Merci Suárez Changes Gears-Meg Medina 2018-09-11 Winner of the 2019 Newbery Medal Thoughtful, strong-willed sixth-grader Merci Suarez navigates difficult changes with friends, family, and everyone in between in a resonant new novel from Meg Medina. Merci Suarez knew that sixth grade would be different, but she had no idea just how different. For starters, Merci has never been like the other kids at her private school in Florida, because she and her older brother, Roli, are scholarship students. They don't have a big house or a fancy boat, and they have to do extra community service to make up for their free tuition. So when bossy Edna Santos sets her sights on the new boy who happens to be Merci's school-assigned Sunshine Buddy, Merci becomes the target of Edna's jealousy. Things aren't going well at home, either: Merci's grandfather and most trusted ally, Lolo, has been acting strangely lately — forgetting important things, falling from his bike, and getting angry over nothing. No one in her family will tell Merci what's going on, so she's left to her own worries, while also feeling all on her own at school. In a coming-of-age tale full of humor and wisdom, award-winning author Meg Medina gets to the heart of the confusion and constant change that defines middle school — and the steadfast connection that defines family.

Child Development-Laura E. Levine 2021-01-09 In the topically organized *Child Development: An Active Learning Approach*, Fourth Edition, authors Laura E. Shark Lady-Jess Keating 2017-06-06 One of New York Times' Twelve Books for Feminist Boys and Girls! This is the story of a woman who dared to dive, defy, discover, and inspire. This is the story of Shark Lady. One of the best science picture books for children, Shark Lady is a must for both teachers and parents alike! An Amazon Best Book of the Month Named a Best Children's Book of 2017 by Parents magazine Eugenie Clark fell in love with sharks from the first moment she saw them at the aquarium. She couldn't imagine anything more exciting than studying these graceful creatures. But Eugenie quickly discovered that many people believed sharks to be ugly and scary—and they didn't think women should be scientists. Determined to prove them wrong, Eugenie devoted her life to learning about sharks. After earning several college degrees and making countless discoveries, Eugenie wrote herself into the history of science, earning the nickname "Shark Lady." Through her accomplishments, she taught the world that sharks were to be admired rather than feared and that women can do anything they set their minds to. An inspiring story by critically acclaimed zoologist Jess Keating about finding the strength to discover truths that others aren't daring enough to see. Includes a timeline of Eugenie's life and many fin-tastic shark facts! The perfect choice for parents looking for: Books about sharks Inspiring nonfiction narrative books Role model books for girls and boys Kids STEM books

The Race to Save the Lord God Bird-Phillip Hoose 2014-08-26 The tragedy of extinction is explained

through the dramatic story of a legendary bird, the Ivory-billed Woodpecker, and of those who tried to possess it, paint it, shoot it, sell it, and, in a last-ditch effort, save it. A powerful saga that sweeps through two hundred years of history, it introduces artists like John James Audubon, bird collectors like William Brewster, and finally a new breed of scientist in Cornell's Arthur A. "Doc" Allen and his young ornithology student, James Tanner, whose quest to save the Ivory-bill culminates in one of the first great conservation showdowns in U.S. history, an early round in what is now a worldwide effort to save species. As hope for the Ivory-bill fades in the United States, the bird is last spotted in Cuba in 1987, and Cuban scientists join in the race to save it. All this, plus Mr. Hoose's wonderful story-telling skills, comes together to give us what David Allen Sibley, author of *The Sibley Guide to Birds* calls "the most thorough and readable account to date of the personalities, fashions, economics, and politics that combined to bring about the demise of the Ivory-billed Woodpecker." *The Race to Save the Lord God Bird* is the winner of the 2005 Boston Globe - Horn Book Award for Nonfiction and the 2005 Bank Street - Flora Stieglitz Award.

Building Powerful Learning Environments-Arina Bokas 2016-12-24 Building Powerful Learning Environments takes a close look at the trends of the Post-Digital Era through the prism of how systems of education can meet the needs of our times and offers a systemic approach to creating a different canvas for learning that aligns to these changes. At the center of the book are the concepts of a learning environment and a culture of partnerships. A learning environment has traditionally been viewed as something that educators created and sustained inside their schools. Building Powerful Learning Environmentsexpands this understanding to embrace families, communities, other learning institutions, and businesses not as helpers, but as co-builders of a powerful learning environment. It demonstrates that schools have to take the first step in this direction by becoming the center of a new educational culture - a culture of partnerships. This book looks into various ways of creating this culture at district, school, and classroom levels. It provides practical guidance, strategies, and tips as well as some conceptual understanding of what can be done to create and support this culture at various levels of educational

leadership.

