Practical Geodesy-Maarten Hooijberg 2012-12-06 Written for geodesists using computers of modest capacity, the book reviews the latest development in geodetic computation techniques. The aim is to take stock of available data (datums, ellipsoids, units etc.), to focus on applications and to illuminate spatial developments. Topics cover datums and reference systems, geodetic arc distances, different projections and coordinate systems. The material has been specially chosen and covers the practical aspect of geodesy, including the demonstration of global examples. Stressing the how-to-do approach, the book is of interest to students in geodesy, GIS consultants, hydrographers and land surveyors.

The Urban Generation-Zhen Zhang 2007-03-28 Since the early 1990s, while mainland China's state-owned movie studios have struggled with financial and ideological constraints, an exciting alternative cinema has

developed. Dubbed the “Urban Generation,” this new cinema is driven by young filmmakers who emerged in the shadow of the events at Tiananmen Square in 1989. What unites diverse directors under the “Urban Generation” rubric is their creative engagement with the wrenching economic and social transformations underway in China. Urban Generation filmmakers are vanguard interpreters of the confusion and anxiety triggered by the massive urbanization of contemporary China. This collection brings together some of the most recent original research on this emerging cinema and its relationship to Chinese society. The contributors analyze the historical and social conditions that gave rise to the Urban Generation, its aesthetic innovation, and its ambivalent relationship to China’s mainstream film industry and the international film market. Focusing attention on the Urban Generation’s sense of social urgency, its documentary impulses, and its representations of gender and sexuality, the contributors highlight the characters who populate this new urban cinema—ordinary and marginalized city dwellers including aimless bohemians, petty thieves, prostitutes, postal workers, taxi drivers, migrant workers—and the fact that these “floating urban subjects” are often portrayed by non-professional actors. Some essays concentrate on specific films (such as *Shower* and *Suzhou River*) or filmmakers (including Jia Zhangke and Zhang Yuan), while others survey broader concerns. Together the thirteen essays in this collection give a multifaceted account of a significant, ongoing cinematic and cultural phenomenon. Contributors: Chris Berry, Yomi Braester, Shuqin Cui, Linda Chiu-han Lai, Charles Leary, Sheldon H. Lu, Jason McGrath, Augusta Palmer, Bérénice Reynaud, Yaohua Shi, Yingjin Zhang, Zhang Zhen, Xueping Zhong

Gender in the Media-Niall Richardson 2014-05-19 This lively and engaging text introduces students to the key contemporary issues in the study of gender and the media. Integrating cultural theory with text-based criticism, Gender in the Media analyses recent debates in feminist cultural theory, masculinity studies and queer theory, before applying these cultural paradigms to critical readings in relevant media contexts.

Richardson and Wearing address a wide range of new media texts and topics, covering television dramas, make-over shows, life-style magazines, internet dating and more. Critical, current and far-reaching, this

book is invaluable for all students of media and gender studies, as well as for anyone interested in gender representation in different media forms.

The Office of Governor-General-Sir Paul Hasluck 1979 The events of November 1975 sparked off lively debate as to what the Governor-General does. The real point at issue in that controversy was not whether a Governor-General has the power to dismiss a Prime Minister. The fact that the power was exercised is proof that the power exists. The question to be asked is whether the Governor-General was justified by the facts as he saw and interpreted them, and, if he were justified, whether he was wise to use the power. There is a difference between an extreme situation and a customary action. The controversy over the dismissal of a Prime Minister concentrated attention on one aspect, but in this lucid essay Sir Paul Hasluck sets out the wide range of the Governor-General's duties and the place of office in the whole structure of Australian government.

A Source Book in Classical Analysis-Garrett Birkhoff 1973 An understanding of the developments in classical analysis during the nineteenth century is vital to a full appreciation of the history of twentieth-century mathematical thought. It was during the nineteenth century that the diverse mathematical formulae of the eighteenth century were systematized and the properties of functions of real and complex variables clearly distinguished; and it was then that the calculus matured into the rigorous discipline of today, becoming in the process a dominant influence on mathematics and mathematical physics. This Source Book, a sequel to D. J. Struik's Source Book in Mathematics, 1200-1800, draws together more than eighty selections from the writings of the most influential mathematicians of the period. Thirteen chapters, each with an introduction by the editor, highlight the major developments in mathematical thinking over the century. All material is in English, and great care has been taken to maintain a high standard of accuracy both in translation and in transcription. Of particular value to historians and philosophers of science, the Source Book should serve as a vital reference to anyone seeking to understand the roots of twentieth-century mathematical thought.
