Model pembelajaran berbasis kearifan lokal-M. Agus Martawijaya 2016-01-01 Buku dengan judul "Model Pembelajaran Berbasis Kearifan Lokal" disusun untuk membantu pendidik dan dosen atau calon pendidik dan mahasiswa pendidikan atau non-pendidikan, pakar pendidikan, dan praktisi pendidikan, yang hendak merencanakan dan mengelola pembelajaran. Dalam pelaksanaan pembelajaran, aktivitas peserta didik berorientasi pada penyelidikan ilmiah (scientific inquiry) yang dilakukan dengan mengintegrasikan budaya kearifan lokal suatu daerah. Salah satu kearifan lokal suatu daerah yang diintegrasikan dalam pembelajaran adalah ungkapan a'bulo sibatang dengan mengutamakan norma assamaturuseng, yang diperoleh dari kearifan lokal masyarakat Sulawesi Selatan dan Sulawesi Barat pada umumnya, serta masyarakat pulau Barrang Lompo pada khususnya.

Pembangunan Pertanian dalam Pusaran Kearifan Lokal-Prof. Dr. Ir. H. Zulkifli Sjamsir, M.M. 2017-11-30 Sektor pertanian merupakan sektor yang mempunyai peranan strategis dalam struktur pembangunan perekonomian nasional. Sektor ini merupakan sektor yang tidak endapatkan perhatian secara serius dari pemerintah dalam pembangunan bangsa. Mulai dari proteksi,kredit hingga kebijakan lain tidak satu pun yang menguntungkan bagi sektor ini. Program-program pembangunan pertanian yang tidak terarah tujuannya bahkan semakin menjerumuskan sektor ini pada kehancuran. Meski demikian sektor ini merupakan sektor yang sangat banyak menampung luapan tenaga kerja dan sebagian besar penduduk kita tergantung padanya. Perjalanan pembangunan pertanian Indonesia hingga saat ini masih belum dapat menunjukkan hasil yang maksimal jika dilihat dari tingkat kesejahteraan petani dan kontribusinya pada pendapatan nasional. Pembangunan pertanian di Indonesia dianggap penting dari keseluruhan pembangunan nasional. Ada beberapa hal yang mendasari mengapa pembangunan pertanian di Indonesia mempunyai peranan penting, antara lain: potensi Sumber Daya Alam yang besar dan beragam, pangsa terhadap pendapatan nasional yang cukup besar, besarnya pangsa terhadap ekspor nasional, besarnya penduduk Indonesia yang menggantungkan hidupnya pada sektor ini, perannya dalam penyediaan pangan masyarakat dan menjadi basis pertumbuhan di pedesaan. Potensi pertanian Indonesia yang besar namun pada kenyataannya sampai saat ini sebagian besar dari petani kita masih banyak yang termasuk golongan miskin. Hal ini mengindikasikan bahwa pemerintah pada masa lalu bukan saja kurang memberdayakan petani tetapi juga terhadap sektor pertanian keseluruhan. Pembangunan pertanian pada masa lalu mempunyai beberapa kelemahan, yakni hanya terfokus pada usaha tani, lemahnya dukungan kebijakan makro, serta pendekatannya yang sentralistik. Akibatnya usaha pertanian di Indonesia sampai saat ini masih banyak didominasi oleh usaha dengan: (a) skala kecil, (b) modal yang terbatas, (c) penggunaan teknologi yang masih sederhana, (d) sangat dipengaruhi oleh musim, (e) wilayah pasarnya lokal, (f) umumnya berusaha dengan tenaga kerja keluarga sehingga menyebabkan terjadinya involusi pertanian (pengangguran tersembunyi), (g) akses terhadap kredit, teknologi dan pasar sangat rendah, (h) pasar komoditi pertanian yang sifatnya mono/oligopsoni yang dikuasai oleh pedagang-pedagang besar sehingga terjadi eksploitasi harga yang merugikan petani. Selain itu, masih ditambah lagi dengan permasalahan-permasalahan yang menghambat pembangunan pertanian di Indonesia seperti pembaruan agraria (konversi lahan pertanian menjadi lahan non pertanian) yang semakin tidak terkendali lagi, kurangnya penyediaan benih bermutu bagi petani, kelangkaan pupuk pada saat musim tanam datang.

