ASME International Steam Tables for Industrial Use-William T. Parry 2000 Continuing the tradition of the ASME Steam Tables that dates back to 1967, ASME International Steam Tables for Industrial Use places at your fingertips the thermodynamic, transport, and other properties of water and steam in a handy, printed soft cover format. Based on the International Association for the Properties of Water and Steam- Industrial Formulation 1997 (IAPWS- IP97), this new book complements the software, ASME Steam Properties for Industrial Use, published in January 1999. Together, these important references are the international standard for power plant and industrial calculations, used in conjunction with contract commitments. The tables have been calculated, and reproduce values from, the computer software. The tables have fewer points than in previous editions of the Steam Tables, and they are intended for estimation and ready reference rather than for serious design and precise interpolation. This volume was published on behalf of the ASME Research and Technology Committee on Water and Steam in Thermal Systems, Subcommittee on Properties of Steam.

Life on the Road: Kiwi Trucking Stories-Randolph Covich 2018-07-30 Kiwi truckies are the unsung heroes of New Zealand - the men and women who make great personal sacrifice and often risk their lives to keep our country running. The people who devote their life, in some way or another, to what is often a hard and lonely passion. Life on the Road gathers together their fascinating stories. It captures the humour, tragedy, action and extremes of the trucking world, by turns moving between the dramatic, light-hearted and surprising - including runaway trucks, skirmishes with the law, nostalgic tales of the early pioneers, love stories, and more than one practical joke. Whether you're a trucking die-hard or just love the wide open road and a cracking good yarn, Life on the Roadis a gripping insight into the real lives of Kiwi truckies.

Red Rosa-Kate Evans 2015-12-08 A graphic novel of the dramatic life and death of German revolutionary Rosa Luxemburg A giant of the political left, Rosa Luxemburg is one of the foremost minds in the canon of revolutionary socialist thought. But she was much more than just a thinker. She made herself heard in a world inimical to the voices of strong-willed women. She overcame physical infirmity and the prejudice she faced as a Jew to become an active revolutionary whose philosophy enriched every corner of an incredibly productive and creative life—her many friendships, her sexual intimacies, and her love of science, nature and art. Always opposed to the First World War, when others on the German left were swept up on a tide of nationalism, she was imprisoned and murdered in 1919 fighting for a revolution she knew to be doomed. In this beautifully drawn work of graphic biography, writer and artist Kate Evans has opened up her subject’s intellectual world to a new audience, grounding Luxemburg’s ideas in the realities of an inspirational and deeply affecting life. From the Trade Paperback edition.

Health Technology Assessment of Medical Devices-World Health Organization 2012-10-25 WHO and partners have been working towards devising an agenda, an action plan, tools and guidelines to increase access to appropriate medical devices. This document is part of a series of reference documents being developed for use at the country level. The series will include the following subject areas: * policy framework for health technology * medical device regulations * health technology assessment * health technology management * needs assessment of medical devices * medical device procurement * medical equipment donations * medical equipment inventory management * medical equipment maintenance * computerized maintenance management systems * medical device data * medical device nomenclature * medical devices by health-care setting * medical devices by clinical procedures * medical device innovation, research and development. These documents are intended for use by biomedical engineers, health managers, donors, nongovernmental organizations and academic institutions involved in health technology at the district, national, regional or global levels. HTA is the systematic evaluation of properties, effects, and/or impacts of health technology. Its main purpose is to inform technology-related policy-making in health care, and thus improve the uptake of cost-effective new technologies and prevent the uptake of technologies that are of doubtful value for the health system. It is one of three complementary functions to ensure the appropriate introduction and use of health technology. The other two components are regulation, which is concerned with safety and efficacy, and assessment of all significant intended as well as unintended consequences of technology use; and management, which is concerned with the procurement and maintenance of the technology during its life-cycle. The performance of health systems is strengthened when the linkages and exchange among these elements are clearly differentiated but mutually supportive. This document integrates health technology assessment into the WHO framework for evidence-informed policy-making. Health systems are strengthened when HTA is integrated into the human and material resources, data, transparent decision- and policy-making, and linked to the overall vision of equity and accountability. Good governance can rely on health technology assessment to provide a policy approach that is accountable for its decisions to the population.

