Promise of the Wolves-Dorothy Hearst 2008-06-03 The first in The Wolf Chronicles trilogy, brilliantly weaving together original research, lovable characters and a dynamic, thoroughly engaging

plot, *Promise of the Wolves* is a historical adventure story in the tradition of *Clan of the Cave Bear* and *Watership Down*. Set 14,000 years ago in what is now Southern Europe, *Promise of the Wolves* is told from the point of view of Kaala, a young wolf born of a forbidden, mixed-blood litter. An outcast after her mother is exiled, Kaala struggles to earn her place in her pack. But her world is turned upside down when she rescues a human girl from drowning. Kaala and her young packmates begin hunting and playing with humans—risking expulsion from their pack and banishment from their home in the Wide Valley. When war between humans and wolves threatens, Kaala learns that she is the last in a long line of wolves charged with keeping watch over humans in order to prevent them from losing touch with nature and thus destroying the world. But to do so she must solve the great paradox of wolfkind: though wolves must always be with humans, humans cannot abide the presence of wolves, and every time the two come together, war ensues. Kaala must choose between safety for herself, her friends, and their human companions and the survival of her pack—and perhaps all of wolf and humankind.

*Spirit Wolf*-Kathryn Lasky 2013-04-30 When earthquakes and erupting volcanoes strike the Beyond, Faolan and the other surviving wolves must head for the Distant Blue, where they hope to find a new home.

*Wolf Spirit*-Gudrun Pflüger 2015 "I really believe the encounter with the wolves in the wilderness was a powerful medication. They gave me strength." -- Gudrun Pflüger, in *USA Today* In 2005, elite marathon mountain runner and cross-country skier Gudrun Pflüger spent five weeks tracking and studying elusive coastal wolves by foot, kayak and sailboat along the rugged Pacific Coast of western Canada. Her daring and adventurous work as a field biologist eventually formed the basis for the Smithsonian Channel documentary *A Woman Among Wolves*. In the period between the completion of her research and the premier of this first documentary film, Pflüger was diagnosed with an aggressive brain cancer and told she had eighteen months to live. Eventually surgeons removed a tumour the size of a golf ball, and Pflüger underwent protracted chemotherapy and additional, non-conventional therapies in order to combat what some expected was

an inevitable and all too common fate. During her prolonged and arduous recovery, she took the wolf - a true "endurance athlete" - as a model and re-immersed herself in what she hoped would be the restorative mountain environments of the British Columbia and Alberta backcountry in order to focus her traumatized mind and body on a path toward self-healing. Her difficult and reflective return to studying wolves in Canada led to another Smithsonian Channel documentary, *Running With Wolves*. It also included an event that defied the odds and astounded her doctors: after gruelling rounds of cancer treatment Gudrun became a mother, giving birth to a son, Conrad, in 2009. Through an intensely personal and emotional, yet rigorously scientific connection with the wolves she studies and the glorious landscape that surrounded her during this remarkable journey, Gudrun Pflüger tells an absorbing story of the transformative and healing power of nature, motherhood and one woman's goal to save the wolves she admires and bring her own threatened body and mind back to health.

*Secrets of the Wolves*-Dorothy Hearst 2012-07-24 The second installment in *The Wolf Chronicles* finds Kaala struggling with the consequences of forming the first mixed wolf-human pack.

*Spirit of the Wolves*-Dorothy Hearst 2015-12-29 "Weaving together original research, series characters and a dynamic plot, *Spirit of the Wolves* is the final title in *The Wolf Chronicles* trilogy"--

*Wolves*-Melissa Gish 2004-08-01 Describes the physical characteristics, behavior, habitat, life cycle, and conservation of North American gray wolves.

*Wolf*-Diana Landau 2000 An anthology in celebration of wolves includes writings by wolf experts, along with poetry, fables, legends, and myths from cultures around the world.

*Wolves of the Beyond #5: Spirit Wolf*-Kathryn Lasky 2012-05-01 Faolan, a wolf once doomed to die, struggles to fulfill his destiny as the leader of the wolves of *Beyond*. No one ever saw Faolan as a leader. Banished as a pup, he survived and returned as a gnaw wolf-the lowest member of the wolf pack. But Faolan wasn't meant to be a gnaw wolf. It's not just his strange, splayed paw, or his uncanny connection with the bears. There's something about Faolan that inspires certain wolves . . . and leaves others deeply suspicious.

