Economía solidaria en Colombia: autores y reflexión conceptual-Amanda Vargas Prieto 2020-06-08 El presente libro busca contribuir a una reflexión y un diálogo conducentes a la identificación de la epistemología del concepto de 'economía solidaria' y, para ello, propone el análisis de la documentación de tres grupos de interés: universidades, entidades de agremiación e integración del sector solidario en Colombia; redes; y entidades del Estado. Todos ellos son actores y voces representativas del sector que pueden y deben ser escuchados a través de su producción escrita. Se inicia con un análisis teórico de los enfoques que determinan el concepto, luego se aborda el enfoque metodológico investigativo cualitativo y cuantitativo y, para finalizar, se presentan los resultados de cada grupo focal. Las aproximaciones arrojan puntos de encuentro entre los actores, en función del concepto y las características singulares de cada actor, que los acercan a fines comunes. Desde ahora, una primera conclusión es el reconocimiento de la pluralidad de expresiones en la sociedad, que invita al diálogo permanente para el reconocimiento de los otros, con quienes se construyen sinérgicamente realidades sociales y solidarias, para encontrar una forma diferente de hacer economía.

La formación de educadores en Colombia-Sandra Sandoval Osorio 2001 Cooperatives, Grassroots Development, and Social Change-Marcela Vásquez-León 2017-03-14 Cooperatives, Grassroots Development, and Social Change presents examples from Paraguay, Brazil, and Colombia, examining what is necessary for smallholder agricultural cooperatives to support holistic community-based development in peasant communities. Reporting on successes and failures of these cooperative efforts, the contributors offer analyses and strategies for supporting collective grassroots interests. Illustrating how poverty and inequality affect rural people, they reveal how cooperative organizations can support grassroots development strategies while negotiating local contexts of inequality amid the broader context of international markets and global competition. The contributors explain the key desirable goals from cooperative efforts among smallholder producers. They are to provide access to more secure livelihoods, expand control over basic resources and commodity chains, improve quality of life in rural areas, support community infrastructure, and offer social spaces wherein small farmers can engage politically in transforming their own communities. The stories in Cooperatives, Grassroots Development, and Social Change reveal immense opportunities and challenges. Although cooperatives have often been framed as alternatives to the global capitalist system, they are neither a panacea nor the hegemonic extension of neoliberal capitalism. Through one of the most thorough cross-country comparisons of cooperatives to date, this volume shows the unfiltered reality of cooperative development in highly stratified societies, with case studies selected specifically because they offer important lessons regarding struggles and strategies for adapting to a changing social, economic, and natural environment. New Trends in Medical and Service Robotics-Georg Rauter 2020-11-09 This book contains the papers of the 7th International Workshop on Medical and Service Robots (MESROB) that was planned to be held in Basel, Switzerland, in July 2020. Since the conference could not be held due to the worldwide Corona pandemic, the proceedings are published in this book and presentation of the accepted papers will be postponed to next year’s conference (MESROB 2021). The main topics of the workshop include: design of medical devices, kinematics and dynamics for medical robotics, exoskeletons and prostheses, anthropomorphic hands, therapeutic robots and rehabilitation, cognitive robots, humanoid and service robots, assistive robots and elderly assistance, surgical robots, human-robot interfaces, haptic devices, medical treatments, medical lasers, and surgical planning and navigation. The contributions, which were selected by means of a rigorous international peer-review process, highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaboration among different specialists, demonstrating that medical and service robotics will drive the technological and societal change in the coming decades.

Working Together for a Change-Ariel Fiszbein 1999 The Economic Development Institute (EDI), in cooperation with the United Nations Development Programme (UNDP) and the Inter-American Foundation, launched the Partnerships for Poverty Reduction program in six countries in Latin America and the Caribbean[as part of the Bank’s Mission “to fight poverty with passion and professionalism for lasting results.” The program sought to promote the adoption of an approach to poverty reduction that relies on partnerships among local, regional, and central governments, other public sector agencies, nongovernmental organizations, private sector companies and other civic organizations. This publication is a result of these collaborative efforts. It contains a powerful message about partnerships with the state, civil society and business: these partnerships have the potential of becoming the basis of an approach to poverty reduction that replaces old and failed paradigms in the region.

