The Children's Story-James Clavell 2014-11-12 It was a simple incident in the life of James Clavell—a talk

with his young daughter just home from school—that inspired this chilling tale of what could happen in twenty-five quietly devastating minutes. He writes, "The Children's Story came into being that day. It was then that I really realized how vulnerable my child's mind was —any mind, for that matter—under controlled circumstances. Normally I write and rewrite and re-rewrite, but this story came quickly—almost by itself. Barely three words were changed. It pleases me greatly because I kept asking the questions... Questions like, What's the use of 'I pledge allegiance' without understanding? Like Why is it so easy to divert thoughts? Like What is freedom? and Why is so hard to explain? The Children's Story keeps asking me all sorts of questions I cannot answer. Perhaps you can—then your child will...."

Lead-Acid Batteries for Future Automobiles-Jürgen Garche 2017-02-21 Lead-Acid Batteries for Future Automobiles provides an overview on the innovations that were recently introduced in automotive lead-acid batteries and other aspects of current research. Innovative concepts are presented, some of which aim to make lead-acid technology a candidate for higher levels of powertrain hybridization, namely 48-volt mild or high-volt full hybrids. Lead-acid batteries continue to dominate the market as storage devices for automotive starting and power supply systems, but are facing competition from alternative storage technologies and being challenged by new application requirements, particularly related to new electric vehicle functions and powertrain electrification. Presents an overview of development trends for future automobiles and the demands that they place on the battery Describes how to adapt LABs for use in micro and mild hybrid EVs via collector construction and materials, via carbon additives, via new cell construction (bipolar), and via LAB hybrids with Li-ion and supercap systems System integration of LABs into vehicle power-supply and hybridization concepts Short description of competitive battery technologies

Physics: Bengali Edition-Shyam Mehta 2014-03 From an ex-colleague of mine who came first in his year at Physics in Cambridge University: "If the message is that western physics is wrong, then everybody will agree, because it is widely accepted that modern physics has not yet found the explanation for the most important phenomena in the universe, and that its major triumphs refer to experiments where the present theories are not tested to their limits. An idea mentioned in the book is that light moves instantaneously, and that it takes time for impressions to reach us."

The Origin of Continents and Oceans-Alfred Wegener 1966-01-01 In 1915 Alfred Wegener's seminal work describing the continental drift was first published in German. Wegener explained various phenomena of historical geology, geomorphology, paleontology, paleoclimatology, and similar areas in terms of continental drift. This edition includes new data to support his theories, helping to refute the opponents of his controversial views. 64 illustrations.

Charandas Chor-Habiba Tanavira 2004 Impudent and irresistible, Charandas is a thief with a difference. Having vowed never to lie, he manages to keep his word while robbing the rich blind. A typical folk hero, street-smart and savvy, he runs rings around the forces of law and order till he comes up against one wall he cannot scale his own commitment to the truth. And the unexpected twist at the end of this heartwarming comedy lifts the play onto another plane. This play by veteran playwright/director Habib Tanvir, performed by Naya Theatre's Chattisgarhi folk artists, is a contemporary Indian classic. When it was first staged in 1975, it made a tremendous impact. Folk actors on the contemporary stage, vibrant and self-confident, speaking their own dialect and performing their own material, albeit under the guiding hand of a master director, was a novel experiment in Indian theatre. Moreover, it was an experiment that worked, and that opened up a new direction in theatre practice. Twenty years later, Charandas Chor is still popular. It has been performed all over India, and at many forums and festivals abroad, winning the top award at the prestigious Edinburgh Fringe Festival in 1982. This volume contains, along with the translated playscript, an introduction to Habib Tanvir's work in theatre by theatre scholar and critic Javed Malick and a long interview with the playwright/director in which he discusses the milestones in his long

career. Anjum Katyal, the translator, is an editor and writer who lives and works in Calcutta. Drawn to Landscape-Janet Mendelsohn 2015 "J. B. (John Brinckerhoff) Jackson founded, edited, and published Landscape from 1951-1969, v. 1-32, no. 2; spring 1951-1994] a magazine that changed the way everyone—including writers and scholars, planners and designers, artists and the general public—came to understand and interpret the everyday places that surround us and influence us in fundamental ways. Then, through his distinguished teaching career at Harvard University and the University of California, Berkeley, and through his expansive array of seminal essays and influential books, Jackson further pioneered the advancement of "landscape studies," whose connections today extend to more than a dozen academic, artistic, and professional fields. Drawn to Landscape is the first book to present fully the many aspects of Jackson's career. Including original essays by those who not only knew Jackson well, but also have carried his torch to new heights in their own work, the book sheds valuable light on Jackson's life, oeuvre, influences, and many legacies. Also included are 126 color illustrations and twenty-eight black-and-white illustrations, among them 117 of Jackson's original drawings, watercolors, and teaching slides. J. B. Jackson redefined landscape not as scenery but as the historical record of human interactions with the environment, whether urban, rural, suburban, social, or wild. He taught us to pay attention to the often overlooked but defining features of our everyday world, whose varied landscapes are created by ordinary people going about their day-to-day lives. And he guided us, from the first issue of Landscape to his last lecture and publication, to look at the landscape like one reads a book. As he proclaimed, "We have but to learn how to read it." This book helps show us the way."--
