A Sceptic's Search for Meaning-Michael Willesee 2019-10-29 'Willesee has always been a news-hound in pursuit of a story.' Sydney Morning Herald Perfect for fans of Proof of Heaven, this part memoir, part investigation is a spellbinding spiritual quest around the world and deep into the heart of life's ultimate riddle. Is there life after death? Does God exist? How do you explain miracles? In a career spanning fifty years and thousands of stories, legendary Australian journalist Mike Willesee dared to pose the big questions as part of his ongoing quest for meaning. Born into the Catholic faith, with early ambitions to be a priest, he tried to escape his spiritual destiny by pursuing a path as an investigative journalist. But fate kept catching up, as A Sceptic's Search for Meaning reveals. He had a premonition his plane was going to crash, moments before it did. He found himself the neighbour of one of Australia's most passionate investigators of mystical phenomena, who convinced Mike to join him on his quest. Among many such adventures, Mike flew to Bolivia to interview Katya Rivas, dubbed 'God's secretary'. He watched as the barely literate woman who claimed never to have read the Bible wrote page after page of perfect theology in multiple languages. He also sat by her bed as blood started to ooze from her brow, her hands and her feet - the telltale signs of stigmata. Written in his final year as Mike fought a losing battle with cancer, A Sceptic's Search for Meaning is a moving and intriguing tale of one man's attempt to make sense of the profound mysteries of faith. PRAISE FOR MEMOIRS 'A cracking tale of good fortune, ambition, risk-taking, self-belief and driving curiosity.' Daily Telegraph

Identification and Control of Sheet and Film Processes-Andrew P. Featherstone 2012-12-06 Sheet and film processes include coating, papermaking, metal rolling, and polymer film extrusion. Products produced by these processes include paper, bumper stickers, plastic bags, windshield safety glass, and sheet metal. The total capitalization of industries that rely on these processes is well over \$ 500 billion worldwide. These processes are notorious for being difficult to control. The goal of this book is to present the theoretical background and practical techniques for the identification and control of sheet and film processes. It is explained why many existing industrial control systems perform poorly for sheet and film processes. Identification and control algorithms are described and illustrated which provide consistent and reliable product quality. These algorithms include an experimental design technique that ensures that informative data are collected during input-output experimentation, model identification techniques that produce a process model and an estimate of its accuracy, and control techniques that take into account actuator constraints as well as robustness to model uncertainties. The algorithms covered in this book are truly the state of the art. Variations on some of the algorithms have been implemented on industrial sheet and film processes. Other algorithms are in various stages of implementation. All of the algorithms have been applied to realistic simulation models constructed from industrial plant data; many of these studies are included in this book.

The Free Aceh Movement (GAM)-Kirsten E. Schulze 2004 This paper looks at the Aceh conflict since 1976 and more specifically the insurgent Free Aceh Movement??GAM. It aims to provide a detailed ideological and organizational ?map? of this organization in order to increase the understanding of its history, motivations, and organizational dynamics. Consequently this paper analyzes GAM?s ideology, aims, internal structure, recruitment, financing, weapons procurement, and its military capacity. The focus of this study is on the recent past, as the fall of Suharto not only allowed the Indonesia government to explore avenues other than force to resolve the Aceh conflict, but also provided GAM with the opportunity to make some changes to its strategy and to transform itself into a genuinely popular movement. It will be argued here that the key to understanding GAM in the post-Suharto era and the movement?s decisions, maneuvers and statements during the three years of intermittent dialogue can be found in the exiled leadership?s strategy of internationalization. This strategy shows that for GAM the negotiations, above all, were not a way to find common ground with Jakarta but a means to compel the international community to pressure the Indonesian government into ceding independence.This is the second publication in Policy Studies, a peer-reviewed East-West Center Washington series that presents scholarly analysis of key contemporary domestic and international political, economic, and strategic issues affecting Asia in a policy relevant manner.