P Is for Pterodactyl-Raj Haldar 2018-11-13 A New York Times Bestseller! A "raucous trip through the odd corners of our alphabet." —The New York Times Let's get real—the English language is bizarre. A might be for apple, but it's also for aisle and aeons. Why does the word "gnat" start with a G but the word "knot" doesn't start with an N? It doesn't always make sense, but don't let these rule-breaking silent letters defeat you! This whimsical, funky book from Raj Haldar (aka rapper Lushlife) turns the traditional idea of an alphabet book on its head, poking fun at the most mischievous words in the English language and demonstrating how to pronounce them. Fun and informative for word nerds of all ages!

An Inconvenient Alphabet-Beth Anderson 2018-09-25 "Delightful, relatable, and eye-catchingly illustrated." —School Library Journal "Deelytful and iloominaating for noo and seesuned reeders alyk." —Kirkus Reviews "Thought-provoking and entertaining." —School Library Connection "Engaging...A comprehensible, lively read." —Publishers Weekly Do you ever wish English was eez-ee-yer to spell? Ben Franklin and Noah Webster did! Debut author Beth Anderson and the New York Times bestselling illustrator of I Dissent, Elizabeth Baddeley, tell the story of two patriots and their attempt to revolutionize the English alphabet. Once upon a revolutionary time, two great American patriots tried to make life easier. They knew how hard it was to spell words in English. They knew that sounds didn't match letters. They knew that the problem was an inconvenient English alphabet. In 1786, Ben Franklin, at age eighty, and Noah Webster, twenty-eight, teamed up. Their goal? Make English easier to read and write. But even for great thinkers, what seems easy can turn out to be hard. Children today will be delighted to learn that when they "sound out" words, they are doing eg-zakt-lee what Ben and Noah wanted.

The Bookshop Girl-Sylvia Bishop 2018-09-15 A whimsical delight, crafted with quirkiness and a touch of classic charm The Joneses have just won the Great Montgomery Book Emporium in a contest, and it's every book lover's dream! The pull of a lever calls forth a room full of marvelous wonders—from the Room

of Woodland tales with its squirrels and mice, to the rocket ship in the Room of Space Adventures, and the aquarium ceiling in the Room of Ocean Tales. But there is more to the Emporium than its thousands of books in extravagant displays. In fact, the previous owner is hiding something that could destroy absolutely everything for the Joneses. Property Jones has a whopper of a secret too—and it might just be the key to saving her family and their bookshop from the clutches of a nasty villain. Sylvia Bishop's exceptional and fantastical U.S. debut features a cast of memorable, quirky characters, including the resourceful Property Jones herself and her cantankerous kitten side-kick, beautiful descriptions of the tactile pleasures of books, and the magical transporting quality bookstores can have for readers.

How to Eradicate Hazing-Ronald W. Holmes, Ph.D. 2013-01-10 Hazing has been defined in a number of ways, but the resulting consequences are the same - ridicule, humiliation, embarrassment and abuse. Despite contrary beliefs, hazing impacts all ages and segments of society. Society must therefore be engaged in educational strategies to understand the causes and effects of hazing and research-based strategies for prevention that over time will eliminate the negative consequences. The book by Dr. Ronald Holmes provides a framework for K-20 educators and others to have an in depth look at hazing and begin to develop anti-hazing strategies to overcome the negative consequences in our communities, schools, institutions and society. It is a must read for those interested in using knowledge and collaborative strategies to understand and prevent hazing. Dr. George E. Cooper, former president of South Carolina State University The time is now for all of us to become actively involved to tackle the problem and pain of violence on Black college campuses, Black community and other communities. I hope that this book will inspire and challenge us to do our level best to rid, purge and root out hazing from our culture. Make no mistake about hazing, it didn't begin with Robert Champion, but prayerfully, it must end with the death of our drum major and other beloved children throughout the country. Let's become a champion in this fight! Reverend Dr. R. B. Holmes Jr., pastor of Bethel Missionary Baptist Church Founder/Chair, National Anti-Hazing/Anti-Violence Task Force

