Corporate Social Opportunity!-David Grayson 2017-12-04 Don't be misled by the word social in the title. This is a book about how to improve corporate performance and gain competitive advantage. In Corporate Social Opportunity! Grayson and Hodges challenge perceived wisdom that adherence by business to corporate social responsibility (CSR) is a zero-sum game where the impact on companies is added costs and extra regulatory burden. From their unique vantage point working with leaders of global businesses and of local communities, the authors explain how powerful drivers forcing companies to adopt stringent social, ethical and environmental standards simultaneously create largely untapped opportunities for product innovation, market development and non-traditional business models. The key to exploiting these opportunities lies in building CSR into business strategy, not adding it on to business operations. With examples from 200 companies to illustrate their case, they outline both in theory and practice a seven-step process managers can apply to assess the implications of CSR on their business strategy and identify their own corporate social opportunities. Business is operating in a whirlwind of interacting global forces: revolutionary developments in communications and technology, significant changes in markets, shifts in demographics, and a transformation of personal values. The fallout from these forces is the underlying reason that corporate social responsibility has come of age. These global forces have led to a number of issues-such as ecology and environment, human rights and diversity, health and well-being, and communities-becoming potential liabilities for companies. Once regarded as 'soft' management issues, they are now increasingly recognised as hard to predict and hard for the business to deal with when they go wrong. Corporate Social Opportunity!, by the authors of the best-selling Everybody's Business moves the argument from the "why" of corporate social responsibility (CSR) to the "how" and beyond - to a future where CSR is perceived as an opportunity for business both in terms of reaping the benefits of retaining brand or organisational value and by developing new products and services, serving new markets and adopting new business models. This is not always a story of black and white, of what is right or what is wrong. Often it embraces apparently conflicting demands which require the application of judgement, guided by a clear sense of overall direction and corporate purpose. This book is designed to act as a compass for aiding navigation through such dilemmas and complex decisions. Using examples of current good practice, detailed interviews with leading CEOs and newly created diagnostic planning tools, all framed within a seven-step model for making CSR happen, the book aims to provide a practical guide to help business leaders and their managers understand how to assess the impact of corporate social responsibility factors on their core business strategy and operations and help them identify and prioritise between subsequent options and resulting business opportunities. The book is structured into two parts. Both parts describe the same seven-step model which, if followed, will help managers think through desired changes to business strategies, and necessary corresponding changes to operational practices. In Part 1, the seven steps-triggers; scoping; making the business case; committing to action; resources and integrating operations; engaging stakeholders; and measuring and reporting-are described and illustrative evidence and corresponding data provided. In Part 2, the authors have created a worked example of the diagnostic processes that form the backbone of the seven steps, based on the health and well-being issue of fast food and the growing problem of obesity, particularly among children, along with notes on how a manager might work through the processes with colleagues. The authors are pro-business although not business-as-usual. The book is written first and foremost with the purpose of helping to improve business performance, because business is after all the principal motor for growth and development in the world today. The authors argue that companies adhering to best practice in CSR and taking advantage of possibilities inherent in Corporate Social Opportunity! are good for shareholders as well as customers and employees.

Under an Ionized Sky-Elana Freeland 2018-02-13 It is difficult to believe that our planet has been weaponized before our very eyes, but that is exactly what has happened. First, we were seduced by the convenience of a wireless world; then, atmospheric weather experimentation in the guise of carbons "climate change" converted the air we breathe into an antenna. Now, the geo-engineering we've been subjected to for two decades is being normalized as the "Star Wars" Space Fence rises around and within us. Is this the Space Age we were promised?

