The Americans-Gerald A. Danzer 2003-12-04

The Significance of the Frontier in American History-Frederick Jackson Turner 2008-08-07 This hugely influential work marked a turning point in US history and culture, arguing that the nation's expansion into the Great West was directly linked to its unique spirit: a rugged individualism forged at the juncture between civilization and wilderness, which - for better or worse - lies at the heart of American identity today. Throughout history, some books have changed the world. They have transformed the way we see ourselves - and each other. They have inspired debate, dissent, war and revolution. They have enlightened, outraged, provoked and comforted. They have enriched lives - and destroyed them. Now Penguin brings you the works of the great thinkers, pioneers, radicals and visionaries whose ideas shook civilization and helped make us who we are.

Women & Economics-Charlotte Perkins Gilman 2017-12-06 This eBook edition of "Women & Economics" has been formatted to the highest digital standards and adjusted for readability on all devices. Women and Economics - A Study of the Economic Relation Between Men and Women as a Factor in Social Evolution is a book written by Charlotte Perkins Gilman and published in 1898. It is considered by many to be her single greatest work, and as with much of Gilman's writing, the book touched a few dominant themes: the transformation of marriage, the family, and the home, with her central argument: "the economic independence and specialization of women as essential to the improvement of marriage, motherhood, domestic industry, and racial improvement." The 1890s were a period of intense political debate and economic challenges, with the Women's Movement seeking the vote and other reforms. Women were "entering the work force in swelling numbers, seeking new opportunities, and shaping new definitions of themselves." It was near the end of this tumultuous decade that Gilman's very popular book emerged. Charlotte Perkins Gilman (1860-1935) was a prominent American feminist, sociologist, novelist, writer of short stories, poetry, and nonfiction, and a lecturer for social reform. She was a utopian feminist during a time when her accomplishments were exceptional for women, and she served as a role model for future generations of feminists because of her unorthodox concepts and lifestyle. Her best remembered work today is her semi-autobiographical short story "The Yellow Wallpaper" which she wrote after a severe bout of postpartum psychosis.

Imagined Histories-Anthony Molho 1998 This collection of essays by twenty-one distinguished American historians reflects on a peculiarly American way of imagining the past. At a time when history-writing has changed dramatically, the authors discuss the birth and evolution of historiography in this country, from its origins in the late nineteenth century through its present, more cosmopolitan character. In the book's first part, concerning recent historiography, are chapters on exceptionalism, gender, economic history, social theory, race, and immigration and multiculturalism. Authors are Daniel Rodgers, Linda Kerber, Naomi Lamoreaux, Dorothy Ross, Thomas Holt, and Philip Gleason. The three American centuries are discussed in the second part, with chapters by Gordon Wood, George Fredrickson, and James Patterson. The third part is a chronological survey of non-American histories, including that of Western civilization, ancient history, the middle ages, early modern and modern Europe, Russia, and Asia. Contributors are Eugen Weber, Richard Saller, Gabrielle Spiegel, Anthony Molho, Philip Benedict, Richard Kagan, Keith Baker, Joseph Zizak, Volker Berghahn, Charles Maier, Martin Malia, and Carol Gluck. Together, these scholars reveal the unique perspective American historians have brought to the past of their own nation as well as that of the world. Formerly writing from a conviction that America had a singular destiny, American historians have gradually come to share viewpoints of historians in other countries about which they write. The result is the virtual disappearance of what was a distinctive American voice. That voice is the subject of this book.

