Insuring Tomorrow-Tony Cañas 2017-06-02 For several years, the Property Casualty Insurance Industry has been talking about a "looming talent crisis." Today, crisis is no longer looming, it's very much here. The average age of an insurance professional is around 60 years old and the number of insurance pros over 55 has increased by 74% in the decade before 2012. Making things worse insurance has a bad reputation in society and only 4% of Millennials report having an interest in working in the industry. In the last few years we have been hiring thousands of Millennials, but we haven't done a good job of engaging them and retaining them in the industry. This is your guidebook to not only keep your Millennials but grow them and help them fall in love with the insurance industry. Carly and Tony have been immersed in the topic for over five years, and since 2015 have been running the popular insurance blog InsNerds.com. Tony has also been speaking at industry conferences about how to engage and retain Millennials in the industry. His session has been described as fascinating, interesting and hilarious by audiences all over the country. But an hour long

presentation doesn't allow enough depth to really dig into the problem. This deeply researched book is our answer to this perplexing problem. Written in the easy to read style of InsNerds while also being informative, engaging and full of answers to the most perplexing questions and concerns about growing the next generation of insurance superstars. Finally, here is the answer to the most important insurance question of our time: Where will our future leaders come from?

The London Stock Exchange-Ronald Michie 2001-04-26 In 2001, the London Stock Exchange will be 200 years old, though its origins go back a century before that. This book traces the history of the London Stock Exchange from its beginnings around 1700 to the present day, chronicling the challenges and opportunities it has faced, avoided, or exploited over the years. Throughout, the history seeks to blend an understanding of the London Stock Exchange as an institution with that of the securities market of which it was - and is - such an important component. One cannot be examined satisfactorily without the other. Without a knowledge of both, for example, the causes of the 'Big Bang' of 1986 would forever remain a mystery. However, the history of the London Stock Exchange is not just worthy of study for what it reveals about the interaction between institution and market. Such was the importance of the London Stock Exchange that its rise to world dominance before 1914, its decline thereafter, and its renaissance from the mid-1980s, explain a great deal about Britain's own economic performance and the working of the international economy. For the first time a British economic institution of foremost importance is studied throughout its entire history, with regard to the roles played and the constraints under which it operated, and the results evaluated

against the background of world economic progress.

Pricing in General Insurance-Pietro Parodi 2014-10-15 Based on the syllabus of the actuarial industry course on general insurance pricing — with additional material inspired by the author’s own experience as a practitioner and lecturer — Pricing in General Insurance presents pricing as a formalised process that starts with collecting information about a particular policyholder or risk and ends with a commercially informed rate. The main strength of this approach is that it imposes a reasonably linear narrative on the material and allows the reader to see pricing as a story and go back to the big picture at any time, putting things into context. Written with both the student and the practicing actuary in mind, this pragmatic textbook and professional reference: Complements the standard pricing methods with a description of techniques devised for pricing specific products (e.g., non-proportional reinsurance and property insurance) Discusses methods applied in personal lines when there is a large amount of data and policyholders can be charged depending on many rating factors Addresses related topics such as how to measure uncertainty, incorporate external information, model dependency, and optimize the insurance structure Provides case studies, worked-out examples, exercises

inspired by past exam questions, and step-by-step methods for dealing concretely with specific situations Pricing in General Insurance delivers a practical introduction to all aspects of general insurance pricing, covering data preparation, frequency analysis, severity analysis, Monte Carlo simulation for the calculation of aggregate losses, burning cost analysis, and more.

Granite Mountain-Brendan McDonough 2016-05-03 The true story behind the events that inspired the major motion picture Only the Brave. A "unique and bracing" (Booklist) first-person account by the sole survivor of Arizona's disastrous 2013 Yarnell Hill Fire, which took the lives of 19 "hotshots"--firefighters trained specifically to battle wildfires. Brendan McDonough was on the verge of becoming a hopeless, inveterate heroin addict when he, for the sake of his young daughter, decided to turn his life around. He enlisted in the Granite Mountain Hotshots, a team of elite firefighters based in Prescott, Arizona. Their leader, Eric Marsh, was in a desperate crunch after four hotshots left the unit, and perhaps seeing a glimmer of promise in the skinny would-be recruit, he took a chance on the unlikely McDonough, and the chance paid off. Despite the crew's skepticism, and thanks in large part to Marsh's firm but loving encouragement, McDonough unlocked a latent drive and dedication, going on to successfully battle a number of blazes and eventually win the confidence of the men he came to call his brothers. Then, on June 30, 2013, while McDonough--"Donut" as he'd been dubbed by his team--served as lookout, they confronted a freak, 3,000-degree inferno in nearby Yarnell, Arizona. The relentless firestorm ultimately trapped his hotshot brothers, tragically killing all 19 of them within minutes. Nationwide, it was the greatest loss of firefighter lives since the 9/11 attacks. Granite Mountain is a gripping memoir that traces McDonough's story of finding his way out of the dead end of drugs, finding his purpose among the Granite Mountain Hotshots, and the minute-by-minute account of the fateful day he lost the very men who had saved him. A harrowing and redemptive tale of resilience in the face of tragedy, Granite Mountain is also a powerful reminder of the heroism of the people who put themselves in harm's way to protect us every day. many of us have put our faith in the financial services industry when
it comes to the stewardship of our wealth. Unfortunately, the
industry has consistently failed us on this front. The financial
services industry—including banks, brokerages, and insurance
companies—is unique among all others. Through effective
advertising and marketing, it's been able to evade being painted
with the brush other underperforming industries have, and in most
cases, their well-designed sales pitch has allowed them to
effectively prey on the emotional desires of investors. Based on
author David Loeper's nearly twenty-five years of experience with
this industry's inner workings, Stop the Investing Rip-off reveals the
real costs of the investments we make, details the false and
misleading information sold to us, and discusses the devastating
effects they can have on personal wealth. With this book as your
guide, you'll gain invaluable insights into the major segments of the
financial services industry, how they spin their offerings, and the
questions you need to ask before committing any money to a
financial product or service you may be interested in. Filled with in-
depth insights and practical advice, Stop the Investing Rip-off sheds
much-needed light on the often-unseen aspects of the financial

services industry—exposing what only insiders know—and shows you how to avoid the conflicts of interest that could compromise your financial well-being.

Insurance Law-James Fischer 2016-11-14 This treatise explains how certain principles or doctrines such as insurable interests, designation of insurers, and risk transference apply to property, life, liability, or other types of insurance. It also addresses insurance law issues and suggests lines of analysis to consider in order to better evaluate the merits of a claim. Other subjects include conceptualization, classification, marketing, indemnity, insurability, claim processes, and settlements. Also overviews insurance regulation, government sponsorship of insurance, and resolving disputed claims.
