Rescued from the bedside of her difficult mother, forty-something Cilla finds herself called away to Rome to keep an eye on her wayward teenage niece, Hannah. The Worst of Times-Paul B. Wignall 2017-05-09 260 million years ago, life on Earth suffered wave after wave of cataclysmic extinctions, with the worst--the end-Permian extinction--wiping out nearly every species on the planet. This book delves into the mystery behind these extinctions and sheds light on the fateful role the primeval supercontinent, known as Pangea, may have played in causing these global catastrophes. Drawing on the latest discoveries as well as his own field expeditions to remote corners of the world, Paul Wignall reveals what scientists are only now beginning to understand about the most prolonged period of environmental crisis in Earth's history. He describes how a series of unprecedented extinction events swept across the planet in a span of eighty million years, rapidly killing marine and terrestrial life on a scale more devastating than the dinosaur extinctions that would come later. Wignall shows how these extinctions--some of which have only recently been discovered--all coincided with gigantic volcanic eruptions of flood basalt lavas that occurred when the world's landmasses were united into a single vast expanse. Unraveling one of the great enigmas of ancient Earth, this book also explains how the splitting apart of Pangea into the continents we know today ushered in a new age of vibrant and more resilient life on our planet.--Adapted from book jacket.

Calamities & Catastrophes-Derek Wilson 2012-12-04 They say that history is written by the winners. Not according to Derek Wilson. In this fascinating, revelatory book, Wilson tells the story from the point of view of the losers - collating a catalogue of calamities and catastrophes that have shaped our world more than historians tend to let on.

In ten lucid and entertaining chapters, the author identifies the very worst years of human history, from the destruction of the Roman Empire in 541 to the immediate aftermath of the American Civil War in 1865, from the march on Leningrad in 1942 to the Vietnam War of 1968. Condensing two thousand years of war, plague, misrule and political villainy, he identifies the traitors, scumbags and villains, whose lust for power – and sometimes, sheer incompetence – brought such terror to their times. He delves into the natural forces beyond human control that have wiped out whole peoples. And, most of all, he shows how history has a horrible habit of repeating itself. Intimate Lies and the Law-Jill Elaine Hasday 2019-06-25 Intimacy and deception are often entangled. People deceive to lure someone into a relationship or to keep her there, to drain an intimate's bank account or to use her to acquire government benefits, to control an intimate or to resist domination, or to capture myriad other advantages. No subject is immune from deception in dating, sex, marriage, and family life. Intimates can lie or otherwise intentionally mislead each other about anything and everything. Suppose you discover that an intimate has deceived you and inflicted severe-even life-altering-financial, physical, or emotional harm. After the initial shock and sadness, you might wonder whether the law will help you secure redress. But the legal system refuses to help most people deceived within an intimate relationship. Courts and legislatures have shielded this persistent and pervasive source of injury, routinely denying deceived intimates access to the remedies that are available for deceit in other contexts. Jill Elaine Hasday's Intimate Lies and the Law is the first book that systematically examines deception in intimate relationships and uncovers the hidden body of law governing this duplicity. Hasday argues that the law has placed too much emphasis on protecting intimate deceivers and too little importance on helping the people they deceive. The law can and should do more to recognize, prevent, and redress the injuries that intimate deception can inflict. Entering an intimate relationship should not mean losing the law's protection from deceit.

The Worst Years of Our Lives-Barbara Ehrenreich 1990 Presents an offbeat look back at the 1980s that covers topics ranging from the bright side of nuclear war to feminism, couch potatoes, Yuppies, and televangelism

Behave-Robert M. Sapolsky 2017-05-02 Why do we do the things we do? Over a decade in the making, this game-changing book is Robert Sapolsky's genre-shattering attempt to answer that question as fully as perhaps only he could, looking at it from every angle. Sapolsky's storytelling concept is delightful but it also has a powerful intrinsic logic: he starts by looking at the factors that bear on a person's reaction in the precise moment a behavior occurs, and then hops back in time from there, in stages, ultimately ending up at the deep history of our species and its genetic inheritance. And so the first category of explanation is the neurobiological one. What goes on in a person's brain a second before the behavior happens? Then he pulls out to a slightly larger field of vision, a little earlier in time: What sight, sound, or smell triggers the nervous system to produce that behavior? And then, what hormones act hours to days earlier to change how responsive that individual is to the stimuli which trigger the nervous system? By now, he has increased our field of vision so that we are thinking about neurobiology and the sensory world of our environment and endocrinology in trying to explain what happened. Sapolsky keeps going—next to what features of the environment affected that person's brain, and then back to the childhood of the individual, and then to their genetic makeup. Finally, he expands the view to encompass factors larger than that one individual. How culture has shaped that individual's group, what ecological factors helped shape that culture, and on and on, back to evolutionary factors thousands and even millions of years old. The result is one of the most dazzling tours de horizon of the science of human behavior ever attempted, a majestic synthesis that harvests cutting-edge research across a range of disciplines to provide a subtle and nuanced perspective on why we ultimately do the things we do...for good and for ill. Sapolsky builds on this understanding to wrestle with some of our deepest and thorniest questions relating to tribalism and xenophobia, hierarchy and competition, morality and free will, and war and peace. Wise, humane, often very funny, Behave is a towering achievement, powerfully humanizing, and downright heroic in its own right.

