Grading for Equity-Joe Feldman 2018-09-25 "Joe Feldman shows us how we can use grading to help students become the leaders of their own learning and lift the veil on how to succeed. . . . This must-have book will help teachers learn to implement improved, equity-focused grading for impact." --Zaretta Hammond, Author of Culturally Responsive Teaching & The Brain Crack open the grading conversation Here at last—and none too soon—is a resource that delivers the research base, tools, and courage to tackle one of the most challenging and emotionally charged conversations in today’s schools: our inconsistent grading practices and the ways they can inadvertently perpetuate the achievement and opportunity gaps among our students. With Grading for Equity, Joe Feldman cuts to the core of the conversation, revealing how grading practices that are accurate, bias-resistant, and motivational will improve learning, minimize grade inflation, reduce failure rates, and become a lever for creating stronger teacher-student relationships and more caring classrooms. Essential reading for schoolwide and individual book study or for student advocates, Grading for Equity provides A critical historical backdrop, describing how our inherited system of grading was originally set up as a sorting mechanism to provide or deny opportunity, control students, and endorse a “fixed mindset” about students’ academic potential—practices that are still in place a century later A summary of the research on motivation and equitable teaching and learning, establishing a rock-solid foundation and a “true north” orientation toward equitable grading practices Specific grading practices that are more equitable, along with teacher examples, strategies to solve common hiccups and concerns, and evidence of effectiveness Reflection tools for facilitating individual or group engagement and understanding As Joe writes, “Grading practices are a mirror not just for students, but for us as their teachers.” Each one of us should start by asking, “What do my grading practices say about who I am and what I believe?” Then, let’s make the choice to do things differently . . . with Grading for Equity as a dog-eared reference.

Rethinking Homework-Cathy Vatterott 2018-09-25 In this updated edition, Cathy Vatterott examines the role homework has played in the culture of schooling over the years; how such factors as family life, the media, and "homework gap" issues based on shifting demographics have affected the homework controversy; and what recent research as well as common sense tell us about the effects of homework on student learning. She also explores how the current homework debate has been reshaped by forces including the Common Core, a pervasive media and technology presence, the mass hysteria of "achievement culture," and the increasing shift to standards-based and formative assessment. The best way to address the homework controversy is not to eliminate homework. Instead, the author urges educators to replace the old paradigm (characterized by long-standing cultural beliefs, moralistic views, and behaviorist philosophy) with a new paradigm based on the following elements: Designing high-quality homework tasks; Differentiating homework tasks; Deemphasizing grading of homework; Improving homework completion; and Implementing homework support programs. Numerous examples from teachers and schools illustrate the new paradigm in action, and readers will find useful new tools to start them on their own journey. The end product is homework that works—for all students, at all levels.

Building Motivational Interviewing Skills-David B. Rosengren 2012-09-26 Developing expertise in motivational interviewing (MI) takes practice, which is exactly the point of this engaging, user-friendly workbook. The volume is packed with real-world examples from a range of clinical settings, as well as sample interactions and hands-on learning activities. The author is an experienced MI researcher, clinician, and trainer who facilitates learning with quizzes, experiential exercises, and reproducible worksheets. The reader learns step by step how to practice core MI skills: raising the importance of

behavior change, fostering the client's confidence, resolving ambivalence, solidifying commitment to change, and negotiating a change plan. The utility of the book is enhanced by the large-size format and lay-flat binding. The book shows how to navigate each session using microskills that many clinicians already know: open-ended questions, affirmations, reflective listening, and summaries, or OARS for short. This book is in the Applications of Motivational Interviewing series.

Learning and Leading with Habits of Mind-Arthur L. Costa 2008 In Learning and Leading with Habits of Mind, noted educators Arthur L. Costa and Bena Kallick present a comprehensive guide to shaping schools around Habits of Mind. The habits are a repertoire of behaviors that help both students and teachers successfully navigate the various challenges and problems they encounter in the classroom and in everyday life. The Habits of Mind include * Persisting * Managing impulsivity * Listening with understanding and empathy * Thinking flexibly * Thinking about thinking (metacognition) * Striving for accuracy * Questioning and posing problems * Applying past knowledge to new situations * Thinking and communicating with clarity and precision * Gathering data through all senses * Creating, imagining, innovating * Responding with wonderment and awe * Taking responsible risks * Finding humor * Thinking interdependently * Remaining open to continuous learning This volume brings together--in a revised and expanded format--concepts from the four books in Costa and Kallick's earlier work Habits of Mind: A Developmental Series. Along with other highly respected scholars and practitioners, the authors explain how the 16 Habits of Mind dovetail with up-to-date concepts of what constitutes intelligence; present instructional strategies for activating the habits and creating a "thought-full" classroom environment; offer assessment and reporting strategies that incorporate the habits; and provide real-life examples of how communities, school districts, building administrators, and teachers can integrate the habits into their school culture. Drawing upon their research and work over many years, in many countries, Costa and Kallick present a compelling rationale for using the Habits of Mind as a foundation for leading, teaching, learning, and living well in a complex world.

