(Re)Constructing Memory: Education, Identity, and Conflict-Michelle J. Bellino 2017-02-08 How do schools protect young people and call on the youngest citizens to respond to violent conflict and division operating outside, and sometimes within, school walls? What kinds of curricular representations of conflict contribute to the construction of national identity, and what kinds of encounters challenge presumed boundaries between us and them? Through contemporary and historical case studies—drawn from Cambodia, Egypt, Northern Ireland, Peru, and Rwanda, among others—this collection explores how societies experiencing armed conflict and its aftermath imagine education as a space for forging collective identity, peace and stability, and national citizenship. In some contexts, the erasure of conflict and the homogenization of difference are central to shaping national identities and attitudes. In other cases, collective memory of conflict functions as a central organizing frame through which citizenship and national identity are (re)constructed, with embedded messages about who belongs and how social belonging is achieved. The essays in this volume illuminate varied and complex inter-relationships between education, conflict, and national identity, while accounting for ways in which policymakers, teachers, youth, and community members replicate, resist, and transform conflict through everyday interactions in educational spaces.
World History-California Edition-Elisabeth Gaynor Ellis 2007-03-30
Literature from Around the World-Anonimo 2007-03-30 Presents a collection of children's literature from Europe, Asia, and the Middle East.
World History Survey-Elisabeth Gaynor Ellis 2007-07-01 Developed specifically for high school global history programs, this text covers world history from the beginnings of human civilization to the present.
World History & Geography-Jackson J. Spielvogel 2018
Fynbos-Nicky Allsopp 2014 "This book provides the first synthesis of the field for 20 years, bringing together the latest ecological and evolutionary research on the South African global biodiversity hotspots of the Greater Cape Floristic Region--the iconic fynbos and succulent karoo"--Page 4 of cover.
The Rhetoric of Social Intervention-Susan K. Opt 2008-08-22 The first-ever thorough exploration and discussion of the rhetorical model of social invention [RSI] (initially conceived by rhetorical theorist William R. Brown) for today's students and scholars.
Air Force Combat Units of World War II-
The Battle for China's Spirit-Sarah Cook 2017-05-16 This study is the first comprehensive analysis of its kind. It examines the Communist Party's evolving religious controls and citizens' responses to them, focusing on seven religious groups that account for 350 million believers: Chinese Buddhism, Taoism, Catholicism, Protestantism, Islam, Tibetan Buddhism, and Falun Gong.
High School World History 2011 Survey Student Edition Grade 9/10-Prentice-Hall, Inc. 2009-07-01 By the time teens are in high school, they have already spent years wrestling with a heavy backpack. It's high time to solve this problem--and Pearson can help. Explore Pearson@home social studies products for home use.
Plant Pest Risk Analysis-Christina Devorshak 2012 This text provides instruction on the concepts and application of risk analysis in the field of regulatory plant protection, covering topics such as the background on why and how risk analysis is conducted and specific methods for implementing risk analysis. This book also provides useful exercises and case studies to aid students of plant pathology and crop protection in their absorption of the subject. Equally useful for practitioners, this book is written by experts with a wealth of national and international experience.
Advanced Nutrition and Dietetics in Obesity-Catherine Hankey 2018-02-05 This addition to the British Dietetic Association Advanced Nutrition and Dietetics book series is written for clinicians and researchers who work with any aspect of obesity and its comorbid conditions. Featuring contributions from leading researchers and practitioners from around the globe Advanced Nutrition and Dietetics in Obesity offers a uniquely international perspective on what has become a worldwide public health crisis. Chapters cover a full range of new ideas and research on the underlying drivers of obesity in populations including discussions on the genetic and clinical aspects of obesity, along with expert recommendations on how to effectively manage and prevent this chronic and persistent disease. Providing a comprehensive overview of the key literature in this field, Advanced Nutrition and Dietetics in Obesity is an invaluable resource for all those whose work should or does embrace any aspect of obesity.
Geomorphology in the Anthropocene-Andrew S. Goudie 2016-10-10 The Anthropocene is a major new concept in the Earth sciences and this book examines the effects on geomorphology within this period. Drawing examples from many different global environments, this comprehensive volume demonstrates that human impact on landforms and land-forming processes is profound, due to various driving forces, including: use of fire; extinction of fauna; development of agriculture, urbanisation, and globalisation; and new methods of harnessing energy. The book explores the ways in which future climate change due to anthropogenic causes may further magnify effects on geomorphology, with respect to future hazards such as floods and landslides, the state of the cryosphere, and sea level. The book concludes with a consideration of the ways in which landforms are now being managed and protected. Covering all major aspects of geomorphology, this book is ideal for undergraduate and graduate students studying geomorphology, environmental science and physical geography, and for all researchers of geomorphology.