Chemtrails, HAARP, and the Full Spectrum Dominance of Planet Earth-Elana Freeland 2014-05-26 We are entering a Space Age, but not the kind President Kennedy originally envisioned. This Space Age is replacing resource wars and redefines planet earth as a "battlespace" in accordance with the military doctrine of "Full-Spectrum Dominance." This book examines how chemtrails and ionospheric heaters like the High-frequency Active Auroral Research Project (HAARP) in Alaska services a full-spectrum dominance. This "Revolution in Military Affairs" needs an atmospheric medium to assure wireless access to the bodies and brains of anyone on Earth—from heat-seeking missiles to a form of mind control. How sinister are these technologies? Are we being prepared for a "global village" lockdown? The recent release of NSA records have reminded Americans that "eyes in the sky" are tracking us as supercomputers record the phone calls, e-mails, internet posts, and even the brain frequencies of millions. Elana M. Freeland's startling book sifts through the confusion surrounding chemtrails-versus-contrails and how extreme weather is being "geo-engineered" to enrich disaster capitalists and intimidate nations. A deconstruction of Bernard J. Eastlund's HAARP patent points to other covert agendas, such as a global Smart Grid infrastructure that enables access to every body and brain on Earth, a "Transhumanist" future that erases lines between human and machine, and Nanobiological hybrids armed with microprocessors that infest and harm human bodies.

The Design Manager's Handbook-John Eynon 2013-01-23 Design management as a recognised role in the built environmentindustry is relatively new, initially arising from the need forbetter co-ordination and delivery of design information from designteams to main contractors - particularly important as procurementroutes involving contractor led design have become much morecommonplace. The advent of design packages driven by specialistsub-contractors has also increased the need for co-ordination andmanagement of the design process. With the growing complexity ofconstruction projects, effective design management is increasinglycentral to project success. BIM, as it gains acceptance across theindustry will undoubtedly have a huge impact on project deliveryprocess and the role of the Design Manager. The CIOB Design Manager's Handbook covers subjectssuch as design process and management tools, the role of the DesignManager, value management and innovation, procurement routes andimplications, people dynamics, and factors that will affect thedevelopment of the Design Manager's role in the future,including BIM. It will ensure Design Managers understand theprocesses, tools and skills that are required to be successful inthe role, and will assist them in delivering real value to complexconstruction projects. Written for both the Design Manager practitioner and students onconstruction related degree courses, anyone interested inconstruction based design management will also find the bookuseful.

An Inspector Recalls-Graham Satchwell 2016-04-04 Born in inner-city Birmingham, from an 'impeccable working class pedigree', Graham Satchwell was diagnosed with a serious illness at age 7 - a condition which should have barred his entry to the police force. Forty-two years later, he was Britain's senior-most railway detective. In a career that encompassed every CID rank and involved some of the country's toughest gangsters, petty thieves, bomb threats, terrorism, the odd politician and even the Queen, Graham Satchwell has seen it all. Infused with humour and genuine down-to-earth wisdom, An Inspector Recalls is a frank and intimate account of a life spent on the frontier between crime and punishment that recalls the gangsters, politics and often-questionable police culture of the 1970s, '80s and '90s.

Zero Six Bravo-Damien Lewis 2013-03-14 The Sunday Times No.1 bestseller. They were branded as cowards and accused of being the British Special Forces Squadron that ran away from the Iraqis. But nothing could be further from the truth. Ten years on, the story of these sixty men can finally be told. In March 2003 M Squadron - an SBS unit with SAS embeds - was sent 1,000 kilometres behind enemy lines on a true mission impossible, to take the surrender of the 100,000-strong Iraqi Army 5th Corps. From the very start their tasking earned the nickname 'Operation No Return'. Caught in a ferocious ambush by thousands of die-hard fanatics from Saddam Hussein's Fedayeen, plus the awesome firepower of the 5th Corps' heavy armour, and with eight of their vehicles bogged in Iraqi swamps, M Squadron launched a desperate bid to escape, inflicting massive damage on their enemies. Running low on fuel and ammunition, outnumbered, outmanoeuvred and outgunned, the elite operators destroyed sensitive kit and prepared for death or capture as the Iraqis closed their deadly trap. Zero Six Bravo recounts in vivid and compelling detail the most desperate battle fought by British and allied Special Forces trapped behind enemy lines since World War Two. It is a classic account of elite soldiering that ranks with Bravo Two Zero and the very greatest Special Forces missions of our time.