Handbook of Teaching for Physical Therapists - E-Book-Gail M. Jensen 2012-09-02 Whether you are practicing in an in-patient or an out-patient facility, academic institution, or clinical residency program, this well-respected handbook gives you the background and guidance you need to effectively educate individuals across the continuum of physical therapy practice. Practical, real-life examples show you how to: incorporate health literacy and needs of the learner; assess and adapt to the various learning styles of patients; use simulations in education; facilitate the development of clinical reasoning skills; and assess learning outcomes and the effectiveness of your teaching. Plus, four all-new chapters and major revisions of all content throughout the book keep you on top of the latest research and best practices. Coverage of the theory and application of educational principles across the continuum of PT practice provides the information you need to improve your skills in the educational process both in academic and clinical settings. Two section format divides content into two parts: designing academic and clinical education programs and teaching students in academic and clinical settings; and teaching patients and families in clinical and community settings. Variety of teaching and teaching assessment methods expands your teaching, learning, and assessment repertoires. Case stories at the beginning of each chapter allow you to see the relevance of the information in the chapter. Threshold concepts highlight key ideas that are important to know. Annotated bibliography at end of each chapter provides resources for further study. NEW! Chapter on Authentic Assessment: Simulation-Based Education reflects the new ways to facilitate student learning through the use of human simulation models. NEW! Chapter on Strategies for Planning and Implementing Interprofessional Education covers the fundamental concepts of team-based care and interprofessional learning. NEW! Chapter on What Makes a Good Clinical Teacher? translates current research on clinical teaching into clinical education and practice. NEW! Chapter on Facilitating the Teaching and Learning of Clinical Reasoning helps you apply current research on clinical reasoning in rehabilitation to clinical education and teaching. NEW! Two combined chapters on Patient Education and Health Literacy (previously chapters 8 and 12) and Applied Behavioral Theory and Adherence: Models for Practice (previously chapters 9 and 10) provide focused presentations on current thinking and practical strategies for addressing health literacy issues in the clinical environment. NEW! Expanded chapter on Post-Professional Clinical Residency and Fellowship Education offers more information on models and trends in residency education and mentoring.

Grading Smarter, Not Harder-Myron Dueck 2014-07-15 All the talk of closing the achievement gap in schools obscures a more fundamental issue: do the grades we assign to students truly reflect the extent of their learning? In this lively and eye-opening book, educator Myron Dueck reveals how many of the assessment policies that teachers adopt can actually prove detrimental to student motivation and achievement and shows how we can tailor policies to address what really matters: student understanding of content. In sharing lessons, anecdotes, and cautionary tales from his own experiences revamping assessment procedures in the classroom, Dueck offers a variety of practical strategies for ensuring that grades measure what students know without punishing them for factors outside their control; critically examining the fairness and effectiveness of grading homework assignments; designing and distributing unit plans that make assessment criteria crystal-clear to students; creating a flexible and modular retesting system so that students can improve their scores on individual sections of important tests. Grading Smarter, Not Harder is brimming with reproducible forms, templates, and real-life examples of grading solutions developed to allow students every opportunity to demonstrate their learning. Written with abundant humor and heart, this book is a must-read for all teachers who want their grades to contribute to, rather than hinder, their students' success.

Journeys Reader's Notebook, Grade 4-

Enhancing Professional Practice-Charlotte Danielson 2007-02-08 The framework for teaching is a research-based set of components of instruction that are grounded in a constructivist view of learning and teaching. The framework may be used for many purposes, but its full value is realized as the foundation for professional conversations among practitioners as they seek to enhance their skill in the complex task of teaching. The framework may be used as the foundation of a school's or district's recruitment and hiring, mentoring, coaching, professional development, and teacher evaluation processes, thus linking all those activities together and helping teachers become more thoughtful practitioners. The actions teachers can take to improve student learning are clearly identified and fall under four domains of teaching responsibility: Planning and Preparation, the School Environment, Instruction, and Professional Responsibilities. Within the domains are 22 components and 76 descriptive elements that further refine our understanding of what teaching is all about. The framework defines four levels of performance--Unsatisfactory, Basic, Proficient, and Distinguished--for each element, providing a valuable tool that all teachers can use. This second edition has been revised and updated and also includes frameworks for school specialists, such as school nurses, counselors, library and media specialists, and instructional coaches. Comprehensive, clear, and applicable to teaching across the K-12 spectrum, the framework for teaching described in this book is based on the PRAXIS III: Classroom Performance Assessment criteria

developed by Educational Testing Service and is compatible with INTASC standards.

Stone Fox-John Reynolds Gardiner 2010-05-18 John Reynolds Gardiner's classic action-packed adventure story about a thrilling dogsled race has captivated readers for more than thirty years. This middle grade novel is an excellent choice for tween readers in grades 5 to 6, especially during homeschooling. It's a fun way to keep your child entertained and engaged while not in the classroom. Based on a Rocky Mountain legend, Stone Fox tells the story of Little Willy, who lives with his grandfather in Wyoming. When Grandfather falls ill, he is no longer able to work the farm, which is in danger of foreclosure. Little Willy is determined to win the National Dogsled Race—the prize money would save the farm and his grandfather. But he isn't the only one who desperately wants to win. Willy and his brave dog Searchlight must face off against experienced racers, including a Native American man named Stone Fox, who has never lost a race. Exciting and heartwarming, this novel has sold millions of copies and was named a New York Times Outstanding Children's Book.

Learning from Children-Ed Labinowicz 1985 Although recent research on children's numerical thinking has much to say to teachers, little attempt has been made to communicate it directly to them. This book attempts to build a bridge between theory, research, and classroom practice with the aim of supporting informed change in the schools. The ultimate goal is to promote children's numerical thinking and to ensure their survival in a rapidly changing world.
