Pen and Sword-Mary S. Mander 2010-10-01 Addressing the ever-changing, overlapping trajectories of war and journalism, this introduction to the history and culture of modern American war correspondence considers a wealth of original archival material. In powerful analyses of letters, diaries, journals, television news archives, and secondary literature related to the U.S.'s major military conflicts of the twentieth century, Mary S. Mander highlights the intricate relationship of the postmodern nation state to the free press and to the public. Pen and Sword: American War Correspondents, 1898-1975 situates war correspondence within the larger framework of the history of the printing press to make perceptive new points about the nature of journalism and censorship, the institution of the press as a source of organized dissent, and the relationship between the press and the military. Fostering a deeper understanding of the occupational culture of war correspondents who have accompanied soldiers into battle, Mander offers interpretive analysis of the reporters' search for meaning while embedded with troops in war-torn territories. Broadly encompassing the history of Western civilization and modern warfare, Pen and Sword prompts new ways of thinking about contemporary military conflicts and the future of journalism.

Operational Semantics and Verification of Security Protocols-Cas Cremers 2012-10-30 Security protocols are widely used to ensure secure communications over insecure networks, such as the internet or airwaves. These protocols use strong cryptography to prevent intruders from reading or modifying the messages. However, using cryptography is not enough to ensure their correctness. Combined with their typical small size, which suggests that one could easily assess their correctness, this often results in incorrectly designed protocols. The authors present a methodology for formally describing security protocols and their environment. This methodology includes a model for describing protocols, their execution model, and the intruder model. The models are extended with a number of well-defined security properties, which capture the notions of correct protocols, and secrecy of data. The methodology can be used to prove that protocols satisfy these properties. Based on the model they have developed a tool set called Scyther that can automatically find attacks on security protocols or prove their correctness. In case studies they show the application of the methodology as well as the effectiveness of the analysis tool. The methodology's strong mathematical basis, the strong separation of concerns in the model, and the accompanying tool set make it ideally suited both for researchers and graduate students of information security or formal methods and for advanced professionals designing critical security protocols.

Diseases of Carp and Other Cyprinid Fishes-David Hoole 2008-04-15 Cyprinids rank as one of the most commercially important groups of freshwater fishes and are exploited for many purposes; as a human food source, especially in Europe and Asia; as sport fish; and as ornamental fish for ponds and aquaria. Certain species are also cultured as bait fish and several of the small cyprinids such as the zebra fish have become internationally accepted laboratory models for toxicology testing and molecular research. A thorough understanding of cyprinid health and diseases is fundamental to the successful management and exploitation of these fishes for freshwater fisheries, pisciculture and ornamental productions. This practical guide to disease diagnosis, prevention and control includes numerous colour plates and covers a comprehensive array of diseases - infectious and non-infectious - of cultivated and wild cyprinids.

The Practice of Network Security Monitoring-Richard Bejtlich 2013-07-15 Network security is not simply about building impenetrable walls—determined attackers will eventually overcome traditional defenses. The most effective computer security strategies integrate network security monitoring (NSM): the collection and analysis of data to help you detect and respond to intrusions. In The Practice of Network Security Monitoring, Mandiant CSO Richard Bejtlich shows you how to use NSM to add a robust layer of protection around your networks—no prior experience required. To help you avoid costly and inflexible solutions, he teaches you how to deploy, build, and run an NSM operation using open source software and vendor-neutral tools. You'll learn how to: -Determine where to deploy NSM platforms, and size them for the monitored networks -Deploy stand-alone or distributed NSM installations -Use command line and graphical packet analysis tools, and NSM consoles -Interpret network evidence from server-side and client-side intrusions -Integrate threat intelligence into NSM software to identify sophisticated adversaries There's no foolproof way to keep attackers out of your network. But when they get in, you'll be prepared. The Practice of Network Security Monitoring will show you how to build a security net to detect, contain, and control them. Attacks are inevitable, but losing sensitive data shouldn't be.

Poetry in Pieces-Michelle Clayton 2011-01-10 Set against the cultural and political backdrop of interwar Europe and the Americas, Poetry in Pieces is the first major study of the Peruvian poet César Vallejo (1892-1938) to appear in English in more than thirty years. Vallejo lived and wrote in two distinct settings—Peru and Paris—which were continually crisscrossed by new developments in aesthetics, politics, and practices of everyday life; his poetry and prose therefore need to be read in connection with modernity in all its forms and spaces. Michelle Clayton combines close readings of Vallejo's writings with cultural, historical, and theoretical analysis, connecting Vallejo—and Latin American poetry—to the broader panorama of international modernism and the avant-garde, and to writers and artists such as Rainer Maria Rilke, James Joyce, Georges Bataille, and Charlie Chaplin. Poetry in Pieces sheds new light on one of the key figures in twentieth-century Latin American literature, while exploring ways of rethinking the parameters of international lyric modernity.