Britain and Japan-Hugh Cortazzi 2013-05-13 The continuing success of this series, highly regarded by scholars and the general reader alike, has prompted The Japan Society to commission this fourth volume, devoted as before to the lives of key people, both British and Japanese, who have made significant contributions to the development of Anglo-Japanese relations. The appearance of this volume brings the number of portraits published to over one hundred. The portraits cover diplomats (from Mori Arinori to Sir Francis Lindley), businessmen (from William Keswick to Lasenby Liberty), engineers and teachers (from W. E. Ayrton to Henry Spencer Palmer), scholars and writers (from Sir Edwin Arnold to Ivan Morris), as well as journalists, judo masters and the aviator Lord Sepphill. In all, there are a total of 34 contributions.
Advice And Support: The Early Years 1941-1960 [Illustrated Edition]-Ronald H. Spector 2014-08-15 Includes over 75 maps, photos and plans. The present volume describes the activities of the U.S. Army in Vietnam during World War II, military advice and assistance to the French government during the immediate post-war years, and the advisory program that developed after the Geneva Agreements of 1954. Its scope ranges from high-level policy decisions to low-echelon advisory operations in the field, presented against a background of relevant military and political developments. The author enjoyed access to the official records of the period and examined personal papers, interviews, other documentary sources, and miscellaneous published materials. Useful not only as a study of military assistance but as a view of the Army as an agent of national policy, this volume is a fitting introduction to the overall study of the conflict in Vietnam.
A Clinical Guide to the Treatment of the Human Stress Response-George S. Jr. Everly 2006-04-06 This updated edition covers a range of new topics, including stress and the immune system, post-traumatic stress and crisis intervention, Eye Movement Desensitization and Reprocessing (EMDR), Critical Incident Stress Debriefing (CISD), Crisis Management Briefings in response to mass disasters and terrorism, Critical Incident Stress Management (CISM), spirituality and religion as stress management tools, dietary factors and stress, and updated information on psychopharmacologic intervention in the human stress response. It is a comprehensive and accessible guide for students, practitioners, and researchers in the fields of psychology, psychiatry, medicine, nursing, social work, and public health.
Delivering Superior Health and Wellness Management with IoT and Analytics-Nilmini Wickramasinghe 2019-11-27 This in-depth book addresses a key void in the literature surrounding the Internet of Things (IoT) and health. By systematically evaluating the benefits of mobile, wireless, and sensor-based IoT technologies when used in health and wellness contexts, the book sheds light on the next frontier for healthcare delivery. These technologies generate data with significant potential to enable superior care delivery, self-empowerment, and wellness management. Collecting valuable insights and recommendations in one accessible volume, chapter authors identify key areas in health and wellness where IoT can be used, highlighting the benefits, barriers, and facilitators of these technologies as well as suggesting areas for improvement in current policy and regulations. Four overarching themes provide a suitable setting to examine the critical insights presented in the 31 chapters: Mobile- and sensor-based solutions Opportunities to incorporate critical aspects of analytics to provide superior insights and thus support better decision-making Critical issues around aspects of IoT in healthcare contexts Applications of portals in healthcare contexts A comprehensive overview that introduces the critical issues regarding the role of IoT technologies for health, Delivering Superior Health and Wellness Management with IoT and Analytics paves the way for scholars, practitioners, students, and other stakeholders to understand how to substantially improve health and wellness management on a global scale.
Ancient Jewish Prayers and Emotions-Stefan C. Reif 2015-11-13
A Handbook of Global Freshwater Invasive Species-Robert A. Francis 2012-03-12 Invasive non-native species are a major threat to global biodiversity. Often introduced accidentally through international travel or trade, they invade and colonize new habitats, often with devastating consequences for the local flora and fauna. Their environmental impacts can range from damage to resource production (e.g. agriculture and forestry) and infrastructure (e.g. buildings, road and water supply), to human health. They consequently can have major economic impacts. It is a priority to prevent their introduction and spread, as well as to control them. Freshwater ecosystems are particularly at risk from invasions and are landscape corridors that facilitate the spread of invasives. This book reviews the current state of knowledge of the most notable global invasive freshwater species or groups, based on their severity of economic impact, geographic distribution outside of their native range, extent of research, and recognition of the ecological severity of the impact of the species by the IUCN. As well as some of the very well-known species, the book also covers some invasives that are emerging as serious threats. Examples covered include a range of aquatic and riparian plants, insects, molluscs, crustacea, fish, amphibians, reptiles and mammals, as well as some major pathogens of aquatic organisms. The book also includes overview chapters synthesizing the ecological impact of invasive species in fresh water and summarizing practical implications for the management of rivers and other freshwater habitats.