My Best Worst Year-Alison Tucker 2020-08-24 'Alison, I've got bad news.' The voice of the pathologist at the other end of the telephone confirmed for Alison Tucker the news no woman ever wants to hear: she had breast cancer. Once the shock had settled, Alison decided that she would take charge. Not only would she take ownership of the dreaded disease, but she would do so with a positive mindset and prepare herself as best she could for what was to come. She did detailed research and paid close heed to what she was told by others who had walked the path before her. As she navigated her way through surgery and the chemotherapy and radiotherapy that followed, Alison's determination paid off. Not only did she make new friends, but she learnt valuable life lessons too: acceptance of the illness for what it was, the amazing impact of ongoing advances in medical science, and the importance of being able to ask for – and receive – help. In My Best Worst Year – A Breast Cancer Story Alison gives us an authentic account of her experience, offering insights and advice for others who might one day face the same diagnosis. You will accompany her on her highs, empathise with her lows, and be amused by humorous anecdotes along the way. Through the generous support of family and friends, she has amassed a collection of practical tips for both patients and supporters which she shares with open-hearted honesty. What to take to chemotherapy sessions. What to look for when choosing a wig. What side effects a person can expect when having the various types of cancer treatment. What to say, and what not to say, to a cancer patient. How to remove stress from a cancer patient's life. What kind of gifts and gestures are most appreciated. Contrary to Alison's expectations, her year of treatment turned out to be her best worst year. By telling her story, she underlines the importance of a positive attitude and hopes to show that a person can still lead a productive and enjoyable life even after being diagnosed with cancer. 'I learnt the power of gratitude, a learning that I will cherish forever and that I will draw on in no small measure in the good times and the bad.'

The Rocket Years-Elizabeth Segran 2020-03-31 The Defining Decade for the #Adulting generation—a book that blends storytelling and data to unpack the choices you make in your twenties, why they matter, and how to turn those critical years into a launchpad for the life you want. We tend to think of our twenties as a playground for life: A time for low-consequence experimentation and delaying big decisions. But the truth is that while you're muddling through those years—exploring new cities, dating the wrong people, hopping between jobs—a small shift in your flight path can mean the difference between landing on Mars or Saturn. As the data shows, the choices we make (or put off) during this critical decade about our career, marriage, health, friends, even downtime have the greatest impact on how our lives play out. For example, did you know that people who marry between the ages of 28 and 32 have the lowest risk of divorce? And that the average 25 year old has 20 close friends, but this will shrink to 8 after age 40? And that most of us don't acquire new hobbies after we hit our thirties? Rather than prescribing one correct path (who are we kidding, there's no such thing anyway!), Elizabeth Segran invites readers to think critically and holistically about the life they want to build. With signature warmth and humor, Segran is the guide we all wish we had to show us the way. Blending insightful anecdotes with research from economics, sociology, and political science, The Rocket Years is an empowering exploration of these exciting, confusing, wonderful years.

From Hero to Zero-James Patterson 2018 "Rafe Khatchadorian takes his troublemaking ways across the pond and gets lost in London!"--

The Thomas Berryman Number-James Patterson 2006-06-01 Three terrifying murders in the South culminate in a relentless manhunt in the North that centers on a ruthless assassin, the woman he loves, and the beloved leader he is hired to kill with extreme prejudice.

The Great Terror-Robert Conquest 2008 The definitive work on Stalin's purges, the author's The Great Terror was universally acclaimed when it first appeared in 1968. It was "hailed as the only scrupulous, nonpartisan, and adequate book on the subject". And in recent years it has received equally high praise in the Soviet Union, where it is now considered the authority on the period, and has been serialized in Neva, one of their leading periodicals. Of course, when the author wrote the original volume two decades ago, he relied heavily on unofficial sources. Now, with the advent of glasnost, an avalanche of new material is available, and he has mined this enormous cache to write a substantially new edition of his classic work. It is remarkable how many of the most disturbing conclusions have born up under the light of fresh evidence. But the author has added enormously to the detail, including hitherto secret information on the three great "Moscow Trials," on the fate of the executed generals, on the methods of obtaining confessions, on the purge of writers and other members of the intelligentsia, on life in the labor camps, and many other key matters. Both a leading Sovietologist and a highly respected poet, the author blends research with prose, providing not only an authoritative account of Stalin's purges, but also a compelling chronicle of one of this century's most tragic events. A timely revision of a book long out of print, this is the updated version of the author's original work.

