In Praise of Asclepius-Donald A. Russell 2016-08-01 In the middle decades of the second century AD the acclaimed orator Aelius Aristides wrote a number of prose hymns to traditional Greek gods and thereby demonstrated that the cults of these gods had not yet become obsolete and were more than just a topic of backward-looking paideia. This volume presents four of these texts, specifically those that focus on the god of healing, Asclepius, together with a new edition of the Greek text, a new English translation with commentary, and a number of essays shedding additional light on these texts from various perspectives. All in all, the volume wants to show how in these texts of Aristides the author's rhetorical skills, his outlook on the world and his personal religiosity come together to form a remarkable whole.

Stamping the Earth from Space-Renato Dicati 2017-01-10 This unique book presents a historical and philatelic survey of Earth exploration from space. It covers all areas of research in which artificial satellites have contributed in designing a new image of our planet and its environment: the atmosphere and ionosphere, the magnetic field, radiation belts and the magnetosphere, weather, remote sensing, mapping of the surface, observation of the oceans and marine environments, geodesy, and the study of life and ecological systems. Stamping the Earth from Space presents the results obtained with the thousands of satellites launched by the two former superpowers, the Soviet Union and the United States, and also those of the many missions carried out by the ESA, individual European countries, Japan, China, India, and the many emerging space nations. Beautifully illustrated, it contains almost 1100 color reproductions of philatelic items. In addition to topical stamps and thematic postal documents, the book provides an extensive review of astrophilatelic items. The most important space missions are documented through event covers and cards canceled at launch sites, tracking stations, research laboratories, and mission control facilities.

The Data Book of Astronomy-Patrick Moore 2000-01-01 Filled with data about the Earth, Moon, the planets, the stars, our Galaxy, and the myriad galaxies in deep space, this invaluable resource reveals the latest scientific discoveries about black holes, quasars, and the origins of the Universe. It includes maps supported by detailed tables of the names, positions, magnitudes, and spectra of the main stars in each constellation along with key data on galaxies, nebulae, and clusters. MNASSA wrote, "This book fills a niche with detailed astronomical data and concise explanations, all at an accessible level it is an excellent resource, and probably will be the first book I shall reach for."

Pausanias-Pausanias 2003-10-09 Pausanias, the Greek historian and traveler, lived and wrote around the second century AD, during the period when Greece had fallen peacefully to the Roman Empire. While fragments from this period abound, Pausanias' Periegesis ("description") of Greece is the only fully preserved text of travel writing to have survived. This collection uses Pausanias as a multifaceted lens yielding indispensable information about the cultural world of Roman Greece.

Shut Up and Listen!-Tilman Fertitta 2019-09-17 For entrepreneurs ready to reach the next level of success, small business owner turned multibillionaire Tilman Fertitta shares the commonsense principles that have rocketed his worldwide hospitality empire to the top. For aspiring entrepreneurs or people in business, this book will help you take your company to the next level. When you put this book down, you'll know what you're doing right and what you're doing wrong to operate your business, and if you're just getting started, it will help set you up for success. Tilman Fertitta, also known as the Billion Dollar Buyer,

started his hospitality empire thirty years ago with just one restaurant. So he knows the challenges that business owners face, as well as the common pitfalls that cause them to go under. Over the years he's stayed true to the principles that helped him scale his business to what is believed to be the largest single-shareholder company in America, with over \$4 billion in revenue, including hundreds of restaurants (Landry's Seafood, Bubba Gump Shrimp Company, Morton's Steakhouse, Mastro's, The Chart House, Rainforest Café, and over forty more restaurant concepts) and five Golden Nugget Casinos. He's also sole owner of the NBA's Houston Rockets. In *Shut Up and Listen!*, he shares the key insights that made it all possible. When entrepreneurs appear on *Billion Dollar Buyer*, the biggest obstacles they often face are ones they don't suspect: not knowing your numbers, not knowing your strengths and weaknesses, or not being willing to go that extra mile with your customers. Fertitta has seen it all. He knows that what you aren't paying attention to can either sink your business or become the very things that launch you to the top. As Fertitta says: "You might think you know what you're doing, but I'm going to show you what you don't know." Fertitta shares straight-talk "Tilmanisms" around six key action items that any entrepreneur can adopt today: Be the Bull No Spare Customers Change, Change, Change Know Your Numbers Follow the 95/5 Rule Take No Out of Your Vocabulary A groundbreaking, no-holds-barred book, *Shut Up and Listen!* offers practical, hard-earned wisdom from one of the most successful business owners in the world.

