Motorized Obsessions-Paul R. Josephson 2007-08-22 From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

Social Forms/Human Capacities (RLE Social Theory)-Philip Corrigan 2020-07-26 This is an exhilarating book, written by one of sociology's most imaginative theorists and critics. Professor Corrigan proceeds by turning old answers into new questions. He draws on a rich tradition of thought from sociology, philosophy, structuralism, post-structuralism, and literary criticism to explore major ongoing problems in everyday life: moral regulation, schooling, the capitalist world economy, intellectuals, and the problem of difference, masculinity. The result is one of the most dazzling contributions to critical sociology published in recent years.

History of Langlade County, Wisconsin-Robert M. Dessureau 2018-10-09 Excerpt from History of Langlade County, Wisconsin: From U. S. Government Survey to Present Time, With Biographical Sketches Time passes swiftly. There is approaching that hour when the last pioneer will pass to his reward, and with this thought as his inspiring motive, the writer began the task of setting down, while yet there are a few from whose lips the story can be told, the deeds, trials, tribulations and monumental efforts of that vanguard of mortal souls who first trod the soil of Langlade County. Old Stationary Engines-D.W. Edgington 2008-03-04 The versatile engine was used a prime mover to drive all kinds of machinery, working either from a fixed stationary position or as a portable- a trolley or truck was used to transport it to a location where an appliance needed power. They were available in all sizes, from diminutive models used for home-workshop tasks, to large-scale engines for driving agricultural or industrial machinery. David W. Edgington explores the many types and styles of old engine, describing their development from early steam and gas driven examples through to later versions fuelled by petrol, paraffin and diesel. Colour photographs and archive illustrations depict engines produced by well-known manufacturers such as the Associated Manufacturer's Company, Lister, Petter, and Wolseley, and those of lesser-known makers such as Morton and Naylor. This is the ideal introduction to these fascinating machines.

The First Americans-James Adovasio 2009-01-16 J. M. Adovasio has spent the last thirty years at the center of one of our most fiery scientific debates: Who were the first humans in the Americas, and how and when did they get there? At its heart, The First Americans is the story of the revolution in thinking that Adovasio and his fellow archaeologists have brought about, and the firestorm it has ignited. As he writes, "The work of lifetimes has been put at risk, reputations have been damaged, an astounding amount of silliness and even profound stupidity has been taken as serious thought, and always lurking in the background of all the argumentation and gnashing of tenets has been the question of whether the field of archaeology can ever be pursued as a science."