Worst Cases-Lee Clarke 2006 Al Qaeda detonates a nuclear weapon in Times Square during rush hour, wiping out half of Manhattan and killing 500,000 people. A virulent strain of bird flu jumps to humans in Thailand, sweeps across Asia, and claims more than fifty million lives. A single freight car of chlorine derails on the outskirts of Los Angeles, spilling its contents and killing seven million. An asteroid ten kilometers wide slams into the Atlantic Ocean, unleashing a tsunami that renders life on the planet as we know it extinct. We consider the few who live in fear of such scenarios to be alarmist or even paranoid. But Worst Cases shows that such individuals—like Cassandra foreseeing the fall of Troy—are more reasonable and prescient than you might think. In this book, Lee Clarke surveys the full range of possible catastrophes that animate and dominate the popular imagination, from toxic spills and terrorism to plane crashes and pandemics. Along the way, he explores how the ubiquity of worst cases in everyday life has rendered them ordinary and mundane: very real threats like a killer flu or an American Hiroshima have become so common that they have lost their ability to shock us. Fear and dread, Clarke argues, have actually become too rare: only when the public has more substantial information and more credible warnings will it take worst cases as seriously as it should. A timely and necessary look into how we think about the unthinkable, Worst Cases will be must reading for anyone attuned to our current climate of threat and fear.

The Book of Moods-Lauren Martin 2020-12-10 "Hilariously witty, unflinchingly honest, and brimming with hope." Bobbi Brown "A fascinating, thorough, and truly helpful book. I loved it!" Sarah Knight, New York Times bestselling author of Calm the F*ck Down The Happiness Project meets So Sad Today in this "hilariously witty, unflinchingly honest" book from the beloved founder of Words of Women, contemplating the nature of negative emotions, and the insights that allowed her to take back control. Five years ago, Lauren Martin was sure something was wrong with her. She had a good job in New York, an apartment in Brooklyn, a boyfriend, yet every day she wrestled with feelings of inferiority, anxiety and irritability. It wasn't until a chance encounter with a (charming, successful) stranger who revealed that she also felt these things, that Lauren set out to better understand the hold that these moods had on her, how she could change them, and began to blog about the wisdom she uncovered. It quickly exploded into an international online community of women who felt like she did: lost, depressed, moody, and desirous of change. Inspired by her audience to press even deeper, The Book of Moods shares Lauren's journey to infuse her life with a sense of peace and stability. With observations that will resonate and inspire, she dives into the universal triggers every woman faces - whether it's a comment from your mother, the relentless grind at your job, days when you wish the mirror had a Valencia filter, or all of the above. Blending cutting-edge science, timeless philosophy, witty anecdotes and effective forms of self-care, Martin has written a powerful, intimate, and incredibly relatable chronicle of transformation, proving that you really can turn your worst moods into your best life.

These Ghosts Are Family-Maisy Card 2021-01-05 Longlisted for the 2020 Center for Fiction First Novel Prize A "rich, ambitious debut novel" (The New York Times Book Review) that reveals the ways in which a Jamaican family forms and fractures over generations, in the tradition of Homegoing by Yaa Gyasi. *An Entertainment Weekly, Millions, and LitHub Most Anticipated Book of 2020 Pick and Buzz Magazine's Top New Book of the New Decade* Stanford Solomon's shocking, thirty-year-old secret is about to change the lives of everyone around him. Stanford has done something no one could ever imagine. He is a man who faked his own death and stole the identity of his best friend. Stanford Solomon is actually Abel Paisley. And now, nearing the end of his life, Stanford is about to meet his firstborn daughter, Irene Paisley, a home health aide who has unwittingly shown up for her first day of work to tend to the father she thought was dead. These Ghosts Are Family revolves around the consequences of Abel's decision and tells the story of the Paisley family from colonial Jamaica to present-day Harlem. There is Vera, whose widowhood forced her into the role of a single mother. There are two daughters and a granddaughter who have never known they are related. And there are others, like the houseboy who loved Vera, whose lives might have taken different courses if not for Abel Paisley's actions. This "rich and layered story" (Kirkus Reviews) explores the ways each character wrestles with their ghosts and struggles to forge independent identities outside of the family and their trauma. The result is a "beguiling...vividly drawn, and compelling" (BookPage, starred review) portrait of a family and individuals caught in the sweep of history, slavery, migration, and the more personal dramas of infidelity, lost love, and regret.