Why You Can't Teach United States History without American Indians-Susan Sleeper-Smith 2015-04-20 A resource for all who teach and study history, this book illuminates the unmistakable centrality of American Indian history to the full sweep of American history. The nineteen essays gathered in this collaboratively produced volume, written by leading scholars in the field of Native American history, reflect the newest directions of the field and are organized to follow the chronological arc of the standard American history survey. Contributors reassess major events, themes, groups of historical actors, and approaches—social, cultural, military, and political—consistently demonstrating how Native American people, and questions of Native American sovereignty, have animated all the ways we consider the nation's past. The uniqueness of Indigenous history, as interwoven more fully in the American story, will challenge students to think in new ways about larger themes in U.S. history, such as settlement and colonization, economic and political power, citizenship and movements for equality, and the fundamental question of what it means to be an American. Contributors are Chris Andersen, Juliana Barr, David R. M. Beck, Jacob Betz, Paul T. Conrad, Mikal Brotnov Eckstrom, Margaret D. Jacobs, Adam Jortner, Rosalyn R. LaPier, John J. Laukaitis, K. Tsianina Lomawaima, Robert J. Miller, Mindy J. Morgan, Andrew Needham, Jean M. O'Brien, Jeffrey Ostler, Sarah M. S. Pearsall, James D. Rice, Phillip H. Screening Race in American Nontheatrical Film-Allyson Nadia Field 2019-11-15 Although overlooked by most narratives of American cinema history, films made for purposes outside of theatrical entertainment dominated twentieth-century motion picture production. This volume adds to the growing study of nontheatrical films by focusing on the ways filmmakers developed and audiences encountered ideas about race, identity, politics, and community outside the borders of theatrical cinema. The contributors to Screening Race in American Nontheatrical Film examine the place and role of race in educational films, home movies, industry and government films, anthropological films, and church films as well as other forms of nontheatrical filmmaking. From filmic depictions of Native Americans and films by 1920s African American religious leaders to a government educational film about the unequal treatment of Latin American immigrants, these films portrayed—for various purposes and intentions—the lives of those who were mostly excluded from the commercial films being produced in Hollywood. This volume is more than an examination of a broad swath of neglected twentieth-century filmmaking; it is a reevaluation of basic assumptions about American film culture and the place of race within it. Contributors: Crystal Mun-hye Baik, Jasmyrn R. Castro, Nadine Chan, Mark Garrett Cooper, Dino Everett, Allyson Nadia Field, Vilho Forsberg, Joshua Glick, Tanya Goldman, Marsha Gordon, Noelle Griffiths, Colin Gunckel, Michelle Kelley, Todd Kushigemachi, Martin L. Life and Fate-Vasily Grossman 2012-06-13 A book judged so dangerous in the Soviet Union that not only the manuscript but the ribbons on which it had been typed were confiscated by the state, Life and Fate is an epic tale of World War II and a profound reckoning with the dark forces that dominated the twentieth century. Interweaving a transfixing account of the battle of Stalingrad with the story of a single middle-class family, the Shaposhnikovs, scattered by fortune from Germany to Siberia, Vasily Grossman fashions an immense, intricately detailed tapestry depicting a time of almost unimaginable horror and even stranger hope. Life and Fate juxtaposes bedrooms and snipers' nests, scientific laboratories and the Gulag, taking us deep into the hearts and minds of characters ranging from a boy on his way to the gas chambers to Hitler and Stalin themselves. This novel of unsparing realism and visionary moral intensity is one of the supreme achievements of modern Russian literature.

With boundless erudition and in delightfully clear prose, Surowiecki ranges across fields as diverse as popular culture, psychology, ant biology, behavioral economics, artificial intelligence, military history, and politics to show how this simple idea offers important lessons for how we live our lives, select our leaders, run our companies, and think about our world.

Huffman 2014-04-24 This is a comprehensive, authoritative and innovative account of Pythagoras and Pythagoreanism, one of the most enigmatic and influential philosophies in the West. In twenty-one chapters covering a timespan from the sixth century BC to the seventeenth century AD, leading scholars construct a number of different images of Pythagoras and his community, assessing current scholarship and offering new answers to central problems. Chapters are devoted to the early Pythagoreans, and the full breadth of Pythagorean thought is explored including politics, religion, music theory, science, mathematics and magic. Separate chapters consider Pythagoreanism in Plato, Aristotle, the Peripatetics and the later Academic tradition, while others describe Pythagoreanism in the historical tradition, in Rome and in the pseudo-Pythagorean writings. The three great lives of Pythagoras by Diogenes Laertius, Porphyry and Iamblichus are also discussed in detail, as is the significance of Pythagoras for the Middle Ages and Renaissance.

How does gossip spread so quickly? Are we all related through six degrees of separation? There is a growing awareness of the complex networks that pervade modern society. We see them in the rapid growth of the Internet, the ease of global communication, the swift spread of news and information, and in the way epidemics and financial crises develop with startling speed and intensity. This introductory book on the new science of networks takes an interdisciplinary approach, using economics, sociology, computing, information science and applied mathematics to address fundamental questions about the links that connect us, and the ways that our decisions can have consequences for others.

Handbook of Frauds, Scams, and Swindles-Serge Matulich 2016-04-19 It has been said that scammers and swindlers often display characteristics commonly attributed to good leadership. These include setting a vision, communicating it clearly, and motivating others to follow their lead. But when these skills are used by unconscionable people to satisfy greed, how can the average person recognize that foul play is afoot? Providing a unique account of frauds throughout modern history, Handbook of Frauds, Scams, and Swindles: Failures of Ethics in Leadership compiles narratives from around the world, including a number of highly-publicized cases. Leading financial and investigative experts have authored the individual chapters, yet the book maintains a reader-friendly style. The result is a text that is highly engaging and most importantly, provides regulators and investigators with an understanding of the motivations and behavior common to the individuals behind these life-damaging crimes. The book includes a wealth of stories, including famous cases such as Ponzi, ZZZZ Best, Enron, Parmalat, and Vivendi, along with lesser-known scandals involving both corporations and individuals. There is also a section on frauds perpetrated for motives other than financial rewards, including instances when the government performed experiments on humans without their knowledge or consent, as well as stories on frauds involving science and religion. A section detailing the Arthur Anderson debacle discusses the compounding of a fraud when the supposed watchdog plays a complicit role. And recognizing that not every issue is black or white, the book also explores whether a hoax perpetrated in the name of a noble cause can ever be justified. By reviewing the tactics used by swindlers and the motivations that turned good people crooked, investigators and others will come to recognize the red flags that accompany unscrupulous behavior. In doing so, they may well learn how to head off potential disaster.