Knowledge to Policy-Fred Carden 2009-04-06 Does research influence public policy and decision-making and, if so, how? This book is the most recent to address this question, investigating the effects of research in the field of international development. It starts from a sophisticated understanding about how research influences public policy and decision-making. It shows how research can contribute to better governance in at least three ways: by encouraging open inquiry and debate, by empowering people with the knowledge to hold governments accountable, and by enlarging the array of policy options and solutions available to the policy process. Knowledge to Policy: Making the Most of Development Research examines the consequences of 23 research projects funded by Canada's International Development Research Centre (IDRC). Key findings and case studies from Asia, Africa, and Latin America are presented in a reader-friendly, journalistic style, giving the reader a deeper grasp and understanding of approaches, contexts, relationships and events. The book will be useful to academics, researchers and students of political science, public administration, development studies, and international affairs; professionals in donor and development organizations worldwide; policy- and decision-makers in government (local and national levels) and international arenas (particularly trade and finance); and development agencies and civil society (non-governmental) organizations concerned with integrating the voice of citizens into policy- and decision-making processes.

Indigenous Environmental Knowledge and its Transformations-Alan Bicker 2003-12-16 The first concerted critical examination of the uses and abuses of indigenous knowledge. The contributors focus on a series of interrelated issues in their interrogation of indigenous knowledge and its specific applications within the localised contexts of particular Asian societies and regional cultures. In particular they explore the problems of translation and mistranslation in the local-global transference of traditional practices and representations of resources.

Beyond Knowledge-Larisa V. Shavinina 2004-05-20 Some aspects of giftedness and creativity cannot be explained by cognitive, developmental, personality, or social approaches considered in isolation. At the intersection of these approaches is something invisible, deeply hidden, but at the same time very important--the extracognitive facets of high ability. This volume brings together chapters by leading specialists from around the world responsible for much of the current research in this field, presenting a wide range of perspectives for understanding exceptional achievement. "High ability" refers to human abilities described by terms, such as giftedness, talent, creativity, excellence, genius, child prodigy, exceptional leadership, and wisdom. "Extracognitive factors" refer to phenomena like internally developed standards and subjective norms of intellectually creative behavior; specific intellectual intentions and beliefs that influence exceptional achievements; specific feelings that scientific geniuses and other highly creative individuals say contribute to their advanced development; specific preferences and intellectual values; luck, chance, intuition, and other similar phenomena in extraordinary development and performance; and social, cultural, and historical influences on talent development. Although there are many books about the cognitive bases of high ability, this volume uniquely discusses the foundations of such achievements in extracognitive factors as defined here, thus providing a rich source of information on this topic to researchers, practitioners, and graduate students of education, psychology, business, and administration who work in the area of high ability.

Teaching for Wisdom-Michel Ferrari 2008-10-14 This book examines if it is possible to teach wisdom. It considers how people at different times and places have engaged the age-old question of how (or whether) we can learn to live a good life, and what that life is like. Offering a range of perspectives, coverage considers Greek and Confucian philosophy; Christian, Islamic and Buddhist religion; African tradition, as well as contemporary scientific approaches to the study of wisdom.

Gus Dur-Greg Barton 2002 In October 1999, Abdurrahman Wahid, almost blind and recovering from a nearfatal stroke, was elected as Indonesia's fourth president. Referred to as 'Indonesia's surprising new president' by the Economist, the man who had commanded the highest respect of his fellow countrymen for his lifetime devotion to public service, liberal democracy and tolerant Islam, was impeached in humiliating and controversial circumstances less than two years later. Wise to some, insolent to others, Abdurrahman's mercurial style of leadership constantly confounded critics and ultimately caused him to be widely misunderstood by both domestic and international observers. For the first time, biographer Greg Barton delves beneath the surface and gives us a unique insight into the man and his world drawn from his long relationship with Gus Dur - including being at his side during the final extraordinary months of the presidency. Those interested in the drama of modern Indonesian politics will find this book provides a fascinating and invaluable account of the enigmatic Gus Dur.

