The Origins of International Investment Law-Kate Miles 2013-10-24 Examination of the origins of international investment law and their continued resonance in the twenty-first century.

The Origins of International Investment Law-Kate Miles 2013-10-24 International investment law is a complex and dynamic field. Yet, the implications of its history are under explored. Kate Miles examines the historical evolution of international investment law, assessing its origins in the commercial and political expansionism of dominant states during the seventeenth to early twentieth centuries and the continued resonance of those origins within modern foreign investment protection law. In particular, the exploration of the activities of the Dutch East India Company, Grotius' treatises, and pre-World War II international investment disputes provides insight into current controversies surrounding the interplay of public and private interests, the systemic design of investor-state arbitration, the substantive focus of principles, and the treatment of environmental issues within international investment law. In adopting such an approach, this book provides a fresh conceptual framework through which contemporary issues can be examined and creates new understandings of those controversies.

International Investment Law-Surya P Subedi QC 2020-06-11 '...This book [...] goes beyond stating what the law is and focuses on controversies occurring within this area of the law... an excellent introduction to this complex area of international law for newcomers to the subject' Kate Miles, Australian International Law Journal The updated edition of this acclaimed book offers a critical overview of the law of foreign investment, incorporating a thorough analysis of the principles and standards of treatment available to foreign investors in international law. It is authoritative and multi-layered, offering an analysis of the key issues and an insightful assessment of recent trends in the case law, from both developed and developing country perspectives. A major feature of the book is that it deals with the tension between the law of foreign investment and other competing principles of international law. In doing so, it proposes ways of achieving a balance between these principles and the need to protect the legitimate rights and expectations of foreign investors on the one hand, and the need not to restrict unduly the right of host governments to implement their public policy on the other, including the protection of the environment and human rights, and the promotion of social and economic justice within the host country. Many of the pioneering ideas that were advanced in the first edition of this book in 2008 have been taken up by governments and international organisations in their attempts to reform the investor-State dispute settlement mechanism and strike a balance between different competing principles in developing international investment law. Accordingly, this fourth edition captures the essence of the ongoing multiple reform processes -either planned or envisaged - currently underway.

International Investment Law and History-Stephan W. Schill 2018 Historiographical approaches in international investment law scholarship are becoming ever more important. This insightful book combines perspectives from a range of expert international law scholars who explore ways in which using a broad variety of methods in historical research can lead to a better understanding of international investment law.

International Investment Law and Arbitration-Chin Leng Lim 2018-04-26 What was once a contested body of principles applied peripherally to the international settlement of expropriation disputes has been transformed and in its place now stands an important area of international disputes practice. International Investment Law and Arbitration offers a comprehensive introduction to the subject. Presenting the facts of daily legal practice and the largely unaltered aims of the subject alongside a broad selection of key awards and original materials, historical developments are discussed in the context of the changing directions in the arbitral jurisprudence and current treaty and arbitration reform debate. Key features: accessible and engaging commentary integrated throughout, end of chapter questions test reader understanding, further reading lists support and encourage exploration of the subject. Suitable for postgraduate law students studying modules on international investment arbitration, International Investment Law and Arbitration offers an indispensable introduction to the subject.

International Investment Law. The Sources of Rights and Obligations-Tarcisio Gazzini 2012-08-22 Drawing on State practice, arbitral awards and national decisions, this book provides a systematic study of the sources of rights and obligations in the field of transnational investment, and their coordination and interaction.

International Investment Law and Arbitration-Borzu Sabahi 2018-02-22 International Investment Law and Arbitration: History, Modern Practice, and Future Prospects explores international law on foreign investment: its creation, functioning and evolution.