Beyond Strategic Vision-Michael Cowley 2012-08-21 Hoshin is a system which was developed in Japan in the 1960's, and is a derivative of Management By Objectives (MBO). It is a Management System for determining the appropriate course of action for an organization, and effectively accomplishing the relevant actions and results. Having recognized the power of this system, Beyond Strategic Vision tailors the Hoshin system to fit the culture of North American and European organizations. It is a "how-to" guide to the Hoshin method for executives, managers, and any other professionals who must plan as part of their normal job. The management of an organization, whether it be large or small, has as one of its principal responsibilities setting the direction of the organization for the future. The most effective way to set the future direction is to develop a shared vision of what the organization will be in the future, contrast it to the way the organization is now, and then to create a plan for bridging the gap: the Strategic Plan. Beyond Strategic Vision shows you how to do this effectively and efficiently. Michael Cowley has been a teacher and practitioner of management and strategic planning methodologies since 1972. He is a certified instructor for GOAL/QPC and has worked with a wide variety of clients in the automotive, manufacturing, financial, military, healthcare, and educational fields. Dr. Cowley is President of Cowley & Associates, management consultants in Carnelian Bay, California. Ellen Domb is President of the PQR Group, a consulting firm specializing in the application of TQM in Upland, California. She has a successful history of teaching and consulting for planning, management, manufacturing, product development, and business systems. Transformational Government-Great Britain: Cabinet Office 2005-11-02 This document sets out the strategy to transform the business of government through increased and better use of technology. It is directed at three key areas: (1) the transformation of public services for the benefit of citizens, businesses, taxpayers and front-line staff; (2) the efficiency of the corporate services and infrastructure of government organizations; (3) the steps necessary to achieve effective delivery of technology for government. To achieve this, services must be designed around the citizen or business, not the provider. Government must move to a shared services culture, releasing efficiencies by standardisation, simplification and sharing. And there must be more professionalism in the planning, delivery, management, skills and governance of IT in government. A detailed action plan to implement the strategy will be approved by the Chief Information Officers' Council and the Service Transformation Board, and published before the end of this financial year. Comments on the strategy (by 3 February 2006) are welcomed: itstrategyprojectteam@cabinet-office.x.gsi.gov.uk; Strategy Team, eGovernment Unit, Cabinet Office, 3rd Floor, Stockley House, 130 Wilton Road, London SW1V 1LQ (tel 020 7276 63160)

We are Still Here-Laura Waterman Wittstock 2013 The American Indian Movement, founded in 1968 in Minneapolis, burst into that turbulent time with passion, anger, and radical acts of resistance. Spurred by the Civil Rights movement, Native people began to protest the decades--centuries--of corruption, racism, and abuse they had endured. They argued for political, social, and cultural change, and they got attention. The photographs of activist Dick Bancroft, a key documentarian of AIM, provide a stunningly intimate view of this major piece of American history from 1970 to 1981. Veteran journalist Laura Waterman Wittstock, who participated in events in Washington, DC, has interviewed a host of surviving participants to tell the stories behind the images. The words of Russell Means, Dennis Banks, Clyde Bellecourt, Eddie Benton Banai, Pat Bellanger, Elaine Salinas, Winona LaDuke, Bill Means, Ken Tilsen, Larry Leventhal, Jose Barreiro, and others tell the stories: the takeovers of federal buildings and the Winter Dam in Wisconsin, the founding of survival schools in the Twin Cities, the Wounded Knee trials, international conferences for indigenous rights, the Trail of Broken Treaties Caravan and the Longest Walk for Survival, powwows and camps and United Nations actions. This is the inside record of a movement that began to change a nation. Dick Bancroft has been the unofficial photographer for the American Indian Movement since 1970. He has traveled the world to take these photographs. Laura Waterman Wittstock (Seneca Nation), a writer and media consultant, covered the early years of the American Indian Movement as a journalist. Rigoberta Menchú Tum, recipient of the 1992 Nobel Peace Prize, is an activist for indigenous rights in Guatemala.

And it was a hoax, as validated by the Mueller Hearings--but first exposed here in Papadopoulos' historic account.
