Salt Sugar Fat-Michael Moss 2013-02-26 From a Pulitzer Prize-winning investigative reporter at The New York Times comes the troubling story of the rise of the processed food industry -- and how it used salt, sugar, and fat to addict us. Salt Sugar Fat is a journey into the highly secretive world of the processed food giants, and the story of how they have deployed these three essential ingredients, over the past five decades, to dominate the North American diet. This is an eye-opening book that demonstrates how the makers of these foods have chosen, time and again, to double down on their efforts to increase consumption and profits, gambling that consumers and regulators would never figure them out. With meticulous original reporting, access to confidential files and memos, and numerous sources from deep inside the industry, it shows how these companies have pushed ahead, despite their own misgivings (never aired publicly). Salt Sugar Fat is the story of how we got here, and it will hold the food giants accountable for the social costs that keep climbing even as some of the industry's own say, "Enough already."

The Future of Aging- 2010-07-28 Just as the health costs of aging threaten to bankrupt developed countries, this book makes the scientific case that a biological "balout" could be on the way, and that human aging can be different in the future than it is today. Here 40 authors argue how our improving understanding of the biology of aging and selected technologies should enable the successful use of many different and complementary methods for ameliorating aging, and why such interventions are appropriate based on our current historical, anthropological, philosophical, ethical, evolutionary, and biological context. Challenging concepts are presented together with in-depth reviews and paradigm-breaking proposals that collectively illustrate the potential for changing aging as never before. The proposals extend from today to a future many decades from now in which the control of aging may become effectively complete. Examples include sirutin-modulating pills, new concepts for attacking cardiovascular disease and cancer, mitochondrial rejuvenation, stem cell therapies and regeneration, tissue reconstruction, telomere maintenance, prevention of immunosenescence, extracellular rejuvenation, artificial DNA repair, and full deployment of nanotechnology. The Future of Aging will make you think about aging differently and is a challenge to all of us to open our eyes to the future therapeutic potential of biogerontology.

Linking Literature with Life-Alexa L. Sandmann 2002 Three significant changes have impacted the teaching of social studies to young adolescents in the past decade: (1) development of the curriculum standards for social studies by the National Council for the Social Studies (NCSS); (2) growth in the number of middle schools, which are premised on the integration of content; and (3) expansive use of children's literature in social studies. This book is in response to those innovations which are explained in two parts: (1) provides a rationale for using trade books in social studies and details strategies for nurturing students' reading comprehension; and (2) provides annotations for more than 250 trade books, along with ideas for classroom use, and recommends 150+ additional titles. An index by title and an index by subject are also included. (BT)

"I thought you said you were leaving!" shouts the boy. The dog drools. Locating Classical Receptions on Screen-Ricardo Apostol 2018-10-19 This volume explores film and television sources in problematic conversation with classical antiquity, to better understand the nature of artistic reception and classical reception in particular. Drawing inspiration from well-theorized fields like adaptation studies, comparative literature, and film, the essays in this collection raise questions fundamental to the future of reception studies. The first section, 'Beyond Fidelity', deals with idiosyncratic adaptations of ancient sources; the second section, 'Beyond Influence', discusses modern works purporting to adapt ancient figures or themes that are less straightforwardly ancient than they may at first appear; while the last section, 'Beyond Original', uses films that lack even these murky connections to antiquity to challenge the notion that studying reception requires establishing historical connections between works. As questions of audience, interpretation, and subjectivity are central to most contemporary fields of study, this is a collection that is of interest to a wide variety of readers in the humanities.
