Xeelee: Vacuum Diagrams-Stephen Baxter 2015-10-08 Return to the eon-spanning and universe-crossing conflict between humanity and the unknowable alien Xeelee in this collection of stories, available in ebook for the first time! Baxter's future history, known as the Xeelee sequence, is an exemplar of the form: it comprises his first four novels - Raft, Timelike Infinity, Flux and Ring - and these marvellous linked stories, as well as those in the new collection XEELEE: ENDURANCE. Contains 21 short stories, all set in the XEELEE universe.

Raft-Stephen Baxter 2018-07-10 Stephen Baxter's highly acclaimed first novel and the beginning of his stunning Xeelee Sequence finally enters the SF Masterwork series! A spaceship from Earth accidentally crossed through a hole in space-time to a universe where the force of gravity is one billion times as strong as the gravity we know. Somehow the crew survived, aided by the fact that they emerged into a cloud of gas surrounding a black hole, which provided a breathable atmosphere. Five hundred years later, their descendants still struggle for existence, divided into two main groups. The Miners live on the Belt, a ramshackle ring of dwellings orbiting the core of a dead star, which they excavate for raw materials. These can be traded for food from the Raft, a structure built from the wreckage of the ship, on which a small group of scientists preserve the ancient knowledge which makes survival possible. Rees is a Miner whose curiosity about his world makes him stow away on a flying tree - just one of the many strange local lifeforms - carrying trade between the Belt and the Raft. And what he finds will change his world...

Xeelee: Endurance-Stephen Baxter 2015-09-17 Return to the eon-spanning and universe-crossing conflict between humanity and the unknowable alien Xeelee in this selection of uncollected and unpublished stories, newly edited and placed in chronological reading order. From tales charting the earliest days of man's adventure to the stars to stories of Old Earth, four billion years in the future, the range and startling imagination of Baxter is always on display. As humanity rises and falls, ebbs and flows, one thing is always needed - the ability to endure. Contains eleven short stories and novellas.

Ring-Stephen Baxter 1996-04-25 Michael Poole's wormholes constructed in the orbit of Jupiter had opened the galaxy to humankind. Then Poole tried looping a wormhole back on itself, tying a knot in space and ripping a hole in time. It worked. Too well. Poole was never seen again. Then from far in the future, from a time so distant that the stars themselves were dying embers, came an urgent SOS--and a promise. The universe was doomed, but humankind was not. Poole had stumbled upon an immense artifact, light-years across, fabricated from the very string of the cosmos. The universe had a door. And it was open...

Flux-Stephen Baxter 2013-01-24 Star humans were engineered to exist within the mantle of a star, mere tools of their Earth-evolved makers in a war against the Xeelee, owners of the universe. Stephen Baxter's third novel in his magnificent Xeelee Sequence is an exotic and endearing story of an abandoned people. Abandoned to their fate, their history lost along with contact with their makers, Star people survive in an environment that is possibly the strangest in science fiction. Microscopic inhabitants of superfluid air above a Quantum Sea and below the tangled Crust of the Star, swimming in an electric-blue grid, the Magflit, which is subject to violent storms. Star people struggle, like us, to make sense of their world... and the threat hanging over it. Though the truth is far more disturbing and ominous than they feared, they will confront, finally, their makers, and they will rebel against the purpose for which they were created.

Timelike Infinity-Stephen Baxter 2013-01-24 Timelike Infinity: the strange region at the end of time where the Xeeles, owners of the universe, are waiting... The second novel in Stephen Baxter's Xeelee sequence. First there were good times: humankind reached glorious heights, even immortality. Then there were bad times: Earth was occupied by the faceless, brutal Qax. Immortality drugs were confiscated, the human spirit crushed. Earth became a vast factory for alien foodstuffs. Into this new dark age appears the end of a tunnel through time. Made from exotic matter, it is humanity's greatest engineering project in the pre-Qax era, where the other end of the tunnel remains anchored near Jupiter. When a small group of humans in a makeshift craft outwit the Qax to escape to the past through the tunnel, it is not to warn the people of Earth against the Qax, who are sure to follow them. For these men and women from the future are themselves dangerous fanatics in pursuit of their own bizarre quantum grail. Michael Poole, architect of the tunnel, must boldly confront the consequences of his genius.

Xeelee: Redemption-Stephen Baxter 2018-08-23 Michael Poole finds himself in a very strange landscape. . . . This is the centre of the Galaxy. And in a history without war with the humans, the Xeelee have had time to built an immense structure here. The Xeelee Belt has a radius ten thousand times Earth's orbital distance. It is a light year in circumference. If it was set in the solar system it would be out in the Oort Cloud, among the comets - but circling the sun. If it was at rest it would have a surface area equivalent to about thirty billion Earths. But it is not at rest: it rotates at near lightspeed. And because of relativistic effects, distances are compressed for inhabitants of the Belt, and time drastically slowed. The purpose of the Belt is to preserve a community of Xeelee into the very far future, when they will be able to tap dark energy, a universe-spanning antigravity field, for their own purposes. But with time the Belt has attracted populations of lesser species, here for the immense surface area, the unending energy flows. Poole, Miriam and their party, having followed the Ghosts, must explore the artefact and survive encounters with its strange inhabitants - before Poole, at last, finds the Xeelee who led the destruction of Earth...

