Most people's honest answer is: not enough. Everyone is buried by busywork, responsibility, distraction, and fatigue. The joy-producing, difference-making ideas are waiting for when the time is right, when the current project is over, when they have a little more money, when the kids are grown, or when they get a more understanding boss. They are waiting for someday. The trouble is someday never comes on its own. Start Finishing presents a nine-step method for converting an idea into a project by addressing the challenges you'll face and getting the project on a reality-based schedule. This critically acclaimed book will teach you how to: • Practice the five keys that lead to self-mastery • Build your success pack of supporters, guides, peers, and beneficiaries • Keep working through the thrashing that comes with any project that matters to you • Chunk, link, and sequence your ideas down to doable parts • Use the Five Project Rule to prioritize your daily schedule and be at peace with the work you choose not to do • Fly through drag points—how to deal with head trash, no-win scenarios, and other people's priorities • Heatmap your schedule so you do the right work at the right time • Overcome cascades, logjams, and tarpits—the three ways projects routinely get stuck • Finish strong—celebrate, review, and ride the momentum to your next goal You are not incapable, wired to struggle, or fated to be unable to get your act together. With a few key steps, you can change the way you show up, how you plan, and how you respond when things get tough. You can Start Finishing the work that matters most to you. Includes original contributions from Seth Godin, Susan Piver, Jonathan Fields, James Clear, and many other teachers.

TEXTBOOK OF ANIMAL BEHAVIOUR-FATIK BARAN MANDAL 2012-01-17 This well-accepted book, now stands in its second edition, is a time-honoured revision and extension of the previous edition. Beginning with an introduction to the study of animal behaviour, the book explains the various aspects of behavioural biology incorporating a wealth of information from molecular biology, neurobiology, and socio-biology with a new approach. It describes different kinds of innate and learned behaviours, animal communications, defensive behaviours such as camouflage and mimicry with suitable illustrations. The book incorporates the introductory concepts of biomimicry in an attractive manner. Further, it discusses biorhythms, migration in fish and birds, in addition to evolution and physiological basis of migration. The text also presents the important aspects of socio-biology and social behaviours, such as feeding, adaptation, prey defence, territoriality, aggression, altruism, sexuality, and parental care. Finally, it provides discussions on behavioural ecology in the context of conservation biology, and human behaviour. The book presents the basic principles of animal behaviour with the aid of carefully selected examples from both the recent and classic literature along with an emphasis on readability. In the present edition, topics like eusociality and behavioural theories have been incorporated. This edition also includes as many as 11 published articles by the author on different topics related to the subject matter in box format to further strengthen the text. The book is primarily intended for the students of B.Sc./M.Sc. (Zoology/Life Science) for their courses. It would be useful for the researchers in the field of animal behaviour, and conservation biologists. It would also attract readership studying Sociology and Anthropology. KEY FEATURES : Presents a well-balanced view of ethology. Discusses the current development in the field. Includes a glossary of important terms. Offers end-of-chapter

questions to check the students' understanding of the concepts.

Nuclear Politics and the Non-Aligned Movement-William Potter 2017-10-03 The Non-Aligned Movement (NAM) is the largest and most diverse political grouping of states engaged on issues related to nuclear nonproliferation and disarmament. Drawing on the authors first-hand experiences as members of NAM observer-state delegations in NPT and IAEA negotiations, as well as the findings of a larger CNS research project on NAM nuclear politics, the book will provide important new insights about how a small subset of NAM states has tended to dominate NAM politics and have promoted policies that are often at odds with those advanced by Western states on issues such as nuclear terrorism, IAEA safeguards, nuclear export controls, multinational fuel arrangements, proliferation in the Middle East, NPT, and nuclear arms control and disarmament. Based on an analysis of NAM perspectives, politics, and priorities, the book will provide practical recommendations for engaging NAM members in a more constructive fashion on issues related to nuclear nonproliferation, disarmament, peaceful use, and counter-nuclear terrorism. Particular attention will be given to problems likely to be encountered when Iran assumes the chairmanship of NAM in 2012 and how these difficulties can best be mitigated in the lead up to the next NPT Review Conference.

History of Modern India-Bipan Chandra 2009 History of Modern India presents an authoritative overview of the history of what was known as British India. The text is largely based on the author's research on nationalism and colonialism in India and also draws from the works of eminent historians of the period.

Challenging and revising colonial and nationalist interpretations of history, this book moves away from a largely political narrative to a social, economic and religious history of modern India. It explains how conditions in India during the eighteenth century helped the British East India Company establish its rule in India. It also gives us important insights into the primary aim of colonial rule which was the economic exploitation of India through trade and investment. The topics are arranged thematically in order to showcase the various forces that went into the making of independent India. However, in the entire arrangement of themes, the chronology of the period is enmeshed innovatively with the various forces that evolved both as a cause and effect of British imperialist rule of the subcontinent. The book also provides a detailed account of the nationalist movement and introduces us to the contributions of different individuals who were behind the nationalist movement. A comprehensive textbook for students of history and interested readers, History of Modern India is essential reading for a broad based understanding of the making of modern India.

Asia's Naval Expansion-Geoffrey Till 2017-10-03 The navies of China, India and to a lesser extent Japan are expanding rapidly at present. This has the potential to alter the US-dominated naval balance in Asia-Pacific but it also raises a question: are the regions powers involved in a naval arms race? Naval development is and always has been a crucial indicator of economic and political development. It shows the emergence of a significant shift in strategic weight from West to East. But within the Asia-Pacific Region, alongside growing economic and institutional integration, there are geo-political tensions that threaten the regions stability and peace. The balance between the two determines the form that naval development in that region is taking. Some aspects of this suggest the beginnings of a naval arms race that would have profound consequences for the region and the world.

The Merchant of Venice-William Shakespeare 2020-10-26 In The Merchant of Venice, the path to marriage is hazardous. To win Portia, Bassanio must pass a test prescribed by her father's will, choosing correctly among three caskets or chests. If he fails, he may never marry at all. Bassanio and Portia also face a magnificent villain, the loan shark Shylock. In creating Shylock, William Shakespeare seems to have shared in a widespread prejudice against Jews. Shylock would have been regarded as a villain because he was a Jew. Yet he gives such powerful expression to his alienation due to the hatred around him that, in many productions, he emerges as the hero. Portia is most remembered for her disguise as a lawyer, Balthazar, especially the speech in which she urges Shylock to show mercy that "droppeth as the gentle rain from heaven." The Merchant of Venice is an intriguing drama of love, greed, and revenge.

Essential Calculus: Early Transcendentals-James Stewart 2012-01-20 This book is for instructors who think that most calculus textbooks are too long. In writing the book, James Stewart asked himself: What is essential for a three-semester calculus course for scientists and engineers? ESSENTIAL CALCULUS: EARLY TRANSCENDENTALS, Second Edition, offers a concise approach to teaching calculus that focuses on major concepts, and supports those concepts with precise definitions, patient explanations, and carefully graded problems. The book is only 900 pages--two-thirds the size of Stewart's other calculus texts, and yet it contains almost all of the same topics. The author achieved this relative brevity primarily by condensing the exposition and by putting some of the features on

the book's website, www.StewartCalculus.com. Despite the more compact size, the book has a modern flavor, covering technology and incorporating material to promote conceptual understanding, though not as prominently as in Stewart's other books. ESSENTIAL CALCULUS: EARLY TRANSCENDENTALS features the same attention to detail, eye for innovation, and meticulous accuracy that have made Stewart's textbooks the best-selling calculus texts in the world. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.