Grit-Angela Duckworth 2016-05-03 In this instant New York Times bestseller, Angela Duckworth shows anyone striving to succeed that the secret to outstanding achievement is not talent, but a special blend of passion and persistence she calls “grit.” “Inspiration for non-geniuses everywhere” (People). The daughter of a scientist who frequently noted her lack of “genius,” Angela Duckworth is now a celebrated researcher and professor. It was her early eye-opening stints in teaching, business consulting, and neuroscience that led to her hypothesis about what really drives success: not genius, but a unique combination of passion and long-term perseverance. In *Grit*, she takes us into the field to visit cadets struggling through their first days at West Point, teachers working in some of the toughest schools, and young finalists in the National Spelling Bee. She also mines fascinating insights from history and shows what can be gleaned from modern experiments in peak performance. Finally, she shares what she’s learned from interviewing dozens of high achievers—from JP Morgan CEO Jamie Dimon to New Yorker cartoon editor Bob Mankoff to Seattle Seahawks Coach Pete Carroll. “Duckworth’s ideas about the cultivation of tenacity have clearly changed some lives for the better” (The New York Times Book Review). Among *Grit*’s most valuable insights: any effort you make ultimately counts twice toward your goal; grit can be learned, regardless of IQ or circumstances; when it comes to child-rearing, neither a warm embrace nor high standards will work by themselves; how to trigger lifelong interest; the magic of the Hard Thing Rule; and so much more. Winningly personal, insightful, and even life-changing, *Grit* is a book about what goes through your head when you fall down, and how that—not talent or luck—makes all the difference. This is “a fascinating tour of the psychological research on success” (The Wall Street Journal).

Verbomania-Amelia Gormley 2009-11-07 There's an idea floating around out there, an unspoken opinion that says the Scripps National Spelling Bee is interesting only to boring word nerds and dull academic braniacs. Here is a book which explodes that myth. Written from the perspective of a 2009 speller, "Verbomania" presents what it is like to experience Bee Week in Washington, DC. It details the tension and nerves, friendship and camaraderie, laughter and tears, the joy that comes with winning and the

heartbreak that accompanies losing at the Scripps National Spelling Bee. Maybe spelling is not technically a sport--despite being broadcast on ESPN each year--but after reading "Verbomania," you'll agree that it is a real competition in every sense of the word.

The List-Patricia Forde 2017-08-01 "The fantasy book of the year."-Eoin Colfer, bestselling author of Artemis Fowl A 2018 Notable Children's Books Selection! You are The Wordsmith now. Are you ready for the challenge? The city of Ark is the last safe place on Earth. To make sure humans are able to survive, everyone in Ark must speak List, a language of only 500 words. Everyone that is, except Letta. As apprentice to the Wordsmith, Letta can read all the words that have ever existed. Forbidden words like freedom, music, and even pineapple tell her about a world she's never known. One day her master disappears and the leaders of Ark tell Letta she is the new Wordsmith and must shorten List to fewer and fewer words. Then Letta meets a teenage boy who somehow knows all the words that have been banned. Letta's faced with a dangerous choice: sit idly by and watch language slowly slip away or follow a stranger on a path to freedom...or banishment.

Beeline-Shalini Shankar 2019-04-30 An anthropologist uses spelling bees as a lens to examine the unique and diverse traits of Generation Z--and why they are destined for success At first glance, Generation Z (youth born after 1997) seems to be made up of anxious overachievers, hounded by Tiger Moms and constantly tracked on social media. One would think that competitors in the National Spelling Bee -- the most popular brain sport in America -- would be the worst off. Counterintuitively, anthropologist Shalini Shankar argues that, far from being simply overstressed and overscheduled, Gen Z spelling bee competitors are learning crucial twenty-first-century skills from their high-powered lives, displaying a sophisticated understanding of self-promotion, self-direction, and social mobility. Drawing on original ethnographic research, including interviews with participants, judges, and parents, Shankar examines the outsize impact of immigrant parents and explains why Gen Z kids are on a path to success.

The Stupendously Spectacular Spelling Bee-Deborah Abela 2018-04-03 A heartwarming story about a girl

who's afraid to follow her dreams, and the family who help make them happen. India Wimple can spell. Brilliantly. Every Friday night, she and her family watch the Stupendously Spectacular Spelling Bee on TV. When the Wimples suggest she enter the next Bee, India feels nothing but trepidation. She's sure she's not good enough but with the support of her family, India finds the courage to sign up. There are plenty of obstacles to reaching the finals, like Summer Millicent Ernestine Beauregard-Champion, a spoiled rich girl who isn't afraid to step on anyone who gets in her way of winning. The whole thing seems rather calamitous to India. But with hope, hard work, and a little bit of heart, something splendidous might be on the horizon...