Xeelee: Vengeance-Stephen Baxter 2017-06-15 Half a million years in the future, on a dead, war-ravaged world at the centre of the Galaxy, there is a mile-high statue of Michael Poole. Poole, born on Earth in the fourth millennium, was one of mankind's most influential heroes. He was not a warrior, not an emperor. He was an engineer, a builder of wormhole transit systems. But Poole's work would ultimately lead to a vast and destructive conflict, a million-year war between humanity and the enigmatic, powerful aliens known as the Xeelee. The Xeelee won, but at a huge cost. And, defeated in a greater war, the Xeelee eventually fled the universe. Most of them. A handful were left behind, equipped with time travel capabilities, their task to tidy up: to reorder history more to the Xeelee's liking. That million-year war with humankind was one blemish. It had to be erased. And in order to do that, a lone Xeelee was sent back in time to remove Michael Poole from history. . . .

Phase Space-Stephen Baxter 2012-06-28 2025. Tied in to Baxter's masterful Manifold trilogy, these thematically linked stories are drawn from the vast graph of possibilities across which the lives of hero Reid Malenfant have been scattered.

Exultant-Stephen Baxter 2004-10-26 When it comes to cutting-edge science fiction, Stephen Baxter is in a league of his own. His mastery of hard science, his fearlessly speculative imagination, and his ability to combine grand philosophical questions with tales of rousing adventure make him essential reading for anyone concerned with the future of humankind. Now, in Exultant, Baxter takes us to a distant future of dazzling promise and deadly threat, in which a far-flung humanity battles for survival against an implacable alien foe. Destiny's Children EXULTANT For more than twenty thousand years, humans have been at war with the alien race of Xeelee. It is a war fought with armaments so advanced as to be godlike, a war in which time itself has become an ever-shifting battleground. At the cost of billions of lives, and with ruthless and relentless efficiency, the ruling Coalition has pushed the Xeelee back to the galactic core, where the supermassive black hole known as Chandra serves the Xeelee as both fortress and power source. There, along a front millions of light-years long, a grisly stalemate reigns, until a young pilot, Pirius, faced with certain death, disobeys orders and employs an innovative time-travel maneuver that, for the first time in the history of the war, results in the capture of a Xeelee fighter. But far from being hailed as a hero when he returns to base with his prize, Pirius is court-martialed, disgraced, and sentenced to penal servitude on a bleak asteroid. It is not only Pirius who pays the price. In flying into the future and back again, Pirius returned to a time before he'd left, a time inhabited by his younger self. And that younger self, by the pitiless logic of Coalition justice, shares the older Pirius guilt and must be punished. Not everyone in the Coalition agrees. Commissary Nilis believes that the elder Pirius, whom he dubs Pirius Blue, may have found a way to defeat the Xeelee. But Nilis can do nothing for Pirius Blue. Instead, he takes charge of the younger Pirius (Pirius Red), and brings him back to Earth, the capital of a vast empire seething with intrigue. There Pirius Red will discover truths that will shatter his preconceived notions of all that he is fighting for, even of what it means to be human. Pirius Blue, meanwhile, will learn truths harsher and more discomfiting still. Yet the most shocking revelation of all is still to come, waiting for them at a place called Chandra. . . . From the Hardcover edition.

Ark-Stephen Baxter 2010-05-04 It's the year 2030. The oceans have risen rapidly, and soon the entire planet will be submerged. But the discovery of another life-sustaining planet light years away gives those who remain alive hope. Only a few will be able to make the journey-Holle Groundwater is one of the candidates. If she makes the cut, she will live. If not, she will be left to face a watery death...

Coalescent-Stephen Baxter 2004-11-01 Discovering he has a twin sister after the death of his father, George Poole learns his sister has been raised by an enigmatic religious group that is promoting a questionable agenda beneath the streets of Rome. Transcendent-Stephen Baxter 2010-05-27 Baxter's ability to combine wildly divergent narrative threads has become a trademark of his writing and has been seen to its best effect in the previous two novels from this sequence. TRANSCENDENT, with its melding of a near future narrative that carries a terrible warning about the post-oil and post-global warming world and a narrative thread that tours the fantastically varied diverse species that mankind has become in the impossibly distant future is an example of Baxter at his best. At once a cautionary tale of what we are capable of destroying and a celebration of what we could become this is the capstone to Baxter's best series to date. In TRANSCENDENT we find out what happened to the children of the Poole brothers (from COALESCENT) and what will happen to mankind.

