For the Love of Physics-Walter Lewin 2011-05-03 “YOU HAVE CHANGED MY LIFE” is a common refrain in the emails Walter Lewin receives daily from fans who have been enthralled by his world-famous video lectures about the wonders of physics. “I walk with a new spring in my step and I look at life through physics-colored eyes,” wrote one such fan. When Lewin’s lectures were made available online, he became an instant YouTube celebrity, and The New York Times declared, “Walter Lewin delivers his lectures with the panache of Julia Child bringing French cooking to amateurs and the zany theatricality of YouTube’s greatest hits.” For more than thirty years as a beloved professor at the Massachusetts Institute of Technology, Lewin honed his singular craft of making physics not only accessible but truly fun, whether putting his head in the path of a wrecking ball, supercharging himself with three hundred thousand volts of electricity, or demonstrating why the sky is blue and why clouds are white. Now, as Carl Sagan did for astronomy and Brian Green did for cosmology, Lewin takes readers on a marvelous journey in For the Love of Physics, opening our eyes as never before to the amazing beauty and power with which physics can reveal the hidden workings of the world all around us. “I introduce people to their own world,” writes Lewin, “the world they live in and are familiar with but don’t approach like a physicist—yet.” Could it be true that we are shorter standing up than lying down? Why can we snorkel no deeper than about one foot below the surface? Why are the colors of a rainbow always in the same order, and would it be possible to put our hand out and touch one? Whether introducing why the air smells so fresh after a lightning storm, why we briefly lose (and gain) weight when we ride in an elevator, or what the big bang would have sounded like had anyone existed to hear it, Lewin never ceases to surprise and delight with the extraordinary ability of physics to answer even the most elusive questions. Recounting his own exciting discoveries as a pioneer in the field of X-ray astronomy—arriving at MIT right at the start of an astonishing revolution in astronomy—he also brings to life the power of physics to reach into the vastness of space and unveil exotic uncharted territories, from the marvels of a supernova explosion in the Large Magellanic Cloud to the unseeable depths of black holes. “For me,” Lewin writes, “physics is a way of seeing—the spectacular and the mundane, the immense and the minute—as a beautiful, thrillingly interwoven whole.” His wonderfully inventive and vivid ways of introducing us to the revelations of physics impart to us a new appreciation of the remarkable beauty and intricate harmonies of the forces that govern our lives.

Everybody In, Nobody Out-Ken Fischer 2020-08-21 Housed on the campus of the University of Michigan in Ann Arbor, the University Musical Society is one of the oldest performing arts presenters in the country. A past recipient of the National Medal of Arts, the nation’s highest public artistic honor, UMS connects audiences with wide-ranging performances in music, dance, and theater each season.Between 1987 and 2017, UMS was led by Ken Fischer, who over three decades pursued an ambitious campaign to expand and diversify the organization’s programming and audiences—initiatives inspired by Fischer’s overarching philosophy toward promoting the arts, “Everybody In, Nobody Out.” The approach not only deepened UMS’s engagement with the university and southeast Michigan communities, it led to exemplary partnerships with distinguished artists across the world. Under Fischer’s leadership, UMS hosted numerous breakthrough performances, including the Vienna Philharmonic’s final tour with Leonard Bernstein, appearances by then relatively unknown opera singer Cecilia Bartoli, a multiyear partnership with the Royal Shakespeare Company, and artists as diverse as Yo-Yo Ma, Jawole Willa Jo Zollar, Elizabeth Streb, and Nusrat Fateh Ali Khan. Though peppered with colorful anecdotes of how these successes came to be, this book is neither a history of UMS nor a memoir of Fischer’s significant accomplishments with the organization. Rather it is a reflection on the power of the performing arts to engage and enrich communities—not by handing down cultural enrichment from on high, but by meeting communities where they live and helping them preserve cultural heritage, incubate talent, and find ways to make community voices heard.
