History of Sterling Trucks-Ernest R. Sternberg 1993

Coventry Climax Racing Engines-Des Hammill In the 50s & 60s Coventry Climax engines powered many race-winning cars, including some driven by Stirling Moss & Jack Brabham. To get the true inside story, the author, an engineer, has talked to all surviving Coventry Climax personnel who were involved with the racing engines. The author was given full access to all of Walter Hassan’s papers, photographs and engine drawings. After 30 months of original research and writing, this book describes exactly how these famous engines developed from industrial fire pumps to the Hillman Imp, from Le Mans winning Lotus Elites to Formula One winners driven by Stirling Moss and Jack Brabham, right through to the company’s takeover by Jaguar in 1963. Viewed through the eyes of an engineer, and the detailed recollections of those who were there, this is a fascinating account of the trials and tribulations of leading edge race engine design from 1952 to 1966.

Calculus-Earl W. Swokowski 2000-06 This edition of Swokowski’s text is truly as its name implies: a classic. Groundbreaking in every way when first published, this book is a simple, straightforward, direct calculus text. It’s popularity is directly due to its broad use of applications, the easy-to-understand writing style, and the wealth of examples and exercises which reinforce conceptualization of the subject matter. The author wrote this text with three objectives in mind. The first was to make the book more student-oriented by expanding discussions and providing more examples and figures to help clarify concepts. To further aid students, guidelines for solving problems were added in many sections of the text. The second objective was to stress the usefulness of calculus by means of modern applications of derivatives and integrals. The third objective, to make the text as accurate and error-free as possible, was accomplished by a careful examination of the exposition, combined with a thorough checking of each example and exercise.

Unpacking Complexity in Informational Texts-Sunday Cummins 2014-11-12 To acquire content knowledge through reading, students must understand the complex components and diverse purposes of informational texts, as emphasized in the Common Core State Standards (CCSS). This practical book illuminates the ways in which a text’s purpose, structure, details, connective language, and construction of themes combine to create meaning. Classroom-tested instructional recommendations and “kid-friendly” explanations guide teachers in helping students to identify and understand the role of these elements in different types of informational texts. Numerous student work samples, excerpts from exemplary books and articles, and a Study Guide with discussion questions and activities for professional learning add to the book’s utility. y

Eaten by a Giant Clam-Joseph Cummins 2010-09-01 The history of natural science across its many disciplines, including zoology, botany, geology or even malacology (the study of molluscs) is often a case of truth being stranger than fiction. There are countless stirring, occasionally alarming, natural history adventure stories to be told, rollicking tales of men and women risking life and limb in the name of science and in the cause of the broadening of human knowledge. Eaten by a Giant Clam focuses on the work of these natural scientists in the field. It comprises 22 stories, with a focus on the heyday of natural history endeavours between the eighteenth and twentieth centuries. Each story surveys the life and career of the scientist, with the main focus being career highlights and their most striking adventures. This fascinating book ranges in content from the humorous to the tragic, from the virtually unbelievable to the inspirational.

Proofs and Fundamentals-Ethan D. Bloch 2013-12-01 The aim of this book is to help students write mathematics better. Throughout it are large exercise sets well-integrated with the text and varying appropriately from easy to hard. Basic issues are treated, and attention is given to small issues like not placing a mathematical symbol directly after a punctuation mark. And it provides many examples of what students should think and what they should write and how these two are often not the same.

November Mourns-Tom Piccirilli 2005-05-31 BONUS: This edition contains an excerpt from Tom Piccirilli’s The Last Kind Words. Two years ago Shad Jenkins went to prison for assaulting his sister’s attacker. Now he has returned to the southern mountain town of Moon Run Hollow, only to find that Megan is dead. No one knows how she died—or why she was found on Gospel Trail Road, a dirt path leading up to the gorge high above the Chatalaha River, where victims of yellow fever were once brought to die. Navigating a world filled with abnormal children and clandestine snake handlers, one that is slowly being poisoned by illegal moonshine, Shad must pierce the townsfolk’s superstitions and terrible secrets to find out the truth about his sister’s death. But the Blood Dreams he’s suffered from since childhood have taken on an eerie urgency, revealing to Shad the nightmarish form of an unseen adversary. Plagued by the wraiths that haunt the hollow, Shad finds himself increasingly unsure of his own sanity as he begins to piece together what may have happened to his sister—and who exactly his enemy is....