Preparing Effective Leaders for Tomorrow's Schools-Norma Zunker 2013 The CEDER Yearbook is a bound volume of selected manuscripts of educational research. This edition focuses on preparing effective leaders for tomorrow's schools.

ABCs from Space-Adam Voiland 2017-08-29 "Twenty or so years from now, we may point to this book as the launchpad for the careers of astrophysicists and astronauts." —The New York Times "Young children will find the alphabet in amazing places in ABCs from Space, an abecedary composed of distant landforms, cloud formations, and sinuous waterways." —The Wall Street Journal "This remarkable bird's-eye...view of the planet...lets readers see Earth—and the alphabet—in a new light." —Publishers Weekly (starred review) Look up! Does that cloud look like an animal? Do the stars form a circle in the sky? But have you ever wondered what our world looks like from space? Discover the alphabet in an all-new way with this clever picture book filled with unaltered images of Earth from space. In this ingenious alphabet book, scientist and writer Adam Voiland takes us on a journey of our planet from afar. And you might be very surprised at what you see. Could that river form an A? Could those clouds form a B? These awe-inspiring and unaltered images of Earth from above showcase the diversity and beauty of our amazing planet in a special and unique way. From A to Z, ABCs from Space is a rare opportunity to see Earth like you could never have imagined. And as you go through the book, play a guessing game of where and what the letters

might be and then find the answers in the detailed descriptions in the back of the book along with information about the science of space.

The Elementary Spelling Book-Noah Webster 1832

Stubborn Roots-Prudence L. Carter 2012-05-01 What are the features of the school environment that make students' of color incorporation greater at some schools than at others? Prudence L. Carter seeks to answer this basic but bedeviling question through a rich comparative analysis of the organizational and group dynamics in eight schools located within four cities in the United States and South Africa-two nations rebounding from centuries of overt practices of racial and social inequality. Stubborn Roots provides insight into how school communities can better incorporate previously disadvantaged groups and engender equity by addressing socio-cultural contexts and promoting "cultural flexibility." It also raises important and timely questions about the social, political, and philosophical purposes of multiracial schooling that have been greatly ignored by many, and cautions against narrow approaches to education that merely focus on test-scores and resources. "There are simply not enough texts that look comparatively at the two foremost experiments with questions of race, culture, and class in the English-speaking world, the United States and South Africa. Prudence Carter's work is simultaneously scholarly and compassionate. It helps us see, in these two benighted but globally important societies, how easily things break, but also how well, when structures are in place and when human agency takes flight, individuals and the groups to which they belong flourish and grow." - Crain Soudien, Professor of Education, University of Cape Town "In this ambitious mixed-method study, Carter analyzes the social and symbolic boundaries that account for disparate educational experiences by race in the United States and South Africa. Resources are only part of the answer; equally important, she argues, are the cultural and institutional conditions that make students feel they are valued contributors of the community. Thus, school policies about hairstyle, dress codes, tracking, extracurricular activities, and language use are among the important dimensions that enable or discourage engagement in students. Educators,

policymakers, and scholars alike have much to learn from this agenda-setting work." -Michele Lamont, Harvard University Author of *The Dignity of Working Men: Morality and the Boundaries of Race, Class and Immigration* "Prudence Carter's remarkable book shines a light on the often invisible patterns that perpetuate educational disparity in both the United States and South Africa. *Stubborn Roots* reveals how racial and ethnic divides are often reinforced, even in supposedly 'integrated' schools and even when many people of good will, try to eradicate them. Carter's insights illuminate how educators and schools can address these issues by becoming increasingly attuned to the socio-cultural worlds in which their students live. This book paves the way for the changes needed for historically disadvantaged groups to receive equitable, high-quality educations." -Linda Darling-Hammond, Charles Ducommun Professor of Education, Stanford University

Development of Professional Expertise-K. Anders Ericsson 2009-06-22 This book is designed to provide the first comprehensive overview of research on the acquisition and training of professional performance.