Air Emissions from Animal Feeding Operations-National Research Council 2003-04-07 Air Emissions from Animal Feeding Operations: Current Knowledge, Future Needs discusses the need for the U.S. Environmental Protection Agency to implement a new method for estimating the amount of ammonia, nitrous oxide, methane, and other pollutants emitted from livestock and poultry farms, and for determining how these emissions are dispersed in the atmosphere. The committee calls for the EPA and the U.S. Department of Agriculture to establish a joint council to coordinate and oversee short - and long-term research to estimate emissions from animal feeding operations accurately and to develop mitigation strategies. Their recommendation was for the joint council to focus its efforts first on those pollutants that pose the greatest risk to the environment and public health.
Core Concepts in Hypertension in Kidney Disease-Ajay K. Singh 2016-10-12 This guide provides a comprehensive review of the full spectrum of hypertension in chronic kidney disease (CKD). Targeted towards the busy practitioner, the focus of this volume is on various therapies and how to lower blood pressure through lifestyle changes.
Specialist patient populations and hypertension and causes of hypertension are also covered in detail. Clinically-focused and authoritative, this resource offers a rationalized approach to diagnosing and treating hypertension in CKD.
Towards Mechanism-based Treatments for Fragile X Syndrome- Daman Kumari 2019-09-18 It has been more than 25 years since the identification of the FMR1 gene and the demonstration of the causative role of CGG-repeat expansion in the disease pathology of fragile X syndrome (FXS), but the underlying mechanisms involved in the expansion mutation and the resulting gene silencing still remain elusive. Our understanding of the pathways impacted by the loss of FMRP function has grown tremendously, and has opened new avenues for targeted treatments for FXS. However, the failure of recent clinical trials that were based on successful preclinical studies using the Fmr1 knockout mouse model has forced the scientific community to revisit clinical trial design and identify objective outcome measures. There has also been a renewed interest in restoring FMR1 gene expression as a possible treatment approach for FXS. This special issue of Brain Sciences highlights the progress that has been made towards understanding the disease mechanisms and how this has informed the development of treatment strategies that are being explored for FXS.
The Trouble with Textbooks-Gary A. Tobin 2008-07-31 Our elementary, middle, and high school teaching about Jews, Judaism, and Israel is driven by textbook misstatements about Jewish theology, social structure, and the history of Israel that comprise an unsavory picture of Jews and Israel. This book will be an extremely valuable reference tool for educators and members of the public interested in religion and the Middle East.
Handbook on Marine Environment Protection-Markus Salomon 2018-01-31 This handbook is the first of its kind to provide a clear, accessible, and comprehensive introduction to the most important scientific and management topics in marine environmental protection. Leading experts discuss the latest perspectives and best practices in the field with a particular focus on the functioning of marine ecosystems, natural processes, and anthropogenic pressures. The book familiarizes readers with the intricacies and challenges of managing coasts and oceans more sustainably, and guides them through the maze of concepts and strategies, laws and policies, and the various actors that define our ability to manage marine activities. Providing valuable thematic insights into marine management to inspire thoughtful application and further study, it is essential reading for marine environmental scientists, policy-makers, lawyers, practitioners and anyone interested in the field.
Climate and Conservation-Jodi A. Hilty 2012-06-11 Climate and Conservation presents case studies from around the world of leading-edge projects focused on climate change adaptation-regional-scale endeavors where scientists, managers, and practitioners are working to protect biodiversity by protecting landscapes and seascapes in response to threats posed by climate change. The book begins with an introductory section that frames the issues and takes a systematic look at planning for climate change adaptation. Thirteen chapters that follow examine particular case studies in every part of the world, including landscapes and seascapes from equatorial, temperate, montane, polar, and marine and freshwater regions. Projects profiled range from North American grasslands to boreal forests to coral reefs to Alpine freshwater environments. Chapter authors have extensive experience in their respective regions and are actively engaged in working on climate-related issues. The result is a collection of geographical case studies that allows for effective cross-comparison while at the same time recognizing the uniqueness of each situation and locale. Climate and Conservation offers readers tangible, place-based examples of projects designed to protect large landscapes as a means of conserving biodiversity in the face of the looming threat of global climate change. It informs readers of how a diverse set of conservation actors have been responding to climate change at a scale that matches the problem, and is an essential contribution for anyone involved with large-scale biodiversity conservation.