The History of Foreign Investment in the United States to 1914-Mira Wilkins 1989 From the colonial era to 1914, America was a debtor nation in international accounts--owing more to foreigners than foreigners owed to us. By 1914 it was the world's largest debtor nation. Mira Wilkins provides the first complete history of foreign investment in the United States during that period. The book shows why the United States was attractive to foreign investors and traces the changing role of foreign capital in the nation's development, covering both portfolio and direct investment. The immense new wave of foreign investment in the United States today, and our return to the status of a debtor nation--once again the world's largest debtor nation--makes this strong exposition far more than just historically interesting. Wilkins reviews foreign portfolio investments in government securities (federal, state, and local) and in corporate stocks and bonds, as well as foreign direct investments in land and real estate, manufacturing plants, and even such service-sector activities as accounting, insurance, banking, and mortgage lending. She finds that between 1776 and 1875, public-sector securities (principally federal and state securities) drew in the most long-term foreign investment, whereas from 1875 to 1914 the private sector was the main attraction. The construction of the American railroad system called on vast portfolio investments from abroad; there was also sizable direct investment in mining, cattle ranching, the oil industry, the chemical industry, flour production, and breweries, as well as the production of rayon, thread, and even submarines. In addition, there were foreign stakes in making automobile and electrical and nonelectrical machinery. America became the leading industrial country of the world at the very time when it was a debtor nation in world accounts.

Resistance and Change in the International Law on Foreign Investment-M. Sornarajah 2015-04-16 Explores the political context of the rapid changes in the international law on foreign investment made through investment arbitration.

The Origin and Evolution of Investment Treaty Standards-Federico Ortino 2019-12-19 This book charts the origins and development of investment protection provisions in foreign investment treaties. Federico Ortino argues that these provisions revolve around three key concepts: legal stability, investment's value, and reasonableness.

Principles of International Investment Law-Rudolf Dolzer (jurist) 2012-11-15 This book provides an ideal introduction to the fundamentals of international investment law and dispute settlement for students or practitioners. It combines a systematic analytical study of the texts and principles underlying investment law with a jurisprudential analysis of the case law arising in international tribunals.

International Investment Treaties and Arbitration Across Asia-Julien Chaisse 2018-02-05 International Investment Treaties and Arbitration Across Asia examines whether and how the Asian region has or may become a significant 'rule maker' in contemporary international investment law and dispute resolution, focusing on the 'ASEAN+6' economies.

Human Rights in International Investment Law and Arbitration-Pierre-Marie Dupuy 2009 There is a growing interplay between international investment law, arbitration and human rights. This book offers a systematic analysis of this interaction, exploring the role of principles of justice in investment law, comparing investment arbitration with other courts, and examining case studies on human rights.

EU Foreign Investment Law-Angelos Dimopoulos 2011-12-08 Regulation of foreign investment is one of the most topical and controversial subjects in EU law and international investment law. This book examines the legal foundations upon which EU investment policy is based, addressing the legal, practical, and political concerns created by the establishment of a common investment policy.

International Investment Law and Water Resources Management-Ana Maria Daza-Clark 2016-12-01 In International Investment Law and Water Resources Management, Daza-Clark offers an appraisal of indirect expropriation, including an analysis of the doctrine of police power.

The Law of Investment Treaties-Jeswald W. Salacuse 2015 New to this edition: Additional chapter on the consequences of treaty violations and the determination of damages in investor state disputes - Covers all treaties and free trade agreements that have been negotiated since the first edition - Includes analysis of trends from treaty negotiation

Full Protection and Security in International Investment Law-Sebastián Mantilla Blanco 2019-10-24 This book provides a comprehensive study of the standard of 'full protection and security' (FPS) in international investment law. Ever since the Germany-Pakistan BIT of 1959, almost every investment agreement has included an FPS clause. FPS claims refer to the most diverse factual settings, from terrorist attacks to measures concerning concession contracts. Still, the FPS standard has received far less scholarly attention than other obligations under international investment law. Filling that gap, this study examines the evolution of FPS from its medieval roots to the modern age, delimits the scope of FPS in customary international law, and analyzes the relationship between FPS and the concept of due diligence in the law of state responsibility. It additionally explores the interpretation and application of FPS clauses, drawing particular attention to the diverse wording used in investment treaties, the role ascribed to custom, and the interplay between FPS and other treaty-based standards. Besides delivering a detailed analysis of the FPS standard, this book also serves as a guide to the relevant sources, providing an overview of numerous legal instruments, examples of state practice, arbitral decisions, and related academic publications about the standard.

State Responsibility for Breaches of Investment Contracts-Jean Ho 2018-10-25 This book critically analyses the origins, the creation, and the evolution of an international law on investment contract protection.

