Issues in Media-CQ Researcher, 2018-10-03 What is the future of television? Do social media and big data threaten privacy rights? Do children have too much access to violent media content? Is reporting on global conflict worth the risk? These questions—and many more—are at the heart of today’s media landscape. Written by award-winning CQ Researcher journalists, this collection of non-partisan reports focuses on fifteen hot-button issues impacting the media. With reports ranging from the fight over net neutrality to social media and politics, Issues in Media promotes in-depth discussion, facilitates further research, and helps readers formulate their own positions on crucial issues. And because it’s CQ Researcher, the reports are expertly researched and written, presenting readers with all sides of an issue. Key Features: Chapters follow a consistent organization, beginning with a summary of the issue, then exploring a number of key questions around the issue, next offering background to put the issue into current context, and concluding with a look ahead. A pro/con debate box in every chapter offer readers the opportunity to critically analyze and discuss the issues by exploring a debate between two experts in the field. All issues include a chronology, a bibliography, photos, charts, and figures to offer readers a more complete picture of the issue at hand.

Digital Broadcasting-Jo Pierson 2015-04-23 Digital Broadcasting presents an introduction to how the classic notion of 'broadcasting' has evolved and is being reinterpreted in an age of digitization and convergence. The book argues that 'digital broadcasting' is not a contradiction in terms, but-on the contrary-both terms presuppose and need each other. Drawing upon an interdisciplinary and international field of research and theory, it looks at current developments in television and radio broadcasting on the level of regulation and policy, industries and economics, production and content, and audience and consumption practices.

Computer Vision-Richard Szeliski 2010-09-30 Computer Vision: Algorithms and Applications explores the variety of techniques commonly used to analyze and interpret images. It also describes challenging real-world applications where vision is being successfully used, both for specialized applications such as medical imaging, and for fun, consumer-level tasks such as image editing and stitching, which students can apply to their own personal photos and videos. More than just a source of “recipes,” this exceptionally authoritative and comprehensive textbook/reference also takes a scientific approach to basic vision problems, formulating physical models of the imaging process before inverting them to produce descriptions of a scene. These problems are also analyzed using statistical models and solved using rigorous engineering techniques. Topics and features: structured to support active curricula and project-oriented courses, with tips in the Introduction for using the book in a variety of customized courses; presents exercises at the end of each chapter with a heavy emphasis on testing algorithms and containing numerous suggestions for small mid-term projects; provides additional material and more detailed mathematical topics in the Appendices, which cover linear algebra, numerical techniques, and Bayesian estimation theory; suggests additional reading at the end of each chapter, including the latest research in each sub-field, in addition to a full Bibliography at the end of the book; supplies supplementary course material for students at the associated website, <http://szeliski.org/Book/>. Suitable for an upper-level undergraduate or graduate-level course in computer science or engineering, this textbook focuses on basic techniques that work under real-world conditions and encourages students to push their creative boundaries. Its design and exposition also make it eminently suitable as a unique reference to the fundamental techniques and current research literature in computer vision.

The Age of Surveillance Capitalism-Shoshana Zuboff 2019-01-15 The challenges to humanity posed by the digital future, the first detailed examination of the unprecedented form of power called "surveillance capitalism," and the quest by powerful corporations to predict and control our behavior. In this masterwork of original thinking and research, Shoshana Zuboff provides startling insights into the phenomenon that she has named surveillance capitalism. The stakes could not be higher: a global architecture of behavior modification threatens human nature in the twenty-first century just as industrial capitalism disfigured the natural world in the twentieth. Zuboff vividly brings to life the consequences as surveillance capitalism advances from Silicon Valley into every economic sector. Vast wealth and power are accumulated in ominous new "behavioral futures markets," where predictions about our behavior are bought and sold, and the production of goods and services is subordinated to a new "means of behavioral modification." The threat has shifted from a totalitarian Big Brother state to a ubiquitous digital architecture: a "Big Other" operating in the interests of surveillance capital. Here is the crucible of an unprecedented form of power marked by extreme concentrations of knowledge and free from democratic oversight. Zuboff's comprehensive and moving analysis lays bare the threats to twenty-first century society: a controlled "hive" of total connection that seduces with promises of total certainty for maximum profit--at the expense of democracy, freedom, and our human future. With little resistance from law or society, surveillance capitalism is on the verge of dominating the social order and shaping the digital future--if we let it.

The Water Dancer-Ta-Nehisi Coates 2019-09-24 #1 NEW YORK TIMES BESTSELLER • OPRAH'S BOOK CLUB PICK • From the National Book Award-winning author of *Between the World and Me*, a boldly conjured debut novel about a magical gift, a devastating loss, and an underground war for freedom. "This potent book about America's most disgraceful sin establishes [Ta-Nehisi Coates] as a first-rate novelist."—San Francisco Chronicle IN DEVELOPMENT AS A MAJOR MOTION PICTURE • Adapted by Ta-Nehisi Coates and Kamilah Forbes, produced by MGM, Plan B, and Oprah Winfrey's Harpo Films NOMINATED FOR THE NAACP IMAGE AWARD • NAMED ONE OF PASTE'S BEST NOVELS OF THE DECADE • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY Time • NPR • The Washington Post • Chicago Tribune • Vanity Fair • Esquire • Good Housekeeping • Paste • Town & Country • The New York Public Library • Kirkus Reviews • Library Journal Young Hiram Walker was born into bondage. When his mother was sold away, Hiram was robbed of all memory of her—but was gifted with a mysterious power. Years later, when Hiram almost drowns in a river, that same power saves his life. This brush with death births an urgency in Hiram and a daring scheme: to escape from the only home he's ever known. So begins an unexpected journey that takes Hiram from the corrupt grandeur of Virginia's proud plantations to desperate guerrilla cells in the wilderness, from the coffin of the Deep South to dangerously idealistic movements in the North. Even as he's enlisted in the underground war between slavers and the enslaved, Hiram's resolve to rescue the family he left behind endures. This is the dramatic story of an atrocity inflicted on generations of women, men, and children—the violent and capricious separation of families—and the war they waged to simply make lives with the people they loved. Written by one of today's most exciting thinkers and writers, *The Water Dancer* is a propulsive, transcendent work that restores the humanity of those from whom everything was stolen. Praise for *The Water Dancer* "Ta-Nehisi Coates is the most important essayist in a generation and a writer who changed the national political conversation about race with his 2015 memoir, *Between the World and Me*. So naturally his debut novel comes with slightly unrealistic expectations—and then proceeds to exceed them. *The Water Dancer* . . . is a work of both staggering imagination and rich historical significance. . . . What's most powerful is the way Coates enlists his notions of the fantastic, as well as his fluid prose, to probe a wound that never seems to heal. . . . Timeless and instantly canon-worthy."—Rolling Stone

