This book will help your students to develop positive attitudes and raise competency in math and science.

Number Talks-Sherry Parrish 2010-04-01 "This resource supports new and experienced educators who want to prepare for and design purposeful number talks for their students; the author demonstrates how to develop grade-level-specific strategies for addition, subtraction, multiplication, and division. Includes connections to national standards, a DVD, reproducibles, bibliography, and index"--Provided by publisher.

Mission-Loreen Leedy 1997 Miss Prime and her animal students explore addition by finding many examples in the world around them.

Sir Cumference and All the King's Tens-Cindy Neuschwander 2018-03-29 Read Along or Enhanced eBook: A clever introduction to place value. Sir Cumference and Lady Di planned a surprise birthday party for King Arthur, but they didn't expect so many guests to show up. How many lunches will they need? And with more guests arriving by the minute, what about dinner? Sir Cumference and Lady Di have to figure out a quick way to count the guests to bring order to the party. Sir Cumference and his friends have been entertaining young and old alike for years as they introduce important math concepts with clarity and humor.

Lesson Study-Bill Cerbin 2012-03-12 Why do students stumble over certain concepts and ideas—such as attributing causality to correlation; revert to former misconceptions, even after successfully completing a course—such as physics students continuing to believe an object tossed straight into the air continues to have a force propelling it upward; or get confused about terminology—such as conflating negative reinforcement with punishment? This is the first book about lesson study for higher education. Based on the idea that the best setting in which to examine teaching is where it takes place on a daily basis—the lecture hall, seminar room, studio, lab, and the online classroom management system – lesson study involves several instructors jointly designing, teaching, studying, and refining an individual class lesson in order to explore student learning problems, observe how students learn, and analyze how their instruction affects student learning and thinking. The primary purpose is to help teachers better understand how to support student learning and thinking. By observing how students learn through lesson study teachers can improve their own teaching and build knowledge that can be used by other teachers to improve their practice. Lesson study grew out of the collective efforts of classroom teachers in Asia—most notably in Japan—to improve their teaching. Subsequently imported, tested, and implemented by a group of instructors of biology, economics, English, and psychology at the University of Wisconsin-La Crosse, the process proved so valuable that the university has since established the College Lesson Study Project, of which the author of this book is Director. Focusing on a single lesson enables participants to examine in detail every step of the teaching process, from vision and goals, to instructional design, to implementation, to observation and analysis of student performance, and then evidence-based improvement. It enables faculty to explore learning problems that matter most to them, learn alternative ways to teach from one another, and co-design new course materials. This book introduces lesson study practices to college teachers, providing the necessary guidance, tools, examples, models, and ideas to enable teachers to undertake lesson study in their own classes. It also explores the underlying rationale for lesson study practices and how to realize the full potential of lesson study to advance teaching and learning. A Joint Publication with the National Teaching and Learning Forum An ACPA / NASPA Joint Publication

A Practical Approach to Using Learning Styles in Math Instruction-Ruby Bostick Midkiff 1993

The 512 Ants on Sullivan Street-Carol A. Losi 2006 In this rhyming, cumulative story, the number of ants doubles each time they take a new treat from a picnic lunch.

The Good Neighbors Store an Award-Mark Ramsay 2010-02-01 When The Good Neighbors each receive a cheesy award, they must work together to store it all safely inside their houses. The story models the addition with regrouping process as demonstrated with base-ten blocks.

Teaching Problems and the Problems of Teaching-Magdalene Lampert 2001 In this book an experienced classroom teacher and noted researcher on teaching takes us into her fifth grade math class through the course of a year. Magdalene Lampert shows how classroom dynamics—the complex relationship of teacher, student, and content—are critical in the process of bringing each student to a deeper understanding of mathematics, or any other subject. She offers valuable insights into students and teaching for all who are concerned about improving the learning that happens in the classroom. Lampert considers the teacher's and students' work from many different angles, in views large and small. She analyzes her own practice in a particular classroom, student by student and moment by moment. She also investigates the particular kind of teaching that aims at engaging elementary school students in learning fundamentally important ideas and skills by working on problems. Finally, she looks at the common problems of teaching that occur regardless of the individuals, subject matter, or kinds of practice involved. Lampert arrives at an original model of teaching practice that casts new light on the complexity in teachers' work and on the ways teachers can successfully deal with teaching problems.

15 Fun and Easy Games for Young Learners Math-Susan Julio 2001-09 Kids will have a blast playing Ship Shapes, Hickory Dickory Clock, Pocket Change, and other games that reinforce important primary math skills, such as basic shapes, time, money, patterns, measurement, greater than/less than, and more. Series blurb: What better way to reinforce essential skills than by engaging young children in a variety of delightful games? This collection of easy-to-play, reproducible games gives kids practice in reading and math, and incorporates favorite themes you teach. Perfect for centers and choice time! For use with Grades K-2.

Hurry, Santa!-Julie Sykes 1999-09-01 When his alarm clock fails to go off, Santa oversleeps on Christmas Eve and then encounters a series of disasters that threaten to prevent him from delivering his presents on time. On board pages.

What's Math Got to Do with It?-Jo Boaler 2008 Discusses how to make mathematics for children enjoyable and why it is important for American children to succeed in mathematics and choose math-based career paths in the future.

Runaway Signs-Joan Holub 2020-06-02 When the road signs take a vacation, chaos and hilarity ensue—and they quickly learn how important they are. School is ending for the summer, and the stick figures on the school crossing sign are jealous of all the vacation plans they hear the students making. The stick figures work hard—maybe they deserve a vacation, too! So they abandon their signpost and set off on an adventure, inviting along all the other underappreciated road signs they meet on the way. It's all fun and games for a while, especially when they stumble upon a fantastic amusement park. But the people they've left behind are feeling their absence, and soon there are traffic tangles and lost pedestrians everywhere. The signs are more important than they realized, and now it's time for them to save the day!

Addition and Subtraction Facts-Ideal School Supply Co. 1999-01-15 Never lose another Flash Card again! Help children develop understanding, mastery, and recall of related facts. Includes 156 addition and subtraction facts through 12 + 12 and 24 - 12 in a vertical format. Addition problems are on one side, subtraction problems are on the other side. Features helpful learning hints plus an addition chart. Great for individual use or small and large group instruction.

Performance and Accountability in Today's Classroom-Kimberly T. Strike 2010 This is a consumable workbook for new teachers, or veteran teachers who may need instructional coaching. The first chapter includes an assessment instrument directly aligned to National Teacher Standards and requires the teacher to set goals, be attuned to accountability, self-report on a quarterly basis, and serve as a tool for discussion between a mentor and mentee. The remaining chapters may be covered in any order. The format allows teachers to read through pertinent, concise information on specific topics named important or challenging to new teachers. To apply the information, teacher activity/ies follow the information. Each chapter ends with reflective questions to be used in whole or part in discussion with one's mentor. The book is designed to carry a participant through a three-year mentor-mentee relationship.

The Greedy Triangle-Marilyn Burns 1994 Dissatisfied with its shape, a triangle keeps asking the local shapeshifter to add more lines and angles until it doesn't know which side is up.

Subtraction Grade 1- 2008-01-01 "This workbook will help your child perform multi-digit subtraction with ease."--cover.

The Best Laid Plans-Lesley R. Wagner 2003