Handbook of International Investment Law and Policy-Julien Chaisse 2021-02-15 The Handbook of International Investment Law and Policy is a one-stop reference source. This Handbook covers the main conceptual questions in a logical, scholarly yet easy to comprehend manner. It is based on a truly global vision insisting particularly on Global South related issues and developments. In this respect, the Handbook of International Investment Law and Policy provides an excellent modern treatment of international investment law which is one of the fastest growing areas of international economic law. Professor Julien Chaisse, Professor Leila Choukroune, and Professor Sufian Jusoh are the editors-in-chief of the Handbook of International Investment Law and Policy, a 1,500-page reference book, which is anticipated becoming one of the most influenced reference books in the international economic law areas. This Handbook is a highly comprehensive set of four volumes of original materials designed to cover all facets of international investment law and policy. The chapters, written by world-leading experts, explore key ideas and debates in relation to:

international investment substantive law (Volume I), Investor-state dispute settlement (Volume II); interaction between international investment law and other fields of international law (Volume III); and, the new trends and challenges for international investment law (Volume IV). The Handbook will feature more than 80 contributions from leading experts (academics, lawyers, government officials), including Vivienne Bath, M. Sornarajah, Mélida Hodgson, Rahul Donde, Roberto Echandi, Andrew Mitchell, Ernst-Ulrich Petersmann, Christina L. Barry, Krista Nadakavukaren Schefer, Leon Trakman, Prabhash Ranjan, Emmanuel Jacomy, Mariel Dimsey, Stavros Brekoulakis, Romesh Weeramantry, Nathalie Bernasconi-Osterwalder, David Collins, Damilola S. Olawuyi, Katia Fach Gomez, Jaemin Lee, Alejandro Carballo-Leyda, Patrick W. Pearsall, Mark Feldman, Surya Deva, Luke Nottage, Rafael Leal-Arcas, James Nundumpara, Rodrigo Polanco, etc. This Handbook will be an essential reference tool for students and scholars of international economic law. Policy makers and researchers alike will find the Handbook of International Investment Law and Policy useful for years to come.

International Investment Law and Development-Stephan W. Schill 2015-12-18 International investment law has often been seen as an obstacle to sustainable development. While the connections between investment and development are plain, for a long time there has been relatively little scholarship exploring them. Combining critical reflection and detailed analysis, this book addresses the relationship between contemporary investment law and development. The book is organized around two competing visions of investment and development - as working either harmoniously or in conflict with one another. The expert contributors reflect on both of these views and analyse the social dimensions of development and its impact on investment law. Coverage includes in-depth discussion on such issues as human rights, poverty reduction, labor standards, and indigenous peoples. Students and scholars of international investment law will benefit from the informed analysis of the links between investment and development. This book will also be of use to practitioners and experts of development law who are looking for an up-to-date perspective of the field.

The Multilateralization of International Investment Law-Stephan W. Schill 2009-08-20 The book argues that international investment law is a structured body of law based on uniform principles of investment protection.

Law and Practice of Investment Treaties-Andrew Paul Newcombe 2009-01-01 The book focuses on the substantive protections accorded to investors and investments and on the variations among jurisdictions. Among the many specific issues and topics that arise in the course of the discussion are the following: - problems of transparency and conflict of interest; - the recent growth in IIAs between and among developing nations; - the effect of new model bilateral investment treaties (BITs); - the ability of non-disputing parties to participate in investor-state arbitration; - theories of the interaction of foreign direct investment (FDI) and BITs; - investor-state arbitration as an evasion of public regulatory authority; - the role of investment funds in international investment; - 'fork in the road' provisions; and - institutional versus ad hoc arbitration. International business and other investors will greatly appreciate the in-depth information and insightful guidance in this solidly useful book. It will also be welcomed by jurists and students as a significant milestone in the development of principles in a quickly growing field of practice that is still plagued with inconsistencies.

