Riemannian Spaces, and other topics. Contributors: Agboola A.A.A., Florentin Smarandache, Linfan Mao, P.Siva Kota Reddy, H.J.Siamwalla, A.S.Muktibodh, Mathew Varkey T.K., Shajahan A., H.S.Shukla, O.P.Pandey, Honey Dutt Josh, and others.

Media Ownership and Control-Suzanne Rab 2014-12-01 Competition and diversity in media and communications are fundamental to a healthy economy and democracy. In India and internationally there is no consensus on the exact manner and scope of interventions that are appropriate to protect competition and pluralism in media markets. Many emerging economies including India are seeking to adopt their own regulation in this area taking their lead from the UK. The issues have been brought into sharp focus in India in recent years. First, the enactment and implementation of modern - but sector neutral - competition law under the Competition Act 2002 has caused a step change in regulation towards an economics and effects-based approach. Second, in 2013 the India telecoms regulator launched controversial reform proposals to apply a media-specific approach to ownership regulation. As academics, lawyers, businesses, regulators and policy-makers in India cast a glance at the international experience, this book examines the legal, economic and policy issues relating to regulation of ownership and control of media markets. The focus of comparative assessment is on examples from the European Union, EU Member States and the US.

Nuclear Weapons and International Security-Ramesh Thakur 2015-02-11 This volume brings together more than three decades of research and writings by Professor Ramesh Thakur on the challenges posed by nuclear weapons. Following an introduction to the current nuclear state of play, the book addresses the challenge of nuclear weapons in three parts. Part I describes the scholar-practitioner interface in trying to come to grips with this challenge, the main policy impact on security strategy, and the various future nuclear scenarios. Part II addresses regional nuclear challenges from the South Pacific to East, South and

West Asia and thereby highlights serious deficiencies in the normative architecture of the nuclear arms control and disarmament regime. In the third and final part, the chapters discuss regional nuclear-weapon-free zones, NPT anomalies (and their implications for the future of the nuclear arms control regime) and, finally, assess the global governance architecture of nuclear security in light of the three Nuclear Security Summits between 2010 and 2014. The concluding chapter argues for moving towards a world of progressively reduced nuclear weapons in numbers, reduced salience of nuclear weapons in national security doctrines and deployments, and, ultimately, a denuclearized world. This book will be of much interest to students of nuclear proliferation, global governance, international organisations, diplomacy and security studies.

The Death of Money-James Rickards 2014-04-08 The next financial collapse will resemble nothing in history. . . . Deciding upon the best course to follow will require comprehending a minefield of risks, while poised at a crossroads, pondering the death of the dollar. The U.S. dollar has been the global reserve currency since the end of World War II. If the dollar fails, the entire international monetary system will fail with it. But optimists have always said, in essence, that confidence in the dollar will never truly be shaken, no matter how high our national debt or how dysfunctional our government. In the last few years, however, the risks have become too big to ignore. While Washington is gridlocked, our biggest rivals—China, Russia, and the oil-producing nations of the Middle East—are doing everything possible to end U.S. monetary hegemony. The potential results: Financial warfare. Deflation. Hyperinflation. Market collapse. Chaos. James Rickards, the acclaimed author of *Currency Wars*, shows why money itself is now at risk and what we can all do to protect ourselves. He explains the power of converting unreliable investments into real wealth: gold, land, fine art, and other long-term stores of value.

China and International Investment Law-Wenhua Shan 2014-10-31 The first volume in the Silk Road Studies in International Economic Law Series, *China and International Investment Law: Twenty Years of ICSID Membership* examines cutting-edge issues of international investment law and arbitration in interaction with China, the second largest economy of the world.

Law Commission: Fiduciary Duties of Investment Intermediaries: A Consultation Paper - Consultation Paper No 215-Great Britain. Law Commission 2013

Adaptation and mitigation policies in Cameroon-Félicien Kengoum The purpose of this study is to identify new synergistic pathways between climate change mitigation and adaptation policies in Cameroon using an approach based on a literature review of the political processes that led to the introduction of the two strategies. The common feature of the two political processes is the absence of strategy in Cameroon. The country is finding it difficult to assimilate and coordinate these processes at the national level. More attention is being given to mitigation than to adaptation. In any case, it is difficult to formulate any political options without complete studies on the responses to the drivers of deforestation and forest degradation and on the vulnerability of the forest populations and their capacity to absorb climate shocks.

