The Australian Beekeeping Manual-Robert Owen 2015-10-01 The book is aimed at both the novice and experienced beekeeper in Australia and explains in detail the steps required to manage colonies of bees. Supported by over 350 photographs and drawings, each action to be performed is explained in detail with photographs showing the steps as well as the final result. Many potential beekeepers are unclear about the equipment they need to buy and how to obtain their first colony of bees. The first chapters in the book explain in detail the equipment needed as well as equipment that may be useful later on as their confidence and experience grows. The chapter 'Your First Bees' explains how to obtain bees, where to locate them in the garden, and the basics of colony management. In addition to chapters on keeping bees, there are detailed chapters on the life cycle of the honey bee, extracting honey, the bee-friendly garden, entering honey in competitions, native bees and rearing queens. The result is a comprehensive manual that includes material not available in other Australian, North American or European books and is the ultimate Australian reference source.

Review of *Apanteles sensu stricto* (Hymenoptera, Braconidae, Microgastrinae) from Area de Conservaci?n Guanacaste, northwestern Costa Rica, with keys to all described species from Mesoamerica-Jose L.

Fernández-Triana 2014-02-24 The present paper deals with 205 species of *Apanteles* (Hymenoptera, Braconidae: Microgastrinae) from Mesoamerica, including 186 new species from Area de Conservación Guanacaste (ACG), Costa Rica. The limits of the genus *Apanteles* sensu stricto are reassessed, and all Mesoamerican species are assigned to 32 species-groups, all but two of which are newly defined. Taxonomic keys are presented in traditional dichotomous print versions and links to electronic interactive versions (software Lucid 3.5). Numerous illustrations, computer-generated descriptions, distributional information, wasp biology, and DNA barcodes (where available) are presented for every species. All morphological terms are detailed and linked to the Hymenoptera Anatomy Ontology website. About 90% of the wasp species with known host records seem to be monophagous or oligophagous at some level, parasitizing just one host family and commonly, just one species of caterpillar. The ACG species of *Apanteles* attack mainly species of Hesperidae, Elachistidae and Crambidae (Lepidoptera).

The Humane Gardener-Nancy Lawson 2017-04-18 In this eloquent plea for compassion and respect for all species, journalist and gardener Nancy Lawson describes why and how to welcome wildlife to our backyards. Through engaging anecdotes and inspired advice, profiles of home gardeners throughout the country, and interviews with scientists and horticulturalists, Lawson applies the broader lessons of ecology to our own outdoor spaces. Detailed chapters address planting for wildlife by choosing native

species; providing habitats that shelter baby animals, as well as birds, bees, and butterflies; creating safe zones in the garden; cohabiting with creatures often regarded as pests; letting nature be your garden designer; and encouraging natural processes and evolution in the garden. The Humane Gardener fills a unique niche in describing simple principles for both attracting wildlife and peacefully resolving conflicts with all the creatures that share our world.

Exquisite Corpse-Poppy Z. Brite 1997-08-20 From the author of *Lost Souls*, *Drawing Blood*, and *Wormwood* comes a thrilling and chilling novel that bestselling author Peter Straub says serves as a "guidebook to hell." To serial slayer Andrew Compton, murder is an art, the most intimate art. After feigning his own death to escape from prison, Compton makes his way to the United States with the sole ambition of bringing his "art" to new heights. Tortured by his own perverse desires, and drawn to possess and destroy young boys, Compton inadvertently joins forces with Jay Byrne, a dissolute playboy who has pushed his "art" to limits even Compton hadn't previously imagined. Together, Compton and Byrne set their sights on an exquisite young Vietnamese-American runaway, Tran, whom they deem to be the perfect victim. Swiftly moving from the grimy streets of London's Piccadilly Circus to the decadence of the New Orleans French Quarter, Poppy Z. Brite dissects the landscape of torture and invites us into the mind of a killer. *Exquisite Corpse* confirms Brite as a writer who defies categorization. It is a novel for those who dare trespass where the sacred and profane become one.

The Wasp Factory-Iain Banks 2013-07-02 The polarizing literary debut by Scottish author Ian Banks, *The Wasp Factory* is the bizarre, imaginative, disturbing, and darkly comic look into the mind of a child psychopath. Meet Frank Cauldhame. Just sixteen, and unconventional to say the least: Two years after I killed Blyth I murdered my young brother Paul, for quite different and more fundamental reasons than I'd disposed of Blyth, and then a year after that I did for my young cousin Esmerelda, more or less on a whim. That's my score to date. Three. I haven't killed anybody for years, and don't intend to ever again. It was just a stage I was going through.

Rewired-James Patrick Kelly 2007-10-01 Cyberpunk is dead. The revolution has been co-opted by half-assed heroes, overclocked CGI, and tricked-out shades. Once radical, cyberpunk is now nothing more than a brand. Time to stop flipping the channel. These sixteen extreme stories reveal a government ninja routed by a bicycle repairman, the inventor of digitized paper hijacked by his college crush, a dead boy trapped in a warped storybook paradise, and the queen of England attacked with the deadliest of forbidden technology: a working modem. You'll meet Manfred Macx, renegade meme-broker, Red Sonja, virtual reality sex-goddess, and Felix, humble sys-admin and post-apocalyptic hero. Editors James Patrick Kelly and John Kessel (Feeling Very Strange: The Slipstream Anthology) have united cyberpunk visionaries William Gibson, Bruce Sterling, and Pat Cadigan with the new post-cyberpunk vanguard, including Cory Doctorow, Charles Stross, and Jonathan Lethem. Including a canon-establishing introduction and excerpts from a hotly contested online debate, Rewired is the first anthology to define and capture the crackling excitement of the post-cyberpunks. From the grittiness of Mirrorshades to the Singularity and beyond, it's time to revive the revolution.

Hymenoptera of the World-Canada. Agriculture Canada. Research Branch 1993 This publication is the result of a course on identification of Hymenoptera given three times since 1985 at the Centre for Land and Biological Resources Research. The considerable interest in these courses indicated the need for a comprehensive identification guide to all extant families of Hymenoptera. The main emphasis is on family identification using the keys, which are complemented by family sketches. The sketches include a taxonomic diagnosis to supplement the keys, a summary of the biology, the size and distribution, and important literature references.
