A Dictionary of Mah Meri as Spoken at Bukit Bangkong-Nicole Kruspe 2010-07-06 Mah Meri is an Aslian (Austroasiatic: Mon-Khmer) language spoken in scattered settlements along a section of the southwest coast of Selangor in Peninsular Malaysia. The Mah Meri are the only Aslian speakers who live in a coastal environment. Their language, which may have about 2,000 speakers, has no written language and is highly endangered. This is the first comprehensive dictionary of Mah Meri and is based on the author's extensive field research and consultation with members of the community over the last ten years. The dialect presented here is spoken by about 600 people at Bukit Bangkong, the most southerly Mah Meri settlement. The dictionary contains around 4,000 entries, each with a phonetic transcription and translations in both English and Malay. Many entries are further complemented by illustrative examples, notes on usage, derivations, ethnographic information, and illustrations—all provide insight into the world of Mah Meri speakers. Two finder lists (English-Mah Meri and Malay-Mah Meri) are included, giving access to the intended audience of international and local scholars and community members. The volume also includes a general introduction to the Mah Meri, notes to assist the reader in using the dictionary, and a short grammatical description.

Environmental Engineering Studies-Lucjan Pawlowski 2003-12-31 ENVIRONMENTAL ENGINEERING IN THE HISTORICAL PERSPECTIVE Lucjan Pawlowski Information bombarding the nowadays Man may suggest that the world is on the way to an ecological catastrophe. I do not disregard the dangers we are facing now, but I would like to remind that since the beginning of existence Man has been facing numerous threats of an ecological character. First, they were caused by natural phenomena, such as huge forest fires, floods, earth quakes, and later on, caused by the development of our civilisation, Man who was becoming more and more powerful in his abilities started creating new, anthropogenic threats. We may look pessimistically at the development of our civilisation, having in mind the catastrophes caused by Man's activity; we may also look at the examples showing the development of knowledge and the skills derived from it, which enable the elimination of threats and, at the same time making Man's life richer. It is not possible to make an in-depth analysis of the phenomena mentioned above in a short opening speech of the Congress. Nevertheless, I would like to share with you an optimistic reflection. I think that we can observe two trends in

the development of our civilisation - good alternates with evil, environmental threats with the hope for their overcoming, and events swing to both sides like a pendulum in a clock.

Valve train-Simone Dreger 2013-04-18 Valve train systems control the gas exchange in a combustion engine, which means that they represent a significant opportunity for optimizing the combustion process. Since they draw energy from the crankshaft, an efficient valve train contributes greatly to improving overall efficiency. The components of the valve train system are subjected to high loads. In addition to wear due to mechanical forces increasing combustion pressures and temperatures, in particular, place greater demands on the materials and heat dissipation of components on the combustion side. This technical book clearly and thoroughly presents a holistic understanding of the valve train system.

Dionysius the Areopagite on the Divine Names and the Mystical Theology-Clarence E. Rolt 2007-10-01 First published in 1920, this book is a translation-the only known work of British scholar CLARENCE EDWIN ROLT (1880-1917)-of On the Divine Names and The Mystical Theology, by Dionysius the Areopagite, a first-century bishop of Athens. The author is often also referred to as "pseudo-Dionysius" because a variety of anachronisms suggest that the manuscript was actually written much later by an unknown writer. Despite the book's unclear origins, the writings are still greatly valued for their theological insight. Saint Thomas Aquinas often quoted from pseudo-Dionysius, as did many other famous and influential theologians and philosophers. Pseudo-Dionysius deals, here, with the Supra-Personality of God. Personality, by definition, is a quality limited to an individual. God, on the other hand, is the opposite of an individual. God is in all things, so one cannot speak of a personality for the divine. Rather, pseudo-Dionysius proposes a Supra-Personality, which describes aspects and qualities of the universal being. Religious scholars and Christians wanting a different understanding of the relationship between God and the universe will find this a challenging but ultimately thought-provoking study.