Triumph and Demise-Paul Kelly 2014-08-21 Drawing on more than sixty on-the-record interviews with all the major players, *Triumph and Demise* is full of remarkable disclosures. It is the inside account of the hopes, achievements and bitter failures of the Labor Government from 2007 to 2013. Kevin Rudd and Julia Gillard came together to defeat John Howard, formed a brilliant partnership and raised the hopes of the nation. Yet they fell into tension and then hostility under the pressures of politics and policy. Veteran journalist Paul Kelly probes the dynamics of the Rudd-Gillard partnership and dissects what tore them apart. He tells the full story of Julia Gillard's tragedy as our first female prime minister—her character, Rudd's destabilisation, the carbon tax saga and how Gillard was finally pulled down on the eve of the 2013 election. Kelly documents the most misunderstood event in these years—the rise of Tony Abbott and the reason for his success. It was Abbott's performance that denied Rudd and Gillard the chance to recover. Labor misjudged Abbott and paid the price. Kelly writes with a keen eye and fearless determination. His central theme is that Australian politics has entered a crisis of the system that, unless corrected, will diminish the lives of all Australians.

Club and Prescription Drug Abuse-Valerie Bodden 2014 This title examines how inhalants and club, prescription, and over-the-counter (OTC) drugs affect individuals and society, investigates how people are working to put an end to drug abuse, and analyzes the controversies and conflicting viewpoints surrounding the issue. Features include a glossary, selected bibliography, websites, source notes, and an index, plus a timeline and essential facts. Aligned to Common Core Standards and correlated to state standards. Essential Library is an imprint of Abdo Publishing, a division of ABDO.

Geological Survey Water-supply Paper- 1970

Application and Theory of Petri Nets and Concurrency-Jose-Manuel Colom 2013-06-19 This book constitutes the refereed proceedings of the 34th International Conference on Applications and Theory of Petri Nets and Concurrency, PETRI NETS 2013, held in Milan, Italy, in June 2013. The 18 regular papers and 2 tool papers presented were carefully reviewed and selected from 56 submissions. The book also contains 2 invited talks. All current issues on research and development in the area of Petri nets and related models of concurrent systems are addressed.

Sessional Papers- 1903 "Report of the Dominion fishery commission on the fisheries of the province of Ontario, 1893", issued as vol. 26, no. 7, supplement.

Saving Europe-Carlo Bastasin 2015-01-23 In this gripping narrative, Carlo Bastasin reconstructs the main political decisions of the euro crisis, unveiling the hidden interests and the secret diplomacy behind the scene. The European dream was both the rejection of war and the creation of a new spirit of peaceful cooperation. Yet confrontation has been the hallmark of the euro crisis, and national opportunistic gimmicks have driven the awkward attempts to solve the crisis itself. Today, Europe is in a crisis of democracy, which Bastasin has dubbed, "the first War of Interdependence of the global age." Praise for the first edition of *Saving Europe* Bastasin does an admirable job in analysing the euro-zone's economic challenges and is a sure-footed guide through the seemingly endless European Union summit meetings that were supposed to resolve them. He also has an eye for the human detail that makes his sad account of institutional muddle surprisingly compelling. — *Financial Times* Bastasin's book is worth reading for its detailed political narrative of the eurozone crisis to date, focusing on the interaction among decision-makers in Europe's capitals. — *Foreign Affairs* A reconstruction that may be considered definitive. Revelations on the European negotiations are written with talent and go hand in hand with no-esoteric economic analysis and with the right amount of realism to reach the political substance. — *Corriere della Sera* Anyone looking for general knowledge and deeper understanding of the crisis, I can recommend a formidable analysis by Carlo Bastasin: *Saving Europe*. The author is a very unusual combination of a qualified economist and driven journalism. — *Svenska Dagbladet*

Essays on the Evolution of the Post-Apartheid State-Mapungubwe Institute for Strategic Reflection (MISTRA) 2014-10-01 This book critically examines the challenges, successes, and failures of the post-1994 South African state against the humane values enshrined in its constitution: nonracial democracy and respect for all generations of human rights—civil, political, social, economic, resources and the environment and gender and communication. The book sheds light on the difficulties faced by the State when trying to bring together a diverse society comprised of traditional South African, Western-based and "other" African (immigrant) cultures into a cohesive nation with a common South African identity. The views of the essays may not be entirely consistent and the issues they raise may be contentious. This merely affirms the truism that the State is a contested terrain. The aim of this book is to deepen the search for an understanding of the theory of the State as it applies to a transforming society such as ours and to trudge the dividing line between theory and practice so they can feed into each other in a progressive spiral towards the desired end-state.