Building Literacy in the Content Areas-Thomas G. Gunning 2003 Building Literacy in the Content Areas reflects the diversity of today's student population and emphasizes the need to gear instruction to include all students. With templates, sample lessons, and actual teaching scenarios, this new text provides preservice teachers with the tools they need to effectively teach reading at all grade levels.

Inter/Cultural Communication-Anastacia Kurylo 2012-07-23 Today, students are more familiar with other cultures than ever before because of the media, Internet, local diversity, and their own travels abroad. Using a social constructionist framework, Inter/Cultural Communication provides today's students with a rich understanding of how culture and communication affect and effect each other. Weaving multiple approaches together to provide a comprehensive understanding of and appreciation for the diversity of cultural and intercultural communication, this text helps students become more aware of their own identities and how powerful their identities can be in facilitating change--both in their own lives and in the lives of others.
Multiple Myeloma-Thomas Moehler 2011-04-21 Multiple myeloma is currently still an incurable disease, but during the past decade knowledge of its molecular pathogenesis has increased rapidly. This has led to remarkable progress in both diagnosis and therapy, including in particular the approval of novel and first-in-class drugs such as thalidomide, bortezomib, and lenalidomide. This book, written by internationally acknowledged experts, covers a wide range of topics relating to multiple myeloma, including history, epidemiology, pathophysiology, clinical features, staging, and prognostic systems. The principal focus, however, is on therapy, with detailed information on the various promising treatment options which give hope that this cancer will be transformed into a chronic disease or even become curable. Individualized therapy and the variety of supportive treatment options, as described in this volume, will help in achieving this goal, as well as in reducing adverse events and improving quality of life.
Portal Hypertension-Plinio Rossi 2012-12-06 Portal hypertension is a relatively common condition, the complications of which are frequently life threatening. Patients with portal hypertension represent an important portion of the daily clinical work of abdominal radiologists, gastroenterologists and abdominal surgeons. During the past two decades the development of new radiological devices and of new percutaneous image-guided treatment methods has resulted in fundamental changes in the clinical management of patients with portal hypertension. During the same period tremendous progress was achieved in the visualization of the numerous morphological and functional changes observed in patients with portal hypertension, due to the clinical introduction of the new cross-sectional imaging methods: ultrasonography, computed tomography and magnetic resonance imaging. I am very grateful to Prof. Plinio Rossi, an internationally recognized leader in the field of interventional radiology, for accepting the challenging task of compiling and presenting in a structured way the numerous facts and data that have become available during the past few years in this rapidly developing field. The editor has been inspired and successful in his selection of the impressive group of international experts that has contributed to many chapters of this volume. Molecular Basis of Cardiovascular Diseases: Implications of Natriuretic Peptides-Speranza Rubattu 2019-10-21 The natriuretic peptides (NPs) family includes a class of hormones and their receptors needed for the physiological control of cardiovascular functions. The discovery of NPs provided a fundamental contribution into our understanding of the physiological regulation of blood pressure, and of heart and kidney functions. NPs have also been implicated in the pathogenesis of several cardiovascular diseases (CVDs), including hypertension, atherosclerosis, heart failure, and stroke. A fine comprehension of the molecular mechanisms dependent from NPs and underlying the promotion of cardiovascular damage has contributed to improve our understanding of the molecular basis of all major CVDs. Finally, the opportunity to target NPs in order to develop new therapeutic tools for a better treatment of CVDs has been developed over the years. The current Special Issue of the Journal covers all major aspects of the molecular implications of NPs in physiology and pathology of the cardiovascular system, including NP-based therapeutic approaches.