Arbitration Under International Investment Agreements-Katia Yannaca-Small 2010 Investor-state arbitration is a relatively new dispute settlement mechanism that allows foreign investors the opportunity to seek redress for damages arising out of breaches of investment-related treaty obligations by the governments of host countries. Claims are submitted to independent, international arbitration tribunals, which are called upon to interpret the treaty at hand. Because of the public interest involved in these cases, the awards of these tribunals are subject to much scrutiny and debate. Thus, it has already generated hundreds of cases and created new legal disciplines, inspiring a continuous string of legal writings. This book provides a comprehensive analysis of the main issues that arise in investor-state arbitration. It accompanies the reader through the phases of such a procedure, starting with an examination of the instruments, which provide, in the overwhelming majority of the cases, the legal basis for the requests for such arbitration. It then continues with the launching of the arbitration procedure, followed by the analysis of the main jurisdictional and substantive issues that the tribunals are confronted with, and the review procedures, when there is a request for setting aside of the award. It finally looks at the post-award phase and concludes with a reflection on the role of precedent in investment arbitration. Arbitration under International Investment Agreements: a Guide to the Key Issues contains in one volume what everybody needs to know on this evolving topic. Calling on the most renowned experts in this field, private practitioners, academics, government and international organization officials, it describes the process in all its phases from A to Z, providing a comprehensive insight in the way investor-state arbitration works from the perspective of the main actors involved. Its analyses of all key aspects of the topic are pragmatic and reliable.

Bounded Rationality and Economic Diplomacy-Laue N. Skovgaard Poulsen 2015-08-21 Examines how developing countries often sign up to highly potent rules underwriting economic globalisation without even realising it.

China, the EU and International Investment Law-Yuwen Li 2019-11-11 This book provides an original and critical analysis of the most contentious subjects being negotiated in the China-EU Comprehensive Agreement on Investment (CAI). It focuses on the pathway of reforming investor-state dispute settlement (ISDS) from both Chinese and European perspectives in the context of the China-EU CAI and beyond. The book is divided into three parts. Part I examines key and controversial issues of the China-EU CAI negotiations, including market access, sustainable development and human rights, as well as comparing distinct features between the China-EU CAI and the China-US BIT. Part II concentrates on the institutional reform of investor-state arbitration with an extensive analysis of the EU's approach to replacing the private nature of investment arbitration with the public nature of an investment court. Part III addresses the core substantive and procedural issues concerning ISDS, such as the role of domestic courts in investment dispute settlement, the status of state-owned enterprises (SOEs) as investors, transparency and the protection of victims in investment dispute resolution. This book will be of interest to scholars and practitioners in the field of international investment and trade law, particularly investment dispute settlement.

U.S. International Investment Agreements-Kenneth J. Vandeveld 2009 Discusses the bilateral investment treaty, or BIT.

Miga and Foreign Investment-Ibrahim F. I. Shihata 1988 Chapters.

Takeover-David Uren 2015-08-31 Did the Chiko Roll change Australian history? As a matter of fact, yes. Efforts by the reviled US company IT&T to take over the company making the Roll in the early 1970s marked a turning point in Australian foreign investment policy. And this is just one of the strange twists and turns in the buying and selling of Australia. Takeover is an authoritative, engaging account of the history of foreign investment in Australia - both the economics and the politics. It explores the strange coalitions of left and right that have sought to insulate us from the world economy and the equally unpredictable forces that have embraced it. It is a story of the fights between the protectionists and free traders of the nineteenth century, of our relationships with the US, Britain, Japan and China, and of the rise of Google and Uber. Australia's economy has been built on the back of foreign capital - alone among nations advanced or emerging, we have been able to run deficits with the world throughout our history precisely because foreigners are so keen to invest here. Yet there is an insecurity about the source of our prosperity coming from somewhere else. Where does the national interest lie, and what issues are at stake?

Sources of International Law-Christoph Schreuer 2000

Foreign Investment, Development, and Globalization-E. Paus 2005-10-13 This book engages the question, hotly debated among theorists and policymakers alike, of how a developing country's pursuit of foreign direct investment (FDI)

affects its development prospects in a globalized world. Can small latecomers to economic development use high-tech FDI to rapidly expand indigenous capabilities, thus shortcutting stages of the industrialization process? What conditions, economic and non-economic, must be met for this strategy to succeed? Using the cases of Ireland and Costa Rica, the author shows how the dynamics of the FDI-development nexus have changed over time, rendering problematic Costa Rica's attempt, and those of other latecomers, to replicate the Celtic Tiger's success story.

The Effect of Treaties on Foreign Direct Investment-Karl P Sauvart 2009-03-27 Over the past twenty years, foreign direct investments have spurred widespread liberalization of the foreign direct investment (FDI) regulatory framework. By opening up to foreign investors and encouraging FDI, which could result in increased capital and market access, many countries have improved the operational conditions for foreign affiliates and strengthened standards of treatment and protection. By assuring investors that their investment will be legally protected with closed bilateral investment treaties (BITs) and double taxation treaties (DTTs), this in turn creates greater interest in FDI.

