World History-Eric Vanhaute 2013-07-24 World History: An Introduction provides readers with the knowledge and tools necessary to understand the global historical perspective and how it can be used to shed light on both our past and our present. A concise and original guide to the concepts, methods, debates and contents of world history, it combines a thematic approach with a clear and ambitious focus. Each chapter traces connections with the past and the present to explore major questions in world history: How did humans evolve from an endangered species to the most successful of them all? How has nature shaped human history? How did agricultural societies push human history in a new direction? How has humankind organized itself in ever more complex administrative systems? How have we developed new religious and cultural patterns? How have the paths of 'The West' and 'The Rest' diverged over the last five centuries? How, at the same time, has the world become more interconnected and "globalized"? How is this world characterized by growing gaps in wealth, poverty and inequality? Sharp and accessible, Eric Vanhaute's introduction to this exciting field demonstrates that world history is more of a perspective than a single all-encompassing narrative: an instructive new way of seeing, thinking and doing. It is an essential resource for students of history in a global context.
Salt-Mark Kurlansky 2011-03-18 From the award-winning and bestselling author of Cod comes the dramatic, human story of a simple substance, an element almost as vital as water, that has created fortunes, provoked revolutions, directed economies and enlivened our recipes. Salt is common, easy to obtain and inexpensive. It is the stuff of kitchens and cooking. Yet trade routes were established, alliances built and empires secured - all for something that filled the oceans, bubbled up from springs, formed crusts in lake beds, and thickly veined a large part of the Earth's rock fairly close to the surface. From pre-history until just a century ago - when the mysteries of salt were revealed by modern chemistry and geology - no one knew that salt was virtually everywhere. Accordingly, it was one of the most sought-after commodities in human history. Even today, salt is a major industry. Canada, Kurlansky tells us, is the world's sixth largest salt producer, with salt works in Ontario playing a major role in satisfying the Americans' insatiable demand. As he did in his highly acclaimed Cod, Mark Kurlansky once again illuminates the big picture by focusing on one seemingly modest detail. In the process, the world is revealed as never before. From the Hardcover edition.

New Orleans in the Atlantic World-William Boelhower 2013-09-13 The thematic project 'New Orleans in the Atlantic World' was planned immediately after hurricane Katrina and focuses on what meteorologists have always known: the city's identity and destiny belong to the broader Caribbean and Atlantic worlds as perhaps no other American city does. Balanced precariously between land and sea, the city's geohistory has always interwoven diverse cultures, languages, peoples, and economies. Only with the rise of the new Atlantic Studies matrix, however, have scholars been able to fully appreciate this complex history from a multi-disciplinary, multilingual and multi-scaled perspectivism. In this book, historians, geographers, anthropologists, and cultural studies scholars bring to light the atlanticist vocation of New Orleans, and in doing so they also help to define the new field of Atlantic Studies. This book was published as a special issue of Atlantic Studies.

Hegel's Grand Synthesis-Daniel Berthold-Bond 1989-07-03 This book offers the first genuinely systematic treatment of Hegel's eschatology in the literature. It is an investigation into Hegel's project to demonstrate the ultimate unity of thought and being (consciousness and reality, self and world). The author traces the project through Hegel's epistemology, metaphysics, and philosophy of history. The grand synthesis creates a basic tension, an ambivalence, that reaches its most acute formulation in Hegel's eschatological language of a final completion or fulfillment of history. This conflicts with his dialectic and Heraclitian metaphysics of becoming. Berthold-Bond concludes that a substantially new approach to Hegel's eschatology is needed.

Politics and culture in international history-Adda BrÄVammer Bozeman The current political conflicts in Somalia and Russia make the reappearance of this book as relevant as ever. Politics and Culture in International History illumines world politics by identifying the causes of conflict and war and assessing the validity of schemes for peace and unity. Bozeman maintains that political systems are grounded in cultures; thus, international relations are by definition intercultural relations. She deals exclusively with the thought patterns of the world's literate civilizations and societies between the fourth millenium B.C. and the fifteenth century A.D. In a substantial new introduction, Bozeman analyzes world politics over the last half century, showing how the interplay of politics and culture has intensified. She notes that the world's assembly of states is no longer held together by substantive accords on norms, purposes, and values, but by loose agreements on the use offoms, techniques, and words. The causes and effects of these changes between the 1950s and 1990s are assayed by Bozeman.

The Oxford Handbook of Internet Studies-William H. Dutton 2013-01-10 Internet Studies has been one of the most dynamic and rapidly expanding interdisciplinary fields to emerge over the last decade. The Oxford Handbook of Internet Studies has been designed to provide a valuable resource for academics and students in this area, bringing together leading scholarly perspectives on how the Internet has been studied and how the research agenda should be pursued in the future. The Handbook aims to focus on Internet Studies as an emerging field, each chapter seeking to provide a synthesis and critical assessment of the research in a particular area. Topics covered include social perspectives on the technology of the Internet, its role in everyday life and work, implications for communication, power, and influence, and the governance and regulation of the Internet. The Handbook is a landmark in this new interdisciplinary field, not only helping to strengthen research on the key questions, but also shape research, policy, and practice across many disciplines that are finding the Internet and its political, economic, cultural, and other societal implications increasingly central to their own key areas of inquiry.
Technology: A World History-Daniel R. Headrick Professor of Social Sciences and History Roosevelt University 2009-02-25 Today technology has created a world of dazzling progress, growing disparities of wealth and poverty, and looming threats to the environment. Technology: A World History offers an illuminating backdrop to our present moment-a brilliant history of invention around the globe. Historian Daniel R. Headrick ranges from the Stone Age and the beginnings of agriculture to the Industrial Revolution and the electronic revolution of the recent past. In tracing the growing power of humans over nature through increasingly powerful innovations, he compares the evolution of technology in different parts of the world, providing a much broader account than is found in other histories of technology. We also discover how small changes sometimes have dramatic results-how, for instance, the stirrup revolutionized war and gave the Mongols a deadly advantage over the Chinese. And how the nailed horseshoe was a pivotal breakthrough for western farmers. Enlivened with many illustrations, Technology offers a fascinating look at the spread of inventions around the world, both as boons for humanity and as weapons of destruction.

Landscape, Tourism, and Meaning-Anne K Soper 2012-11-28 How do we re-theorize tourism? By drawing less on the Foucauldian notion of 'tourism as gazing' and instead focusing on the social construction of meaning in the landscape, this insightful book provides an innovative and compelling new approach to tourist studies. Arguing that in any view of the landscape and in tourism generally there is a multiplicity of insider and outsider meanings, the book grounds tourism studies within the framework of social theory, and particularly in the social theoretic approaches to landscape. Bringing together specialists in tourism and landscape studies to discuss the relationships between the two, it finds that issues of identity are a common thread and are raised with regard to the social construction of landscape and its portrayal through tourism. The international studies range in scale from regional to national, personal to political, and from local residents to international tourists, highlighting the multiplicity of interpretations and meanings between these scales.
