Clinical Guide to Alcohol Treatment-Robert J. Meyers 1995-08-04 This book is the first complete guide to implementing the Community Reinforcement Approach (CRA), an empirically based, highly effective cognitive-behavioral program for treating alcohol problems. CRA acknowledges the powerful role of environmental contingencies in encouraging or discouraging drinking, and attempts to rearrange these contingencies so that a non-drinking lifestyle is more rewarding than a drinking one. Unique in its breadth, the approach utilizes social, recreational, familial, and vocational strategies to aid clients in the recovery process. This authoritative manual is a hands-on guide to applying these therapeutic procedures. The authors present a step-by-step guide to each component of the treatment plan, many of which have been shown to be effective forms of treatment in themselves. Topics include behavioral skills training, social and recreational counseling, marital therapy, motivational enhancement, job counseling, and relapse prevention. Each chapter provides detailed instructions for conducting a procedure, describes what difficulties to expect, and presents strategies for overcoming them. Sample dialogues between clients and therapists, annotated by the authors, further illuminate the treatment process. The book concludes with a chapter that both addresses the common mistakes made when implementing CRA, and emphasizes the flexibility and benefits of this total treatment plan. This book is an invaluable resource for a wide range of practitioners including psychologists, psychiatrists, substance abuse counselors, and social workers.

Health Promotion at the Community Level-Neil F. Bracht 1990 This timely book offers substantial help to professionals and the general public in their efforts to mobilize community resources for health promotion programs, environmental protection and disease prevention. The contributors have experience in field work and offer practical advice on organizing any community-wide health program. This will prove a vital resource for anyone involved in promoting health from social workers and health visitors to the ordinary concerned citizen.
Handbook of Evidence-Based Practice in Clinical Psychology, Adult Disorders-Michel Hersen 2012-08-02 Handbook of Evidence-Based Practice in Clinical Psychology, Volume 2 covers the evidence-based practices now identified for treating adults with a wide range of DSM disorders. Topics include fundamental issues, adult cognitive disorders, substance-related disorders, psychotic, mood, and anxiety disorders, and sexual disorders. Each chapter provides a comprehensive review of the evidence-based practice literature for each disorder and then covers several different treatment types for clinical implementation. Edited by the renowned Peter Sturmey and Michel Hersen and featuring contributions from experts in the field, this reference is ideal for academics, researchers, and libraries.
Walden Two-B. F. Skinner 2005-07-15 A reprint of the 1976 Macmillan edition. This fictional outline of a modern utopia has been a center of controversy ever since its publication in 1948. Set in the United States, it pictures a society in which human problems are solved by a scientific technology of human conduct.
Launch Point: Community Group Mission Guide-Gary Comer 2014-01-21 What if Small Groups Embarked on Mission Together . . . In Their Own Backyards? Whereas small groups have traditionally focused internally, many Christians nowadays are hungering for much more! Seeking to make a difference where they live, Christians desire mission. The Community Group Mission Series focuses eight weeks of training-to launch groups in a dynamic mission trajectory! Contingency Management for Substance Abuse Treatment-Nancy M. Petry 2013-06-17 Isn't it unethical to pay people to do what they should be doing anyway? Won't patients just sell the reinforcers and buy drugs? Others didn't get prizes for not using. Why should they? The concerns surrounding Contingency Management (CM) are many and reflect how poorly understood and rarely utilized this evidence-based treatment model is in practice settings. Despite being identified as the most efficacious intervention for substance use disorders, a significant gap persists between research and practice, at the client's expense. Nancy Petry, an experienced researcher and consultant for organizations such as the National Institute of Health, has begun to fill this gap by authoring the first clinician-oriented text that focuses on CM protocol development and implementation. In this well-organized and clear book she provides a foundation for understanding CM and details how to design and implement a program that can work for any clinician, whether he or she works for a well-funded program or not. She also addresses realistic concerns such as: How to describe CM to eligible and ineligible patients How to calculate the costs of CM interventions How to solicit donations and raise funds to support CM interventions How to stock a prize cabinet and keep track of prizes Over 50 charts, worksheets, and tables are provided to help the clinician pinpoint exactly which behaviors to target, brainstorm how to reinforce change, and develop a treatment plan that incorporates cost, length of treatment, and method for determining patient compliance. Included with the book is a CD-ROM of editable logs, forms, tables, and worksheets for personal use. More than just filling a void, Dr. Petry provides all of the tools clinicians require to successfully apply a novel treatment in practice.

Questions are organized by ARRT content categories and are available in study mode with immediate feedback after each question, or in exam mode, which simulates the test-taking experience in a timed environment with ARRT exam-style questions.
Substance Use Disorders in Lesbian, Gay, Bisexual, and Transgender Clients-Sandra C. Anderson 2009-07-29 Internalized homophobia, alienation, poor support structures, and high levels of depression all contribute to substance abuse among lesbian, gay, bisexual, and transgender individuals, with social activity at bars and clubs reinforcing addictive behavior. The threat of bias in treatment programs also prevents many from seeking help. An essential resource for human service professionals searching for the latest research on these unique issues, this volume features both state of the art practice methods for treating substance use disorders and up-to-date analyses of sexual orientation and gender identity issues, heterosexism, and the ethical challenges of working with the LGBT community. Sandra Anderson discusses practice with individuals, couples, families, and small groups, as well as practice at the program level. Drawing on case studies with her own clients and from social service agencies that treat LGBT clients, Anderson emphasizes evidence-based treatment models, including motivational enhancement therapy, contingency management, the matrix model, and community reinforcement. Packed with recommendations for effective practice, this singular volume confronts the obstacles faced not only by clients with addictions but also by the LGBT population as a whole.

Addiction Reviews 3, Volume 1216-George R. Uhl 2011-02-21 "For the third installment of this Annals series, we focus on the longstanding and substantial contributions of the National Institute on Alcohol Abuse and Alcoholism (NIAAA) and of investigators interested in alcoholism. While there are also many contributions that relate to other addictive substances, the recent anniversary of the founding of NIAAA, the ongoing discussions about how addiction research funding will be provided in the United States, the unique insights that alcoholism researchers have developed into modeling consequences in tissues such as liver, and the relative paucity of articles on alcoholism in prior Addiction Reviews volumes, all provide timeliness to this emphasis on alcohol research and NIAAA. Among the specific issues covered are: alcoholic liver disease exacerbated by malnutrition or infections; hippocampus, amygdala and stress and susceptibility to addiction; alcohol binge drinking; epigenetics of addiction; and the pharmacological enhancement of drug cue extinction learning."-Society website.