Regionalización de servicios públicos y propiedad municipal-David de la Torre Vargas 2015-02-03 Colombia atraviesa desde hace varios años por una grave crisis en materia de agua potable y saneamiento básico, que en nuestros días ha concentrado todo tipo de esfuerzos tendientes a mejorar los niveles de calidad y cobertura. La más grande apuesta de los últimos años ha sido el esquema de regionalización denominado “Planes departamentales de agua o programa agua para la prosperidad”. Este nuevo modelo tiene una justificación económica importante, pero con fundamentos jurídicos insuficientes que difícilmente armonizan con el diseño que la Constitución Política de Colombia definió para los servicios públicos domiciliarios: libertad de entrada, libre concurrencia, competencia económica y la asignación de un rol determinante en los municipios. La presente obra hace una detallada investigación académica de dicho esquema y aborda una de las principales implicaciones del mismo, desde la perspectiva del derecho de los bienes públicos y la propiedad municipal, y pretende con ello materializar la orientación constitucional que tiene al municipio como entidad fundamental de la división político-administrativa del Estado.

Los males de la guerra-Rafael Ballén 2010 El propósito general de esta investigación es hacer un estudio de la guerra, que sirva de referencia para entender esta locura de humanidad, y que ayude a comprender nuestra guerra, sus estragos, dolor y sufrimiento. Para que sepamos, de una vez por todas, que la guerra colombiana no la va a ganar ningún bando, aunque mate a su último enemigo, porque ninguna guerra la gana nadie, ni siquiera el vencedor. Para ayudar a todos los niños y jóvenes, a que entienda que la guerra no es un castigo divino, ni un virus que está metido en la estructura genética del género humano sino un artificio creado por el hombre para satisfacer sus grandes motivaciones de riqueza, poder, gloria y vanidad. Como objetivos específicos se busca examinar y dar a conocer a la comunidad académica, y a la sociedad en general, el daño que ocasiona la guerra en Colombia, en toda la población: en los niños y jóvenes porque tienen que alistarse en las filas de distintos ejércitos: el oficial, el para-oficial y ...

Recovering Resources - Recycling Citizenship-Dr. Jutta Gutberlet 2012-11-28 Environmental awareness and social mobilization is a growing issue in Latin America. This book discusses how co-operative recycling practices have been increasingly used as a strategy to contest both the waste problem and urban poverty. Selective waste collection and sorting materials out of the garbage stream has become a widespread survival strategy for the economically excluded population. While severe and chronic occupational health problems and risks are very common among the recycling workers, thousands of people exclusively depend on accessing these resources. By examining experiences from Brazil and other Latin American countries, this book questions what can be done to improve the environment and livelihoods for these excluded citizens, examines the specific health and risk implications and looks at the many innovative recycling co-ops and associations which have recently emerged, creating an exciting new form of solidarity economy. In doing so, it uncovers the landscapes of despair populated by the urban marginalized, but also the landscapes of hope, where solidarity and collaboration make a pathway to a better way of life.

Handbook of Research on Social Entrepreneurship and Solidarity Economics-Saiz-Álvarez, José Manuel 2016-05-19 Education programs in social entrepreneurship helps to create and fill jobs devoted to developing the local economy, which has become a dual transfer strategy by which a virtuous circle occurs between a retrofitted educational system based on social entrepreneurship, and vocational students who are highly entrepreneurial. The Handbook of Research on Social Entrepreneurship and Solidarity Economics focuses on practical experience and theoretical models for popularizing the concept of social entrepreneurship as a critical element of economic growth. Emphasizing the ways in which social entrepreneurship benefits developing regions, small and medium enterprises, and low-income communities, this handbook of research is a pivotal reference source for professionals, academics, and graduate-level students in the fields of economics, business administration, sociology, education, politics, and international relations.