The Wandering Astronomer-Patrick Moore 2000-01-01 Drawing on his vast knowledge and direct experience of most of the key events in astronomy and space exploration during this century, Patrick Moore takes a sideways look at the historical reports and contemporary thought behind a wide range of astronomical topics. The Wandering Astronomer presents his personal accounts of the towering characters of 20th-century astronomy, intriguing facts about puzzling astronomical phenomena, and amusing stories about the quirkiest side of astronomy and space exploration. This collection of essays covers everything from the case of vanishing planets to UFOs over Selsey. Entertaining and informative, it will be enjoyable reading for both seasoned and amateur astronomers as well as general science readers. About the Author Author and broadcaster Patrick Moore is a lunar specialist who makes observations from his home in Selsey on most clear nights. He has written more than 100 books, and for the past 43 years he has presented BBC TV's *Sky at Night* program without missing a single episode. Moore served in the RAF during WWII and has been involved in astronomy since he was a boy. In 1967 he was awarded the OBE for his services to astronomy, and in 1988 he received the CBE. He also recently received a knighthood in the New Years Honours list.

Grimoire for the Apprentice Wizard-Oberon Zell-Ravenheart 2004-02-04 With contributions and additional material from Raymond Buckland, Raven Grimassi, Patricia Telesco, Morning Glory Zell-Ravenheart, and other illustrious members of The Grey Council, here is the book Merlin would have given a young Arthur...if only it had existed. This essential handbook contains everything an aspiring Wizard needs to know. It is profusely illustrated with original art by Oberon and friends, as well as many woodcuts from medieval and alchemical manuscripts—plus charts, tables, and diagrams. It also contains: Biographies of famous Wizards in history and legend; Descriptions of magickal tools and regalia (with full instructions for making them); spells and workings for a better life; rites and rituals for special occasions; a bestiary of mythical creatures; systems of divination; the Laws of Magick; myths and stories of gods and heroes; lore and legends of the stars and constellations; instructions for performing amazing illusions, special effects, and many other wonders of the magickal multiverse. To those who study the occult, in particular, Witchcraft, the name of Oberon Zell-Ravenheart is internationally-known and respected. He is a genuine Wizard, and he has written this book for any person wishing to become one. Perhaps, as some have written, Oberon Zell-Ravenheart is the real Albus Dumbledore to aspiring Harry Potters! In addition to his own writings in this collection, he also presents other writers who add some highly thoughtful insights. Such as Raymond Buckland, among others. The illustrations and photographs which accompany the text are among the finest found anywhere, and are a helpful boon to those wanting to see what they are reading about. Biographies of many famous Wizards of history and legend appear in the book. Detailed descriptions of magickal tools with information for making them appears in this book. Additional information includes rites and rituals for special occasions, a bestiary of mythical creatures, a detailed and educational discussion on the laws of magick, myths, and lore of the stars and constellations. This book is full of instructions! As a handbook and guide for becoming a Wizard, this is as near perfect and honest a book as one will find today. New Page Books has done a great service to the paranormal and occult community readers by publishing this worthwhile reference book. Oberon Zell-Ravenheart has written a classic on Wizardry. This is his masterpiece. One of the American pioneers of Paganism in the United States, his lifetime of learning and information is shared with readers from all walks of life. He started in 1968 with the publication of his award-winning journal, Green Egg, and is often considered by readers as one of their favorite Pagan writers. The lessons in this fine book are accurate, honest, and entertaining. If you want to become a Wizard, this is the book to start with, and learn from. This Grimoire is must-have reading for readers interested in true magick. The information given on ghosts will hold the reader spellbound, as will all information in this reference book!

What's Science Ever Done For Us-Paul Halpern 2007-07-09 A playful and entertaining look at science on The Simpsons This amusing book explores science as presented on the longest-running and most popular animated TV series ever made: The Simpsons. Over the years, the show has examined such issues as genetic mutation, time travel, artificial intelligence, and even aliens. "What's Science Ever Done for Us?" examines these and many other topics through the lens of America's favorite cartoon. This spirited science guide will inform Simpsons fans and entertain science buffs with a delightful combination of fun and fact. It will be the perfect companion to the upcoming Simpsons movie. The Simpsons is a magnificent roadmap of modern issues in science. This completely unauthorized, informative, and fun exploration of the science and technology, connected with the world's most famous cartoon family, looks at classic episodes from the show to launch fascinating scientific discussions mixed with intriguing speculative ideas and a dose of humor. Could gravitational lensing create optical illusions, such as when Homer saw someone invisible to everyone else? Is the Coriolis effect strong enough to make all toilets in the Southern Hemisphere flush clockwise, as Bart was so keen to find out? If Earth were in peril, would it make sense to board a rocket, as Marge, Lisa, and Maggie did, and head to Mars? While Bart and Millhouse can't stop time and have fun forever, Paul Halpern explores the theoretical possibilities involving Einstein's theory of time dilation. Paul Halpern, PhD (Philadelphia, PA) is Professor of Physics and Mathematics at the University of the Sciences in Philadelphia and a 2002 recipient of a John Simon Guggenheim Memorial Fellowship. He is also the author of The Great Beyond (0-471-46595-X).

It features an improved section on the diving medical examination,

changes to chapters on mortality statistics and drowning, new sections on habitat diving, breath-hold diving and technical diving, and many new illustrations.