Comparative International Law-Anthea Roberts 2018 By definition, international law, once agreed upon and consented to, applies to all parties equally. It is perhaps the one area of law where cross-country comparison seems inappropriate, because all parties are governed by the same rules. However, as this book explains, states sometimes adhere to similar, and at other times, adopt different interpretations of the same international norms and standards. International legal rules are not a monolithic whole, but are the basis for ongoing contestation in which states set forth competing interpretations. International norms are interpreted and redefined by national executives, legislatures, and judiciaries. These varying and evolving interpretations can, in turn, change and impact the international rules themselves. These similarities and differences make for an important, but thus far, largely unexamined object of comparison. This is the premise for this book, and for what the editors call "comparative international law." This book achieves three objectives. The first is to show that international law is not a monolith. The second is to map the cross-country similarities and differences in international legal norms in different fields of international law, as well as their application and interpretation with regards to geographic differences. The third is to make a first and preliminary attempt to explain these differences. It is organized into three broad thematic sections, exploring: conceptual matters, domestic institutions and comparative international law, and comparing approaches across issue-areas. The chapters are authored by contributors who include leading international law and comparative law scholars with diverse backgrounds, experience, and perspectives.

Investment: A History-Norton Reamer 2016-02-19 Investing—the commitment of resources to achieve a return—affects individuals, families, companies, and nations, and has done so throughout history. Yet until the sixteenth century, investing was a privilege of only the elite classes. The story behind the democratization of investing is bound up with some of history's most epic events. It is also a tale rich with lessons for professional and everyday investors who hope to make wiser choices. This entertaining history doubles as a sophisticated account of the opportunities and challenges facing the modern investor. It follows the rise of funded retirement; the evolution of investment vehicles and techniques; investment misdeeds and regulatory reform; government economic policy; the development of investment theory; and the emergence of new investment structures. Norton Reamer and Jesse Downing map these trends and profile the battle between low cost index and exchange-traded funds, on the one hand, and the higher-fee hedge funds and private equity, on the other. By helping us understand this history and its legacy of risk, Reamer and Downing hope to better educate readers about the individual and societal impact of investing and ultimately level the playing field.

European Yearbook of International Economic Law 2016-Marc Bungenberg 2016-07-16 Volume 7 of the EYIEL focusses on critical perspectives of international economic law. Recent protests against free trade agreements such as the Transatlantic Trade and Investment Partnership (TTIP) remind us that international economic law has always been a politically and legally contested field. This volume collects critical contributions on trade, investment, financial and other subfields of international economic law from scholars who have shaped this debate for many years. The critical contributions to this volume are challenged and sometimes rejected by commentators who have been invited to be "critical with the critics". The result is a unique collection of critical essays accompanied by alternative and competing views on some of the most fundamental topics of international economic law. In its section on regional developments, EYIEL 7 addresses recent megaregional and plurilateral trade and investment agreements and negotiations. Short insights on various aspects of the Transpacific Partnership (TPP) and its sister TTIP are complemented with comments on other developments, including the African Tripartite FTA and the negotiations on a plurilateral Trade in Services Agreement (TiSA). Further sections address recent WTO and investment case law as well as recent developments concerning the IMF, UNCTAD and the WCO. The volume closes with reviews of recent books in international economic law.

International Investment Arbitration-Campbell McLachlan 2017-09-07 "[This book reviews] the substantive principles of international law applied by investment arbitration tribunals, and a clear and comprehensive description of the present state of the law...The second edition is fully updated to take account of the arbitration awards rendered in the period since 2007...Key areas of coverage include: the instruments under which investment disputes arise; the legal basis of treaty arbitration; dispute resolution and parallel proceedings; who is a foreign investor, including nationality issues and foreign control; what is an investment; investors' substantive rights, including fair and equitable treatment; expropriation; compensation and remedies. Arbitration of overseas investment disputes is one of the fastest growing areas of international dispute resolution. The exponential growth of international investment in recent years has led to the signature of over two thousand Bilateral Investment Treaties (BITs) between foreign states, in addition to a wealth of multilateral treaties and other forms of concession agreements. The legal principles that have developed in this area are subject to intense debate, and are still in a state of flux. While tribunals routinely state that they are applying principles of public international law to determine disputes, many of the principles applied have only been developed recently in the context of investment treaty arbitrations, and tribunals are often guided more by the approaches taken by other tribunals, than by pre-existing doctrines of public international law."--