Washing the Brain-Andrew Goatly 2007-01-01 Contemporary metaphor theory has recently begun to address the relation between metaphor, culture and ideology. In this wide-ranging book, Andrew Goatly, using lexical data from his database Metalude, investigates how conceptual metaphor themes construct our thinking and social behaviour in fields as diverse as architecture, engineering, education, genetics, ecology, economics, politics, industrial time-management, medicine, immigration, race, and sex. He argues that metaphor themes are created not only through the universal body but also through cultural experience, so that an apparently universal metaphor such as event-structure as realized in English grammar is, in fact, culturally relative, compared with e.g. the construal of 'cause and effect' in the Algonquin language Blackfoot. Moreover, event-structure as a model is both scientifically reactionary and, as the basis for technological mega-projects, has proved environmentally harmful. Furthermore, the ideologies of early capitalism created or exploited a selection of metaphor themes historically traceable through Hobbes, Hume, Smith, Malthus and Darwin. These metaphorical concepts support neo-Darwinian and neo-conservative ideologies apparent at the beginning of the 21st century, ideologies underpinning our social and environmental crises. The conclusion therefore recommends skepticism of metaphor's reductionist tendencies. Enhancing EFL speaking in rural settings-Bertha Ramos Holguin 2018-02-05 This book shows the paths student-teachers embark on the construction of their identities within the frame of a student-centered approach perspective. Understanding teacher identity construction suggests perceiving a broad and socially-driven dimension. In such a way , humansare contextual, political, and culturally situated to continually make sense of their“selves” on a daily-basis. Delving into teacher identity construction issues is a relevant constituent for the continual professional development of English language teachers.

Promoting Psychological Resilience in the U.S. Military-Lisa S Meredith 2011-06-01 As U.S. service members deploy for extended periods on a repeated basis, their ability to cope with the stress of deployment may be challenged. Many programs are available to encourage and support psychological resilience among service members and families. However, little is known about these programs' effectiveness. This report reviews resilience literature and programs to identify evidence-informed factors for promoting resilience.

The Routledge Handbook of Adoption-Gretchen Miller Wrobel 2020-03-09 Adoption is practiced globally yielding a multidimensional area of study that cannot be characterized by a single movement or discipline. This handbook provides a central source of contemporary scholarship from a variety of disciplines with an international perspective and uses a multifaceted and interdisciplinary approach to ground adoption practices and activities in scientific research. Perspectives of birth/first parents, adoptive parents, and adopted persons are brought forth through a range of disciplinary and theoretical lenses. Beginning with background and context of adoption, including sociocultural and political contexts, the handbook then addresses the diversity of adoptive families in terms of family forms, attitudes about adoption, and characteristics of adopted children. Next, research examining the lived experience of adoption for birth parents, adoptive parents, and adopted individuals is presented. A variety of outcomes for internationally and domestically adopted children and adoptive families is then discussed and the handbook concludes by addressing the development, training, and implementation of adoption competent clinical practice. With cutting-edge research from top international scholars in a diversity of fields, The Routledge Handbook of Adoption should be considered essential reading for students, researchers, and practitioners across the fields of social work, sociology, psychology, medicine, family science, education, and demography.

Linking the Formal and Informal Economy-Basudeb Guba-Khasnobis 2006-09-21 A collection of studies on formality and informality in developing countries, this volume contains contributions from anthropologists, economists, sociologists, and political scientists. It argues for moving beyond the formal-informal dichotomy, and offers information to develop guiding principles for intervention.

Financial Inclusion, Growth and Inequality: A Model Application to Colombia-Ms. Izabela Karpowicz 2014-09-12 Financial inclusion has been one of the key pillars of Colombia’s development strategy for a number of years. Financial inclusion policies have aimed at channeling microcredit to poor, spreading formal banking system usage, fostering electronic payment acceptance, and making financial services more affordable. Using simulations from a general equilibrium model it is possible to identify the most binding financial sector frictions that preclude financial inclusion of enterprises, and study the effects on growth and inequality of efforts to remove these frictions. The study finds that lowering constraints on collateral promises higher growth while inequality is better tackled through measures that lower the financial participation cost.