7-Day Menu Planner: Mid-Winter Repasts-Susan Nicholson 2015-09-22 Welcome to the 7-Day Menu Planner. Mid-Winter menus start with Valentine’s Day when a bit of romance dominates the menu and ends with Easter, a special time to gather the family together. In between, there are five more weeks of easy menus, including a photo almost every week along with a shopping list for every day. Planning menus will change your life (for the better) forever. You won't have that miserable feeling as you stand in front of your open refrigerator and wonder “what’s for dinner?‟ To solve the dinner-dilemma, follow the menus, use the shopping list, and cook! Menu planning is not brain surgery or rocket science. All you need is a desire to eat healthier, save money, reduce stress and enjoy delicious meals with your family. You will also be the powerful master menu-planner for your household. Most of us don’t really hate to cook, we hate to plan what to cook. Just follow along with the easy menus and you’re on your way.

Heidegger and Marcuse-Andrew Feenberg 2005 This short book contrasts the philosophies of technology of Heidegger and Marcus, and relates their work to contemporary technology studies. Feenberg sets out the historical and theoretical background of the debate, then discusses each philosopher's theory in turn.

The I Ching-Richard J. Smith 2012-03-25 How the I Ching became one of the most widely read and influential books in the world The I Ching originated in China as a divination manual more than three thousand years ago. In 136 BCE the emperor declared it a Confucian classic, and in the centuries that followed, this work had a profound influence on the philosophy, religion, art, literature, politics, science, technology, and medicine of various cultures throughout East Asia. Jesuit missionaries brought knowledge of the I Ching to Europe in the seventeenth century, and the American counterculture embraced it in the 1960s. Here Richard Smith tells the extraordinary story of how this cryptic and once obscure book became one of the most widely read and extensively analyzed texts in all of world literature. In this concise history, Smith traces the evolution of the I Ching in China and throughout the world, explaining its complex structure, its manifold uses in different cultures, and its enduring appeal. He shows how the indigenous beliefs and customs of Japan, Korea, Vietnam, and Tibet "domesticated" the text, and he reflects on whether this Chinese classic can be compared to religious books such as the Bible or the Qur'an. Smith also looks at how the I Ching came to be published in dozens of languages, providing insight and inspiration to millions worldwide—including ardent admirers in the West such as Leibniz, Carl Jung, Philip K. Dick, Allen Ginsberg, Hermann Hesse, Bob Dylan, Jorge Luis Borges, and I. M. Pei. Smith offers an unparalleled biography of the most revered book in China's entire cultural tradition, and he shows us how this enigmatic ancient classic has become a truly global phenomenon.

VW Beetle Specification Guide 1949-1967-Richard Copping 2018-10-31 The VW Beetle is one of the best-loved of all classic cars, with many thousands preserved across the world, many in regular use. Over the years countless changes were introduced, together making a mid sixties Beetle, for instance, very different from one built in the mid-50s, or mid-70s, despite the obvious similarities. With the aid of hundreds of full colour photographs this new edition in paperback documents all the Beetle's specification changes and model differences during the classic period 1949-67, making it possible to determine the original specification and fittings of any Beetle from this period.Uses the same format as for the highly successful VW Transporter spec guides. Aimed at early-Beetle owners and enthusiasts. Superbly illustrated with 300 colour photographs. New edition in paperback for 2018.