The Extraterritoriality of Law-Daniel S. Margolies 2019-03-27 Questions of legal extraterritoriality figure prominently in scholarship on legal pluralism, transnational legal studies, international investment law, international human rights law, state responsibility under international law, and a large number of other areas. Yet many accounts of extraterritoriality make little effort to grapple with its thorny conceptual history, shifting theoretical valence, and complex political roots and ramifications. This book brings together thirteen scholars of law, history, and politics in order to reconsider the history, theory, and contemporary relevance of legal extraterritoriality. Situating questions of extraterritoriality in a set of broader investigations into state-building, imperialist rivalry, capitalist expansion, and human rights protection, it tracks the multiple meanings and functions of a distinct and far-reaching mode of legal authority. The fundamental aim of the volume is to examine the different geographical contexts in which extraterritorial regimes have developed, the political and economic pressures in response to which such regimes have grown, the highly uneven distributions of extraterritorial privilege that have resulted from these processes, and the complex theoretical quandaries to which this type of privilege has given rise. The book will be of considerable interest to scholars in law, history, political science, socio-legal studies, international relations, and legal geography.

Making Transnational Law Work in the Global Economy-Pieter H. F. Bekker 2010-10-28 This tribute to Professor Detlev Vagts of the Harvard Law School brings together his colleagues at Harvard and the American Society of International Law, as well as academics, judges and practitioners, many of them his former students. Their essays span the entire spectrum of modern transnational law: international law in general; transnational economic law; and transnational lawyering and dispute resolution. The contributors evaluate established fields of transnational law, such as the protection of property and investment, and explore new areas of law which are in the process of detaching themselves from the nation-state such as global administrative law and the regulation of cross-border lawyering. The implications of decentralised norm-making, the proliferation of dispute settlement mechanisms and the rising backlash against global legal interdependence in the form of demands for preserving state legal autonomy are also examined.

Regionalism in International Investment Law-Leon Trakman 2013-03-07 Regionalism in International Investment Law provides a multinational perspective on international investment law. In it, distinguished academics and practitioners provide a critical and comprehensive understanding of issues in a field which has grown exponentially in its importance particularly over the last decade, focusing on the European Union, Australia, North America, Asia, and China. The book approaches the field of foreign direct investment from both academic and practical viewpoints and analyzes different bilateral, regional, and multinational agreements, often yielding competing perspectives. The academic perspective yields a strong conceptual foundation to often misunderstood elements of international investment law, while the practical perspective aids those actively pursuing foreign direct investment in better understanding the landscape, identifying potential conflicts which may arise, in more accurately assessing the risk underlying the issues in conflict and in resolving those issues. Thorny issues relating to global commerce, sovereignty, regulation, expropriation, dispute resolution, and investor protections are covered, depicting how they have developed and are applied in different regions of the world. These different treatments ensure that readers are able grasp the subject matter at multiple levels and provide a comprehensive overview of developments in the field of foreign direct investment.

The Oxford Handbook on the Sources of International Law-Jean d'Aspremont 2017-10-26 The question of the sources of international law inevitably raises some well-known scholarly controversies: where do the rules of international law come from? And more precisely: through which processes are they made, how are they ascertained, and where does the international legal order begin and end? These traditional questions bear on at least two different levels of understanding. First, how are international norms validated as rules of international "law", i.e. legally binding norms? This is the static question of the pedigree of international legal rules and the boundaries of the international legal order. Second, what are the processes through which these rules are made? This is the dynamic question of the making of these rules and of the exercise of public authority in international law. The Oxford Handbook on the Sources of International Law is the very first comprehensive work of its kind devoted to the question of the sources of international law. It provides an accessible and systematic overview of the key issues and debates around the sources of international law. It also offers an authoritative theoretical guide for anyone studying or working within but also outside international law wishing to understand one of its most foundational questions. This handbook features original essays by leading international law scholars and theorists from a range of traditions, nationalities and perspectives, reflecting the richness and diversity of scholarship in this area.