The Measurement of Intelligence-Lewis Madison Terman 1916 The constant and growing use of the Binet-Simon intelligence scale in public schools, institutions for defectives, reform schools, juvenile courts, and police courts is sufficient evidence of the intrinsic worth of the method. It is generally recognized, however, that the serviceableness of the scale has hitherto been seriously limited, both by the lack of a sufficiently detailed guide and by a number of recognized imperfections in the scale itself. The Stanford

revision and extension has been worked out for the purpose of correcting as many as possible of these imperfections, and it is here presented with a rather minute description of the method as a whole and of the individual tests. The aim has been to present the explanations and instructions so clearly and in such an untechnical form as to make the book of use, not only to the psychologist, but also to the rank and file of teachers, physicians, and social workers. More particularly, it is designed as a text for use in normal schools, colleges, and teachers' reading-circles. (PsycINFO Database Record (c) 2004 APA, all rights reserved).

Hyper Education-Pawan Dhingra 2020-04-28 An up-close look at the education arms race of after-school learning, academic competitions, and the perceived failure of even our best schools to educate children Beyond soccer leagues, music camps, and drama lessons, today's youth are in an education arms race that begins in elementary school. In Hyper Education, Pawan Dhingra uncovers the growing world of high-achievement education and the after-school learning centers, spelling bees, and math competitions that it has spawned. It is a world where immigrant families vie with other Americans to be at the head of the class, putting in hours of studying and testing in order to gain a foothold in the supposed meritocracy of American public education. A world where enrichment centers, like Kumon, have seen 194 percent growth since 2002 and target children as young as three. Even families and teachers who avoid after-school academics are getting swept up. Drawing on over 100 in-depth interviews with teachers, tutors, principals, children, and parents, Dhingra delves into the why people participate in this phenomenon and examines how schools, families, and communities play their part. Moving past "Tiger Mom" stereotypes, he addresses why Asian American and white families practice what he calls "hyper education" and whether or not it makes sense. By taking a behind-the-scenes look at the Scripps National Spelling Bee, other national competitions, and learning centers, Dhingra shows why good schools, good grades, and good behavior are seen as not enough for high-achieving students and their parents and why the education arms race is likely to continue to expand.

Raising the Stakes-T. L. Taylor 2015-01-30 How a form of play becomes a sport: players, agents, referees, leagues, tournaments, sponsorships, and spectators, and the culture of professional computer game play. Competitive video and computer game play is nothing new: the documentary King of Kong memorably portrays a Donkey Kong player's attempts to achieve the all-time highest score; the television show Starcade (1982-1984) featured competitions among arcade game players; and first-person shooter games of the 1990s became multiplayer through network play. A new development in the world of digital gaming, however, is the emergence of professional computer game play, complete with star players, team owners, tournaments, sponsorships, and spectators. In Raising the Stakes, T. L. Taylor explores the emerging scene of professional computer gaming and the accompanying efforts to make a sport out of this form of play. In the course of her explorations, Taylor travels to tournaments, including the World Cyber Games Grand Finals (which considers itself the computer gaming equivalent of the Olympics), and interviews participants from players to broadcasters. She examines pro-gaming, with its highly paid players, play-by-play broadcasts, and mass audience; discusses whether or not e-sports should even be considered sports; traces the player's path from amateur to professional (and how a hobby becomes work); and describes the importance of leagues, teams, owners, organizers, referees, sponsors, and fans in shaping the structure and culture of pro-gaming. Taylor connects professional computer gaming to broader issues: our notions of play, work, and sport; the nature of spectatorship; the influence of money on sports. And she examines the ongoing struggle over the gendered construction of play through the lens of male-dominated pro-gaming. Ultimately, the evolution of professional computer gaming illuminates the contemporary struggle to convert playful passions into serious play.

Reel Character Education-William B. Russell III, Ph.D. 2010-10-01 Values, attitudes, and beliefs have been

depicted in movies since the beginning of the film industry. Educators will find this book to be a valuable resource for helping explore character education with film. This book includes an overview of the history of character education, a discussion of how to effectively teach with film, and a discussion about analyzing film for educational value. This book offers educators an effective and relevant method for exploring character education with today's digital and media savvy students. This book details how film can be utilized to explore character education and discusses relevant legal issues surrounding the use of film in the classroom. Included in this book is a filmography of two hundred films pertaining to character education. The filmography is divided into four chapters. Each chapter details fifty films for a specific educational level (elementary, middle, high school, and postsecondary). Complete bibliographic information, summary, and applicable character lesson topics are detailed for each film. This book is clearly organized and expertly written for educators and scholars at the elementary, middle, high school, and postsecondary levels.