Macmillan Dictionary of Anthropology-Charlotte Seymour-Smith 1986 4e de couverture : Anthropology is one of the most challenging and rapidly expanding areas of human knowledge today. This Dictionary aims to be a useful guide to the subject for the student and interested layman as well as for the academic anthropologist. It is unique in the existing literature in providing in a single volume coverage of basic concepts, key theoretical issues and the work of some 250 British, American and European anthropologists. It covers the subject from the early ethnographers to the most recent research, offering clear definitions of such formidable topics as the work of Levi-Strauss or the influence of semiology. The 2000 entries are fully cross-referenced and are supplemented by an extensive bibliography. Aimed primarily at students, it should provide useful reference not only for anthropologists, but for students of related disciplines at a time when the academic reputation of the subject, and the need for historians, sociologists, political scientists among others to be familiar with its central concepts and thinkers has never been so great.

Humanism in Islam-Marcel Boisard 1987-10-01 Humanism in Islam - The West's generalized fear and lack of intellectual honesty toward Islam prevent it from recognizing the wealth of benefits Islam bestows on mankind. Demonstrates that Islam and Islamic law can make a vital contribution to the protection of human rights worldwide. Freed from European colonial tutelage and representing almost a billion souls, grouped in approximately forty states, the Muslims have entered the international scene without really having any other choice but to imitate the existing institutions, or to accept provisions in which they, historically speaking, have had no participation. Nevertheless, the process of modernization has not lured the Muslims away from the remembrance of a glorious heritage. On the contrary, wherever the movement of Westernization has been too brutal, it has run into a religious challenge. Islam thus reappeared as one of the grand moral and political forces of the contemporary world. Humanism in Islam has not been drafted only out of sympathy for the Muslims but also on account of historical evidence: Islamic civilization was the first to outline clear and mandatory provisions for protecting the destiny of man and society, and for creating order in the ties between peoples. As to its general character, this work attempts to encourage a certain Western public to abandon its ethnocentrism in order to better understand the legitimate aspirations - expressing themselves sometimes in chaos - of the present-day Muslims.

The Wisdom of Crows-James Surowiecki 2005-08-16 In this fascinating book, New Yorker business columnist James Surowiecki explores a deceptively simple idea: Large groups of people are smarter than an elite few, no matter how brilliant—better at solving problems, fostering innovation, coming to wise decisions, even predicting the future. With boundless erudition and in delightfully clear prose, Surowiecki ranges across fields as diverse as popular culture, psychology, ant biology, behavioral economics, artificial intelligence, military history, and politics to show how this simple idea offers important lessons for how we live our lives, select our leaders, run our companies, and think about our world.

Access to Environmental Justice: A Comparative Study-Andrew Harding 2007-06-05 Although it is commonly asserted that enhanced citizen participation results in better environmental policy and improved enforcement of environmental standards, this hypothesis has rarely been subject to testing on a comparative basis. The contributors to this book set out to study the extent to which citizens can and do exert influence over their urban environments through the legal (and extra-legal) 'gateways' in eleven countries spanning several continents as well as different climates, levels and type of economic development, and national legal and constitutional systems, as well as exhibiting a different set of environmental problems. One interviewee questioned about access to environmental justice, dryly remarked that in his city there was no environment, no justice and no access to either. Yet this view, as will be seen, requires to be nuanced. While few people will be surprised by the finding that legal gateways to environmental justice are largely ineffective, the reasons for this are revealing; but also the richness of detail and the comparisons between the different countries, and also the positive aspects which surfaced in several instances, were indeed both encouraging and sometimes surprising. This book presents the first comparative survey of access to environmental justice, and will be of considerable use to lawyers, policy-makers, activists and scholars who are concerned with the environmental issues which so profoundly affect and afflict our habitat and conditions of social justice throughout the world.

A Handbook of Wisdom-Robert Sternberg 2005-06-13 A topic ignored in mainstream scientific inquiry for decades, wisdom is beginning to return to the place of reverence that it held in ancient schools of intellectual study. A Handbook of Wisdom, first published in 2005, explores wisdom's promise for helping scholars and lay people to understand the apex of human thought and behavior. At a time when poor choices are being made by notably intelligent and powerful individuals, this book presents analysis and review on a form of reasoning and decision-making that is not only productive and prudent, but also serves a beneficial purpose for society. A Handbook of Wisdom is a collection of chapters from some of the most prominent scholars in the field of wisdom research. Written from multiple perspectives, including psychology, philosophy, and religion, this book gives the reader an in-depth understanding of wisdom's past, present, and possible future direction within literature, science, and society.