The Concept of Water-R. D. V. Glasgow 2009 Water is commonly taken for granted and treated with contempt, yet it is the very foundation of human existence. Assuming countless forms, it is deeply associated both with life and death, body and soul, purity and pollution, creation and destruction. "The Concept of Water" seeks to bring together the various aspects of our deeply ambiguous relationship with water, providing a systematic account of its symbolic and philosophical significance. This involves looking at how water has been conceived and the role it has played in everyday thought, mythology, literature, religion, philosophy, politics and science, both across cultures and through history. R. D. V. Glasgow was born in Sheffield and currently lives in Zaragoza. His previous books are "Madness, Masks and Laughter" (1995), "Split Down the Sides" (1997), and "The Comedy of Mind" (1999).

Wetlands-Ben A. LePage 2011-04-15 The science of wetlands and our understanding of these complex ecosystems have improved considerably. The emergence of multidisciplinary strategies is providing new opportunities and innovative approaches to address issues such as climate change and coastal protection. This book, with contributions from 19 specialists from academia, government, and industry, provides a trans-disciplinary approach to the understanding wetlands science, drawing together a wide range of expertise. Topics covered include the physical aspects that shape different wetlands around the world, as well as wetlands ecology, regulation, policy, and related social and economic issues. Featuring contributions from some of the world's leading wetlands researchers and practitioners, this book provides an invaluable resource for undergraduate and post-graduate training in all aspects of wetlands management, conservation, and construction. It is also a useful auxiliary text for researchers working across disciplines in fields such as wetlands science, law, landscape architecture, environmental engineering, conservation ecology, and related disciplines.

Plain Brown Wrapper-Greg Lynch 2016-05-19 Impoverished college student Allison Kerry only thought her life was complicated. On a broiling August afternoon in Dallas, it's about to get much worse. Political blackmail leads to a political payoff gone terribly wrong and the money ends up in Allison's hands, but she has no idea where it came from or who lost it. When those who lost the money try to take it back, Allison starts to realize she's stumbled into something far worse than she imagined. To make it through, she'll have to run a gauntlet of corrupt politicians, hired thugs, a sociopathic dog-catcher, a foul-mouthed mob hit man and a pearly-toothed televangelist. Armed with only a single ambiguous clue and the help of someone she isn't sure she can trust, Allison has many questions, few answers and far less time than she thinks to piece everything together.

Eric-Doris Lund 2000-05-30 This is the bestselling story of Eric, a boy with leukemia who refused to give up living--as told by the person who was with him through it all, his mother. Eric was seventeen when he heard the doctor's verdict about the disease that wanted his life. At first he and his family could not believe it. Eric was the picture of everything a youth should be--a champion athlete, a splendid human being, vibrant with energy and loved by all who knew him. The doctors could promise little. They would do as much as was medically possible. Eric had to do as much as was humanly possible. But if the odds were not good, they were good enough for Eric. Given the choice between life and death, Eric chose to live.

Bodyscapes-Allan I. Teger 2012 Can there be more than one reality at a time, and can we experience them both? These were the questions that led photographer and former psychology professor Allan I. Teger to create this collection of black and white Bodyscapes(R). At first glance, Bodyscapes appear to be landscapes; a second look shows that they are in fact nude bodies with small toys and miniatures set on them. Spanning a 35-year period, this collection shows more than 110 black and white images photographed in a single exposure without any post processing or manipulation. The body becomes the setting for golfing, skiing, mountain climbing, surfing, and other sports. Other images feature landscapes ranging from rolling farmlands to beaches and outer space. They are fun, beautiful, and sensual, but always in good taste. This elegant portfolio of Teger's images is an ideal, reality-bending addition to any art photography library.

Reading Hemingway's Men Without Women-Joseph M. Flora 2008 A close reading of one of Hemingway's short story collections. It guides readers towards understanding how Hemingway tested old ideas of family, gender, race, ethnicity and manhood.

Truth Facts-Mikael Wulff 2016-11-08 Welcome to Truth Facts, a collection of information graphics that poke fun at societal quirks and everyday absurdities through charts and graphs. Danish writer Mikael Wulff and cartoon artist Anders Morgenthaler have taken the internet by storm with their humorous and perceptive infographics that turn commonplace phenomena into clever commentary. In distilling keen observations about universal experiences into elegant charts and graphs, Truth Facts gets to the heart of the paradoxical and wonderful world we all share, and puts modern reality into perspective in a funny and visceral way. These simple, colorful graphics explore societal quirks and everyday oddities, such as what happens when you call customer service (anything but service), when banks are open (only when you're at work), the biggest lies on the internet ("LOL"), and much more. Playfully teasing readers even as it explores themes like perception vs. reality, this compendium of life's truthiest facts prods us to laugh at ourselves, own up to our shortfalls, accept the strangeness of the world we live in, and continue on--happier and more connected to one another than ever before.
