It's Never Too Late to Sleep Train-Craig Canapari, MD 2019-05-07 From a leading pediatric sleep physician comes a revolutionary program that will have everyone in the house sleeping through the night. When Dr. Craig Canapari became a father, he realized that all his years of 36-hour hospital shifts didn't even come close to preparing him for the sleep deprivation that comes with parenthood. The difference is that parents don't get a break— it's hard to know if there's a night of uninterrupted sleep anywhere in the foreseeable future. Sleepless nights for kids mean sleepless nights for the rest of the family--and a grumpy group around the breakfast table in the morning. In *It's Never Too Late to Sleep Train*, Canapari helps parents harness the power of habit to chart a clear path to high-quality sleep for their children. The result is a streamlined two-step sleep training plan that focuses on cues and consequences, the two elements that shape all habits and that take on special importance when it comes to kids' bedtime routines. Dr. Canapari distills years of clinical research and experience to make sleep training simple and stress-free. Even if you've been told that you've missed the optimal "window" for sleep training, Dr. Canapari is here to prove that it's never too late, whether your child is 6 months or 6 years old. He's on your side in the battle against bedtime, and with his advice, parents and children alike can expect a lifetime of healthy sleep.

Secrets of the Nanny Whisperer-Tammy Gold 2015-01-06 The New Childcare Bible—A Must-Have Whether You Have Occasional Sitters or a Full-Time Nanny Finding the right caregiver can be one of the most life-changing decisions a parent makes. Whether it's a kindly neighbor for the weekday latchkey hours, a teenage babysitter one night a week, or a full-time professional nanny, the right caregiver can enrich a child's world and literally grow her brain. Hire the wrong one, and this person could cause developmental delays and stress for the entire family. In her groundbreaking new book, *Secrets of the Nanny Whisperer: A Practical Guide for Finding and Achieving the Gold Standard of Care for Your Child*, nationally recognized parenting expert Tammy Gold draws from her extensive background in child developmental psychology, social work, and family therapy to offer the first childcare bible for parents. Knowing the impact caregivers have on children coupled with the unregulated often unknown world of in-home childcare workers, Gold has devoted her professional career, and now this book, to helping parents navigate through this important—and woefully overlooked—process. She arms parents with invaluable tools, tips, and insider secrets to finding the perfect caregiver-family match. Gold's Family Needs Assessment helps parents identify the traits and conditions that are "must-haves," added "pluses," or nonnegotiable "deal breakers." Parents can then use this list of qualities to quickly weed out unqualified candidates. She also details what to ask over the phone and in a face-to-face interview, how to structure a trial run (which she deems essential), and what to spell out in a Nanny-Family Work Agreement--another essential tool included in the book. Readers learn her "Nanny Speak 1-2-3" technique to help clarify and resolve issues with the caregiver in a productive, positive way. In addition to saving hours and energy, Parents will also discover as much about parenting as they will be finding a nanny. *Secrets of the Nanny Whisperer* is chock-full of parenting gems about children's developmental stages, ways to nurture and stimulate the child, and essential strategies for maintaining harmonious and high-functioning parent-child-caregiver relationships. This book is a must read for parents who want to create a happier, healthier and safer childcare experience for their child.

Parenting Matters-National Academies of Sciences, Engineering, and Medicine 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the familyâ€”which includes all primary caregiversâ€”are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Recovering from the trauma, Bobby re-builds his business and journeys across the US and China, experiencing a life unhindered by religious animosity. Having experienced both sides of religion - of immersion and detachment - he starts questioning the role of religion in our lives. Based on his vision of an emergent India, Bobby finally submits a PIL in the Supreme Court for religious shrines to distribute their excess income for the downtrodden. What happens next as religious hardliners turn against him?

From Neurons to Neighborhoods-Division of Behavioral and Social Sciences and Education 2000-11-13 How we raise young children is one of today's most highly personalized and sharply politicized issues, in part because each of us can claim some level of "expertise." The debate has intensified as discoveries about our development-in the womb and in the first months and years-have reached the popular media. How can we use our burgeoning knowledge to assure the well-being of all young children, for their own sake as well as for the sake of our nation? Drawing from new findings, this book presents important conclusions about nature-versus-nurture, the impact of being born into a working family, the effect of politics on programs for children, the costs and benefits of intervention, and other issues. The committee issues a series of challenges to decision makers regarding the quality of child care, issues of racial and ethnic diversity, the integration of children's cognitive and emotional development, and more. Authoritative yet accessible, *From Neurons to Neighborhoods* presents the evidence about "brain wiring" and how kids learn to speak, think, and regulate their behavior. It examines the effect of the climate-family, child care, community-within which the child grows.

5 Days to a Perfect Night's Sleep for Your Child-Eduard Estivill 2010-11-24 An international phenomenon now available in America for the first time, this quick, no-nonsense guide is all you need to get your child to sleep through the night (pillow not included). These days, most books on improving your child's sleep take either a tough-love approach (ignore crying) or a soothing strategy (offer continuous comfort). But now an internationally renowned sleep expert provides a middle-ground method that will have your child sleeping through the night at any age. Dr. Eduard Estivill's no-fail technique focuses on a mixture of authority, ritual, and reward. Parents can end negative cycles of resistance and wakefulness and feel as rested as their child will by following these expert tips: • Adopt a firm and confident attitude (your child will pick up on your mood). • Use meals as a cue to announce your child's next nap or nighttime sleep. • Incorporate appropriate elements (such as a stuffed animal or a pacifier) at bedtime so your child will not rely on you as a vital part of the sleep process. • Reinforce the contrast between light (day) and dark (night). • Never punish children by making them go to bed (it sends the wrong message about sleep time). • Learn what to say before—and after—the light is turned off. Complete with special techniques to use with newborns, plus an invaluable question-and-answer section that addresses specific concerns (children sleeping in their parents' bed, how divorced parents can work together, special-needs children), this sanity-saving guide promises sweet dreams for all.