Science Teaching and the Development of Thinking-Anton E. Lawson 1995 To provide future science teachers with the methods and tools to present science, this text integrates new methods and theories with more traditional existing programs to meet the needs of almost every instructor. It encourages personal development of critical-thinking skills in students as well as professional development for the future teacher by encouraging establishment of curriculum guidelines. The text also stresses an active learning environment by utilizing learning cycles and in-depth science investigation activities.

What Teachers Need to Know about Numeracy-Westwood 2008 There is an increasing need for numeracy skills in all aspects of life. This book explores the issues that are emerging regarding the teaching of these skills, beginning with preschool and the early years of primary school through to adults with poor numeracy skills. It draws on research and relevant literature from several different countries to provide a comprehensive overview of the subject and contains many links to other sources of information and additional resources.

Transforming the Multicultural Education of Teachers-Michael J. Vavrus 2002-09-06 Recognizing the responsibility institutions have to prepare teachers for today's diverse classrooms, Vavrus shows us how to incorporate transformative multicultural education into teacher education curriculum, pedagogy, and evaluation. Placing race, racism, antiracism, and democracy at the center of his analyses and recommendation, this volume provides: - Concrete structural suggestions for including transformative multicultural education in higher education and K-12 in-service programs. -A multicultural critique of new NCATE accreditation standards for teacher education programs that offers reconceptualized assessment procedures. -The historical roots of transformative multicultural education that incorporates issues of white privilege and racialized color blindness, anti-racist pedagogy, racial identity among teachers, and critical race theory. - A discussion of globalization that emphasizes its contemporary economic effects on social and educational inequities.

Essentials of Public Health Communication-Claudia Parvanta 2010-10-25 The field of communications is increasingly recognized as a powerful tool in addressing the world's most imperative public health challenges. Effective communication in health campaigns can inform, empower, or persuade individuals to adopt healthier lifestyles as well as foster public debate and policy change. Featuring a full chapter on informatics, this book is devoted to the competencies in health communication and informatics recommended by the Association of Schools of Public Health. Regulating Aversion-Wendy Brown 2009-01-10 Tolerance is generally regarded as an unqualified achievement of the modern West. Emerging in early modern Europe to defuse violent religious conflict and reduce persecution, tolerance today is hailed as a key to decreasing conflict across a wide range of other dividing lines-- cultural, racial, ethnic, and sexual. But, as political theorist Wendy Brown argues in *Regulating Aversion*, tolerance also has dark and troubling undercurrents. Dislike, disapproval, and regulation lurk at the heart of tolerance. To tolerate is not to affirm but to conditionally allow what is unwanted or deviant. And, although presented as an alternative to violence, tolerance can play a part in justifying violence--dramatically so in the war in Iraq and the War on Terror. Wielded, especially since 9/11, as a way of distinguishing a civilized West from a barbaric Islam, tolerance is paradoxically underwriting Western imperialism. Brown's analysis of the history and contemporary life of tolerance reveals it in a startlingly unfamiliar guise. Heavy with norms and consolidating the dominance of the powerful, tolerance sustains the abjection of the tolerated and equates the intolerant with the barbaric. Examining the operation of tolerance in contexts as different as the War on Terror, campaigns for gay rights, and the Los Angeles Museum of Tolerance, Brown traces the operation of tolerance in contemporary struggles over identity, citizenship, and civilization.

A History of Modern Indonesia since c.1200-M.C. Ricklefs 2008-09-10 Recognised as the most authoritative general account of Indonesia, this revised and expanded fourth edition has been updated in the light of new scholarship. The Case for STEM Education-Rodger W. Bybee 2013 "If you are interested in STEM education, policies, programs or practices, or you work on STEM in some capacity at any level, the case for STEM education will prove to be valuable reading. Author Rodger W. Bybee has written this book to inspire individuals in leadership roles to better understand and take action on STEM initiatives. The book's 10 chapters accomplish several tasks: Put STEM in context by outlining the challenges facing STEM education, drawing lessons from the Sputnik moment of the 1950s and 1960s, and contrasting contemporary STEM with other education reforms; Explore appropriate roles for the federal government, as well as states, districts, and individual schools; Offer several ideas and recommendations you can use to develop action plans for STEM. With an emphasis on both thinking and acting. The case for STEM education is a must-read for leaders at all levels: national and state policy makers, state-level educators responsible for STEM initiatives, college and university faculty who educate future STEM teachers, local administrators who make decisions about district and school programs, and teachers who represent STEM disciplines." - Back cover.