Annual Report 2013 of the Institute for Nuclear and Energy Technologies-Schulenberg, Thomas 2014-09-23

UNICORE Summit 2013-Valentina Huber 2013

The Oxford Companion to the Economics of China-Shenggen Fan 2014-10-30 China's rise as an economic powerhouse raises a number of questions that are the subject of lively debate. How did the country do it? How applicable are the lessons of China's economic reform of the past thirty years to the challenges it faces in the next three decades? What does the detailed pattern of China's success and challenges look like at the sub-sectoral and sub-national levels, and what does this mean for future policy? How will China's role as a global economic player evolve? The Oxford Companion to the Economics of China presents an original collection of perspectives on the Chinese economy's past, present, and future: 99 entries written by the leading China analysts of our time. The topics covered include: the China model, future prospects for China, China and the global economy, trade and the Chinese economy, macroeconomics and finance, urbanisation, industry and markets, agriculture and rural development, land, infrastructure, and environment, population and labour, dimensions of wellbeing and inequality, health and education, gender equity, regional divergence in China, and a selection of perspectives on some of China's provinces. The Editors are four global leaders in Chinese economic analysis and policy who between them have held or hold the following positions: Director General, International Food Policy Research Institute; Co-Editor, *China Economic Review*; President Chinese Economists Society; Assistant Director of Research at the IMF; Principal Adviser to the Chief Economist of the World Bank; and Professors of Economics at Ivy League Universities.

Contesting History-Jeremy Black 2014-03-13 *Contesting History* is an authoritative guide to the positive and negative applications of the past in the public arena and what this signifies for the meaning of history more widely. Using a global, non-Western model, Jeremy Black examines the employment of history by the state, the media, the national collective memory and others and considers its fundamental significance in how we understand the past. Moving from public life pre-1400 to the struggle of ideologies in the 20th century and contemporary efforts to find meaning in historical narratives, Jeremy Black incorporates a great deal of original material on governmental, social and commercial influences on the public use of history. This includes a host of in-depth case studies from different periods of history around the world, and coverage of public history in a wider range of media, including TV and film. Readers are guided through this material by an expansive introduction, section headings, chapter conclusions and a selected further reading list. Written with eminent clarity and breadth of

knowledge, Contesting History is a key text for all students of public history and anyone keen to know more about the nature of history as a discipline and concept.

The House of Commons-Emma Crewe 2015-04-23 The House of Commons is one of Britain's mysterious institutions: constantly in the news yet always opaque. In this ground-breaking anthropological study of the world's most famous parliament, Emma Crewe reveals the hidden mechanisms of parliamentary democracy. Examining the work of Members of Parliament - including neglected areas such as constituencies and committees - this book provides unique insights into the actual lives and working relationships of parliamentarians. 'Why do the public loathe politicians but often love their own MP?' the author asks. The antagonistic façade of politics irritates the public who tend to be unaware that, backstage, democracy relies on MPs consulting, compromising and cooperating across political parties far more than is publicly admitted. As the book shows, this is only one of myriad contradictions in the labyrinths of power. Based on unprecedented access and two years of interviews and research in the Palace of Westminster and MPs' constituencies, The House of Commons: An Anthropology of MPs at Work challenges the existing scholarship on political institutions and party politics. Moving beyond the narrow confines of rational choice theory and new institutionalism, Emma Crewe presents a radical alternative to the study of British politics by demonstrating that all of its processes hinge on culture, ritual and social relations. A must-read for anyone interested in political anthropology, politics, or the Westminster model.

Urban Economics and Urban Policy-Paul C. Cheshire 2014-05-30 øThis groundbreaking book will prove to be an invaluable resource and a rewarding read for academics, practitioners and policymakers interested in the economics of urban policy, urban planning and development, as well as international studies and innov