Radical Cities-Justin McGuirk 2014-06-10 What makes the city of the future? How do you heal a divided city? In Radical Cities, Justin McGuirk travels across Latin America in search of the activist architects, maverick politicians and alternative communities already answering these questions. From Brazil to Venezuela, and from Mexico to Argentina, McGuirk discovers the people and ideas shaping the way cities are evolving. Ever since the mid twentieth century, when the dream of modernist utopia went to Latin America to die, the continent has been a testing ground for exciting new conceptions of the city. An architect in Chile has designed a form of social housing where only half of the house is built, allowing the owners to adapt the rest. Medellin, formerly the world’s murder capital, has been transformed with innovative public architecture; squatters in Caracas have taken over the forty-five-story Torre David skyscraper; and Rio is on a mission to incorporate its favelas into the rest of the city. Here, in the most urbanised continent on the planet, extreme cities have bred extreme conditions, from vast housing estates to sprawling slums. But after decades of social and political failure, a new generation has revitalised architecture and urban design in order to address persistent poverty and inequality. Together, these activists, pragmatists and social idealists are performing bold experiments that the rest of the world may learn from. Radical Cities is a colorful journey through Latin America—a crucible of architectural and urban innovation. From the Hardcover edition.

A Magnificent Obsession-Helen Rappaport 2012-03-13 As she did in her critically acclaimed The Last Days of the Romanovs, Helen Rappaport brings a compelling documentary feel to the story of this royal marriage and of the queen’s obsessive love for her husband - a story that began as fairy tale and ended in tragedy. After the untimely death of Prince Albert, the queen and her nation were plunged into a state of grief so profound that this one event would dramatically alter the shape of the British monarchy. For Britain had not just lost a prince: during his twenty year marriage to Queen Victoria, Prince Albert had increasingly performed the function of King in all but name. The outpouring of grief after Albert's death was so extreme, that its like would not be seen again until the death of Princess Diana 136 years later. Drawing on many letters, diaries and memoirs from the Royal Archives and other neglected sources, as well as the newspapers of the day, Rappaport offers a new perspective on this compelling historical psychodrama—the crucial final months of the prince's life and the first long, dark ten years of the Queen's retreat from public view. She draws a portrait of a queen obsessed with her living husband and - after his death - with his enduring place in history. Magnificent Obsession will also throw new light on the true nature of the prince's chronic physical condition, overturning for good the 150-year old myth that he died of typhoid fever.

Hyena-Jude Angelini 2014-09-23 "In the vein of Charles Bukowski, Augusten Burroughs and Hunter S. Thompson is Jude Angelini, host of Sirius Radio's wildly popular "The All Out Show", and his collection of brutally honest and blackly comical autobiographical essays"--

Mid-Life Ex-Wife-Stella Grey 2017-05-02 Nora Ephron meets Bridget Jones's Diary in Guardian columnist Stella Grey's heartrendingly honest, witty memoir about her online oddyssey to find real love in a virtual world. "The literary equivalent of the When Harry Met Sally line, 'tell me I'll never be out there again.'"—JoJo Moyes, #1 New York Times bestselling author of Me Before You Singers may croon about love being lovelier the second time around, but it can also be far more complicated. When Stella Grey's husband leaves her for another woman, she fears she'll be unhappy and alone for the rest of her life. But daytime vodka-drinking and ice-cream are only short-term consolations. Realizing that she needs to take her future into her own hands, Stella dives into the world of online dating. What follow are 693 days of hilarious, depressing, and baffling encounters that unfold both in person and online. Stella quickly discovers that the men perfect a man appears on her screen, the warier she should be. It's a game of chance, with some players perfectly willing to lie to get what they want, whether that's a lifetime of love or a very brief encounter. Amid flirty emails, Skype chats, and awkward small talk over glasses of bad wine (which may or may not lead to awkward sex), Stella struggles to remain optimistic. To succeed, does she have to redefine the kind of man she's looking for—or change the kind of woman she is? Funny, raw, and heartwarming, this book is a brutally honest account of the world of online dating—a world which so many of us are a part of, no matter our age—drawn from Stella's hugely popular Guardian column, "Mid-life Ex-Wife" (and expanded with new material) about her search for a second chance at love.