Urban Sustainability in Theory and Practice-Paul James 2014-09-19 Cities are home to the most consequential current attempts at human adaptation and they provide one possible focus for the flourishing of life on this planet. However, for this to be realized in more than an ad hoc way, a substantial rethinking of current approaches and practices needs to occur. *Urban Sustainability in Theory and Practice* responds to the crises of sustainability in the world today by going back to basics. It makes four major contributions to thinking about and acting upon cities. It provides a means of reflexivity learning about urban sustainability in the process of working practically for positive social development and projected change. It challenges the usually taken-for-granted nature of sustainability practices while providing tools for modifying those practices. It emphasizes the necessity of a holistic and integrated understanding of urban life. Finally it rewrites existing dominant understandings of the social whole such as the triple-bottom line approach that reduce environmental questions to externalities and social questions to background issues. The book is a much-needed practical and conceptual guide for rethinking urban engagement. Covering the full range of sustainability domains and bridging discourses aimed at academics and practitioners, this is an essential read for all those studying, researching and working in urban geography, sustainability assessment, urban planning, urban sociology and politics, sustainable development and environmental studies.

Eco-city Planning-Tai-Chee Wong 2011-05-02 Eco-city planning is a key element of urban land use planning in perspective and of ongoing debate of environmental urban sustainable development with a spatial and practical dimension. The conceptual basis of ecological planning is that we can no longer afford to be merely human-centred in approach. Instead, the interdependency of human and non-human species has forced us to appreciate the 'rights' and 'intrinsic values' of non-human species in our pursuit for a sustainable ecosystem. This volume has as approach an emphasis on environmental planning policies whereby, for example, energy saving, anti-pollution measures, use of non-car modes, construction of green buildings, safeguarding of nature and natural habitats in urban areas, and use of more renewable resources are promotional norms. Their aims and leading outcome serve to protect the Earth from adverse effects of global warming and different sources of pollution threatening the quality of life of human societies.

Being After Rousseau-Richard L. Velkley 2002-05 In *Being after Rousseau*, Richard L. Velkley presents Jean-Jacques Rousseau as the founder of a modern European tradition of reflection on the relation of philosophy to culture—a reflection that calls both into question. Tracing this tradition from Rousseau to Immanuel Kant, Friedrich Schelling, and Martin Heidegger, Velkley shows late modern philosophy as a series of ultimately unsuccessful attempts to resolve the dichotomies between nature and society, culture and civilization, and philosophy and society that Rousseau brought to the fore. The Rousseauian tradition begins, for Velkley, with Rousseau's criticism of modern political philosophy. Although the German Idealists such as Schelling accepted much of Rousseau's critique, they believed, unlike Rousseau, that human wholeness could be attained at the level of society and history. Heidegger and Nietzsche questioned this claim, but followed both Rousseau and the Idealists in their vision of the philosopher-poet striving to recover an original wholeness that the history of reason has distorted.

Tourism and Poverty Alleviation-World Tourism Organization 2002 Tourism is a key export for many developing countries, and this industry can play a significant role in promoting balanced sustainable development which generates benefits for poorer communities. This report reflects this concern by examining the contribution which tourism development can make to the elimination of poverty in developing countries, as well as making recommendations for action by governments, the industry, development agencies and local communities.

Tourism: A Community Approach (RLE Tourism)-Peter E Murphy 2013-04-02 Written in 1989 when the modern tourist industry had reached a crucial stage in its development, when increased mobility and affluence had led to more extensive and extravagant travel, and competition within the industry had intensified, this book is comprehensive examination of tourism development. The author provides a new perspective for its evaluation, and a suggested strategy for its continued development and evolution. He examines tourism from the viewpoint of destination areas and their aspirations, and recommends an ecological, community approach to developing and planning - one which encourages local initiative, local benefits, and a tourism product in harmony with the local environment and its people.