The Light of Other Days-Arthur C. Clarke 2010-01-11 From Arthur C. Clarke, the brilliant mind that brought us 2001: A Space Odyssey, and Stephen Baxter, one of the most cogent SF writers of his generation, comes a novel of a day, not so far in the future, when the barriers of time and distance have suddenly turned to glass. When a brilliant, driven industrialist harnesses cutting-edge physics to enable people everywhere, at trivial cost, to see one another at all times--around every corner, through every wall--the result is the sudden and complete abolition of human privacy, forever. Then the same technology proves able to look backward in time as well. The Light of Other Days is a story that will change your view of what it is to be human. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Anti-ice-Stephen Baxter 1994-10-16 Discovering a new element, Anti-Ice, a mysterious substance that unleashes vast energies when warmed, a millionaire industrialist dreams of power from an item that promises world peace--or world destruction. Original. Titan-Stephen Baxter 2013-04-11 Signs of life have been found on Titan, Saturn's largest moon.

The Forge of God-Greg Bear 2014-04-01 This doomsday masterpiece from the author of Eon and Hull Zero Three was a finalist for the Hugo and Nebula awards. On July 26, Arthur Gordon learns that Europa, the sixth moon of Jupiter, has disappeared. Not hiding, not turned black, but gone. On September 28th, Edward Shaw finds an error in the geological records of Death Valley. A cinder cone was left off the map. Could it be new? Or, stranger yet, could it be artificial? The answer may be lying beside it--a dying Guest who brings devastating news for Edward and for Planet Earth. As more unexplained phenomena spring up around the globe--a granite mountain appearing in Australia, sounds emanating from the earth's core, flashes of light among the asteroids--it becomes clear to some that the end is approaching, and there is nothing we can do. In The Forge of God, award-winning author Greg Bear describes the final days of the world on both a massive, scientific scale and in the everyday, emotional context of individual human lives. Facing the destruction of all they know, some people turn to God, others to their families, and a few turn to saviors promising escape from a planet being torn apart. Will they make it in time? And who gets left behind to experience the last moments of beauty and chaos on earth? Nominated for the Nebula, Hugo, and Locus Awards, The Forge of God is an engrossing read, breathtaking in its scope and in its detail.

A bedraggled woman in a ruined chapel speaks of civilizations in conflict, armed by the engines of God... And that prophecy proves to be true as the fearsome war between Christianity and Islam leaves its mark across the land. In Spain, a rogue priest dreams of the final defeat of Islam, for he has found a rent in the tapestry of time, a point where agents from the future used diabolical weapons of destruction to change history. Centuries later, in 1492, as men of vision weary of the strife and are drawn to the unknown West, one such explorer seeks the funding for his voyage--while a mysterious Weaver plots to unravel the strands of time and stop him... From the Paperback edition.

The Time Ships-Stephen Baxter 1995-11-27 There is a secret passage through time ...and it leads all the way to the end of Eternity. But the journey has a terrible cost. It alters not only the future but he "present" in which we live. A century after the publication of H. G. Wells' immortal The Time Machine, Stephen Baxter, today's most acclaimed new "hard SF" author, and the acknowledged Clarke, returns to the distant conflict between the Eloi and the Morlocks in a story that is at once an exciting expansion, and a radical departure based on the astonishing new understandings of quantum physics.

But the sequence of novels began with RAFT in 1991. From there it built into perhaps the most ambitious fictitious universe ever created. Searching for Extraterrestrial Intelligence-H. Paul Shuch 2011-02-14 This book is a collection of essays written by the very scientists and engineers who have led, and continue to lead, the scientific quest known as SETI, the search for extraterrestrial intelligence. Divided into three parts, the first section, 'The Spirit of SETI Past', written by the surviving pioneers of this then emerging discipline, reviews the major projects undertaken during the first 50 years of SETI science and the results of that research. In the second section, 'The Spirit of SETI Present', the present-day science and technology is discussed in detail, providing the technical background to contemporary SETI instruments, experiments, and analytical techniques, including the processing of the received signals to extract potential alien communications. In the third and final section, 'The Spirit of SETI Future', the book looks ahead to the possible directions that SETI will take in the next 50 years, addressing such important topics as interstellar message construction, the risks and assumptions of interstellar communications, when we might make contact, what aliens might look like and what is likely to happen in the aftermath of such a contact.

Proxima-Stephen Baxter 2014-11-04 "Stephen Baxter has been heralded, with some merit, as Arthur C. Clarke's literary heir, and Proxima certainly reinforces this accolade in spades."--Concatenation Mankind's future in this galaxy could be all but infinite. There are hundreds of billions of red dwarf stars, lasting trillions of years--and their planets can be habitable for humans. Such is the world of Proxima Centauri. And its promise could mean the never-ending existence of humanity. But first it must be colonized, and no one wants to be a settler. There is no glamor that accompanies it, nor is there the ease of becoming a citizen of an already-tamed world. There is only hardship...loneliness...emptiness, even as war brews in the solar system. But that's where Yuri comes in. Because sometimes exploration isn't voluntary. It must be coerced.