Six Sigma for Small and Mid-sized Organizations-Terence T. Burton 2005-03-15 Many smaller and mid-sized corporations can benefit from Six Sigma methods but are struggling with how to deploy them on the scale suitable for their organizations. It is a practical "give me the answers quick" Six Sigma guide for smaller businesses. Terence T. Burton is Founder and President of The Center for Excellence in Operations, Inc. He has over 30 years of experience in operations. Jeff L. Sams is Director of North American Operations for Casco Products, a Unit of Sequa Corporation. He is also a Six Sigma Master Blackbelt.

A Spy's London-Roy Berkeley 1994-11-14 A historical tour of London landmarks for anyone fascinated by intrigue and espionage. . . . Includes maps and photos. James Bond may be fictional—but London is indeed the espionage capital of the world. This book takes us through the city's espionage history, with evocative photos and compelling stories and observations about 136 landmarks, conveniently organized into manageable walking tours for those living in or visiting the city. Go behind the façades of ordinary buildings to learn more about clandestine operations: from the modest hotel suite where an eager Red Army colonel poured out his secrets to a team of British and American intelligence officers, to the royal residence where one of the most slippery Soviet moles was at home for years, and the London home where an MP plotting to appease Hitler was arrested on his front steps in 1940.

The Network-Scott Woolley 2016-04-26 The astonishing story of America's airwaves, the two friends—one a media mogul, the other a famous inventor—who made them available to us, and the government which figured out how to put a price on air. This is the origin story of the airwaves—the foundational technology of the communications age—as told through the forty-year friendship of an entrepreneurial industrialist and a brilliant inventor. David Sarnoff, the head of RCA and equal parts Steve Jobs, Jack Welch, and William Randolph Hearst, was the greatest supporter of his friend Edwin Armstrong, developer of the first amplifier, the modern radio transmitter, and FM radio. Sarnoff was convinced that Armstrong's inventions had the power to change the way societies communicated with each other forever. He would become a visionary captain of the media industry, even predicting the advent of the Internet. In the mid-1930s, however, when Armstrong suspected Sarnoff of orchestrating a cadre of government officials to seize control of the FM airwaves, he committed suicide. Sarnoff had a very different view of who his friend's enemies were. Many corrupt politicians and corporations saw in Armstrong's inventions the opportunity to commodify our most ubiquitous natural resource—the air. This early alliance between high tech and business set the precedent for countless legal and industrial battles over broadband and licensing bandwidth, many of which continue to influence policy and debate today.

What About Law?-Catherine Barnard 2011-03-10 Most young people considering studying law, or pursuing a legal career, have very little idea of what learning law involves and how universities teach law to their students. The new edition of this book, which proved very popular when first published in 2007, provides a 'taster' for the study of law; a short, accessible presentation of law as an academic subject, designed to help 17- and 18-year old students and others decide whether law is the right choice for them as a university subject, or, if they have already made the choice, what to expect when they start their law degree. It helps answer the question 'what should I study at university?' and counters the perception that law is a dry, dull subject. What About Law? shows how the study of law can be fun, intellectually stimulating, challenging and of direct relevance to students. Using a case study approach, the book introduces prospective law students to the legal system, as well as to legal reasoning, critical thinking and argument. This is a book that should be in the library of every school with a sixth form, every college and every university, and it is one that any student about to embark on the study of law should read before they commence their legal studies. All of the authors have long experience in teaching law at Cambridge and elsewhere and all have also been involved, at various times, in advising prospective law students at open days and admissions conferences. Listed as one of the 'Six of the best law books' that a future law student should read by the Guardian Law Online, 8th August 2012. See the detailed website for this book: http://www.whataboutlaw.co.ukwww.whataboutlaw.co.uk