Now, with a dangerous threat on the horizon, the pack must make a

choice. Will they trust the silver outsider with the task of leading? If Faolan can't fulfill his destiny, it could be the end of the wolves of the Beyond.

Wolf Spirit-Gudrun Pflüger 2015-11-26 When diagnosed with an aggressive brain tumour, Gudrun Pflüger was told she had eighteen months left to live. Taking the wolf--a true "endurance athlete"--as her model, she immerses herself in the wilderness of the mountain ranges of western Canada and focuses her mind and body on a mysterious and inspirational path toward self-healing. Through an intensely personal, scientific and emotional connection with the wolves she studies and the glorious landscape that surrounds her, Gudrun Pflüger tells a touching and absorbing story of the transformative and healing power of nature.

An orphaned and ostracized fifteen-year-old Native American boy looks up at a bizarre, one-eyed medicine woman and asks himself, "Why am I not dead?" He does not trust the "witch" and is horrified by her ways, but he has no other path to survival and to becoming both man and warrior. When a powerful warrior chieftain from his village threatens both his and the medicine woman's lives, the boy is secreted off to live in the wilderness. There, an ancient exiled hermit teaches him the dark past of his "witch" mentor and how to survive the ever-present dangers of deadly predators, both human and animal. Wolf Island-L. David Mech 2020-10-13 The world's leading wolf expert describes the first years of a major study that transformed our understanding of one of nature's most iconic creatures In the late 1940s, a small pack of wolves crossed the ice of Lake Superior to the island wilderness of Isle Royale, creating a perfect "laboratory" for a long-term study of predators and prey. As the wolves hunted and killed the island's moose, a young graduate student named Dave Mech began research that would unlock the mystery of one of nature's most revered (and reviled) animals—and eventually became an internationally renowned and respected wolf expert. This is the story of those early years. Wolf Island recounts three extraordinary summers and winters Mech spent on the isolated outpost of Isle Royale National Park, tracking and observing wolves and moose on foot and by airplane—and upending the common misperception of wolves as destructive killers of

insatiable appetite. Mech sets the scene with one of his most thrilling encounters: witnessing an aerial view of a spectacular hunt, then venturing by snowshoe (against the pilot's warning) to photograph the pack of hungry wolves at their kill. Wolf Island owes as much to the spirit of adventure as to the impetus of scientific curiosity. Written with science and outdoor writer Greg Breining, who recorded hours of interviews with Mech and had access to his journals and field notes from those years, the book captures the immediacy of scientific fieldwork in all its triumphs and frustrations. It takes us back to the beginning of a classic environmental study that continues today, spanning nearly sixty years—research and experiences that would transform one of the most despised creatures on Earth into an icon of wilderness and ecological health.

A Game of Birds and Wolves-Simon Parkin 2020-01-28 The triumphant true story of the young women who helped to devise the winning strategy that defeated Nazi U-boats and delivered a decisive victory in the Battle of the Atlantic. By 1941, Winston Churchill had come to believe that the outcome of World War II rested on the battle for the Atlantic. A grand strategy game was devised by Captain Gilbert Roberts and a group of ten Wrens (members of the Women's Royal Naval Service) assigned to his team in an attempt to reveal the tactics behind the vicious success of the German U-boats. Played on a linoleum floor divided into painted squares, it required model ships to be moved across a make-believe ocean in a manner reminiscent of the childhood game, Battleship. Through play, the designers developed "Operation Raspberry," a countermaneuver that helped turn the tide of World War II.

Combining vibrant novelistic storytelling with extensive research,

interviews, and previously unpublished accounts, Simon Parkin describes for the first time the role that women played in developing the Allied strategy that, in the words of one admiral, "contributed in no small measure to the final defeat of Germany." Rich with unforgettable cinematic detail and larger-than-life characters, *A Game of Birds and Wolves* is a heart-wrenching tale of ingenuity, dedication, perseverance, and love, bringing to life the imagination and sacrifice required to defeat the Nazis at sea.
