Handbook of Contemporary Paganism-Murphy Pizza 2009-01 Contemporary Paganism is a movement that is still young and establishing its identity and place on the global religious landscape. The members of the movement are simultaneously growing, unifying, and maintaining its characteristic diversity of traditions, identities, and rituals. The modern Pagan movement has had a restless formation period but has also been the catalyst for some of the most innovative religious expressions, praxis, theologies, and communities. As Contemporary Paganism continues to grow and mature, new angles of inquiry about it have emerged and are explored in this collection. This examination and study of contemporary Paganism contributes new ways to observe and examine other religions, where innovations, paradoxes, and inconsistencies can be more accurately documented and explained.

Happy City: Transforming Our Lives Through Urban Design-Charles Montgomery 2013-11-12 A globe-trotting, eye-opening exploration of how cities can—and do—make us happier people Charles Montgomery's Happy City will revolutionize the way we think about urban life. After decades of unchecked sprawl, more people than ever are moving back to the city. Dense urban living has been prescribed as a panacea for the environmental and resource crises of our time. But is it better or worse for our happiness? Are subways, sidewalks, and tower dwelling an improvement on the car-dependence of sprawl? The award-winning journalist Charles Montgomery finds answers to such questions at the intersection between urban design and the emerging science of happiness, and during an exhilarating journey through some of the world's most dynamic cities. He meets the visionary mayor who introduced a "sexy" lipstick-red bus to ease status anxiety in Bogotá; the architect who brought the lessons of medieval Tuscan hill towns to modern-day New York City; the activist who turned Paris's urban freeways into beaches; and an army of American suburbanites who have transformed their lives by hacking the design of their streets and neighborhoods. Full of rich historical detail and new insights from psychologists and Montgomery's own urban experiments, Happy City is an essential tool for understanding and improving our own communities. The message is as surprising as it is hopeful: by retrofitting our cities for happiness, we can tackle the urgent challenges of our age. The happy city, the green city, and the low-carbon city are the same place, and we can all help build it.

Written in an accessible style, this overview is tailored for believers as well as skeptics, scholars, and the idly curious. A glossary of neo-Pagan terms and an extensive bibliography are also included.

Fantasy and Belief-Danielle Kirby 2014-09-19 Religion and spirituality are being transformed in our late modern and secularising times. New forms of belief proliferate, often notable for not being limited to traditional systems of reference or expression. Increasingly, these new religions present worldviews which draw directly upon popular culture - or occulture - in fiction, film, art and the internet. Fantasy and Belief explores the context and implications of these types of beliefs through the example of the Otherkin community. The Otherkin are a loosely-affiliated group who believe themselves to be in some way more than just

human, their non-humanity often rooted in the characters and narratives of popular fantasy and science fiction. Challenging much current sociological thinking about spirituality and consumption, *Fantasy and Belief* reveals how popular occulture operates to recycle, develop, and disseminate metaphysical ideas, and how the popular and the sacred are combining in new ways in today's world.

Curse Tablets and Binding Spells from the Ancient World-John G. Gager 1999-10-28 In the ancient Greco-Roman world, it was common practice to curse or bind an enemy or rival by writing an incantation on a tablet and dedicating it to a god or spirit. These curses or binding spells, commonly called defixiones were intended to bring other people under the power and control of those who commissioned them. More than a thousand such texts, written between the 5th Century B.C.E. and the 5th Century C.E., have been discovered from North Africa to England, and from Syria to Spain. Extending into every aspect of ancient life--athletic and theatrical competitions, judicial proceedings, love affairs, business rivalries, and the recovery of stolen property--they shed light on a new dimension of classical study previously inaccessible. Here, for the first time, these texts have been translated into English with a substantial translator's introduction revealing the cultural, social, and historical context for the texts. This book will interest historians, classicists, scholars of religion, and those concerned with ancient magic.