Doing Youth Participatory Action Research-Nicole Mirra 2015-10-23 Doing Youth Participatory Action Research offers an unprecedented, in-depth exploration of the pragmatics and possibilities of youth-driven research. Drawing upon multiple years of experience engaging youth in rigorous, critical inquiry about the conditions impacting their lives, the authors examine how YPAR encourages the educational community to re-imagine the capabilities of young people and the purposes of teaching, learning, and research itself. Much more than a “how-to” guide for those interested in creating their own YPAR projects, this book draws upon the voices of students and educators, as well as the multiple historical traditions of critical research, to describe how youth inquiry transforms each step of the traditional research process. From identifying research questions to collecting data and disseminating findings, each chapter details how YPAR revolutionizes traditional conceptions of who produces knowledge, how it is produced, and for what purposes. The book weaves together research, policy, and practice to offer YPAR as a practice with the power to challenge entrenched social and educational inequalities, empower critically aware youth, and revolutionize pedagogy in classrooms and communities. For researchers, educators, community members, and youth who want to connect, question, and transform the world collectively, Doing Youth Participatory Action Research is a rich source of both pragmatic methodological guidance and inspiration.

Critical Views on Teaching and Learning English Around the Globe-José Aldemar Álvarez V. 2016-01-01 This volume takes a critical look at teaching and learning English across the globe. Its aim is to fill a gap in the literature created by the omission of the voices of those engaged in the everyday practice of teaching and learning English: those of students, teachers, and specialists. Three unique characteristics give this book broad appeal. They include its inclusion of the perspectives and experiences of students and educators involved in the everyday practice of English language teaching and learning its inclusion of the experiences of students and educators in both core and noncore Englishspeaking countries its basis on original, qualitative studies conducted by scholars in different parts of the world including Europe, the Middle East, Asia, and the Americas Of particular interest to applied linguists, scholars from diverse fields such as English as a Foreign/Second Language, English as an International Language, anthropology and education, English education, sociolinguistics, and bilingual education will also find value in this book. Written in accessible language, it can be used in such courses as Applied Linguistics, Second Language Classroom Contexts, Bilingualism and Multilingualism, English Around the World, Research Methodologies in Second Language Acquisition, and Research in Second Language Pedagogical Contexts. In addition, by focusing on presenting research experiences that adopt several epistemological and theoretical approaches, the book provides teachers of research with a great tool to examine varied applications of qualitative methods, data collection, and analytic techniques. Thus it could also be used for courses in Field Research and Qualitative Methods. ENDORSEMENT: “As a scholar and educator who has consistently explored the social implications of the teaching and learning of English, I applaud this book’s concern with documenting the previously unheard voices of language learners and teachers around the world. The book is unique in the manner in which it focuses on the everyday experiences of marginalized English teachers and learners in various contexts around the globe. It also is unique in the manner in which it brings together researchers, teachers and learners to qualitatively investigate a great diversity of local language learning contexts. This book is a must read for anyone concerned with the current spread of English and its implications for individuals not typically foregrounded in language learning and teaching research.” — Dr. Sandra Lee McKay, Professor Emeritus, San Francisco State University, USA

Three Strategic Concepts for the Guidance of Co-Operatives-Brett Fairbairn 2003

Teaching Contested Narratives-Zvi Bekerman 2011-12-01 In troubled societies narratives about the past tend to be partial and explain a conflict from narrow perspectives that justify the national self and condemn, exclude and devalue the 'enemy' and their narrative. Through a detailed analysis, Teaching Contested Narratives reveals the works of identity, historical narratives and memory as these are enacted in classroom dialogues, canonical texts and school ceremonies. Presenting ethnographic data from local contexts in Cyprus and Israel, and demonstrating the relevance to educational settings in countries which suffer from conflicts all over the world, the authors explore the challenges of teaching narratives about the past in such societies, discuss how historical trauma and suffering are dealt with in the context of teaching, and highlight the potential of pedagogical interventions for reconciliation. The book shows how the notions of identity, memory and reconciliation can perpetuate or challenge attachments to essentialized ideas about peace and conflict.