The wisdom and secrets herein have been distilled from a lifelong and fruit bearing quest, including study with, and of, many pool masters. So open Zen Pool, begin your journey, and let three-time national billiards champion Max Eberle awaken the master within you.

Fundamentals of Global Strategy-Cornelis de Kluyver 2010-08-20 The globalization of the competitive landscape has forced companies to fundamentally rethink their strategies. Whereas once only a few industries such as oil could be labeled truly global, today many—from pharmaceuticals to aircraft to computers—have become global in scale and scope. As a consequence, creating a global competitive advantage has become a key strategic issue for many companies. Crafting a global strategy requires making decisions about which strategy elements can and should be globalized and to what extent.

Dude, You're Gonna Be a Dad!-John Pfeiffer 2011-03-18 There are approximately 3,712 ways for a guy to look stupid during pregnancy - this book's here to help you avoid all(most) of them. And here's your first hint: Focus on what you can be doing for her rather than what's happening to her. She's pregnant. She knows that. You know that. And her 152 baby books tell her exactly what she can expect. Your job is to learn what you can do between the stick turning blue and the drive to the delivery room to make the next nine months go as smoothly as possible. That's where John Pfeiffer steps in. Like any good coach, he's been through it. He's dealt with the morning sickness and doctor visits, painting the baby's nursery and packing the overnight bag, choosing a name, hospital, and the color of the car-seat cover. All the while he remained positive and responsive - there with a "You're beautiful" when necessary - but assertive during the decision-making process (he didn't want to wind up with a kid named Percy). And now it's your turn. She might be having the baby, but you have plenty of responsibilities.

Walk Away the Pounds-Leslie Sansone 2008-11-16 Losing weight has never been easier or more fun than with Leslie Sansone's WALK AWAY THE POUNDS. For over twenty-five years, Leslie has helped more women get off the couch and onto their feet than anyone else in the fitness industry. Her secret? If you can walk, you can achieve the weight-loss goals you dream about...with none of the intimidation or negative messages that have stopped you from succeeding before. Whether you are a beginner or have been walking with Leslie for years, whether you are a teen or a senior or somewhere in between, you will see results. You will lose real weight, and keep it off—twenty pounds, forty, sixty, or even more. All you need is fifteen minutes a day for starters, two feet, and a willing attitude. There is no fancy equipment to buy, no fad diet to follow, and no fitness club to join. The revolutionary program in WALK AWAY THE POUNDS is designed to keep everybody on the path to success, especially those who have never been able to complete a weight-loss plan before. It's a simpler approach to fitness, one that can change your life. Leslie's step-by-step workbook format sets up the program day by day. You just wake up, flip open the book, and follow the directions. You'll get a combination of in-home walking (that's right, you can do it right from the comfort of your own living room!), simple strength training, motivational breakthroughs, and commonsense advice to help you burn fat, tone muscle, reduce stress, avoid illness, shake off the blues, and boost your energy level sky high. It's never been easier. Women all across America have dropped between 20 and 150 pounds with Leslie Sansone. Now you can too!

Click Here to Kill Everybody: Security and Survival in a Hyper-connected World-Bruce Schneier 2018-09-04 A world of "smart" devices means the Internet can kill people. We need to act. Now. Everything is a computer. Ovens are computers that make things hot; refrigerators are computers that keep things cold. These computers—from home thermostats to chemical plants—are all online. The Internet, once a virtual abstraction, can now sense and touch the physical world. As we open our lives to this future, often called the Internet of Things, we are beginning to see its enormous potential in ideas like driverless cars, smart cities, and personal agents equipped with their own behavioral algorithms. But every knife cuts two ways. All computers can be hacked. And Internet-connected computers are the most vulnerable. Forget data theft: cutting-edge digital attackers can now crash your car, your pacemaker, and the nation's power grid. In Click Here to Kill Everybody, renowned expert and best-selling author Bruce Schneier examines the hidden risks of this new reality. After exploring the full implications of a world populated by hyperconnected devices, Schneier reveals the hidden web of technical, political, and market forces that underpin the pervasive insecurities of today. He then offers common-sense choices for companies, governments, and individuals that can allow us to enjoy the benefits of this omnipotent age without falling prey to its vulnerabilities. From principles for a more resilient Internet of Things, to a recipe for sane government regulation and oversight, to a better way to understand a truly new environment, Schneier's vision is required reading for anyone invested in human flourishing.