Recurrent Pregnancy Loss-Howard Carp 2007-06-13 Exploring basic science and the clinical applications, Recurrent Pregnancy Loss: Causes, Controversies and Treatment provides an authoritative, comprehensive review of the management of recurrent pregnancy loss. Many subjects in this area are controversial, and occasionally clinical decisions are based on lack of knowledge rather than evidence. For this reason, chapters include debates by leading experts to aid the clinician in deciding on the appropriate clinical management. Chapters cover basic science, genetics, and the application of evidence based medicine as well as mid- trimester loss, late obstetric complications, and related psychological mechanisms. This book will be essential reading for specialists working in recurrent pregnancy loss clinics and associated disciplines, as well as anyone wishing to gain a comprehensive view of developments in the field.

BLS, Basic Life Support Patient Care Standards-Ontario. A Requiem for a Brand-Pradip Chanda 2010 Drawing from his extensive business management experience, Pradip Chand turns traditional wisdom on its head when he proposes that Brand Loyalty is inversely proportional to the income and education levels of the 'knowledge consumer'. He examines how and why brands become strategic assets, traces the evolution of the knowledge consumer and what companies can do to protect equity of the brands they have nurtured over the decades. A new approach to building a Brand Loyalty that gives marketers a competitive edge in today's high-tech, high-stake brand-hostile environment. The book combines the knowledge with engaging real life case studies and proven examples.

Dictionary of Abbreviations in Medical Sciences-Rolf Heister 2012-12-06 Not everyone is a friend of the manifold abbreviations that have by now become a part of the scientific language of medicine. In order to avoid misunderstanding these abbreviations, it is wise to refer to a reliable dictionary, such as this one prepared by Heister. The abbreviation ED means, for instance, effective dose to the pharmacologist. However, it might also stand for emetic dose.

Radiologists use the same abbreviation for erythema dose, and ED could also mean ethyl dichlorarsine. A common meaning of ECU is European currency unit, a meaning that might not be very often in scientific medical publications.

ECU, however, also means environmental control unit or European Chiropractic Union. Hopefully, those making inventions and discoveries will make use of Heister's dictionary before creating new abbreviations when preparing manuscripts for scientific publications. It is a very worthwhile goal not to use the same abbreviation for several different terms, especially if it is already widely accepted to mean only one of them. It may be impossible, however, to achieve this goal in different scientific disciplines. Therefore, although it is wise for the abbreviations used in a publication to be defined, it is also very helpful for readers and writers to use a dictionary such as this one. The author deserves our warmest thanks since we know that compiling such a comprehensive dictionary is based upon incredibly hard effort.

U.S. Navy Program Guide - 2017-Department Of the Navy 2019-03-12 The U.S. Navy is ready to execute the Nation's tasks at sea, from prompt and sustained combat operations to every-day forward-presence, diplomacy and relief efforts. We operate worldwide, in space, cyberspace, and throughout the maritime domain. The United States is and will remain a maritime nation, and our security and prosperity are inextricably linked to our ability to operate naval forces on, under and above the seas and oceans of the world. To that end, the Navy executes programs that enable our Sailors, Marines, civilians, and forces to meet existing and emerging challenges at sea with confidence. Six priorities guide today's planning, programming, and budgeting decisions: (1) maintain a credible, modern, and survivable sea based strategic deterrent; (2) sustain forward presence, distributed globally in places that matter; (3) develop the capability and capacity to win decisively; (4) focus on critical afloat and ashore readiness to ensure the Navy is adequately funded and ready; (5) enhance the Navy's asymmetric capabilities in the physical domains as well as in cyberspace and the electromagnetic spectrum; and (6) sustain a relevant industrial base, particularly in shipbuilding.

Latter-day Screens-Brenda R. Weber 2019-09-13 From Sister Wives and Big Love to The Book of Mormon on Broadway, Mormons and Mormonism are pervasive throughout American popular media. In Latter-day Screens, Brenda R.

Weber argues that mediated Mormonism contests and reconfigures collective notions of gender, sexuality, race, spirituality, capitalism, justice, and individualism. Focusing on Mormonism as both a meme and an analytic, Weber analyzes a wide range of contemporary media produced by those within and those outside of the mainstream and fundamentalist Mormon churches, from reality television to feature films, from blogs to YouTube videos, and from novels to memoirs by people who struggle to find agency and personhood in the shadow of the church's teachings. The broad archive of mediated Mormonism contains socially conservative values, often expressed through neoliberal strategies tied to egalitarianism, meritocracy, and self-actualization, but it also offers a passionate voice of contrast on behalf of plurality and inclusion. In this, mediated Mormonism and the conversations on social justice that it fosters create the pathway toward an inclusive, feminist-friendly, and queer-positive future for a broader culture that uses Mormonism as a gauge to calibrate its own values.

Phenomenology and the Human Positioning in the Cosmos-Anna-Teresa Tymieniecka 2012-10-24 The classic conception of human transcendental consciousness assumes its self-supporting existential status within the horizon of life-world, nature and earth. Yet this assumed absoluteness does not entail the nature of its powers, neither their constitutive force. This latter call for an existential source reaching beyond the generative life-world network. Transcendental consciousness, having lost its absolute status (its point of reference) it is the role of the logos to lay down the harmonious positioning in the cosmic sphere of the all, establishing an original foundation of phenomenology in the primogenital ontogenesis of life.