Encyclopedia of Death and the Human Experience-Clifton D. Bryant 2009-07-15 Death and dying and death-related behavior involve the causes of death and the nature of the actions and emotions surrounding death among the living. Interest in the varied dimensions of death and dying has led to the development of death studies that move beyond medical research to include behavioral science disciplines and practitioner-oriented fields. As a result of this interdisciplinary interest, the literature in the field has proliferated. This two-volume resource addresses the traditional death and dying-related topics but also presents a unique focus on the human experience to create a new dimension to the study of death and dying. With more than 300 entries, the Encyclopedia of Death and the Human Experience includes the complex cultural beliefs and traditions and the institutionalized social rituals that surround dying and death, as well as the array of emotional responses relating to bereavement, grieving, and mourning. The Encyclopedia is enriched through important multidisciplinary contributions and perspectives as it arranges, organizes, defines, and clarifies a comprehensive list of death-related perspectives, concepts, and theories. Key Features Imparts significant insight into the process of dying and the phenomenon of death Includes contributors from Asia, Africa, Australia, Canada, China, eastern, southern, and western Europe; Iceland; Scandinavia; South America; and the United States who offer important interdisciplinary and cross-cultural perspectives Provides a special focus on the cultural artifacts and social institutions and practices that constitute the human experience Addresses death-related terms and concepts such as angel makers, equivocal death, end-of-life decision making, near-death experiences, cemeteries, ghost photography, halo nurses, caregiver stress, cyberfunerals, global religious beliefs and traditions, and death denial Presents a selective use of figures, tables, and images Key Themes Arts, Media, and Popular Culture Perspectives Causes of Death Conceptualization of Death, Dying, and the Human Experience Coping With Loss and Grief: The Human Experience Cross-Cultural Perspectives Cultural-Determined, Social-Oriented, and Violent Forms of Death Developmental and Demographic Perspectives Funerals and Death-Related Activities Legal Matters Process of Dying Symbolic Rituals, Ceremonies, and Celebrations of Life Theories and Concepts Unworldly Entities and Events With an array of topics that include traditional subjects and important emerging ideas, the Encyclopedia of Death and the Human Experience is the ultimate resource for students, researchers, academics, and others interested in this intriguing area of study.
Pathophysiology and Pharmacotherapy of Cardiovascular Disease-Gowraganahalli Jagadeesh 2015-05-06 The present book covers the basic principles of cardiovascular physiology, pathophysiology and advanced pharmacology with particular emphasis on cellular mechanisms of drug action. It provides an update on the progress made in several aspects of cardiovascular diseases so that it might kindle scientists and clinicians alike in furthering basic and translational research. In addition, the book is expected to fill imperative gaps in understanding and optimally treating cardiovascular disease.
The New Entrepreneurial Leader-Danna Greenberg 2011-09-06 In years past, the keywords for leaders were confidence, single-minded purpose, and strategic planning. But today's vastly complex, globalized, and fast-evolving world requires a different kind of leadership. This game-changing book details a new approach--entrepreneurial leadership--developed at Babson College, the number-one school for entrepreneurship in the world. Entrepreneurial leadership is inspired by, but is separate from, entrepreneurship. It can be applied in any organizational situation, not just start-ups. Based on two years of extensive research, it embraces three principles that add up to a fundamentally new worldview of business and a new logic of decision making. First, rapid change and increasing uncertainty require leaders to be "cognitively ambidextrous," able to shift between traditional "prediction logic" (choosing actions based on analysis) and "creation logic" (taking action despite considerable unknowns). Guiding this different way of thinking and acting is a new view of business, where simultaneous creation of social, environmental, and economic value is the order of the day. Finally, entrepreneurial leaders leverage their understanding of themselves and their social context to guide effective action. Each chapter offers concrete examples of how educators across all disciplines are integrating these ideas into their courses--and even their entire curricula. The New Entrepreneurial Leader lays out a comprehensive new paradigm for reinventing management education in order to mold leaders who will shape social and economic opportunity.
World History 2011 National Modern Student Edition- 2009-05 Experience, succeed, and understand with the Concept Connector Solution. Prentice Hall World History offers the exclusive Concept Connector Solution-an engaging personalized learning experience designed to make history stick and show students why history matters today. This highly acclaimed program enables students to go beyond the facts-by exploring enduring key concepts and essential questions that remain relevant today. Authors Ellis, Esler and Grant Wiggins, co-author of Understanding by Design, inspire students to apply their knowledge of history to current events. By learning about world history, your students will develop the knowledge needed to understand their world today and tomorrow.
The Burning Tigris-Peter Balakian 2009-10-13 A History of International Human Rights and Forgotten Heroes In this national bestseller, the critically acclaimed author Peter Balakian brings us a riveting narrative of the massacres of the Armenians in the 1890s and of the Armenian Genocide in 1915 at the hands of the Ottoman Turks. Using rarely seen archival documents and remarkable first-person accounts, Balakian presents the chilling history of how the Turkish government implemented the first modern genocide behind the cover of World War I. And in the telling, he resurrects an extraordinary lost chapter of American history. Awarded the Raphael Lemkin Prize for the best scholarly book on genocide by the Institute for Genocide Studies at John Jay College of Criminal Justice/CUNY Graduate Center.