The Insufficiency of Maps-Nora Pierce 2007-04-17 In this powerful debut novel by award-winning Nora Pierce, a young girl must discover the meaning of self and family as she struggles to find her place between two contrasting realities. On the reservation, Alice lives in a run-down trailer. Both her parents are alcoholics. She seldom has enough food and she rarely attends school, but she is free to follow her imagination. She is connected to the life and ancestry of her people and the deep love she receives from her family and community. When her mother succumbs to schizophrenia, Alice is removed from her home and placed with a white foster family in the suburbs. This new world is neat and tidy and wholesome, but it is also alien, and Alice is unmoored from everything she has ever known and everything that has defined her. As she traces Alice’s journey between two cultures, Pierce asks probing questions about identity and difference, and she articulates vital truths about the contemporary Native American experience. Utterly authentic and lyrically compelling, this novel establishes Pierce as an important voice in American literature.

That is, practical applications with critical evaluations of methodologies and experimental considerations needed to design, execute, and interpret NMR experiments pertinent to biological molecules.

Sustainable Air Pollution Management-Ramesha Chandrappa 2015-08-21 This work is intended as a textbook on the theory and practice of sustainable air pollution management. The book discusses the fundamental aspects of traditional air pollution topics as well as some more advanced topics (such as atmospheric brown cloud, trans-boundary movement of air pollutants, air transportation of radioactive material, biological air pollutants, etc.). Though much has been written about theory of Air Pollution Management, it is still not practiced in society for a variety of reasons. Having worked at the grass roots level and travelled extensively, the authors have captured useful, cost-effective and successfully implemented practices with their cameras and notebooks. The non-technical issues that are often seen as a hindrance to adopting sustainable solutions due to political, legal and social factors are also addressed to enable readers to understand a different dimension of social problems. Topics covered include selecting a separation process, process description, materials selection logic, implementation etc. Theory, design and operation specifications are also included for each air pollution management option. The book is an excellent guide for those readers looking to understand and practice sustainable air pollution management. Readers also learn how energy-efficient and cost-effective methods can be successfully used to reduce the production of contaminants, providing cleaner air.

Baby Owner’s Manual-Steve Bedwell 2012-10-01 For fathers and their partners, a humorous laugh-out-loud introduction to the chaotic world of parenting, packaged as a retro car manual Regardless of the model you have taken delivery of, your baby will have certain standard equipment in common with all babies, and some which vary from model to model. No two Mother Nature Heavy Industries (MNHl) babies are identical. A humorous operating guide for fathers, this book likens a new baby to the other love in a man’s life—no, not his wife, his car! This essential handbook covers everything from delivery of baby from Mother Nature Heavy Industries, regular servicing of your baby, standard equipment, the cooling system and liquid waste disposal, warning signs, even optimizing economy, and getting the most out of your baby. This is a must-have book for any father-to-be.

Calculus-Tom M. Apostol 2019-04-26 An introduction to the calculus, with an excellent balance between theory and technique. Integration is treated before differentiation -- this is a departure from most modern texts, but it is historically correct, and it is the best way to establish the true connection between the integral and the derivative. Proofs of all the important theorems are given, generally preceded by geometric or intuitive discussion. This Second Edition introduces the mean-value theorems and their applications earlier in the text, incorporates a treatment of linear algebra, and contains many new and easier exercises. As in the first edition, an interesting historical introduction precedes each important new concept.
